The company was incorporated at the last session of the Provincial Legislature solely for the purpose of becoming trustees under a trust mortgage given by the St. John and Quebec Railway in 1912 to the Prudential Trust Company of Montreal. This mortgage was given to secure an issue of bonds and covered the line of the Railway from St. John to Centreville. There was a provision in the mortgage that commencing with the year 1922 the railway company would pay to the trust company as a sinking fund, $42,500 yearly for a period of forty years.

For this and other reasons it became imperative to have trustees under the direct control rather than outside the province, and in regard to whom the province would have no control.

A settlement was effected with the Prudential on July 1st, 1921, whereby it resigned as trustee under the mortgage. Hon. Messrs. Foster, Byrne and Michaud were appointed as the new trustees by the lieutenant-governor in council to replace the company.

The directors of the new trust company must always be chosen from amongst the members of the executive council of the province and as soon as a director ceases to be a member of the executive council, he also ceases to function as a director of the company. They serve without remuneration.

All trust funds are to be held by the provincial secretary-treasurer in trust, and are to be kept separate and distinct from ordinary provincial funds under the terms of the trust mortgage.

## WITNESSES FOR ALLAN TRIAL

Subpoenas were issued on October 5 for eight witnesses who will appear for the Crown against Sir. H. Montagu Allan, President of the defunct Merchants Bank of Canada, when he faces trial on a charge of having negligently signed a return to the Federal Government which contained a false statement in connection with the bank's financial position.

D. C. Macarow, former General Manager of the Merchants Bank, was recently acquitted of of the charge of making the false statement. The date set for the hearing of the charge against Sir Montagu was October 12.

Witnesses for the Crown summoned were: Charles D. Cornell, Bankers' Trust Company; Wilbur G. Finlayson, accountant and trustee for the defunct brokerage firm of Thornton, Davidson & Co.; J. Gillespie Muir, Chief Accountant of the Merchants Bank; John M. Kilbourne, Bann of Montreal; William Meldrum, Bank of Montreal; Henry B. Loucks, Bank of Montreal; Thomas Mackay, Bank of Montreal, and H. B. McKenzie, also of the Bank of Montreal.

## DUTY ON LIQUOR IMPORTS

### Supreme Court Upholds Right of Province to Collect on Provincial Breweries

The right of the Dominion Government to collect Customs duties on liquor imported into Canada by provincial liquor control boards is upheld by the Supreme Court of Canada in a judgment given out on October 10. The judgment dismisses, without order as to costs, the appeal of the Attorney-General of British Columbia versus the Attorney-General of Canada, and upholds the judgment of the Exchequer Court, which dismissed the action of the British Columbia authorities. Justice Brodeur dissents from the judgment.

### Facts of the Case

This was a stated case. The Government purchasing agent for British Columbia, James Patterson, acting under the provincial liquor laws, purchased in Glasgow a case of Johnny Walker Black Label Scotch whiskey, and had it consigned to the B.C. Liquor Control Board from Glasgow by express. On arrival at Victoria, B.C., the case was taken possession of by the Collector of Customs and held for payment of duty. The purchasing agent for the province claimed that by virtue of the provincial rights, His Majesty the King was owner of the whiskey, and therefore demanded that it be delivered to the Liquor Control Board free of any duty or tariff. The Collector of Customs, also acting in the name of the King, by virtue of the rights of the Dominion Government, demanded the payment of duties before he would release the shipment.

The province then brought action for the release of the whiskey free of duty, claiming that it had this right under the law. The Dominion Government contested the action and it was dismissed by Sir Walter Cassels, in the Exchequer Court.

The appeal was then made to the Supreme Court and was heard by the court, presided over by Justice Idington.

## BANK ROBBERY

A masked robber entered the Altona, Manitoba, branch of the Bank of Montreal, at noon on October 9, locked the manager and junior clerk in the vault, unlocked the teller's cage, scooped up $2,300 in cash and escaped in a waiting automobile, which was standing in a lane at the rear of the building. Three other men were in the car, which bore no license number. Altona is about 10 miles from the Manitoba-North Dakota boundary.

This is the first daylight robbery in the series of bank hold-ups throughout Manitoba and Saskatchewan in recent weeks and is the most daring that has occurred since four bandits entered the Bank D'Hochelaga, at Eli, Manitoba, last Fall. No preparations were made by the bandits, the whole arrangement being carried out at a moment's notice.

## STOCK SALESMEN ARRESTED

Charged with theft, involving the sale of Durant Motor stock to Mrs. M. Gillivray, Port Arthur, Ont., W. F. Wilson, president of the British Funding Company, and George Seymour, a salesman employed by him, were arrested in Toronto on October 4. The alleged theft amounts to $200 in the one specific case mentioned. Wilson is held on bail of $10,000, and Seymour, $2,000. Wilson's business address is 71a St. James street, Montreal. Seymour is a resident of Toronto. The arrest of the two men is due to a number of complaints made by people all over Ontario. Mrs. Gillivray claims that she paid the men the money named for Durant stock, which she never received.

## NEW ADJUSTER.

Harold H. McFern who has been in the adjusting business for several years in the States has opened an adjustment office in London, Ont., and offers his services to companies and agents operating in Western Ontario. Mr. McFern has handled claims in and about Windsor, Ont., for past two years for A. H. Dinning, Detroit.

*Issued with the Agreement of the President of the United States, in accordance with a Treaty of September 16th, 1915*

## $16,000,000

# Republic of Haiti

### Customs and General Revenues

### External Thirty-year Sinking Fund 6% Gold Bonds, Series A. Non-callable for fifteen years, except for the Sinking Fund

## HAITI

The President of the United States nominates and the President of Haiti appoints a General Receiver to collect the customs, and a Financial Adviser to supervise the administration of the finances of Haiti.

Under treaty provisions, the public debt of Haiti may not be increased, or the customs duties reduced, without previous agreement with the President of the United States.

Haiti hypothecates its internal revenues and customs duties for the service of this loan and agrees that the control of the hypothecated revenues by nominees of the President of the United States will continue during the life of the loan.

Customs duties alone during the last ten years have averaged approximately two and three-quarter times the maximum interest and sinking fund charges on bonds to be presently issued.

THE NATIONAL CITY COMPANY
NATIONAL CITY BANK BUILDING
NEW YORK

*Offices in more than 50 cities in the United States and Canada.*

## *THE ISSUE*

Dated October 2nd, 1922 Due October 1st, 1952

Interest payable April 1 and October 1. Coupon bonds in denominations of $1,000 and $500, registerable as to principal only. Principal, interest and sinking fund payable in United States Gold Coin of the present standard of weight and fineness in New York City, at the National City Bank of New York, fiscal agent, in time of war as well as of peace, irrespective of the nationality of the owner, without deduction for any past, present or future taxes or duties levied by or within the Republic of Haiti.

### *Sinking fund sufficient to retire entire issue at or before maturity.*

Provision is made for a sinking fund amounting to $152,250 the first year, increasing to $1,149,785 the twenty-ninth year, and leaving not more than $803,510 of bonds to be redeemed the thirtieth year, to be used to purchase bonds in the open market at not exceeding 100 and interest. If bonds are not obtainable at or below 100, they shall be redeemed by lot annually at 100. A market fund is also provided for equal to 25% of the gross general revenues of the Republic for any fiscal year in excess of $7,000,000, but in any case not more than $250,000 annually to be used to purchase bonds at not exceeding 100 and interest. If bonds are not obtainable at or below 100, any unexpended balance remaining in the market fund seven months after the end of any fiscal year shall revert to the Haitian Government.

The proceeds of these bonds (part of a total authorized loan limited to $40,000,000) will be used for refunding two Haitian loans now outstanding in France to the amount of about fcs. 85,838,500, and to provide funds to pay internal floating debt, and for other governmental purposes, including public works. Haiti proposes presently to issue about $5,000,000 Series "B" Bonds of this loan, payable only in Haiti, which will be used for refunding present internal funded debt.

**These bonds, issued pursuant to agreement with the President of the United States, will be the direct obligations of the Republic of Haiti, and, upon the retirement of certain existing loans presently to be redeemed, will be secured by a specific first charge upon the internal revenues and customs duties of the Republic, subject only, as to the latter, to an allowance for the expenses of the General Receiver and Financial Adviser.**

*We offer these bonds if, as and when issued, and received by us, subject to approval of counsel, at*

### 96½ and interest, to yield over 6.25% to maturity.

**Delivery of interim certificates or temporary bonds will be made in due course, and five days' notice will be given of the date of delivery and payment.**

**Application will be made to list these bonds on the New York Stock Exchange**

*Descriptive circular containing official letter signed by Hon. John A. McIlhenny, Financial Adviser to the Republic of Haiti, upon which the above information is based, will be sent upon request.*

## SEPTEMBER FIRE LOSSES

### Estimated Higher Than August—Nine Months' Total Nearly Up to Last Year

Fire losses in Canada in September are estimated by The Monetary Times at $3,127,000, compared with $1,926,355 in August and with $2,410,300 in September last year. The total for the first nine months of 1922 is $28,808,105, or nearly as much as last year's total loss of $30,932,110. The September loss is made up as follows:—

| | |
|---|---|
| Large fires reported | $2,476,000 |
| Small fires reported | 151,000 |
| Estimate of unreported fires | 500,000 |
| | $3,127,000 |

The Monetary Times' record for the past two years shows the following monthly losses:—

| Month | 1921 | 1922 |
|---|---|---|
| January | $ 2,237,900 | $3.597,500 |
| February | 2,735,500 | 4,062,400 |
| March | 2,112,200 | 4,331,750 |
| April | 2,510,700 | 2.532,100 |
| May | 3,811,350 | 2,956,450 |
| June | 2,303,400 | 2,612,550 |
| July | 2,880,250 | 3,652,000 |
| August | 3,014,860 | 1,926,355 |
| September | 2,410,300 | 3,127,000 |
| October | 2,199,700 | |
| November | 1,818,750 | |
| December | 2,897,200 | |
| Totals | $30,932,110 | $28,808,105 |

### Large Fires in September

The following are the September fires with a loss of $10,000 and over:—

Cobalt, Ont. Sept. 4. O'Brien Mine. $250,000.

Lake Frontiere, Que. Sept. 1. Residence, $17.000.

Quebec, Que. Sept. 1. Hospital. $35.000.

Arsenault Siding, N. B. Sept. 6. Mill. $10.000.

Chicoutimi, Que. Sept. 8. Government wharf. $25,000.

Caron, Sask. Sept. 2. Residence. $10,000.

Deschambeault, Que. Sept. 8. Residences. $30.000.

Frelighsburg, Que. Sept. 13. House and barn. $50,000.

Halifax, N.S. Sept. 6. Building. $90,000.

Leader, Sask. Sept. 8. Elevators. $22,000.

Montreal, Que. Sept. 7. Building. $20,000.

Ottawa, Ont. Sept. 4. Warehouse. $10,000.

Winnipeg Beach, Man. Sept. 4. Eight business houses. $55,000.

Winnipeg, Man. Sept. 11. Buildings. $300,000.

Deseronto, Ont. Sept. 13. Mixing house. $10,000.

Dundas, Ont. Sept. 17. Plant. $125,000.

Levis, Que. Sept. 18. Plant. $500,000.

London, Ont. Sept. 17. Grigg house. $12,000.

Lucan, Ont. Sept. 20. Mill. $30,000.

Quebec, Que. Sept. 18. Tannery. $25,000.

Vancouver, B.C. Sept. 16. Buildings. $75,000.

Fredericton, N.B. Sept. 18. Picker room. $100,000.

Kamouraska, Que. Sept. 24. Buildings. $100,000.

Ottawa, Ont. Sept. 25. Plaza Cafe. $10,000.

Winnipeg, Man. Sept. 21. Building. $40,000.

Avonlea, Sask. Sept. 27. Residence. $10,000.

Britannia, Ont. Sept. 28. Three cottages. $20,000.

Delaware, Ont. Sept. 27. Buildings. $25,000.

Nordin, N.B. Sept. 29. Mill. $150.000.

Owen Sound, Ont. Sept. 27. Warehouse. $50,000.

Regina, Sask. Sept. 24. Farm residence. $25,000.

St. Charles, Que. Sept. 25. Parish church. $100,000.

Ste. Marguerite, Que. Sept. 26. Factory and five residences. $15,000.

St. Victorie, Que. Sept. 24. Stores. $100,000.

Vermilion, Alta. Sept. 28. Barn and residence. $10,000.

West Lorne. Ont. Sept. 28. Barn. $10,000.

Winnipeg, Man. Sept. 26. Shed. $10,000.

### Classes of Property

The following are the classes of structures destroyed or damaged: Residences, 65; barns, [illegible] 10; stores, 13; mills, 5; hos-ages, 3; plants, 2; tanneries, 2; hotels, 2; farm buildings, 2; mines, 1; wharves, 1; pool room, 1; mixing house, 1; dance hall, 1; grand stand, 1; picker room, 1; business section, 1; cafe, 1; blacksmith shop, 1; apartments, 1; banks, 1; factory, 1; academy, 1; church, 1.

The following are the causes reported: Lightning, 15; sparks, 4; spontaneous combustion. 2; overheated stovepipes, 2; matches, 2; explosion, 1; short circuit, 1; burning embers, 1; defective stovepipe, 1.

### Fatalities

Deaths from fires in September were 25, as follows:—

| | |
|---|---|
| Elizabeth, Man. Sept. 1. Burnt in building | 1 |
| Beamans, Sask. Sept. 4. Struck by lightning | 2 |
| Nanaimo, B.C. Sept. 4. Burnt in building | 1 |
| Halifax, N.S. Sept. 4. Burnt in building | 1 |
| Brantford, Ont. Sept. 6. Explosion | 1 |
| Shawinigan Falls, Que. Sept. 7. Burnt to death | 1 |
| Caulton, Que. Sept. 8. Explosion | 1 |
| Deschambeault, Que. Sept. 8. Burnt in building | 1 |
| Berwick, N.S. Sept. 9. Explosion | 1 |
| St. Thomas, Ont. Sept. 12. Clothing caught fire | 1 |
| Montreal, Que. Sept. 16. Burnt in building | 1 |
| Montreal, Que. Sept. 18. Clothing took fire | 1 |
| Sturgeon Falls, Ont. Sept. 2. Burnt in building | 2 |
| Toronto, Ont. Sept. 21 Clothing caught fire | 1 |
| Peterboro, Ont. Sept. 22. Clothing caught fire | 1 |
| Nanaimo, B.C. Sept. 22. Burnt in building | 1 |
| Antigonish, N.S. Sept. 23. Explosion | 1 |
| Peterboro, Ont. Sept. 26. Playing with matches | 1 |
| Berton, Man. Sept. 29. Burnt in building | 1 |
| Regina, Sask. Sept. 29. Burnt in building | 3 |
| Swift Current, Sask. Sept. 30. Burnt in building | 1 |
| | 25 |

The record of deaths from fires has been as follows:—

| Month | 1919 | 1920 | 1921 | 1922 |
|---|---|---|---|---|
| January | 13 | 22 | 17 | 25 |
| February | 26 | 30 | 18 | 21 |
| March | 9 | 35 | 11 | 16 |

## INCREASE IN NEW LIFE BUSINESS

### New Life Policies Written Show Slight Increase Over Last Year—Death Claims Also Increase

New life business issued by representative Canadian companies during the month of August shows a slight increase of two hundred thousand dollars over the same month last year. Two of the companies show an increase, namely Company A, being up by almost four hundred thousand, and Company D showing an increase of two hundred and fifty thousand.

There was an increase of eighty-nine thousand dollars in death claims paid by these companies, the largest increase being in Company A. Details of the August statement compiled by The Monetary Times, are given herewith:—

**New Business**

| | August 1921 | August 1922 |
|---|---|---|
| Company A | $ 4,400,472 | $ 4,798,974 |
| Company B | 4,510,417 | 4,360,724 |
| Company C | 2,512.974 | 2,354,767 |
| Company D | 756,320 | 1,004,672 |
| Company E | 1,010,851 | 979,000 |
| | $13,291,034 | $13,498,137 |

**Death Claims Paid**

| | August 1921 | August 1922 |
|---|---|---|
| Company A | $205,033 | $284,180 |
| Company B | 111,333 | 132,786 |
| Company C | 27,913 | 25,232 |
| Company D | 11,978 | 5,000 |
| Company E | 17,258 | 17,065 |

## WINNIPEG INSURANCE

Winnipeg will not undertake to handle its own fire insurance this year, the policy of insurance allotments previously in force having been approved of at a meeting of the finance committee on September 29 on recommendation of the special sub-committee appointed to investigate possibilities of the city acting as its own underwriter.

## GUARANTEE BONDS

At a meeting of the board of directors, of the Montreal Builders' Exchange on October 5, a letter was received from the city clerk, Rene Bauset, intimating that the city was not prepared to accept guarantee bonds in lieu of accepted cheques as deposits from successful tenderers for work for the city. Mr. Bauset, however, stated that the city was prepared to accept Victory Bonds in lieu of such certified cheques. Regret was expressed by the directors at the attitude taken by the city in this matter, and, while the committee of the exchange appointed to deal with the matter was discharged, it was hoped that at some time in the future the city council would be prepared to accept their suggestions.

## ASSIST BURNED OWNERS

To assist burned-out northern Ontario settlers in securing insurance adjustments, superintendent of insurance V. Evan Gray has sent north two departmental insurance experts to give free advice and information. As in all previous widespread fire devastions, insurance records and policies, together with everything else, have, in many instances, been wiped out of existence, leaving the settlers in an almost hopeless position so far as their documentary insurance claims are concerned.

## IMPERIAL LIFE AGENTS

Ottawa district agency of the Imperial Life Assurance Company held its annual meeting on October 6, presided over by E. S. Miller, manager, J. T. Parker, associate actuary, and George Hunt, superintendent of agencies, were present from head office.

## FIRE CHIEFS' PAPER

The first number of The Dominion Fire Chief, a new monthly, has just been published by authority of the Dominion Association of Fire Chiefs. The Editor is Chief James Armstrong of Kingston, with Norman R. Doward and Lawrence Doward of Toronto as publicity directors. E. P. Heaton, Ontario Fire Marshal, is contributing to the magazine, and has an article in the first number.

## FIRES IN QUEBEC PROVINCE

Owing to a prolonged dry spell, numerous forest fires were reported in Quebec last week. One large fire was burning near Levis on October 3. The St. Maurice Valley was the scene of several. On October 5 word was received at Three Rivers that the pulpwood tree nursery of the Laurentide Company at Proulx, which cost around $500,000, and approximately fifty thousand cords of lumber, also belonging to the Laurentide Company, near Grand'Mere, were surrounded by forest fires and seriously endangered. At Lac Des Piles, serious outbreaks were reported. At St. Tite, near Lake Pierre-Paul, the fire was slowly creeping towards the habitations.

Fanned by a high wind, the forest fires were slowly creeping towards Grand'Mere and reserves of wood had already been destroyed in the range of Grand-'Mere, one mile from this town.

Heavy rainfalls throughout Quebec province over the week-end brought to an end the series of fires which caused heavy damage to forest areas and threatened in several districts to destroy towns. Hon. Honore Mercier, Minister of Lands, received on October 8 news indicating that fires in practically every section of

### BLUE GOOSE MEETING

The annual meeting of the Manitoba-Saskatchewan Pond of the Blue Goose was held recently, the following officers being elected:—M.L.G., W. A. Lawrie; S.F., H. C. Grant; C.G., Norman McLeod; G.P., S. F. Cross; K.G.G.E., A. E. Parker; W.G.Q., F. H Hoppins; Delegates to Chicago Convention, E G. Scott and W. A. Lawrie.

### RAIN QUENCHES FIRES

The entire province of New Brunswick was drenched by a heavy downpour of rain, which continued almost steadily during the week-end. Reports received indicate that fires which had sprung up again on Saturday at various points, after being apparently put out by the snow and rain on Friday, have now been effectually squelched.

# Insurance Licenses and Agency Notes

Murdoch Ferguson, who for seventeen years has occupied the position of branch manager at Orillia tor the Dominion Life, has been promoted to be branch manager at Hamilton for the company.

D. H. McNabb, agent for the Dominion Life in North Bay, has been promoted to be branch manager at Orillia, Ont., in succession to M. Ferguson.

The Queensland Insurance Company, Limited, has been granted a license authorizing it to transact in Canada the business of Insurance against damage to property of any kind caused by the Explosion of natural or other gas, in addition to fire insurance for which it is already licensed.

The Autocar Fire and Accident Insurance Company has been licensed to transact in Canada the business of Insurance against damage to property of any kind caused by the Explosion of natural or other gas in addition to Fire insurance for which it is already licensed.

A license has been issued to The North Empire Fire Insurance Company authorizing it to transact in Canada the business of Insurance against damage to property of any kind caused by the Explosion of natural or other gas, in addition to Fire insurance for which it is already licensed.

E. B. Wayte, who for seventeen years has held various positions with the Mutual Life Assurance Company of Canada, at Winnipeg, from office boy to general agent, has been transferred to Peterboro', Ont., where the Mutual Life are establishing a branch office. Mr. Wayte will be branch manager at Peterboro' for five counties. This move has been found necessary to handle the increasing business of the company in that district. Mr. Wayte was a member of the Century Club in Winnipeg, and has been an active member, during the last few years, of the Life Underwriters' Association.

The Motor Union Insurance Company, Limited, of Toronto, Ontario, has been licensed to transact fire and automobile insurance in Saskatchewan during 1922.

The Insurance Company of North America has been granted a license to transact the business of Inland Marine Insurance in Manitoba.

A license has been granted the Cornhill Insurance Company Limited of London, England, authorizing it to transact in the province of Manitoba the business of fire insurance and insurance against damage to property of any kind caused by the explosion of natural or other gas.

### QUEBEC FIRES EXTINGUISHED

Heavy rainfalls throughout Que. province last week brought to an end the series of fires which caused heavy damage to the forest areas of the province, and threatened in several districts to destroy towns. The heavy downpour of Saturday night and Sunday morning proved very welcome to the fire fighters. Hon. Honore Mercier, minister of lands and forests, having given early orders to get out all possible forces to combat the flames, while the big lumber and pulp companies used all their gangs for the same purposes. Hon. Mr. Mercier received news on Monday indicating that the fires had all been extinguished. News received showed that on Thursday the situation was very serious in the districts around Grand-Mere and Shawinigan especially, but the situation there was well in hand Friday.

That serious damage has been done is certain, but it will be several days before the full nature of it is known. Quebec villages had some narrow escapes from the same fate that overtook Haileybury, North Cobalt and other northern Ontario towns. A number of farm houses and barns in Temiskaming fell victims to the flames. Flames swept into this province from Ontario in some instances, burning their way into the township of Nedelec, at the upper end of Temiskaming Lake. The population there, however, is very scattered, hence the great destruction wrought in the neighboring province was escaped.

### FIRES IN NEW BRUNSWICK.

Three forest fires occurred last week on lands of the Continental Lumber Co. on the Charles River. Other fires were reported on Christopher Brook, of the International sub-division of the C.N.R., and two at Ouelette Settlement, Restigouche County.

## PROMOTION OF EMPIRE TRADE

### Major T. E. Pooley Points Out How Much Canada Spends in United States

Speaking before the Edmonton Board of Trade on September 15, Major T. E. Pooley, of Vickers, Ltd., London, England, was of the opinion that Canada must, firstly, develop her industries; secondly, promote empire trade; and, thirdly, have keen competition with the United States.

What was required, he pointed out most effectively, was a real "get-together" spirit between Canada and Great Britain with a view to developing the industries of the Dominion. British capital had in past years suffered much through poor investments in Canada. If the right sort of protection were given, however, there was not the least doubt that plenty of capital is available in the old country for further investment here.

### Fordney Tariff

The Fordney tariff, Major Pooley thought, should have the effect of "waking up" Canadians and getting them to thinking seriously upon industrial matters. There was no reason in the world why Canada should not manufacture her own goods from the raw materials available here. Taking the average for the past fourteen years, Great Britain annually expended a surplus of $223,000,000 in Canada; Canada, on the other hand, expended annually, in the same period, an average of $238,000,000 in the United States. England puts money into Canada; Canada invests it in the United States.

Major Pooley was definitely in favor of the keenest competition in Canada with United States industries. Where it was found impossible to import from Great Britain to compete with the States, he favored manufacturing such articles right in Canada.

### Natural Resources

Canada, he declared, is not alive to the possibilities of development of her great natural resources. Why not mine more coal; why not take advantage of other sources of national wealth? he asked. The United States had a turpentine industry that produced $5,000,000 annually; while from resin $8,000,000 was derived. Canada, with resources equally as great, failed to establish such an industry. Why?

Over 120,000,000 tons of dried fruits are imported into Canada from California every year. Why couldn't this be produced in British Columbia?

## GET NEWSPRINT FROM ABROAD

According to Canadian Trade Commissioner A. E. Bryan, Japanese publishers are now endeavoring to arrange for foreign supplies of newsprint. Mr. Bryan states that up to the present Japanese publishers have always purchased their supplies of newsprint from local mills, but that exorbitant prices charged are forcing them to look for supplies outside of Japan. The Japanese mills, he states, have threatened to refuse supplies in future to any newspaper which buys from a foreign country, but in spite of this a large newspaper is purchasing newsprint from the United States and Sweden.

There appears to be an excellent opening in Japan for foreign newsprint, says Mr. Bryan, providing that the consumers could be assured of permanent supplies.

## THUNDER BAY LIMIT

The successful tenderer for the pulpwood limit in the Thunder Bay District, recently advertised for sale, was Arvo Paju, a lumberman of Port Arthur, Ont. He secures, as a result of his bid, the timber rights on one lot situated one-half in concession seven and one-half in concession eight, in Nipigon Township, and the conditions of the sale obligate him to complete his operations by 30th of April, 1923. The timber is sold subject to the usual restrictions of manufacture in Canada and non-export of spruce. It is almost wholly a pulpwood district.

The prices at which the sale is made, including the customary crown dues, are: Pine, $10 per thousand feet; spruce and poplar. $7.50 per thousand feet; other timber, $2.00 per thousand feet; ties, 45 cents each; spruce pulp, $2.50 per cord; other pulp, $2.00 per cord; fuelwood, 50 cents per cord.

## LARGE AMOUNT OF GRAIN HANDLED

At the annual meeting of the Lake Superior Clearance Association, held in Winnipeg on September 26, it was stated that two hundred and seventy million bushels of grain was handled by the association by rail and vessel during 1921. This amount was 73,000,000 bushels more than was handled in 1920, 142,000,000 more than in 1919, and nearly 200,000,000 more than was handled during 1909, the first year of the association's operations.

The total of 270,000,000 bushels shipped by the association from Fort William and Port Arthur was double the quantity loaded from Chicago, treble the amount loaded out of Duluth in the same period, and approximately 70,000,000 bushels in excess of Chicago, Duluth and Superior combined.

## FISHERIES REPORT

Some sweeping recommendations are understood to be included in the introductory report of the Commission on British Columbia fisheries submitted by William Duff, M.P., chairman of the commission to Hon. Jacques Bureau. Acting Minister of Marine and Fisheries, on September 22. Contents of the report have not been made public but two of its main recommendations are said to be (1) Curtailment of the issue of fishing licenses to Japanese; (2) Re-organization of the Department of Marine and Fisheries.

In the latter connection the suggestion has been made that a Minister of Fisheries should be created distinct from the Department of Marine. The report is understood to take up this point and to urge reorganization of the department with a view to greater attention being given to fisheries and to the pursuance of a more consistent policy.

# LAKE OF THE WOODS MILLING COMPANY LIMITED

## And Its Subsidiary Companies

## Combined Balance Sheet Shows Strong Liquid Position

The Report presented to the Shareholders at the Annual Meeting held at the Head Office of the Company, Montreal, on Wednesday, October 4th, shows the best cash position of the Company in many years.

For the year ended August, 1922, part of which was a period of general business depression and distressing economic conditions in overseas countries which form the export market of the Canadian milling industry, Net Profits are shown at less than $50,000.00 below those of the previous year and less than $40,000.00 below 1919-20.

The Statement shows total Net Profits for the year of $713,087.93, derived as follows:

| | |
|---|---|
| MILLING PROFITS (after deduction of operating expenses and providing for Doubtful Accounts and War Taxes) | $421,813.25 |
| REVENUE from Subsidiaries and Other Sources | 291,274.68 |

This Amount ($713,087.93) has been apportioned as follows:

| | |
|---|---|
| Interest on Bonds for year | $ 54,000.00 |
| Dividend Preferred Stock for year | 105,000.00 |
| Dividend Common Stock for year | 420,000.00 |
| Written off Property and Goodwill Accounts— | |
| Lake of the Woods Company | 100,000.00 |
| Subsidiaries | 18,500.00 |

With the balance carried forward this year, Surplus Account now stands at $1,278,455.27.

# The Partition Between

There is more than a mere partition between the Bookkeeper and the Accountant—The man at the inner desk is there by virtue of ambition and of knowledge.—

The man on the stool outside is there through choice—yes CHOICE—

No one keeps him there—He is either self-satisfied—or he lacks pep and initiative.

He too can enter the inner office—occupy the Accountant's chair—command the executive's salray and be a strong and indispensable factor in directing the affairs of the firm.

Ambition—willingness to work—and proper training alone can span the space between the stool and the swivel chair.

Our course in Higher Accounting supplies the needed training. Hundreds have found The Shaw Way to be The Sure Way to the executive's position and the executive's pay.

Double—yes—you can treble your present income in a few months through systematic training—or you can prepare for your C. A. degree in any province if you are ambitious in this direction.

Send today for full particulars of our course which for 20 years has been the best.

# *Municipal Finance*

**Toronto, Ont.**—According to the annual report of the Toronto Hydro-Electric System, a net surplus of $214,353 was made during 1921. This surplus was made despite a surcharge of $76,929 for electrical power imposed by the provincial hydro commission after the year's operations had closed.

The financial position of the system as at December 31, 1921, is given as follows: Gross income, $3,622,605; cost of current operation and management, including repairs and maintenance, $2,212,373, leaving a gross surplus of income over operating account of $1,410,231. Of this amount $1,195,877 was absorbed by interest, depreciation, exchange, taxes, sinking funds and debenture retirals, leaving a net surplus of $214,353. The net funded debt at the end of the year, less sinking funds in the city treasurer's hands, is given as $9,498,309, all of which will be promptly paid at maturity.

In addition to this is shown the unfunded debt of $641,920, against which there were liquid assets of $1,816,655.

The system has also accumulated a net reserve, of the nature of a surplus, amounting to $4,962,908.

Regarding the surcharge for power the report states that, at the governing rate of $17 per h.p. fixed by the Provincial Commission, the charge for the year for power used would have been $1,034,089, but after the close of the year's operations the Provincial Commission informed the local system that the cost of generating and delivering power supplied during the year was $76,929 more than had been charged, and the local Hydro was requested to assume this deficiency, making the cost per h.p. $18.54.

The gross income increased by 15 per cent. and the commercial income by 15.4 per cent. over the previous year.

The report further states that during 1921 81,923 meters were in use; 221,384,558 kilowatt hours were sold; the connected load was 227,600 h.p. and the peak load 76,378 h.p.

## SLIGHT INCREASE IN SALES

### Bond Sales in September Increase Four Million Over August—Total Lower Than Last Year

Anticipations that new financing during the month of September would create a record for sales for the year, have not been realized, as with the exception of sales during August, the month under review is the second lowest total for the present year.

The month's total is considerably lower than for the same month last year, when sales totalled $87,103,717. Last year's financing included some large issues, such as Canadian National Railways for $25,000,000; Ontario for $30,000,000; and Toronto for $19,000,000.

The outstanding cause for the slump in bond sales during September is, of course, attributed to the European trouble which commenced shortly after the beginning of the month. Prices were also affected by this cause, as a comparison with previous months will show that they have shaded slightly.

Borrowing by the provinces shows a reduction from last year, from $34,350,000 to $5,638,000 this year. Had the trouble in the Near East not arisen, this years' total would have been further increased by ten million and probably more, as Ontario was in the Market for that amount, but decided to hold tenders until the situation had cleared.

Municipal sales during the month show an increase of about half a million over the previous month but are lower than last year, when the total was $23,753,717. Last year's total includes nineteen million for Toronto and almost two million for Ottawa.

The following is a comparison of bond sales during August and September:—

| | Sept 1922 | Aug. 1922 |
|---|---|---|
| Provincial | $ 5,638,000 | $ 175,000 |
| Municipal | 6,007,757 | 5,504,696 |
| Railways | 225,000 | ....... |
| Corporation | 850,000 | 3,255,000 |
| Total | $12,710,757 | $8,934,696 |

| Borrower | Amount | Rate % | Maturity | Int. Basis | Purchaser | Price Paid | Sold in U. S. |

## TO CARRY GRAIN AGAIN

### Government Ships Recommissioned to Operate This Fall.

It has been decided to recommission six Government Merchant Marine freighters for service on the Great Lakes and steps in this direction have now been taken, the officers of the ships now being signed on.

These vessels were sent into the lakes last fall to bring down the last of the wheat. They wintered in lake ports and have not been in service during the present season. They were all built in lake shipyards and have seen service on the Atlantic as well as in inland waters.

After their present service is over they will be brought down to Montreal, and their return to the Atlantic and West Indies service is regarded as a visible proof that trade conditions generally have considerably improved in the matter of ocean freights.

## DEVELOPMENT PLANNED

Recent advices from Quebec state that the Shawinigan Water & Power Co., contemplate the development of 150,000 h.p. at Gray Falls, on the St. Maurice river, about six miles below Shawinigan.

This work will be started some time next spring and will mean the investment of $10,000,000 to $15,000,000. The development will provide considerable work for the unemployed of the province and at the same time provide additional electrical power for industrial expansion.

## THREE RIVERS C. M. A.

At the annual meeting of the Three Rivers, Que., branch of the Canadian Manufacturers' Association, which was held on September 28, the following officers were elected: W. E. G. Aird, manager of the Wabasso Cotton Co., chairman; R. Bourke, manager of Le Nouvelliste, vice-chairman.

Brief addresses were also given by Hon. W. Gariepy, president of the Three Rivers Board of Trade, and R. W. Gould, secretary of the Quebec Division, on the advantages of extending the membership and work of the branch. It was decided to initiate a membership campaign, and the next regular meeting will be held October 26th.

## QUEBEC TIMBER LIMITS

Legislation adopted at the last session of the Quebec legislature to encourage limit holders to make an inventory of their limits has been successful, judging by the fact that in the course of the present year out of a total of 45,000,000 acres of leased timber limits, 1,920,000 acres have been inventoried. The inventory is being carried out by employees of the firm interested and then the reports made are turned over to the forestry engineers.

In due course it is expected that the inventory of the timber limits of the province will be completed. One of the advantages of this inventory apart from the fact that the value and contents of the forest may be known, is that the Lieutenant-Governor in Council may give certain special permits for the cutting of timber under the diameter generally authorized.

# Government and Municipal Bonds

The feature of the bond market during the week was the sale of the twenty million Ontario issue, for which tenders were called up to Tuesday.

That Ontario and other Canadian bonds are held in high esteem by United States investors can be judged from the number of tenders received, totalling seven, representing forty-five prominent bond houses on both sides of the line, and also the price paid by the successful syndicate. Considering the condition of the market during the past few weeks the floatation was a success, as the cost to the province was only 5.19 per cent., whereas the opinion of several of the bond dealers was that the province would have to pay from 5.25 to probably 5.40 per cent., for its money. This price compares with the last sale of bonds, last April, when the province floated an issue of $15,000,000, 5 per cent., 30-year debentures in New York, and received a price of 97.409, the cost to the province being 5.17 per cent.

The sale of the Ontario issue seems to have had the desired effect of stimulating the market to further activities after the recent downward trend, due to war conditions, as there has been a moderate advance, both in demand and prices.

The list of offerings continues to hold up remarkably well, and it is the general opinion that with the war sitpation in Europe becoming cleared up the bond market will again show some of its former activity.

### Tenders Invited.

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues: —

| Borrower | Amount | Ten. close |
|---|---|---|
| Montreal, Que. .. .... .. .. | $3,100,000 | Oct. 18 |
| Ottawa, Ont. .. .......... .. .. | 2,639,883 | Oct. 20 |
| Vancouver Sewerage Board .. | 300,000 | Oct. 26 |
| Verdun, Que. .. .. .... .... | 175,000 | Oct. 23 |
| Montmorency, Que. .. .. .... | 60,000 | Oct. 17 |
| Fort Erie, Ont. .. .. ....... | 40,000 | Oct. 17 |
| Deseronto, Ont. .... .. .... | 12,000 | Oct. 18 |

**Vancouver, B.C.**—The Vancouver and Districts Joint Sewerage and Drainage Board will receive tenders up to 11.30 a.m. October 26, 1922 for the purchase of $300,000 debentures. Bids are asked for 5 per cent., bonds payable in Canada, or in United States; 5½ per cent., bonds payable in Canada or United States; 3-year, 5 per cent., bonds payable in Canada or United States; and 3-year, 5½ per cent., bonds payable in Canada or United States. James Stables, chairman. See official advertisement in this issue.

**Deseronto, Ont.**—Tenders will be received up to 12 o'clock noon, October 18, 1922 for the purchase of $12,000, 6 per cent., 20-instalment school debentures, dated September 15, 1922. Henry R. Bedford, town treasurer. See official advertisement in this issue.

**Verdun, Que.**—Tenders will be received up to 7 p.m. October 23, 1922 for the purchase of $175,000, 6 per cent., 20-year debentures dated November 1, with principal and interest payable at Bank of Hochelaga, Montreal. Bonds in denominations of $1,000 each. J. Wishart, secretary-treasurer.

### Coming Issues

**Galt, Ont.**—The city council has passed two debenture by-laws, one for $10,001 for extension to the waterworks system, and the other for $27,213 for the same purpose.

**Owen Sound, Ont.**—The board of education is asking the city council for an additional $50,000 to complete a new school.

**Grantham Township, Ont.**—The council has passed two debenture by-laws, one for $39,000 for school purposes, and the other for $35,000 for the same purpose.

**North Bay, Ont.**—On September 6 the ratepayers defeated by a majority of 129 the by-law for the purchase of a 77-acre park and agricultural grounds for the sum of $25,000. A by-law for the expenditure of $20,000 in sewer construction and street improvements was carried by a majority of 169.

**Englehart, Ont.**—By votes of 78 to 8 and 64 to 19, respectively, the ratepayers have approved two by-laws to raise money for the extension of the waterworks system of the town and the building of a town and fire hall. Debentures will be issued.

**Saskatchewan**—The following is a list of authorizations granted by the Local Government Board from August 26 to September 9, 1922:—

School Districts: not exceeding 8 per cent., 15-years maturity: Thorny Craft, $2,900; Heather, $4,000; Eldorado, $3,000; Fort Qu'appelle, $4,000; Coynach, $1,600, 8-years.

Rural Telephones: not exceeding 8 per cent., 15-years maturity: East Yorkton, $300; Oak Knoll, $750; Broadview, $400.

Village of Birsay, $1,150, not exceeding 8 per cent., 10-instalments: Town of Yorkton, $50,000, 6½ per cent., 5-years.

**Lindsay, Ont.**—The council has passed a by-law for the issuing of $65,000 debentures for school purposes.

**Vancouver, B.C.**—Submission of a by-law in December to authorize the borrowing by the city of approximately $200,000 for the construction of sewers in 1923 and 1924 is considered likely.

**Hamilton, Ont.**—At a meeting of the council on September 12 they passed two debenture by-laws, one for $45,000 of school purposes, and the other for $23,000 to defray relief expenditures during 1921.

**Collingwood, Ont.**—A by-law to provide $25,000 for installing a new intake pipe was passed by the ratepayers.

**Ford City, Ont.**—The council passed a by-law for the raising of $24,171 for drainage purposes

**Fort Qu'Appelle, Sask.**—The ratepayers will be asked to vote on a $4,000 debenture by-law for school purposes.

**Barton Township, Ont.**—On September 18 the council passed a by-law for the issuing of $120,000 debentures for school purposes.

**Guelph, Ont.**—The Roman Catholic Separate school commissioners have passed a by-law authorizing the issuing of $12,000, 5½ per cent., 20-instalment debentures.

**Quebec, Que.**—The Quebec Catholic School Board will apply to the Quebec Legislature at its next session for authorization to contract a loan of $500,000.

**York Township, Ont.**—The council on September 5 passed two debenture by-laws totalling $258,000 for local improvements.

**Bolton, Ont.**—On October 16 the ratepayers will vote on a by-law for the issuing of $5,000, 5½ per cent., 15-year debentures for the rebuilding of the town hall destroyed by fire.

**Lethbridge, Alta.**—The ratepayers passed the by-law authorizing the expenditure of $4,000 for the public library.

**Stratford, Ont.**—City council gave approval to a by-law for $100,000 for hydro extension work by the local park commission.

**Brooklands, Man.**—On October 13, the ratepayers will vote on a by-law authorizing the expenditure of $40,000 for the erection of a new wing to the present school.

**Winnipeg, Man.**—The city will shortly be floating a debenture issue of between $1,000,000 and $1,250,000 for school and local improvements.

**Toronto, Ont.**—On September 25 the city council passed a by-law for the issuing of $746,000 debentures for the erection of a new bridge.

**Quebec, Que.**—At a meeting of the council on September 28 it was decided to request the provincial government to allow the city to borrow $520,000 and $325,000 respectively for various local improvements.

**North Vancouver, B.C.**—The ratepayers will shortly be asked to vote on a by-law for the issuing of $1,250,000 bonds for the purpose of erecting a bridge.

**Ottawa, Ont.**—The city council passed a debenture by-law for $50,000 for the purchase of land.

**Alberta,**—The following is a list of school districts authorized to borrow money by the Board of Public Utility Commissioners: Scollard, $2,400; Speedhurst, $2,000; Britain, $2,500; Eagle Butte, $1,000; Surprise, $6,000; Sexsmith, $2,000; Libing Spring, $3,500; Community [illegible] thbridge, $3,000; Frontier, $700.

**Walkerville, Ont.**—The council has passed a by-law for the issuing of $127,000 debentures for school purposes.

**Fort William, Ont.**—A by-law providing for the issuing of $40,000 debentures for park purposes was passed by the council.

**Montreal, Que.**—The city will probably borrow $5,000,000 for the construction of a trunk sewer for the northern part of the city.

**Saskatchewan,**—The following is a list of authorizations granted by the Local Government Board from September 9 to 26: —

School Districts: not exceeding 8 per cent.: Strongfield, $1,000, 5-years; St. Mary, $3,500, 15-years; Farmer, $4,000, 15-years; Newpark, $4,300, 15-years; Skala, $1,000, 10-years; Stowers, $2,500, 10-instalments.

Rural Telephones: Melaval, $3,600, 8 per cent., 15-years.

Towns: Wadena, $5,000, 8 per cent., 15-years; Unity, $5,000, 8 per cent., 10-years.

**Sarnia, Ont.**—All tenders for the $28,000, 6 per cent., 10-annual instalment debentures were rejected by the council on September 28. The bids were as follows:

MacNeill, Graham & Co., 100.71; Murray and Co. 100.34; Canada Bond Corp., 100.30; Wood, Gundy & Co., 100.02; R. C. Matthews & Co., 99.77; Kerr, Fleming & Co., 99.42; Housser, Wood & Co., 99.31, and Municipal Bankers Corp., 98.03.

### Bond Sales.

Ontario.—Wood, Gundy & Co., and syndicate were successful tenderers for the $20,000,000, 5 per cent., 20-year bonds, paying a price of 97.67, the money costing the province approximately 5.19 per cent. The bonds will be placed on the New York market, and are payable both in Canada and United States. Bidding for this issue was keen, no less than seven tenders being received, and a total of 45 bond houses being represented. Tenders were as follows:—

Kuhn, Loeb & Co.; Chase Securities Corp.; Kidder, Peabody & Co.; Hallgarten & Co.; Wood, Gundy & Co.; and United Financial Corp., 97.67.

A. E. Ames & Co., 97.32.

A. Jarvis & Co.; McLeod, Young, Weir & Co.; Kissel, Kinnicutt & Co.; W. R. Compton & Co.; Continental & Commercial Trust Co.; First Trust Co.; Union Trust Co.; Old Colony Trust Co.; Redmond & Co.; Coffin & Burr; Rutter & Co.; First National Co.; Estabrook & Co.; Stacey Braum; Blyth, Witter & Co.; Eldrige & Co.; Ogilvy, Austin & Co.; and Solomon Bros. & Hutzler, 97.19.

R. A. Daly & Co; Bankers' Trust Co.; E. H. Rollins & Son; Clarke Dodge & Co.; Lee, Higginson & Co.; Spencer, Trask & Co.; and Brown Bros. & Co., 97.06.

Kerr, Flemming & Co., 97.03.

National City Co.; Dillon, Read & Co.; Harris, Forbes; Guaranty Co.; and Dominion Securities Corp., 96.709.

Municipal Bankers Corp.; R. C. Mattthews & Co.; Blair & Co.; Halsey, Stuart & Co.; White, Weld & Co. and Kountze Bros., 96.20.

**Carleton Place, Ont.**—A. E. Ames & Co. have purchased $142,100, 5½ per cent., 30-annual instalment debentures at a price of 98.33, the money costing the town approximately 5.65 per cent. Tenders were as follows: A. E. Ames & Co., 98.33; Municipal Bankers Corp., 98.03; Bell, Gouinlock & Co., 97.69; and R. C. Matthews & Co., 97.63.

**St. Anne, Man.**—An issue of $15,000, 6 per cent. 30-year bonds has been sold to Emery and Anderson at a price of 102.0, which means that the cost to the municipality will be about 5.85 per cent.

**Vancouver, B.C.**—An issue of $250,000, 5½ per cent., 30-year debentures was awarded to Spitzer, Rorick & Co., at a price of 100.13, the money costing the city approximately 5.49 per cent. Alternative bids were asked for bonds payable in Canada or in the United States. Tenders for the issue were fairly numerous, and bidding was keen. Bids were as follows:—

| | Canadian | American |
|---|---|---|
| Spitzer, Rorick & Co. .... .......... | | 100.13 |
| Gairdner, Clarke & Co., Blythe, Witter & Co., and British American Bond Corp. ............... | 98.57 | 99.38 |
| A. E. Ames & Co. .... .... .............. | | 99.29 |
| Canada Bond Corp. .... .... .............. | 98.51 | 98.51 |
| R. C. Matthews & Co. and Halsey, Stuart & Co. ... .................. | | 98.25 |
| Brandon, Gordon & Waddell .... | | 98.19 |
| Wood, Gundy & Co. .... .... .......... | 97.95 | 98.14 |
| J. E. Price & Co., and Rutter & Co. .... .... .... ............................. | | 98.02 |
| Spokane Syndicate .... .... ............ | | 97.63 |
| Lumbermen's Trust Co. .... ......... | | 97.12 |

**Timmins, Ont.**—Wood, Gundy & Co., have purchased $26,000, 6 per cent., 15-year Roman Catholic school debentures.

**Enderby, B.C.**—An issue of $23,000, 6 per cent. 15-year debentures has been purchased by Royal Financial Corp., at a price of 95, the money costing the municipality about 6.5[illegible] per cent.

## DEBENTURES FOR SALE

(See also page 29)

## $2,639,883.86
## CITY OF OTTAWA, ONT.
### Debentures for Sale

Sealed tenders addressed to the "Chairman of the Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa up to 3 p.m. standard time, on Friday, the 20th day of October, 1922, for the purchase of Debentures of the following amounts and terms:—

| | |
|---|---|
| $216,753.11 | 10 years |
| 247,864.85 | 15 years |
| 400,265.90 | 20 years |
| 1,775,000.00 | 30 years |
| $2,639,883.86 | |

All Debentures bear interest at the rate of 5½%, and are issued on the instalment plan. That is to say, each issue is repaid in such annual amounts that the aggregate amounts paid on principal and interest each year are equal. Each Debenture is, however, for a definite amount payable at the end of some year with interest coupons attached payable semi-annually. Interest is payable 1st January and 1st July.

The Debentures are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, bear date 1st July, 1922, and are in denominations of $1,000.00, $500.00 and odd amounts.

The City will make these Bonds payable either in Canada alone, or both in the United States and Canada, as may be decided.

Debentures will be paid at the branches of the Bank of Nova Scotia at Ottawa, Toronto, and Montreal, and, if payable in the United States, at the National Bank of Commerce, New York.

Tenders will be received as follows:—

(1) Bonds payable as to principal and interest in Canada.

(2) Bonds payable both in Canada and the United States.

All tenders must be on the official form.

Accrued interest from the 1st July, 1922, must be paid in addition to the price tendered.

Tenders specifying for Debentures other than those herein described, or containing conditions varying from the above, will not be considered.

Delivery of the Debentures will be made as soon as the Debentures are printed and signed, upon payment of the purchase money.

A certified cheque payable to the City Treasurer for the sum of $10,000.00 must accompany the tender.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, City Hall, Ottawa, Ont.

FRANK H. PLANT,
Mayor.

### INCREASE IN OUTPUT

The output of the Dominion Coal Co., at Sydney, N.S., for the month of September was 278,583 tons, as compared with 149,917 tons in August, and 374,603 tons during July.

Dominion of Canada
Ten-Year 5½% Renewal Loan Bonds

$150,000 due November 1st, 1932

These bonds are a part of the new issue which, being a direct obligation of the Dominion of Canada, rank in all respects on a par with Victory Bonds. The new bonds may now be obtained slightly below par.

# Stock Markets

Although favorable developments in the Near East were mainly responsible for the general strengthening in the entire list on both the Montreal and Toronto exchanges, there was a noticeable fluctuation in prices and even the well established stocks, such as the paper securities, have been prone to recessions more or less extensive.

The outstanding feature of the week was the announcement by the Steel Company of Canada that the dividend would continued to be paid at the regular rate of 7 per cent. To say the least, the market received one of the biggest surprises for many months, as the prediction had been made that it was a certainty that the dividend would be cut from 7 to 5 per cent. and probably to 4 per cent. Just where the rumor, that the dividend was to be cut, originated is a matter of doubt at the present time, but it is the general opinion on the Street that the reputation of the stock has substained considerable damage which will take considerable time for it to get over. In conjunction with the dividend announcement, there was a decided advance in the price, which stood at a low of 62 on October 5, due to the pressure of liquidation, to a quotation of 75 on the following day. Since that time there has been a slight reaction and the stock is now selling around 66 to 68.

During the latter part of the week the trend of the market has been somewhat irregular, with a dropping off in activity as well as a narrower range. The true explanation of this action of the market has not been forthcoming to date, but it has been stated that in all probability the regrettable development in connection with Steel Company of Canada has tended to induce investors to move cautiously.

### Montreal Tramways Co.

A new issue of $500,000, 5 per cent., perpetual mortgage debentures of the Montreal Tramways., is being offered by Greenshields & Co., at the market price, to yield about 6.25 per cent. The present market price of the debentures is around 80. on the Montreal exchange.

The debentures are callable at 105 after April 1, 1921 on six months' notice, and are in denominations of $100 or a multiple thereof. Interest is payable April 1 and October 1 in Canadian funds, and previous issues of these debentures are listed on the Montreal exchange. Application to list the above issue will be made in due course.

The company owns and controls the street railway system of the city of Montreal and suburbs, serving a population of 839,407 without any other form of competition. The company has a contract with the city which provides for the adjustment of the tariffs of fares, and runs until 1953.

Net earnings for the ten years ended December 31, 1921, after all prior charges, have averaged $2,656,611, and for the year ended June 30, 1922 were $3,315,962 against interest on all bonds and debentures now outstanding of $1,786,750. Dividends on the common stock are being paid at the rate of 10 per cent.

### Belgo Paper Bonds.

A syndicate composed of Newman, Sweezey & Co., Wood, Gundy & Co., and McLeod, Young, Weir & Co., are offering $1,500,000, 6 per cent., first mortgage bonds, dated October 1, 1922 and due October 1, 1947, of the Belgo Paper Company, Ltd., at a price of 100 and accrued interest.

The bonds are in denominations of $1,000 with principal and interest payable at any office in Canada of the National Trust Co. The bonds are callable in whole or in part, at the option of the company on any interest date after thirty days' notice, at 103 and accrued interest. After the present financing the capitalization of the company will be as follows: common stock, authorized $20,000,000, outstanding, $14,000,000; 6 per cent., first, closed, mortgage bonds, $3,000,000, less held in treasury, $1,500,000, outstanding, $1,500,000.

The company was incorporated to acquire the assets and undertakings of the Belgo Canadian Pulp and Paper Co., who have been in successful operation since 1900. The capacity of the newsprint paper mill at Shawinigan Falls will be immediately increased from the present output of 65,000 tons of newsprint per annum to one of 105,000 tons per annum. The installation of the two new paper machines which will be required is already under way, and it is understood that these machines will be in operation early in 1923. The timber areas of the company consist of 1,728 square miles of leasehold timber limits and 15,000 acres of freehold lands estimated to contain over 6,000,000 cords of pulpwood. The company also operates a sawmill at Shawinigan Falls with a capacity of 10,000,000 feet b.m., lumber annually.

Average annual net earnings available for interest charges on this issue of bonds for the five years ended December 31, 1921 have been several times the amount required.

### Parish & Heimbecker Ltd.

The Minnesota Loan and Trust Co., of Minneapolis is offering a new issue of $200,000, 6½ per cent., first mortgage gold bonds, series "A", dated September 1, 1922 and due serially to 1933, of Parish and Heimbecker, Ltd., of Winnipeg.

The bonds are callable on any interest date at 105 and accrued interest, upon 60 days' notice, and are denominations of $100, $500, and $1,000, with interest payable March 1 and September 1 in United States funds at the office of the Minnesota Loan and Trust Co.

The purpose of the issue is to enable the company to construct a modern fireproof concrete terminal elevator at Port Arthur, Ont. The plant, which is to be used as a private grain elevator, will have an immediate capacity of 300,000 bushels, with provisions for the construction of additional storage capacity of 1,000,000 bushels.

The auditors report of the company net earnings shows that net earnings for the past three years have been at least four times the interest charges on $200,000 first mortgage bonds. The balance sheet of the company, as certified by the auditors, after giving effect to the present financing, discloses fixed assets of $649,945, and net quick assets in excess of $90,000. The company has a paid up capital of $450,000.

### Continental Mines, Ltd.

A syndicate composed of Brouse, Mitchell & Co., Toronto, Duncanson, Howe & Co., Toronto, and Shnnard & Co., New York, are offering 250,000 shares of the Continental Mines, Ltd., at $5 per share.

The capitalization of the company is $3,500,000, consisting of 700,000 shares, par value $5, of which $3,100,000 have been issued. The company has no preferred stock or funded debt. With the present financing there will be in the company's treasury over $1,000,000 and unissued and available for corporate purposes, 80,000 shares of stock.

The company is not producing at present, but has 27 claims at Kirkland Lake, Ont., and through the operations of a subsidiary company, the Colonial Mining Co., the Continental Mines, Ltd., will operate at Cobalt, where they have claims on 68 acres.

### Truset Wire Wheel Co.

An issue of $75,000, 8 per cent., preferred cumulative preferred participating treasury stock of the Truset Wire Wheel Co., Ltd., is being offered by St. Francis Bond Co., of Montreal at par.

The company is located at Harriston, Ont., where they will manufacture wire, disc and wooden wheels for automobiles, and also self-cleaning tractor wheels. The company expect that sales in Canada will reach a total of 12,500 sets.

The capital stock is composed of 1,500 common shares, valued at $150,000 and 1,500 shares of preferred stock valued at $150,000. The proceds of the above issue will be used for working capital. The balance of the preferred stock is held by the treasury. The assets of the company are estimated at $216,000, including real estate of $165,000.

### Mackenzie Basin Fisheries, Ltd.

Offering of $75,000, 8 per cent., cumulative, participating, preferred stock of the Mackenzie Basin Fisheries, Ltd., is being made by T. J. Langford of Winnipeg at par, $100 per share.

The capitalization of the company is $285,000 preferred stock, of which $188,000 has been issued and paid up, and $15,000 common stock, all of which has been issued and paid up.

The company operates fisheries on Lesser Slave and Athabasca lakes, with a canning and packing plant at Thorpe Bay, Athabasca lake. The head office of the company is located at Calgary.

The above issue of preferred stock is made to provide further working capital.

### Stocks Listed.

On October 9 an issue of $1,012,000, 6 per cent., first mortgage sinking fund gold bonds, due December 1, 1931, ex-dividend coupons, of the Spanish River Pulp and Paper Mills, Ltd., was listed on the Montreal Stock Exchange.

Stock of the Page-Hersey Tubes, Ltd., to the extent of 30,000 shares of preferred and 27,560 shares of common was listed in the unlisted section of the Toronto Stock Exchange on October 9.

# Unlisted Securities

In their report issued on the unlisted market, A. J. Pattison Jr. & Co. say that trading was at a very low ebb, and while no definite movements in prices occurred, the market showed a distinct tendency to halt, and where offerings in any large amounts occurred, failed to absorb in as firm a fashion as it has for the last few months. On the other hand, the changes which did occur downward were, for the most part fractional and not of any great importance when taken singly. There can be no question that such a slight reaction as has taken place puts the market in a very much stronger technical position, from which the upward movement can be continued.

Durant Motors was heavily traded in at 10.50-11.50, and from present indications, will work higher. Cockshutt Plow Preferred, ex-dividend 1%, was quoted at 48-50, stock changing hands at 49¾, and afterwards easing slightly from this figure. The oil stocks were all firmer, and moved upwards on strong buying in a market comparatively bare of stock. Imperial Oil went as high as 121, and International Petroleum improved to 22-23. Sterling Coal Common lost a point to 16½-18. Western Grocers Preferred was repeatedly asked for at 60, at which price no stock was obtainable. Whalen Pulp Preferred was offered as lo w as 25¾ without being taken. The Debentures remain unchanged at 65-69. Dunlop Tire 6's gained ¾ of a point to 97 bid, without changing hands. The Preferred stock remains offered at 82. Famous Players Preferred found a ready market at 54-56. Algoma Steel 5's, which were offered last week as low as 49, without being taken, improved to 51 bid offered at 53. Toronto Power 5's lost 1½ points to 96-98.

## CHARGE AGAINST STOCK BROKERS

A warrant charging Jules Gosselin and George W. Fairbanks, formerly partners in a Montreal stockbroking firm, with the theft of $500,000 was sworn out on Sept. 26. The warrant was issued at the request of Maurice Demers, acting on behalf of himself and clients of the firm. The indictment charges the partners with converting certain stocks and bonds, the property of their clients, to their own use.

The firm went bankrupt early this year during the epidemic of failures of financial houses in New York and Montreal. This concern owed the defunct Merchants Bank $200,000.

It is alleged by Mr. Demers and other creditors interested that when the firm assigned certain stocks which were supposed to be in their possession, were not turned into the general fund for the benefit of creditors. Of these 1,352 were National Brewery shares. It is stated that Mr. Gosselin, since the failure, has left Canada, and an effort is being now made to locate him.

## GOLD BRICK'S LONG JOURNEY

Officials of the McIntyre Porcupine Mines, Limited ,are elated over the recovery of a brick of gold bullion, valued at $15,000, which was stolen a year ago. It was appropriated by one of the mine workers, who took it home with him to Italy. The sister of the thief wrote to a friend in Timins, asking her correspondent why he did not come home wealthy like her brother who had lots of gold. This letter came into the possession of the McIntyre management, and the bullion is now back in the hands of its original owners.

## B. C. INDUSTRIES AIDED BY NEW DUTY

### Shingle Manufacturing To Be Greatly Increased

Many manufacturers and business men of Vancouver, who have been studying the effect of the new impost, are of the opinion that the new United States tariff will benefit British Columbia in many ways.

British Columbia canners welcome the two cents a pound duty on raw salmon and halibut for they have long advocated measures that will serve to retain the fish for canning in the province. Last year about 92,720 hundredweight of raw fish went to the United States. The new duty, it is said. has virtually killed the demand in that market.

Negotiations are said to be proceeding by the United States shingle firms for sites for mills in British Columbia. Faced with a duty on Canadian cedar logs, and with imported shingles in the free list, they say they have no alternative.

The annual export of shingles from Canada to the United States has averaged more than two billion, practically all from British Columbia, and it is now estimated that at least an extra billion will be marketed in the next 12 months south of the border.

## JAMES BAY RAILWAY

About 900 men are now employed on the James Bay extension of the T. and N. O. Railway. With steel laid to the first crossing of the Abitibi River, some 12 miles from Cochrane and with the big concrete and steel bridge over the river nearing completion, the work of laying additional steel will be rushed with all possible speed so as to reach the second crossing of the river, some 40 miles north, before winter interferes seriously with operations.

**New Issue**

# $500.000

# Montreal Tramways Company

## 5% Perpetual Mortgage Debentures

**Sufficient revenue to pay interest on these debentures is assured to the Company by a contract between the City of Montreal and the Company, ratified by the legislature of the Province of Quebec, which provides for adjustment of the tariffs of fares to produce such revenue.**

Callable at 105 after April 1, 1921, on six months' notice. In fully registered form in denominations of $100 or any multiple thereof. Interest payable by cheque on April 1 and October 1 in Canadian funds. Books close fourteen days preceding April 1 and October 1. Previous issues of these debentures are listed on the Montreal Stock Exchange, and applications will be made to list this issue in due course.

Trustee: **THE ROYAL TRUST COMPANY**

For information concerning these debentures, we refer to the letter of Mr. E. A. Robert, President of the Company, contained in the prospectus from which he has summarized as follows:—

The Montreal Tramways Company owns and controls the street railway system of the City of Montreal and suburbs, serving a populaion of 839,407 without jitney or other competition.

The debentures are secured by a mortgage on all property now owned or subsequently acquired, constituting in the opinion of counsel a first charge, subject only to First Mortgage 5's, due July 1, 1941.

Sufficient revenue to pay interest on these debentures is assured to the Company by a contract between the City of Montreal and the Company which provides for the adjustment of the tariffs of fares to produce such revenue. This contract, which runs until 1953, has been ratified by Legislative Act of the Province of Quebec. The contract also provides for additional revenues ranking after debenture interest and including the rental of $500,000 per annum, payable to the City of Montreal.

Under the terms of the contract, the Montreal Tramways Commission, created for this purpose by the legislative act, is obliged to adjust fares to provide the Company with sufficient revenue to pay all operating expenses and maintenance and renewal fund payments, and an annual return of at least 6% on:

(1) The capital value of the Company's property, as fixed through the franchise contract.

(2) Such additional capital expenditure as may be made from time to time.

The valuation fixed by the contract is in excess of the first mortgage bonds and debentures outstanding. Further bonds or debentures can be issued only to the extent of 75% of additions to capital value.

**The contract therefore assures the Company sufficient revenue at all times to pay interest on its bonds and these debentures and any future issues thereof.**

Provision for revenue to meet further requirements over and above the foregoing are set forth more fully in a letter in the prospectus, a copy of which will be supplied on request.

The City of Montreal is directly interested in the prosperity of the Company, inasmuch as the terms of the franchise contract provide that the Company's right to receive its return on its capital value has priority over the City's right to receive $500.000 in annual rentals and a percentage of surplus earnings.

Net earnings for the 10 years ended Dec. 31, 1921, after all prior charges have averaged $2,656,611 and for the year ended June 30, 1922, were $3,315,962 against interest on all bonds and debentures now outstanding of $1,786,750. Dividends on the common stock are being paid at the rate of 10%.

**Legal Opinion: Lafleur, MacDougall, Macfarlane & Barclay**

**We recommend these debentures for investment**
**Price: At the Market, to yield about 6¼%**

# Corporation Finance

**Spanish River Pulp & Paper Mills, Ltd.**—The board of directors was re-elected without change at the annual meeting held in Toronto on September 28. The directors are Geo. H. Mead, P. B. Wilson, Thomas Gibson, C. E. Read, T. Watson Sime, G. R. Gray, and T. H. Watson. The annual report, which has already been reviewed in The Monetary Times, was presented and approved.

**Lake of the Woods Milling Co.**—Despite fluctuations in wheat prices, and a period of general business depression, the company was able to present a very satisfactory report for the year ended August 31 last at the annual meeting held on October 4.

Net profits for the year were $713,087, as compared with $762,073 for the previous year, and $732,232 for two years ago. The earnings are equal to approximately 15.8 per cent. earned on the common stock, as against 17.2 per cent. in 1921 and 23.4 per cent. in 1920. After the payment of bond interest and preferred dividends, and before the writing off of $118.500 for depreciation, there was a balance of $554,087 this year, as against $603,073 last year, and $573,232 in 1920. After all deductions had been made there remained a surplus of $15,587 as compared with $64,573, bringing the total surplus up to $1,278,455, as against $1,262,866.

A comparison of the profit and loss account for the past two years is given herewith:—

| | 1922 | 1921 |
|---|---|---|
| Milling | $ 421,813 | $ 458,232 |
| Other sources | 291,274 | 303,841 |
| Total profits | $ 713,087 | $ 762,073 |
| Bond interest | 54,000 | 54,000 |
| Balance | $ 659,087 | $ 708,073 |
| Preferred dividends | 105,000 | 105,000 |
| Balance | $ 551,087 | $ 603,073 |
| Common dividends | 420,000 | 420,000 |
| Balance | $ 134,087 | $ 183.073 |
| Written off | 118,500 | 118,500 |
| Surplus | $ 15,587 | $ 64,573 |
| Previous surplus | 1,262,867 | 1,198,293 |
| Total surplus | 1,278,454 | $1.262.866 |

The working capital of the company shows an improvement over the previous year, being up by about ninety thousand dollars. A comparison for the two years is given below:—

| | 1922 | 1921 |
|---|---|---|
| Current assets | $5,199.619 | $4,868 318 |
| Current liabilities | 1.270,680 | 1,009,524 |
| Working capital | $3.928.939 | $3,858.771 |

The balance sheet shows little variation from the previous year. Inventories are up slightly, while an increase is shown in both accounts receivable and accounts payable. Total assets are now valued at $9,949,136, as compared with $9.672.391 in 1921.

**Ford Motor Co. of Canada.**—Although gross sales for the year ended July 31 last were $8,563.219 lower than the preceding year, the net earnings of the company show a substantial improvement, standing at $5.006.521, as compared with $2,352.629. This includes an amount of $231.127, representing a balance remain in the 1920 business profits tax reserve after all adjustments were made and tax had been paid.

This is equal to $71.52 per share on the 70.000 shares of capital stock outstanding, par value $100, or more than twice as much as in the previous year, when it was equal to $33.83 per share.

The report shows a net surplus of $12.537,972, which was made up of surplus of $9.518.934, profits for the year of $5.006,921, and shipping reserve of $133,143. making a total of $14,658,599, from which deductions were made for taxes of $20.627 and dividends $2.100.000.

With total assets of $25.661,446, the liabilities were $2.082.551, with reserves of $4.040.922.

The plant account is given as $8.047,442 for home office and $1.758,833 for branches, a total of $9.806.276. Against this is charged depreciation of $3.880.992, while it is commonly believed that the plant is worth anywhere between $10,000.000 and $115.000.000.

Cash on hand and in banks was $6.147.715, with accounts receivable of $1.017.192, while inventories were $1 560.908. Of the $10.000,000 authorized stock, $7.000.000 is outstanding.

The income account shows that the total sales and other income amounted to $29,273,254, which was a reduction of $8,563,219 from last year, due almost entirely to reductions in the selling prices of the Ford of Canada products.

The amount transferred to surplus, however, was $3,019,038, after all deductions, as compared with $1,302,629 for the previous year.

The output was 45,000 cars and 1,192 tractors for the year, as compared with 46,832 cars and 3,063 tractors for the previous year.

As to investments, the company had $4,000,000 par value Dominion of Canada and United States Government securities, which are shown on the balance sheet at $3,971,194 market value, but which had an actual value July 31 of $4,016,000.

**N.S. Tramways & Power Co.**—Gross earnings for the month of ugust were $100,143. Deduction of operating expenses, $70,745, and taxes, $4.827, left net of $24,571 available for bond interest. After bond interest and amortization charges, surplus for the month was $7,309, which is in strong contrast to the figures for August, 1921, when there was a deficit of $2,590. This betterment is largely accounted for by reduction of operating expenses. The marked improvement which has taken place in the company's earnings for the current year to date is shown by the following comparative figures:—

| | 8 mos. ended Aug. 31 | |
|---|---|---|
| | 1922 | 1921 |
| Gross earnings | $933,365 | $964,323 |
| Operating expenses | 655,970 | 782,465 |
| Balance | $277,395 | $181,858 |
| Taxes | 73,913 | 83,258 |
| Net earnings | $203,482 | $98,600 |
| Interest, etc. | 138.337 | 136,073 |
| Balance | $65,145 | *$37,473 |
| P.C. oper. to gross | 70.48 | 81.37 |

*—Deficit.

**Lake Superior Corporation.**—Only routine business was transacted at the annual meeting of the shareholders held in Camden, N.J., on October 4.

The following directors were elected unanimously: Sidney Mason, W. H. Cunningham, H. Coppell, W. C. Franz, Alex. Taylor, T. Gibson, T. D. Wood, J. S. Dale, R. Home Smith, H. I. Underhill, F. McOwen, H. C. Coleman, Clarence M. Brown, Franklin G. Colby.

At the meeting of the Board following the shareholders meeting, officers were elected as follows: President, W. H. Cunningham; vice-presidents, H. Coppell, W. C. Franz and James Hawson; secretary, Alex. Taylor; treasurer, J. Hawson.

**Porto Rico Railways Co.**—During the month of August there was a slight decline in both gross and net earnings, as compared with the same month last year. Gross at $108,928 compares with $109.941 for August, 1921, and net at $41,331 with $42,271. A moderate improvement in net earnings for the first eight months of the year is shown, while gross continues to fall behind. Gross is down 2.93 per cent., while net, as a result of economies and increased operating efficiency, shows an increase of $13,420, or 3.9 per cent. A comparison follows:

| | For August | |
|---|---|---|
| | 1921 | 1922 |
| Gross | $109.941 | $108,928 |
| Net | 42.271 | 41,331 |
| | For Eight Months | |
| Gross | $902.430 | $877,676 |
| Net | 337,682 | 351,103 |

## ROYAL FINANCIAL CORPORATION

Mention was made in our September 29th issue of the removal of the Royal Financial Corporation's office to 8 and 9, Winch Bldg., Victoria. This was the Victoria office only that was moved, the Vancouver office remaining at Rogers Bldg., Vancouver.

## CHARGED WITH BOND THEFT

Arrested while boarding a train for Seattle on October 6, Alfred Smith, aged 34, was charged with the theft of $11,000 in Victory bonds from his employer, F. B. Lewis, a broker.

## QUEBEC UTILITY COMPANIES

Notices appearing in the Quebec papers announce applications to the provincial legislature to incorporate the Quebec Tramways Company, the Quebec Gas Company, and the Quebec Power Company. In discussing these applications to the provincial legislature at the coming session, regarding the plans for reorganization of the Quebec Light, Heat and Power Company, Limited, President E. A. Robert said: "Since assuming the office of president of the Quebec Railway, Light, Heat and Power Company, Limited, I have made a careful study of the company and its subsidiaries. The success of any public utility company depends primarily upon its furnishing a satisfactory and efficient service in all departments and keeping pace with the growing needs of the population which it serves. Keeping this in view, a detailed survey has been made of all branches of the company's activities to determine its present and future financial and other requirements in each branch. As a result it has been decided that it would be in the interest of both the security holders and customers of the company to effect a re-organization, having for its object the following:—

"To alter the present system of dividing the various branches of the company's business.

"To facilitate the progressive expansion of the company's existing business.

"To enable the company to considerably extend its activities.

"To provide means for economically financing extensions and developments.

"To enable the reorganization of the enterprise to be effected in the best interests of the public and the security holders of the company.

"As a preliminary step application is being made at the forthcoming session of the Legislature in Quebec for the incorporation of three companies, the Quebec Power Company, the Quebec Gas Company, and the Quebec Tramways Company."

## MONTREAL & SOUTHERN COUNTIES RY.

The annual meeting of the Montreal and Southern Counties Railway was held in Montreal on October 4. The board of directors was elected as follows: Sir Joseph Flavelle, Bart., J. N. Dupuis, W. D. Robb, J. E. Dalyrmple, F. L. C. Bond, James A. Yates, Officers appointed were: W. D. Robb, president; J E. Dalyrmple, vice-president; James A. Yates, treasurer; J. M. Rosevear, general auditor; W. B. Powell, general manager; W. C. Chisholm, general solicitor; J. P. Hudson, secretary.

## BUILDING YOUR BUSINESS

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district.

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

## BUYING AN INCOME

When you buy a good bond you are conserving your principal and buying an income.

Government and municipal bonds are secured by the good faith and credit of a municipality and its power to levy taxes for the payment of its obligations.

In buying such securities you are placing your principal in the class of investments which affords the maximum of safety and greatest assurance of prompt and regular payment of income.

Selections may be made at present from bonds of Canada's most representative Governments and Municipalities. There is a wide choice as to maturity, price and income.

your agent for the management of that property.

This Company has eight branch Offices, across the continent from Halifax to Vancouver. It employs a large and competent staff of experts, who know business all over Canada. Consequently it brings to the care and management of your property, wherever located, knowledge and experience that are invaluable to you.

This Company will take care of your property,—make repairs, secure desirable tenants, collect your rents, pay taxes, interest, and insurance premiums, and remit you your revenues with a strict and careful accounting.

You will appreciate not only the release from care, but also the profitable management of your real estate.

We are glad to talk your affairs over with you at any time.

# Agency Contracts in Life Insurance

BY G. C. MOORE
Secretary, Imperial Life Assurance Company.

(An address before the Insurance Institute, Toronto, October 17.)

It has always been our aim to have among the papers presented to the Institute each year some that bear directly upon the subjects comprised in our examination syllabus. We are desirous of reaching the point where the student, in his preparation for our examinations, will not have to go outside of our own published Proceedings. When, according to custom, I prepared a paper for this evening and chose as my subject "Agency Contracts in Life Insurance," it was with this thought in mind, as this subject is one of the few coming under examination in the Life Branch that has not yet been covered by any previous paper presented to The Institute.

There are two systems of agency organization in common use in Canada, known respectively as the General Agency System and the branch office system.

### The General Agency System

In the general agency system a General Agent is appointed having control of certain territory and he is usually paid solely by commissions on the premiums on business produced in his territory. The commissions he receives are not only those in respect of business personally produced by him, but also what are known as overriding commissions in respect of business produced by his sub-agents—these overriding commissions being the difference between the commissions called for by the General Agent's contract and the lower commissions called for by the sub-agent's contract. The rate of commission granted to each sub-agent on business produced by the sub-agent is under control of the General Agent. For example, the contract he makes with his sub-agent may call for the same commissions on first year premiums that he himself receives but no commissions on subsequent premiums, the General Agent retaining such commissions, which are known as renewal commissions, for himself. Or, he may pay the sub-agent a smaller first year commission and smaller renewal commissions than his own contract calls for, thus retaining an overriding commission for himself both in respect of first year premiums and subsequent years' premiums. Or again, he may pay the sub-agent the same first year commission as he himself receives with smaller renewal commissions: or again, a smaller first year commission and the same renewal commissions. If a sub-agent dies or leaves the service of the company, any future commissions on his existing business, to which the sub-agent or his estate is not entitled under the sub-agent's contract, revert to the General Agent.

### General Agent's Duties

In consideration of the remuneration thus received the General Agent agrees to canvass for applications of assurance, to appoint, instruct and supervise sub-agents within his district, collect and remit premiums, to keep accurate statements and books of account in respect of transactions on behalf of the company, and, in general, to devote his time to the proper conduct and building up of the company's business in his territory. The expenses of operating the agency, that is, office rent, salaries of cashier and office staff, etc., are paid by the general Agent, the commissions allowed him under his contract being made sufficiently in excess of the commissions ordinarily payable to cover a reasonable expense charge. The company, however, pays the medical fees and usually supplies the office with the regular company forms, blanks, circulars, etc., and pays the expressage on them.

### The Branch Office System

Under the Branch Office System the Company opens up offices in certain territories, each under the charge of a Manager and Cashier. The Manager receives a salary for organizing the territory and managing the agency. This salary is frequently made to depend upon the volume of business or extent of first year premium income produced each year in his territory. In addition to the salary for managing the agency, the Branch Manager receives commissions on business personally produced by him, usually at the same rate as is paid the sub-agents. He also may be allowed bonuses for volume of business and for increasing the number of successful producing agents in his territory. He does not receive any difference that may exist between the ordinary commissions of his own contract and those of his sub-agents and it is the company and not the Branch Manager that receives the benefit from any reversions of commissions in respect of sub-agents' business.

### Duties of Cashier

The duties of the Cashier, under the Branch Agency System, are to make collection of premiums and of policy loan interest, keep the office books and records, attend to the ordinary routine correspondence—in short, have charge of the general office work of the Agency. He and the clerical staff under him are paid by salary from Head Office and are appointed by, and under the control of, Head Office, although acting under the direction of, and in harmony with, the Branch Manager, so long as such direction is not in conflict with the interests of the company or the instructions of Head Office. Needless to say, the Cashier can prove a very valuable aid to the Manager, through relieving the Manager's mind of all collection and office details and of the bulk of the correspondence, through building up good will by courteous and efficient service to the policyholders and through supplementing in many ways the work of the Manager in the securing and retention of business and in agency organization.

The foregoing sets out in brief the distinctive features of the two systems. Each system has its advantages and disadvantages. The General Agency System is the original system, but has now been almost superseded in Canada by the newer and more up-to-date Branch Office System.

### Comparison of Advantages

For the General Agency System it may be said that it definitely fixes the cost of operating the agency. It may also be said for it that it releases the company to a large extent from the supervision of sub-agents and from the financing—or at any rate the direct financing—of sub-agents, the responsibility for both of which rests upon the General Agent.

In the Branch Office System the Branch Manager has usually no direct personal incentive to keep down the expenses of running the Branch Office, and in consequence more expensive offices and a larger and higher paid office staff are the rule. These higher expenses are, however, to some extent compensated for by the more efficient office work and better service to the policyholder which naturally result.

Perhaps the main advantage of the Branch Office System, and disadvantage of the General Agency System, has to do with uniformity of all sub-agents' contracts, particularly insofar as rates of commission for the securing of business are concerned. Under the Branch Office System the contracts of all sub-agents are practically uniform. In the General Agency System there is a distinct lack of uniformity. The uniformity of contracts among the sub-agents under the Branch Office System gives rise to a more contented and permanent body of agents; the lack of uniformity under the General Agency System is conducive to dissatisfaction and unrest. Again, the more direct and close contact which the main body of agents has with the Head Office under the Branch Office System as compared with the General Agency System gives more and better opportunity for the engendering of loyalty and esprit de corps and these are no unimportant factors in the success of a company.

### Terms of Agreements

When we examine the terms of the agency agreements or contracts between the companies and their agents, in use by the Life companies of Canada, we will find there are certain provisions that, in substance, are more or less common to all, irrespective of company or nature of contract, that is, whether Branch Manager's, General Agent's, Sub-agent's, etc.

The principal provisions coming under this description are as follows:

1. **Duties**—A definition of the duties of the agent usually is that he is appointed to canvass for applications of assurance for the company and to collect and forthwith pay over to the company such premiums as he shall be directed to collect by the company, and to perform such other duties as may, from time to time, be required of him by the company. The agent agrees that in the conduct of the business of the company he shall be governed strictly by his agreement with the company and the published rules and instructions of the company, as well as those he may receive from time to time from the company. In the Branch Manager's and General Agent's contracts the appointing and supervising of agents within the respective district would also be included among these duties.

2. **Limitation of authority**—That the agent shall have no authority on behalf of the company to incur any liability or debt, to accept risks of any kind, revive policies, grant permits, make, alter or discharge any contract, extend the time of payment of any premium or waive payment in cash, and shall have no authority to receive any money due or to become due to the company, except on policies or premium receipts sent to him for collection and on applications obtained by and through him in exchange for conditional receipts to be furnished by the company.

### Collections, Records, etc.

3. **Collections**—That all moneys or securities received by the agent on behalf of the company shall be held by him as trustee and shall not be used by him for any purpose whatever, but shall be immediately paid over to the company or remitted to the company by post office money order, express money order, or chartered bank draft. The agent shall render full and true accounts at such times as the company may prescribe, and shall return at the proper time all uncollected policies, notes, premium or other receipts, and it is expressly stipulated that if the agent shall withhold any funds belonging to the company after such funds should have been reported upon and transmitted to the company, or if he shall withhold any funds, policies, notes, premium or other receipts after demand, in writing, by the company, such dereliction shall, at the option of the company, terminate all rights and claims of the agent under the agreement, but nothing in the agreement shall be construed to affect any claim of the company against the agent.

4. **Records**—That the agent shall keep accurate statements of all transactions on behalf of the company and all books of accounts, letters and other books and documents in connection with the business of the said agency are the property of the company, whether paid for by the company, whether paid for by the company or not, and shall at all times be open to the company's representative for inspection, and shall be delivered to the company or its representative on the order of the company or on the termination of the agreement. It is provided, however, that the books of the company shall be conclusive evidence of the state of account between the parties to the agreement.

5. **Not Taken Policies, etc.**—That the agent shall pay a certain sum, usually about Five Dollars, for each policy issued on an application secured through him which is not taken up and paid for, thereby making the agent responsible for part of the expenses connected with the issue of such Not Taken Policy. Also, it is frequently provided that if an agent takes the responsibility of having an applicant examined, whose application would, in accordance with the company's rules and instructions to agents, be conditioned or declined, or whose application has been declined by another company within the preceding two years, and the application then be declined by the company, or a conditioned policy be offered which the agent fails to place, then the agent shall pay to the company, without deduction therefrom, the sum of Five Dollars for each such application. The agent also agrees personally to bear any loss in respect of advances made by him for the payment of premiums.

### Expenses and Commissions

6. **Expenses**—That the company shall pay the necessary expenses for medical examinations and expressage on documents sent by it to the agent and shall furnish to the agent a reasonable supply of blanks and circulars for the agency. The company shall not be liable to pay any other charge than is specifically allowed in the agreement, or as may be allowed by special written permission of the company. In the branch manager's contract the company also agrees to furnish such office accommodation and office assistance as may appear to it to be necessary and desirable, and to pay the actual traveling expenses of the branch manager incurred in connection with the business of the company when absent from the city in which he resides and traveling within the district in which he is to operate, on a detailed statement of such expenses being furnished to the company in accordance with its requirements.

7. **Commissions**—The agreement contains a schedule showing the commissions which will be paid the agent on first year premiums and on renewal premiums. It is provided that these commissions will be paid upon cash premiums only which shall be collected, paid to and received by the company during the continuance of the agreement, on policies issued on applications secured under the agreement by the agent personally without assistance.

### First Year and Renewals

The commissions paid in respect of first year premiums are higher than those in respect of premiums of the second and subsequent years. As these higher commissions on first year premiums are recouped from subsequent years' premiums, the scale of first year commissions is graded roughly according to the length of premium paying term—the fewer the premiums called for by the plan selected, the lower the rate of first year commission that applies. Also, as a large portion of the premiums on Endowment Policies represent, as it were, a saving deposit made with the company, the rate of first year commissions (and in the case of some companies the rate of renewal commissions) on an Endowment Policy is made less than that on a Life Policy calling for the same number of premiums.

The commissions, both first year and renewal, on policies issued without participation in the profits of the company are as a general rule made a lower percentage of the premium than in the case of participating policies. Also a different and lower scale of commissions is usually made to apply to Term Policies.

In some contracts, as an incentive to the prompt placing of the policy, a small additional commission is paid on the first premium, in consideration of such premium being settled in cash within a stated time, usually a month from the issue of the policy.

Formerly, commissions on premiums of the second and subsequent policy years were made a uniform small percentage of all premiums called for by the policy. In more recent years, the plan has developed of limiting commission payments to, say, the first eight, nine or ten years' premiums of a policy, and as compensation for this curtailment, to pay a somewhat higher commission on the second year's premium than on subsequent years' premiums. It was felt that this had the advantage of causing the policy to be better looked after by the agent at the time the second year's premium became due, which is the period when the tendency on the part of many policyholders to lapse their insurance is greatest. Where this higher second year's commission is paid, it is frequently graded on the basis of number of premiums called for by the policy. As an example, if the policy is one calling for twenty or more premiums, 15% commission might be given, if fifteen premiums, 10%, and if ten premiums, 7½%.

### Renewal Commissions

Some companies make the payment of renewal commissions for any contract year conditional upon the agent having produced a certain minimum of paid-for business in the preceding year—deeming that the agent has failed in his duty to the company and is not entitled to renewal commission if he does not produce this minimum amount. Again, the percentage of second year's premiums granted as commission is sometimes graded on the basis of the amount of new assurances produced and paid for in the preceding year. For example, it might be that a maximum of 15% of the second year's premium would be paid as a commission if $60,000 or over of business was produced; a maximum of 10% if between $60,000 and $40,000; and a maximum of 5% if between $40,000 and $20,000; with no renewal commission payable in the year if a minimum of $20,000 of new insurance had not been produced in the preceding year.

Another method of treating renewal commissions is to make the amount of paid-for business produced by the agent in any contract year determine to what policy year commissions on such year's business will be paid. As an example of this, it might be specified in the contract that if, say, $30,000 of paid-for business were produced by the agent in any contract year, renewal commissions would be paid to the third policy year; if $40,000, then to the fourth policy year; if $50,000, then to the fifth policy year; etc.

### Conditions and Regulations

The commission payments under the contract are usually made subject to certain conditions and regulations, of which the following are typical, and the reason for which will, in most cases, be self-evident.

(a) Commissions on all classes of policy not named in the schedule shall be determined by the company.

(b) No commission shall be payable on extra premiums, nor upon premiums advanced under any non-forfeiture provision. Should the agent

### ST. BONIFACE TREASURER

J. C. Dussault, former city treasurer of St. Boniface, Man., was acquitted on October 6 on a charge of attempted arson. The accused was charged with setting fire to the city hall of St. Boniface, but, according to Magistrate A. Dubuc, the Crown witnesses admitted the fire was not set to the building but to books in a fireproof vault.

Dussault has still to stand trial on a charge of embezzlement of city funds.

# Provinces Want Direct Representation

## Pressure Brought to Bear For Direct Voice in National Railway Management—Conversion Loan Total Smaller Than At First Expected — Prospect of More Vigorous Immigration Policy

(Special to The Monetary Times)

Ottawa, October 18.—The demand for provincial representation on the Canadian National Railway Board, which is very likely to make successful headway, will render it rather difficult to secure as satisfactory a business administration as the first announcement, in which the principle of regional rather than provincial representation was recognized, seemed to assure.

New Brunswick wants direct representation, and will very likely get it. This means that Alberta and Saskatchewan will also demand it; and, seeing how matters are going, Prince Edward Island may put in a claim. Quebec is also annoyed that there are four residents of Ontario on the Board and only one from that province, and is almost certain to get one or more members. The fact that fifteen may be appointed inclines one to the opinion that eventually this may be the number.

So far the Government has attempted to give public ownership a fair chance; but it is quite evident that political pressure will make it very difficult to give the Canadian National the kind of business administration that it should, and must have, if the best results are to be secured. It seems impossible to convince a large element of the public that what the Government owns it should not, or does not, control.

### Operating Results

The Canadian National Railways were not able during July to continue the favorable showing they made during the preceding six months, during which period they reduced the operating deficit by $7,230,000, as compared with the same months in 1921. Indeed, instead of there being a reduction there was an increase of nearly $300,000 in the operating deficit as compared with that of July 1921. During that month the deficit was cut nearly $1,200,000 as against that for the preceding July, owing to the fact that there had been a material reduction in wages. But in July of this year there was no further material reduction, while, on the other hand, earnings had been cut down through rate reductions.

On the whole, however, the whole Government system at the end of July was about $240,000 better off on operating than it was in July of 1921; for while the Canadian National end went behind, the Grand Trunk came along with a gain of $538,000. This was due very largely to the fact that much traffic was diverted to its lines during the recent strike in the United States. The last report, however, indicated that this increase in Grand Trunk earnings was not being maintained.

It is probable that the August operating figures will be still less favorable than those for July. During August last year there was actually an operating surplus of $140,000 on all Canadian National lines, or an improvement to the extent of over $2,000,000 as compared with August, 1920. But between the first of August last year and the first of that month this year two rate reductions came into effect, so that while there was only a very moderate increase in traffic, this was carried at so much lower rates that the earnings must have been considerably less. So a big operating deficit for August is in prospect. In October and November, however, gains should again appear.

### Interest on Bonds

The announcement that the Canadian National Railways at the first of next month will pay the interest on the bonds of the Grand Trunk Pacific branch lines in Saskatchewan and Alberta, guaranteed by the governments of these provinces, means that the Dominion Government has definitely committed itself to the assuming of these liabilities, which total $16,775,931, and on which the annual interest charge is $680,000.

In the case of the Canadian Northern, as the Government took over the system and the capital stock, it automatically assumed responsibility for all the liabilities, including the bond guarantees. But the Grand Trunk Pacific went into the hands of the receiver, the provinces having guaranteed the bonds of the Branch Lines Company, have had to meet the interest thereon during the last two years. After much correspondence the Dominion Government has made good the amount to them, but not until recently did it commit itself definitely to the acceptance of this additional liability. The annual interest charge of $680,000 is a definite addition to the fixed charges, it being due on bonds held by the public in contradistinction to payments due to the Government.

### Conversion Loan

The returns for the Conversion loan, totalling $100,000,000, are considered by the Finance Department as officially satisfactory, and, as no doubt its advisers considered this about the amount that would probably be secured, this statement is warranted. At the same time, it is a much smaller amount than towards the end of September seemed probable. The Government must find about $75,000,000 with which to retire the bonds that will be presented in December. This will not be a difficult matter, but it will probably mean recourse to the New York market for funds. The indications are that a considerable portion of the war issues to be retired during the next three years will have to be refunded in the United States, where is a much greater abundance of funds for loans of this kind than there is in Canada.

---

# TOO MANY "GREAT EXPECTATIONS."

## Financial Policy of Western Provinces Critized in New York —Municipalities Also Burdened with Debt

(Special to The Monetary Times)

New York, October 18.—The current issue of The Annalist, one of the leading weekly financial newspapers in this city, features an article headed, "Canadian Provinces Face a Critical Year." The article, which claims to be based upon a seven thousand mile trip through the Canadian west, blames the present financial difficulties of the west on the reckless way in which they have mortgaged their future. The Canadian West, according to the writer of the article, is cursed by too much optimism. It is always expecting to "strike it big" next year; it always seems willing to borrow on the expectation of being able to pay back its loans out of future earnings.

### Burdened with Debt

"As a result of this policy," says the writer, "each of the four provincial governments, a great many of the municipalities, a large number of the business firms, and the farming community almost without exception are burdened with liabilities heavier than they can comfortably bear. I was informed that one wholesale house in Winnipeg had overdue accounts on its books to the amount of about $8,000,000, and another in the same city of $3,000,000. A certain large lumber company is said to be carrying accounts amounting in the aggregate to several millions. The indebtedness of the farmers to the retail trade is very heavy, which accounts for the heavy liabilities of the latter to the wholesale trade. The farmers owe enormous sums to the manufacturers of agricultural machinery. One authority estimates the latter indebtedness at $40,000,000. The total indebtedness of the farmers of the prairie provinces is estimated by one western authority to average about $1,000 per capita."

The writer incidentally quotes the criticisms of the banks heard so frequently in the Canadian west. In rebuttal, however, he points out that the Canadian banks have always been most liberal in their treatment of the western Canadian farmer, but that conditions during the past year or so have forced them to hold the purse strings rather tight, a fact which accounts for some of the criticism levelled at the banker's head in western Canada.

### Expresses Current Opinion

This article has attracted a great deal of attention in financial circles, mainly because it has expressed openly what a great many bankers and financial men interested in Canada have been discussing privately for some time back. Canadian bank men have taken the stand in these discussions that the time has come for a reversal of policy on the part of the Canadian provinces; many of them have been quite frank in expressing their belief that the provinces should stop borrowing. One well known Canadian financial man, who attended the American Bankers' convention, held here during the week of October 2, said that if the provinces did not stop borrowing so freely the time would arrive, and that in the very near future, when investment bankers on this side of the line would refuse to take their offerings except at prohibitive rates. All it needed to bring such a thing to pass was a tighter money market and more borrowing by some of the more reckless of the provinces.

---

# THRESHING PRACTICALLY COMPLETED IN WEST

## Excellent Weather for Farmers—Medicine Hat Development—Crop Returns Not So Good in Alberta

(Staff Special)

**Calgary, Oct. 16.**—The West has experienced, during the past month, the finest weather that could be desired to complete the year's farming operations. Grain is being marketed freely in all parts of the west and elevators at all points are working to capacity. The movement of the crop is working very smoothly and there is no sign of any congestion. Threshing is practically completed and many farmers are well on with their plowing.

The crop returns from Alberta are not so favorable as the other prairie provinces. In the northern part of the province crops are not as good as last year, while in Southern Alberta a crop considerably above the average has been reaped which is greatly benefitting that part of the country. In the district surrounding Medicine Hat there is scarcely any crop worth speaking about except on irrigated land, where the crops are splendid. Manufacturing industries in Medicine Hat were found to be quite brisk.

### New Industries Starting

The Gas City Brick Co. Ltd. has secured the contract for supplying Heath Unit Tile for all the main buildings of the new refinery plant now in course of construction by the Imperial Oil Co. at Calgary. This contract represents about 100 car loads of tile. The Gas City Brick Co. has been manufacturing for this order so that it may be ready for delivery commencing Jan. 1st. The plant at Calgary, now in course of construction, is on a 25 per cent. larger scale than the plant at Regina, nine of the main buildings averaging from 75 to 280 ft. in length. The natural gas and the additional features that Medicine Hat enjoys, from a manufacturing standpoint, make it possible to reach out into distant markets and successfully compete in many lines of products.

Another large industry at Medicine Hat is that of the Medalta Stoneware Ltd. This Co. has recently increased its capital to $500,000, and has incorporated under the name of Medalta Potteries Ltd. This company is expanding its business and going into the manufacture of white ware, and report business very good. The re-organization of the company will mean a doubling up in the capacity of the plant, necessitating additional buildings.

### Oil Development

Oil development in the vicinity of Medicine Hat has been considerably furthered through the operations of the Community Oil Wells Ltd. This company is composed entirely of citizens of Medicine Hat who subscribed towards the drilling of a well on Petroleum Natural Gas leases taken over by the company. The well is down about 1,800 ft. Drilling operations are proceeding satisfactorily, and the oil experts are confident that a heavy flow of oil will be struck very soon.

The Rosery Flower Co. Ltd. in Medicine Hat is one of the largest in Canada, with over 5 acres at the present time under glass. This company has a most up-to-date plant and make large shipments of flowers and plants as far east as Montreal. They are erecting three large new greenhouses, and with these additions the plant will take second place in the Dominion of Canada for area under glass. When the new additions are completed they will have over six acres glassed in.

### Conditions in Calgary

Business in Calgary was found to be somewhat quiet and the returns from this year's crop have hardly begun to make themselves felt yet. However, the outlook is better than it has been for some years, but the whole west really needs another good crop, at least, before it will begin to recover from the effects of the poor crops of the past 3 or 4 years.

# Municipal Taxation In Canada

## Real Estate Basis of Local Revenues—Widespread Differences in Laws of Various Provinces—Equalization of Assessment Provided in Ontario Counties—Recent Legislation is Voluminous

"Municipal Taxation in Canada" is the subject taken up in a pamphlet just issued by the Citizens' Research Institute of Canada, summarizing recent changes. The following are some extracts:—

To get a bird's-eye view of municipal taxation in Canada is extremely difficult. Each province has its own general system of municipal taxation. Some provinces have different taxation provisions for different grades of municipalities, such as rural municipalities, villages, towns and cities. Several provinces give special charters to cities, and these charters may confer tax powers not identical with those granted in the general law.

The industry of legislatures is well known. Hundreds of laws are enacted annually by provincial legislatures, and not a few of these deal with municipal taxation, so that it is almost impossible to keep information as to municipal taxation strictly up-to-date. Again, in many cases, municipalities have not taken advantage of all the powers granted by permissive legislation. As it is important to get a picture of what is actually done in taxation as well as of what may legally be done, the Institute has not only studied the provincial laws dealing with taxation, but has sent questionnaires to hundreds of Canadian municipalities in the attempt to secure first-hand data as to actual conditions. Many replied, but many did not; so that the facts presented in the forthcoming reports are not 100% complete. The Conference will be deeply indebted to any readers who will point out any important omissions or any misinterpretations of provincial statutes which they may observe. The Institute simply has taken the first step which it was necessary in the interests of the public for somebody to take. This first step having been taken, the best results can not be obtained without the hearty co-operation of all.

### Real Property

Real Estate Taxation is the mainstay of the municipal revenues of the municipalities of each province. Each provincial government authorizes municipalities to assess, and levy taxes on land. Until comparatively recently some of the western provinces had legislation exempting improvements more or less completely and generally from taxation.

### British Columbia

In the year 1919, the legislature of British Columbia amended the Municipal Act by authorizing municipalities to tax land and improvements at their actual value.

The Inspector of Municipalities in his latest report, dated June 15, 1922, states, "Among the cities there are ten which still exempt improvements entirely from taxation, as compared with eighteen in the year 1915; and among the districts there are now fifteen which exempt improvements, as compared with twenty in 1915."

The 1919 legislation had the following very interesting provisions with regard to the assessment of certain public utilities:—

"(1) The poles, cables and wires of any telephone, telegraph, electric light or electric power company within the limits of any municipality shall, for the purposes of assessment and taxation, be deemed to be land, and the amount of assessment thereon shall be in the cities of Victoria and New Westminster $200 per mile, and in all other city municipaltes $100 per mile, and in all district municipalities $75 per mile of such poles, cables or wires.

"(2) a. The miles of single track of any tramway company shall, for purposes of assessment and taxation, be deemed to be land, and the amount of assessment thereon shall be at the rate of $5,280 per mile or fraction thereof of track.

"b. The miles of single track of any railway company, and in the case of track upon privately owned rights-of-way, the land upon which such tracks are laid, shall be assessed as land at their value, as a portion of a going concern.

"(3) A railway company or tramway company is deemed to be land. The amount of assessed value thereof respectively shall be the actual value. The cost, less a reasonable amount for depreciation.

"(5) Water mains and pipes of a water company are deemed land. The assessment shall be $1 per foot.

"(6) Gas company—Mains assessed at 40c. per running foot."

### Alberta

The general municipal Acts of the Province of Alberta since the year 1916 have been amended several times in respect to the assessment of improvements on land. At present (i.e., the date of the beginning of this study) the Town Act authorizes the council of a town to pass a by-law to assess and impose taxes upon buildings and improvements upon lands, not exceeding their actual value. The Village Act limited the power of villages to assess improvements, to sixty per cent. of actual value. Rural municipalities as yet have no authority for imposing a tax upon buildings and improvements. The Town Act makes the assessment of buildings and improvements upon lands compulsory by towns, if any debentures issued are in arrears, either in regard to principal or interest, immediately prior to May 1st in any year. The law provides that, without any by-law to that effect, all improvements shall be assessed under these circumstances at not less than fifty per cent. of their value. The Village Act places the same obligation upon any village (other than a summer village) after any debentures have been issued by the corporation and as long as such debentures remain unpaid.

Under authority of the Municipal District Act, lands containing minerals which are leased or otherwise in the possession of any person other than the owner, or worked by the owner for sale or use in his business, or for profit, shall be assessed separately in respect to such minerals.

All the cities tax buildings and improvements to lands. The replies to questionnaires from a few of the cities give the percentages at which improvements are actually assessed, as follows:

| | |
|---|---|
| Edmonton | 60% |
| Calgary | 50% |
| Medicine Hat | 55% |
| Red Deer | 50% |

### Saskatchewan

The municipal laws in the Province of Saskatchewan provide for the assessment of land at fair actual value. The City, Town and Village Acts limit the assessment of improvements on lands to sixty per cent. of their value. The Rural Act authorizes the assessment of buildings on parcels of land not strictly agricultural in nature or use and not exceeding forty acres in extent. In this case the assessment must not exceed sixty per cent. of fair actual value. In rural municipalities, land containing coal upon which a mine is operated is assessed for the purpose of a school district at its value as a mine, inclusive of plant and equipment.

For the financial year ending April 30, 1921, the actual assessment of improvements in the cities was as follows:—

| | |
|---|---|
| Moose Jaw | 45% |
| North Battleford | 45% |
| Prince Albert | 45% |
| Regina | 30% |
| Saskatoon | 35% |
| Swift Current | 60% |
| Weyburn | 30% |

### Manitoba

The Assessment Act of Manitoba limits the assessment of improvements upon land to two-thirds of actual value. It is provided that in rural municipalities the ordinary farm residence and buildings upon any parcel of land improved for farming purposes shall be assessed (but not for the purposes of taxation) at two-thirds of the full value. In cases where lands are improved for other than farming purposes, they are assessed at two-thirds of the full value and taxed thereon.

### Eastern Provinces

In the provinces of Ontario, Quebec, New Brunswick, Nova Scotia and Prince Edward Island, municipalities have been given full authority under the municipal laws to assess buildings and improvements upon lands at actual value. When land is referred to in these laws, it is interpreted to include buildings and improvements.

The actual practice under the various provincial laws varies from province to province, and even from municipality to municipality within the same province. In the questionnaire referred to above, information on this point was sought, but the results were largely negative. One town in Nova Scotia reported that land was assessed at 50% of its actual value, but improvements at 75% of its value. In 1918 the Bureau of Municipal Research made an assessment study of the Province of Ontario, and found all sorts of anomalies in the practical interpretation of the law. No doubt the same thing is true of the other provinces. While the Assessment Act states that land shall be assessed at its actual value, nine different interpretations of this as to improved land existed among 20 municipalities for which the facts are available. Twelve of these municipalities assessed on the selling price value; one assessed on the basis of revenue produced; another assessed at 80 per cent. of actual value, one at 66 per cent., one at 60 per cent., one at from 40 per cent to 60 per cent, one at from 60 per cent. to 65 per cent, and one at 65 per cent. These probably interpreted actual value to mean sale value. The Act states also that the value of the buildings shall be the amount by which the value of the land is thereby increased. This is interpreted in a later section as follows: ". . . buildings shall be assessed for the amount of the difference between the selling value of the whole property and the selling value of the land if there were no buildings on it."

Of the 20 municipalities mentioned, 6 were guided by the letter of the law and 14 adopted various other standards, such as the following: "80% of value on a cubic-contents basis for each of three building types," "70% to 75% on a square-foot basis, modified by consultation with builders," "building permit and rental value, etc.," "40% on basis of experience as contractor, modified by improvements, state of supply and demand, and classes of people in control of properties."

Of the 20 assessment departments, 11 assessed improvements at the same percentage as the land on which the improvements were erected, 7 assessed improvements at a lower percentage, one at a higher percentage, and one on an entirely different basis.

In 1919 the Ontario Assessment Act was amended to provide for partial exemption of dwelling houses from taxation. This legislation provides as follows: "The council of a city, town or village may, with the assent of the electors qualified to vote on money by-laws, pass a by-law providing that taxes and rates, except for school purposes, on dwelling houses assessed for not more than $4,000, shall be levied and imposed on such percentage of the assessed value as may be thought proper, but not on a less percentage than the following:—

"(a) On dwelling houses assessed at not more than $2,000 on not less than 50% of the assessed value;

"(b) On dwelling houses assessed at not more than $2,500 on not less than 60% of the assessed value;

"(c) On dwelling houses assessed at not more than $3,000 on not less than 70% of the assessed value;

"(d) On dwelling houses assessed at not more than $3,500 on not less than 80% of the assessed value;

"(e) On dwelling houses assessed at not more than $4,000 on not less than 90% of the assessed value."

It is also provided that the council of a township shall have the same power, and, in addition, the by-law may, in the case of farms, extend and apply to all buildings used for farming purposes.

This amendment gives power also to any local municipality, without the assent of the electors, to pass a by-law exempting from taxation, except for local improvements and school purposes, for a period not exceeding ten years, dwelling houses assessed at not more than $3,000 owned and occupied by officers or men who were on active service overseas during the war with the naval or military forces of Great Britain or Great Britain's Allies.

In 1920 the Municipal Tax Exemption Act was incorporated in the Ontario Statutes. Under the authority of this Act the council of a city, town, township or village, with the assent of the qualified ratepayers, may pass a by-law exempting from taxation for all purposes, including school purposes, on a gradual scale.

# The Monetary Times

Trade Review and Insurance Chronicle

OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

**Address:** Corner Church and Court streets, Toronto, Ontario, Canada.

**Telephone:** Main 7404. Branch Exchange connecting all departments.

**Cable Address:** "Montimes, Toronto."

**Winnipeg Office:** 1206 McArthur Building. Telephone Main 3409. G. W. Goodall, Western Manager.

**ANNUAL SUBSCRIPTION RATE, $3.00**

Single Copy, 15 cents, postpaid, anywhere.

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

**ADVERTISING RATES ON REQUEST**

TORONTO, FRIDAY, OCTOBER 20, 1922

## A FIRE INSURANCE LESSON

The weakness of a fire insurance business confined to a small area is again illustrated in the case of the Temiskaming Mutual Fire Insurance Company of New Liskeard, Ont. This company commenced in April, 1920, and wrote business around New Liskeard, Haileybury and neighbouring villages. Its assets at the end of 1920 (the latest year for which figures are available), totalled $3,359, in which is included unassessed premium note capital of $2,293. It now covers risks totalling about $400,000, and up to the present month the losses were insignificant.

The northern Ontario fire, however, swept over the area in which it had written business, and its claims on this account total around $50,000. Evidently the company could not meet these, especially when a large proportion of its members are not in a position to meet assessments.

A small company of this kind goes along for many years doing business cheaply and profitably. Ordinarily its losses do not differ greatly from those of organizations covering a wide area. Once in a while a disaster does occur, however, and that is the time when the insurance protection is most needed. The large companies doing business in the district will by all appearances meet their losses without difficulty, but the local one will not be able to do so unless assistance is extended.

## EMIGRATION AND IMMIGRATION

The recent Dominion census revealed an astonishing loss of population, a condition not realized on account of the absence of emigration figures in this country. Considerable interest therefore attaches to a study of emigration and immigration statistics just issued by the International Labor Office, Geneva. This question is, moreover, being discussed at the Fourth International Labor Conference, which commenced on Wednesday. The study in question is compiled from reports submitted to the International Labor Office by all the governments which are members of the International Labor organization, which show the varying character of the procedure followed in the different countries and consequent difficulty in making an international comparison with the figures obtained. (In this connection it is to be remembered that the International Emigration Commission in August of last year, recommended that all emigration information should be communicated to the International Labor Office by all countries concerned). The International Labor Office has, therefore, prepared this special study to enable the various governments to determine what requirements in the collection and dissemination of emigration statistics are necessary and possible.

The first part of the study contains a description of the methods of compiling emigration statistics in each country, an analysis of these methods as a whole, and a systematic criticism with a view to facilitating the study of international measures which may be taken with a view to rendering national statistics comparable.

The information contained in the various government replies forms the general basis of the study, but while some countries have sent very complete responses, others have only furnished scanty details relating to the establishment of statistics. Recourse has been had to the various other official and scientific resources throughout the work that are available for filling these gaps, and though the work does not claim to be complete, it contains valuable information respecting 39 countries and should prove sufficient to show the full complexity of the problem. It emphasizes the importance of the work which the International Labor Conference will assume and the obstacles in the way, as well as the possibilities in the future.

## THE POWER OF GOODWILL

A manifesto, urging the great necessity of goodwill among men in the industrial and political worlds at the present moment, has been prepared by the Industrial League and Council of Great Britain. It has been signed by a large number of influential leaders and members of parliament who endorse the efforts of this organization to improve the relations between employers and employed; and it is of interest to note that among the earliest of the signatures received was that of the prime minister. The theory and importance of individual responsibility are emphasised in the manifesto; if a spirit of mutual understanding is to be obtained, every class, employer and employed alike, must, it is urged, endeavour to fulfil its obligations.

The world, observes the manifesto, is made up of states, and states are represented very largely by associations created for political or industrial ends. What we desire and demand is that the states should keep the peace as between themselves. What we forget is that a state is no more than an aggregate of individuals giving allegiance to some form of government. There can be no war where individuals are united in the pursuit of peace. There can be no peace where large bodies of men are bent upon war. A perfect human relation with foreign nations and at home between capital and labour is the real secret of future prosperity.

If people are concerned in their individual capacity with struggles and quarrels, if in industry they attach more importance to personal questions than to those that are vital to the well-being of the community, they create an atmosphere in which ill-feeling is the dominant factor, they divide themselves into camps, they look at every question from the view-point of their own individual preferences. The result is that the industry suffers. With it, human relationships suffer.

As it is with industry so it is with the state. If the rulers think only in terms of their own country then sooner or later the result is war. Only as they take wide views and develop a large vision, considering others as well as themselves, is peace maintained. We find states with divergent aims working in complete harmony.

One cannot help agreeing that goodwill among men is the one thing than can save civilisation. But this goodwill is not, and cannot be, limited to statesmen and their military advisers. The real ruler of the world to-day is commerce. It is only the worker who can build up what the soldier has destroyed.

## DEVELOPING EXPORTS

A significant change has taken place in managerial circles. Ten years ago the management of a business often felt that an export manager could be created from a shipping clerk or from the inside sales staff.

There can be no question but that many excellent export managers have been created from timber selected from the traffic and clerical departments, but it has been in spite of the fact rather than because of it. Such export managers must have possessed either an unusual education for the positions they previously held, or an unusual capacity requiring a broad education. Fundamentally, the modern export manager is a man of education. He must be. For in his province lie everyday opportunites for a sound knowledge of sales, production, traffic, credits, collection, finance and organization.

Even in the largest organizations, where export duties are delegated to several heads, the export sales manager must have a working knowledge, at least, of all of its broad divisions of a modern business. Beyond this, he must possess aggressive sales ability, which in itself is rare.

Today, the masters of manufacturing enterprises are inclined to take cognizance of the real qualifications. No longer is the title "Export Manager" given in lieu of increased compensation to a minor employee. Management control is exercised most rigidly for a period of years when an export manager is developed from the inside force. Today, it is extremely rare to find as export manager a man who won his spurs in exporting as a foreign commercial traveller.

In the export fraternity itself, it is generally recognized that the successful export manager is, above all things, a student. While he must retain his essential sales and organization characteristics, and exercise them daily, more and more it is appreciated that the modern export manager must learn much of the elements of business itself and must identify himself with the policies of his company as a whole, rather than move in an outside planet dedicated to export endeavors.

This explains why export managers will be found in the councils of national credit, advertising and sales promotion organizations. It explains why they are the leaders in domestic organizations, specializing on finance and production. It explains why these originally purely domestic organizations now have their export divisions, departments or sections.

## THE RAILWAYS' POSITION

During the past six months the Canadian railways have been making a considerable improvement from the unfavorable position in which they were last year. This has been accomplished, in the face of a declining volume of business, by reducing operating expenses. The Canadian Pacific has still further strengthened its position, while the Canadian National has reduced the operating deficit. The latest returns, however, for July, show an operating deficit for the Canadian National greater than last year. In June the operating deficit was cut from $2,595,256, in June, 1921, to $1,963,988. In May it was cut from $2,554,540 in May, 1921 to $47,045; in April there was a cut of $1,287,000. In March there was another cut of $1,453,512; in February, one of $611,000; in January, one of $640,000. In July, 1922, the operating deficit was $1,633,001, as compared with $1,334,568 for the same month last year. This makes the operating deficit on the first seven months of the year $10,571,999.

When other businesses are struggling for solid ground, it is not likely that the railways will find the task easy. There have been substantial reductions in rates, while the cost of labor and of coal is little less than at the end of the war. Added to this are the economic disadvantages under which the Canadian National is operating.

### SECURING LAND FOR SETTLEMENT.

When the plans of the Western Canada Colonization Association were developed in the spring of last year, the conclusion was reached that there could be no successful effort unless there were available lists of unoccupied land for sale at prices good for a reasonable period. The only vacant land, it was pointed out, within easy reach of existing railways, was being held out of production by absentee owners. The association accordingly asked the governments of the prairie provinces to create Land Settlement Boards, clothed with authority to require each owner of unoccupied land to place a sale valuation on his holding good for two years, such sale valuation to be the basis of the wild lands taxation. Considerable support was given to this proposal in the west, some even going as far as to suggest that a price be fixed at which lands might be expropriated. Many felt, however, that the proposal went too far, a view which was taken by The Monetary Times, as expressed in our issue of May 20, 1921, as follows:—

"It should be borne in mind that the freedom of the individual to buy or sell his property is a fundamental principle of private ownership, to which exception is made only in such individual cases as where property is required for public use. To adopt such a wholesale measure as is suggested, for the re-sale of the property to other individuals, would not help western Canada's reputation as an investment field. Would not a comprehensive list of properties be sufficient to promote the work of colonization?"

The proposal was not adopted by the governments and has been eliminated in the plan presented by the new organization, the Canada Colonization Association. In fact Mr. Brown explained at a meeting of the Association in Toronto on Wednesday night, that it had been made in the first place because of the views held by Col. MacRae, who had been made general manager of the Western Canada Colonization Association. Following the refusal of the provinces to enforce it, Col. MacRae had resigned. Listings are now to be voluntary, with no tax penalty in the background. In spite of this, however, Sir John Willison, president of the Association, suggested at the above mentioned meeting that pressure be brought to bear on owners, while Hon. E. C. Drury, premier of Ontario, speaking as one not connected with the Association, expressed the view that there should be a "good stiff unoccupied land tax."

Nothing has occurred during the past year to alter the relations of the owners in regard to their holdings, and it is moreover necessary that this country be even more chary of shaking the confidence of investors in our justice and integrity. Speculation is an essential part of development in Canada as elsewhere, and should not be stifled.

## Personal

W. R. DAVIDSON, general superintendent, western lines, Grand Trunk Railway, has been transferred to Montreal as general superintendent, eastern lines; R. H. Fish, general superintendent, eastern lines, has been transferred to Toronto as general superintendent, Ontario lines.

A. J. C. FORD has been appointed manager of the real estate department of the Yorkshire & Canadian Trust, Limited, Vancouver.

JOHN G. MYERS, managing director of Big Dyke Gold Mines, Limited, has sailed for England on a business trip.

E. L. PEASE, vice-president and managing director of the Royal Bank of Canada has been elected to the directorate of Ogilvie Flour Mills, Limited.

F. W. MARSH, formerly manager of the British Columbia branch of the Canada Life Assurance Company, has resigned his position to take up literary work. J. M. Queen, manager of the New Brunswick branch will succeed Mr. Marsh.

## Obituary

MAJOR-GEN. SIR JOHN WALLACE CARSON, died in Montreal on October 13th, the anniversary of his 59th birthday. The late Sir John was born in Montreal and received his education in that city. At the age of 16 he entered the service of the Royal Insurance Company, afterwards joining the Northern Insurance Company, and a few years later became manager of the Fire Insurance Company of North America. Later, in 1892, he began business in the insurance lines on his own account. In 1909, along with two others, he organized the Crown Trust Company. He was a director of the Union Bank of Canada, vice-president Crown Trust Company, director Lake of the Woods Milling Co., director Keewatin Flour Mills Co., director Cassidy's, Limited, and managing director Crown Reserve Mining Co.; president and managing director Consolidated Asbestos, Limited; vice-president and managing director Bleustone Mining and Smelting Co; president Federal Asbestos Company; vice-president Jacobs Asbestos Mining Co., and associated with many other financial and commercial organizations. He was knighted in 1917.

ROBERT A. LYON, of the firm of Lyon and Plummer, members of the Toronto Stock Exchange, died in Toronto on October 11th. The late Mr. Lyon was born in Manitoulin Island, 49 years ago.

## Business Conditions

Canadian business is steadily improving, according to despatches to Dun's Review from branch offices of R. G. Dun & Co. in the principal cities, and though progress is less pronounced in some lines than in others, there has been a substantial recovery in practically all the leading departments of trade and industry. Remarkably good crops in almost all sections have resulted in more confident buying by country merchants, while operations of city retailers have been stimulated by the revival in manufacturing activity. Wholesalers in nearly all important centres report the receipt of an increasing volume of orders for dry goods, clothing, furnishings, jewelry, furniture, footwear, groceries, provisions, hardware, and other staples, and, with a further easing in financial conditions and an improving tendency in general collections, prospects are now regarded as decidedly encouraging.

Montreal reports continued improvement in general business, a steady run of orders being received for the principal seasonable staples from both city and country merchants. Collections are somewhat better, and sentiment is optimistic regarding the immediate future.

Advices from Quebec state that wholesalers are busy filling orders for a wide variety of Fall and Winter staples and that business in most lines is better. Collections occasion somewhat less complaint.

Wholesalers at Toronto report that business continues to improve in most lines, retail trade being stimulated by manufacturing activity and increasing orders from country merchants reflecting generally satisfactory crop results. Collections appear to be improving.

Business in the Far West and Northwest is responding to the harvesting of large crops in most sections, advices from Winnipeg, Saskatoon, Calgary, and other centres stating that, while the spirit of conservatism that has prevailed for a long time past has not been entirely dissipated, retail demands for seasonable commodities is improving. Both city and country merchants are ordering more freely, and the movement of Fall and Winter dry goods, clothing, footwear, furnishings, millinery, and other staples is steadily broadening in volume. Collections have not improved to any material extent.

## Railroad Earnings

The following are the approximate gross earnings of Canada's transcontinental railways for the first two periods in October:—

| | 1922. | 1921 |
|---|---|---|
| **Canadian Pacific Railway.** | | |
| October 7th ...... | $4,829,000 | $ 4,383,000 |
| October 14th .... | 5,147,000 | 4,898,000 |
| **Canadian National Railway.** | | |
| October 7th ..... | 3,262,024 | 2,918,593 |
| October 14th .... | 3,473,811 | 2,198,593 |
| **Grand Trunk Raiway.** | | |

### NEW HAMPSHIRE FIRE

Field and agency managers of the New Hampshire Fire Insurance Company recently presented a testimonial to F. W. Sargeant, president, on the occasion of his fortieth anniversary with the company.

### MORATORIUM NOT CONSIDERED

"Such a step has never been in contemplation by the Government of this province," says F. M. Black, provincial treasurer of Manitoba, in reference to the question of a possible moratorium. As stated in these columns on September 29, Alberta has also decided against such a restriction, unless as a last resort.

# Canada's Banking System is Criticized

### Our Banking Power Is Less Than That of Massachusetts, Says Speaker At Chicago Bankers' Meeting—Local Financiers Understand Conditions and Build Up Local Industries—Decrease in Number of Banks Cited

At a meeting of the Chicago and Cook County Bankers' Association in New York on October 3, just before the convention of the American Bankers' Association, Vernon R. Loucks, a Chicago attorney, compared the traditional American banking system, consisting of many independent banks, with the continental idea of a few banks with branches and one great institution acting as the fiscal agent of the Government, and with the Canadian and Scotch branch bank system.

Tracing the history of American banking, he pointed out that both times we have tried out the continental idea it had failed. He referred to the failure of the first Bank of the United States (1791 to 1811), and the popularity that Andrew Jackson won by his fight) against the second United States Bank, with its twenty-five branches (1816 to 1836). When the National Banking Act, under which the national banks are incorporated, was passed in 1863 in order to raise money for the Civil War, the speaker said, branch banking was not permitted, the only exception being where a state bank having branches is consolidated with a nation bank.

Mr. Loucks quoted Attorney General Wickersham's opinion in 1911 that branch banking is not permissible under the Federal statute. He said that the American banking system, "unique and isolated as it is," had flourished under the old conditions so that the banking power of the United States is far greater than that of Great Britain or any continental country, while that of Canada, "so idealized by proponents of the branch banking system," is less than that of Massachusetts.

Conceding that the country's banking system had many defects between the panic of 1893 and 1913 which made it less effective than the Canadian system, Mr. Loucks insisted, however, that these evils had been cured by the Federal Reserve system. This, he said, "has not only eliminated the former great evil of the hoarding of individual reserves, but has afforded a vast expansive system of credit on a scientific basis unknown to any other banking system of the world."

"The branch bank system of expansion," Mr. Loucks went on, "is a centralization of money power in a few hands; the American system is one of decentralization of money power, but with organization and mobilization of reserve available to all. The one is a system of centralization, the other a method of co-operation. The one is a domination of money power by a few, the other an organization of the resources of the many, uniting all independent banks into one cohesive whole."

#### Federal Reserve Advantages

He quoted James B. Forgan, a banker who had favored branch banks, as saying that the Federal Reserve Act gave the banks the advantages of the branch banking system, "without surrendering their individuality of ownership, their interest in local affairs or the local control of their business." He also quoted Charles G. Dawes as saying that branch banking is wrong "because it proceeds from the top down instead of from the bottom up."

In reciting the evils of branch banking, Mr. Loucks said that it destroys the interest which each community feels in its own institutions. People of a community are attached to their own bank not only by financial ties, he said, but by ties of sentiment, local patriotism and neighborliness. They have pride in their home town bank, which they would not have in a branch of a big city bank.

"The branch banking system takes away the benefit of having a bank under local control to build up local industries," he said. Pointing out that Vancouver and Victoria, with no local banks, had only branches of big city banks, he attributed the greater growth of Portland and Seattle, cities with practically the same natural advantages of the Canadian cities, largely to their local ownership of strong national and State banks. "They have a corps of real financial leaders," he said, "independent, resourceful and devoted to the industrial progress of those cities. Does any one believe that Portland or Seattle would today be several times larger than Vancouver or Victoria if they had been dependent for their banking facilities upon branches of New York or Chicago?"

Pointing out that the directors and officers of a big bank, located miles away, are unable to get adequate first-hand information about conditions in the cities where branches are located, he said that for such directors to pass on the credits of merchants miles away "is about as satisfactory as teaching swimming by correspondence."

"The result," he went on, "under the branch banking system is that local loans are frequently refused where they should be made. Local enterprises do not receive the financial credit they must have. The entire community suffers and the city and surrounding country do not develop as they should."

#### Cites Conditions in Canada

"Nothing illustrates this better than the retarded growth of the Western cities and cities in the maritime provinces of Canada. Her natural riches are ex-tensive. She has a great and resourceful people. And yet most of her cities and towns are farming and fishing centers. There is a noticeable lack of factories and other industrial enterprises outside of her few banking centers. The financial resources of her outlaying districts, cities and villages, are tapped and brought to a central reservoir, with the result that the cities of Montreal and Toronto profit at their expense."

Mr. Loucks said the substitution of branch managers for independent bankers in many cities would deprive their communities of helpful financial service and prove an economic waste which would not be equalized by the economies in operation claimed by proponents of the branch system.

"Branch banking is monopolistic and would ultimately destroy the independent bank system," said Mr. Loucks. "What branch banking does to the independent bank is demonstrated by the steady decrease of banks in Canada and England. The Canadian year books show a steady decline in the number of banks in Canada, until in 1904 she had only thirty-five banks. Today she has only seventeen, a decrease of over 100 per cent. in eighteen years. The Encyclopedia Britainica, 1910 and 1922 editions, show that England in 1842 had 429 banks, in 1900 111 and in 1921 41, less than one-tenth the number in existence eighty years ago.

"The only answer to this deplorable condition by those who favor branch banking is that it is a case of the survival of the fittest. But in the realm of finance the fittest does not necessarily survive. One of the well recognized rules relating to money is Gresham's law, to the effect that where good money and bad money circulate side by side the bad money eventually drives the good money out of existence. The fittest money does not survive, nor does the fittest among the banks necessarily survive. It is the survival of the strongest made strong by artificially created conditions.

#### Competitor of Small Banks

Mr. Loucks pointed out that the branch bank is a formidable competitor of the small independent bank, which has to pay taxes on its capital stock, whereas with a branch bank no capital stock taxes are paid except by the parent bank at the home office. As in other business, also, he said, it can use the monopolistic weapons to kill off competition and get the field for itself.

"Price wars," resulting from this kind of competition, he said, would prove unhealthy to the community in the long run.

Mr. Loucks showed what had happened in cities where branch banking is permitted. He said the Bank of California had twenty-six branches in Los Angeles and the Cleveland Trust Company had forty-eight branches and was extending them throughout Ohio. In Detroit there are 191 banking places, of which 171 are branches.

"In his recent letter to Senator McCormick," the speaker went on, "Mr. Crissinger argues that national banks should be permitted to have branches where State banks are given the same permission on the ground that independent banks cannot survive where branch banking is permitted. He speaks of the competition of State banks that have literally taken possession of cities with branch banks or offices and says that 'these facts are notorious and well known to all the State bankers of the country.' He calls attention to the growth of branches in Detroit, Cleveland, Los Angles and other places, and states that the same conditions prevail in the City of New York, where the Corn Exchange Bank and several other State institutions' are literally plastering that city with branches.' He then draws the inevitable conclusion that independent unit banks cannot long survive in any State or community where branch banking is permitted.

#### Concentration of Power

"Most of the advocates of branch banking freely admit that the system means the elimination of the small bank and the concentration of banking power in the hands of the large banks. Their arguments are based upon the benefits of such a concentrated system. They proceed upon the assumption and inevitable fact that branch banking means the passing of the smaller banks.

"The proponents of the system say that there is competition even in branch banking. While this is true, it is not a healthy competition. It is competition only of large and powerful banks fighting over the spoils. There is no competition between large and small banks. The competition of Canadian banks is not free for all. It is a 'war of the barons,' and in ways it is wasteful and extravagant.

"In their attempt to outdo each other the Canadian banks have established branches in some of the large cities of Canada so extensively that they are out of all proportion to the needs of the community. Imagine Chicago with six times the number of banking institutions which it now has and you will have a picture of Toronto. In Montreal practically the same condition exists. As a result of this competition the banks of Canada have 50 per cent. of their capital tied up in bank buildings and equipment. This is not a healthy condition."

Mr. Loucks denied the contention that branch banking would afford more uniform interest rates. He said the rates in Canada and this country vary in about the same proportion, in accordance with economic laws. Under the Federal Reserve system, he said, our clearance system is just as effective and more universal than the Canadian. "A man in business in Chicago to-day can deposit his checks received from customers all over the country and have them collected and credited to his account with fully as much facility as the man in Montreal."

The branch system, he said, ignores the rule of safety that when a bank increases in size, its capital stock should increase in proportion. He denied that the branch system would decrease the danger of panics, saying that it is the failure of big institutions, and not of small country banks, that brings on panics. He also pointed out that in the last eighteen years six of the thirty-five banks in Canada have failed, proving that branch banking does not prevent bank failures. The size of some of our individual banks, he said, enables them to finance enterprises of any magnitude and does away with the argument that the branch banking system is desirable because it creates institutions large enough to develop big business. He said very few large industries do all their business with one bank, anyway.

The principle followed by insurance companies, of splitting up a big risk by reinsurance, he said, was equally good in banking. Such enterprises as the Standard Oil, International Harvester, and the packing corporations, he pointed out, had been financed by our banks when they were much smaller than now.

"The control of great financial resources in a few banks," he concluded, "with their associated insurance companies, trust companies, securities and investment companies, even to-day means control of railroads, mines, steel mills and other industries.

#### Political Power

"Furthermore, in a democracy money power always has and will carry with it corresponding political power, which is reflected in legislation, executive acts and frequently even in judicial circles. Already 46 per cent. of the nation's money and credits is in the hands of 1 per cent. of the banks. The inauguration of a system that has always and everywhere meant and must inevitably mean the destruction of independent banks in the various communities throughout the country, and an oligarchical concentration of financial, industrial and political power, would strike at the very heart of our future welfare.

"We have to-day the best banking system that has yet been developed. We have less reason to discard it for the branch banking system now than ever before. Our banking power is the greatest known. We have more independent and resourceful banking brains, extensively located at point of commercial vantage throughout the country, than any other nation. Banking resources are more available to the average citizen than to the people of any other country. Prosperity is more universally and widely diffused than in any other Government. Let us not at this most fateful hour discard so vital a factor in the prosperity and greatness of our nation."

I. N. Powell, President of the South Side Trust and Savings Bank of Chicago, who was Chairman of the meeting, urged a campaign to induce Congress to pass legislation against branch banks. He said the big interests of New York City were behind the agitation in favor of branch banks.

Samuel R. Jeffreys, a St. Louis attorney, spoke in favor of giving national banks the privilege of having branches in States where State legislation permits State banks to have branches. This suggestion provoked a storm of opposition from the other bankers, practically all of whom favored legislation to abolish all branch banks, either State or national, everywhere.

Among the delegates who made speeches attacking the branch system were Andrew Jay Frame, 78 years old, President of the Waukesha National Bank, Waukesha, Wis., who has not missed a bankers' convention for forty-seven years; William J. Rathje, President of the Mid-City Bank, Chicago; Burne Pollock, Secretary of the Wisconsin Bankers' Association; Michael B. Wells, President of the Home Savings Bank of Milwaukee; Louis E. Dehlendorf and Mr. Miltonberger of St. Louis.

### Resolutions Adopted

The meeting adopted the following resolutions:

Resolved, By the representatives of banks here present, that we view with alarm the large increase in the number of branch banks in the United States and the growing tendency toward legalizing and permitting branch banking; that we desire to express our disapproval of and opposition to branch banking in any form or nature; and,

Resolved, That we regard the branch banking system as detrimental to the best interests of both the banks and the people of the United States and as tending to concentrate the power of money in the hands of a few centralized interests; and,

Resolved. That a committee be appointed to prepare a resolution in accord with the above resolutions for presentation before the American Bankers' Association to combat the opening of additional branch banks or offices.

## HELP TEMISKAMING FIRE CO.

In order to consider the position of the Temiskaming Mutual Fire Insurance Company of New Liskeard, rendered bankrupt by the recent devasting northern Ontario fires, the executive of the Mutual Fire Underwriters' Association held a meeting in Toronto on October 12. The association represents the seventy-two mutual companies at present operating in Ontario, and if the recommendation of its executives is implemented by the individual companies, the position of the policyholders in the defunct company will be quite secure. The recommendation, which was unanimous and strongly concurred in by the officials, is that the other Ontario mutual companies contribute an assessment of 12 cents for every $1,000 of insurance which they carry, and that this sum be devoted to caring for the Temiskaming company's liabilities and towards enabling it to continue its operations.

The Temiskaming company, which operated directly in the burned regions, was organized only two years ago, and thrived during its short history to the extent of gaining 243 members, who had policies totalling about $400,000. Its liability, as a result of the present disaster, will be in the neighborhood of $50,000.

The Temiskaming Company was a member of the Mutual Fire Underwriters' Association, and the directors of this organization now strongly recommend the proposed levy upon other mutual companies, which shall take care of the company's liabilities.

## BOTH YIELD AND QUALITY GOOD.

### Almost Every Class of Produce is Better Than Average—Drought Affected British Columbia.

In a final report on the 1922 crops, dated October 12, the Bank of Montreal says—

"Taken as a whole, the present year is one of the best that Canada has ever experienced as regards the quantity and quality of the crops. In the entire provinces the yield of wheat is estimated to be close upon 380,000,000 bushels, or some 100,000,000 bushels larger than next year, and yields of other grains are proportionately greater. Most of the grain is grading high. The province of Ontario probably never had a more splendid all-round crop than this year. The average has been considerably exceeded in practically every class of agricultural produce. Heavy crops have also been garnered in Quebec and the maritime provinces. British Columbia suffered from drought in the early part of the season, an unusual condition, which cut the yields to below average.

### Prairie Provinces

Owing to the early harvest, 7,000,000 bushels of new wheat were marketed in August and a further 95,000,000 in September, an abnormally large movement, with which the railways coped in an excellent manner. During the first two weeks of September threshing was delayed by rain, but owing to cool weather there was little damage from sprouting. Wheat is grading high, the bulk of the receipts running Numbers 1, 2 and 3 Northern. The yield of wheat is estimated to run from 350,000,000 to 380,000,000 bushels as compared with 280,000,000 bushels last year. Oats 400,000,000 bushels compared with 338,000,000. Barley 55,000,000 bushels as compared with 44,000,000.

### Province of Quebec.

The province's principal crop, that of Hay, proved unusually heavy and of excellent quality. Cereal crops throughout the province have been harvested in good condition, the yields being highly satisfactory. Roots are not quite as good as previously expected, and some rot has appeared in potatoes, which are barely an average crop. Most districts report a good supply of feed. So far as yields of crops are concerned, the present year has been one of the best for some time.

### Province of Ontario.

The yields of grains show an estimated average increase of 43 per cent., over last year. Fall wheat is estimated at 18,250,000 bushels, last year 13,650,000. Spring Wheat, 2,200,000 bushels, last year 1,900,000. Barley and rye 16.875,000 bushels, last year 11,825,000. Oats 122,150,000 bushels, last year 72,575,000. Peas 2,165,000 bushels, last year 1,450,000. Hay and clover 5,670,000 tons, last year 3,950,000. Corn average 10 tons per acre, same as last year. Potatoes average 150 bushels per acre, last year average 100 bushels. Other roots about same percentage of increase. Fruit crop much heavier than last year with exception of winter apples, which average only 80 per cent., of normal crop. Pasture in excellent condition all the season.

### Maritime Provinces

Hay crop exceptionally good. Oats also turned out well. Potatoes in New Brunswick and Nova Scotia will probably be a 50 per cent., crop, and in Prince Edward Island 75 per cent.

Other root crops and grain have been good. Fruit generally is average in quantity and of good quality. Annapolis Valley expects about 1,500,000 barrels of apples of above average quality against 1,750,000 barrels of poorer quality last year. The crops of both years have been well above average. Collectively, all crops will be above an average year, especially cattle feed.

### Province of British Columbia

Most crops below average due to drought. Hay was only from 40 per cent., to 50 per cent., of record crop of 300,000 tons last year. Cereals were only half average crop, a considerable proportion being cut green for fodder, with exception of peaches, fruits were smaller crop than usual. Okanagan apple output estimated at 1,900,000 boxes compared with 2,900,000 last year. Fraser Valley apple and pear crops a good average. In Ashcroft District potatoes highly satisfactory.

## (MUNICIPAL TAXATION IN CANADA)

(Continued from page 6)

The first year of the reduction not less than ten per cent. and not more than twenty-five per cent. of the assessed value of improvements, income and business assessment is exempted from taxation, and from year to year thereafter a further additional percentage, not less than ten and not more than twenty-five per cent., is exempted until the whole or such portion of such assessed value as may be fixed by the by-law is so exempted.

### Equalization of Assessment

Equalization of assessment is provided for in Ontario counties in order to prevent injustices to any municipalities within the counties. But there is no equalization as between counties and cities. During the war there was a provincial tax of one mill on the total assessment of the municipalities. Only because it was a war measure were the resulting injustices tolerable. If ever again such a provincial tax is imposed, a board having powers to equalize assessments, such as is found in some of the Western provinces, will have to be set up. An idea of what happens when assessments are equalized provincially may be obtained from the "Statistical Information Respecting the Municipalities of the Province of Manitoba" for the year 1921, published by the Provincial Government. Whether or not there is provincial taxation on the basis of municipal assessment, should there not be in every province a provincial Board of Assessment with supervisory powers over all local assessors and with authority to prescribe province-wide standards of training and efficiency for assessment officers? Many assessment officers are now thoroughly efficient. Should not all be well trained and efficient?

The most recent move in advance in this direction seems to be that taken at the latest session of the Saskatchewan Legislature. The Act passed, the Saskatchewan Assessment Commission Act, provides for the establishment of a permanent assessment commission, composed of three members, as a branch of the Department of Municipal Affairs. "It shall be the duty of the commission to exercise general supervision over the administration of the assessment provisions of the Municipal Acts of Saskatchewan, and to confer with, advise and direct assessors in the discharge of their duties."

Previous to the passage of this Act the Wild Lands Tax Commissioner of Saskatchewan had equalization duties with regard to rural municipalities, in that he fixed the aggregate assessment of these municipalities. The duties of the Wild Lands Tax Commissioner have been transferred to the commission. The present Act is the culmination of a gradual evolution since the passage of the Patriotic Tax Act in 1916 and that of the Wild Lands Tax Act in 1919.

### Summary

It is evident that there is no agreement as to—

1. What the legal provisions should be for the assessment and taxation of real estate;
2. What the practical interpretation of the law should be within any particular province.

Would not interprovincial conferences on real estate taxation and assessment tend to bring about—

1. Better provincial legislation;
2. More nearly uniform legislation;
3. Better methods in actual practice;
4. Higher professional attainments among assessors?

Only one province seems to be doing anything for the training of municipal officials. Should not the provinces, through the universities or otherwise, offer practical professional courses in real estate assessment and taxation to those officials, now actually performing the work, who may welcome the opportunity for further training?

## PARRY SOUND DISTRICT

Heavy rains have effectively quenched the many bush fires near Parry Sound, Ont., and cleared the air over the Georgian Bay of the pall of smoke which has been hanging overhead for some time past. Until very recently there has been no bush fires, and the seaplane service assisted greatly in preventing the spread of outbreaks. But a few days before the fires in Temiskaming a number of fires started in many parts of the district, which threatened for a time to become serious. The recent rains have saved the situation.

## AGENCY CONTRACTS IN LIFE INSURANCE

(Continued from page 4)

subsequently collect and pay to the company in cash premiums advanced under the non-forfeiture provision, he receives commission thereon at the regular rate.

(c) Where a policy is changed, no commission shall be payable on any allowance which may be made in respect of the old policy and applied to payment of the new.

(d) If the life assured is over a certain age at entrance, usually age 55, or if by reason of the life being sub-standard the premium is rated up above the premium at such age, or if by reason of the policy being issued jointly on two or more lives the premium is greater than the corresponding single life premium at such age, then the commission in respect of both first year and renewal premiums shall be calculated only on the amount of the corresponding single life premium at such age.

(Note: A lower rate of commission automatically is brought about by this clause, both on first year premiums and on renewal premiums, where a policy is issued with a premium greater than the ordinary premium at age 55 for the same plan. The higher commissions of the earlier years are, as before intimated, recouped from the premiums of the subsequent years, and when an age is reached, or some other condition applies, which makes the average number of premiums to be received insufficient for this purpose, a lowering of the rate of commission has to be provided for.)

(e) In the case of policies which are re-assured by the company, either in whole or part, the rates of commission on the premiums on the amount re-assured shall not be greater than those which the company obtains from the re-assuring company.

### Sharing Commissions

(f) Where business is secured with the assistance of any Officer, Superintendent, Inspector, or other representative of the company or in connection with a mortgage made by the company, or purchase of bonds or other securities by the company, such business shall for the purposes of the agreement be credited in proportion of one-half to the said agent and one-half to the other party or to the company. (Some companies allow no commissions in respect of any policy secured in connection with any mortgage or other loan or investment made by the company; other companies deduct from the ordinary commissions a certain percentage of the premium.)

(g) Where a policy is issued on a life previously assured in the company under a policy which has been surrendered or allowed to lapse within one year previous to the date of the new application, or which will lapse by default in payment of the next maturing premium, or, where a policy is converted, then commission in respect of the first year's premium on the new policy shall be allowed only for the amount by which the commission applicable to such new premium exceeds the commission which applied to the first year's premium on the surrendered, lapsed or converted policy. (Some companies leave the matter open by providing that commission in respect of the first year's premium on the new policy shall be determined by the company.)

### Cancellation of Policy

(h) If for any reason the company should desire to cancel a policy and return the premium or premiums paid thereon, then the agent shall lose all right to commission on such premium or premiums, and shall repay to the company on demand the commission received on such premium or premiums returned.

(i) Any expense incurred by the company in the collecting of a premium, or of a note, or other obligation given for a premium, shall be a first charge against any commission due to the agent under the agreement.

(j) No commission shall be allowed on any premium or portion thereof, which may be deducted by the company from any sum payable by the company in accordance with the terms of a policy, to the assured or beneficiary.

(k) If a policy shall lapse for a period of six months and be subsequently restored, except wholly through the instrumentality of the agent, the company shall not be liable to the agent for further commissions thereon.

### Miscellaneous Provisions

In addition to the provisions before noted, there are several others of more or less importance to be found in the agreements which exist between the companies and their agents. A summary of these is given:

1. That all existing agency agreements between the parties shall terminate from the time of the new agreement going into effect, but such termination shall not in any way release the agent from his liability to the company under any previous agreement with the company.

2. That the agent shall not assign any of his rights under the agreement and that the agreement shall not be binding on the company unless signed by the proper officers in its behalf.

3. That the only district within which the agent is to operate is the district named in the agreement but that the said district is not assigned exclusively to him, the company reserving the right to send any officer, inspector or other representative into such district to transact business as the interest of the company may require, and that the agent shall have no claim for commission on any such business, unless he assists therein and his name is on each application under which he claims commission.

4. That the agent shall not be entitled to any remuneration except as specified in the agreement, for services of any kind rendered to the company, and that the company may offset against any claims of the agent or his estate under the agreement any debt or liability due to the company by the agent as agent or otherwise.

5. That the agent will take out and keep renewed any license required by Statute and will also furnish to the company a guaranty bond satisfactory to it for the security of moneys coming into his hands and for the faithful performance of his part of the agreement. It is usual to require the agent, whether a District Manager, a District Agent or a Sub-agent, to pay his own license fee. In the case of the guaranty bond premium, this is paid by the company where the bond is issued on a Branch Manager, but in other cases is paid by the agent himself.

6. That the agent agrees to render the company every assistance possible to secure the retention of its business upon its books and in the collection of its renewal premiums.

7. That the agent shall not take legal proceedings in connection with any matter pertaining to the company's business without the consent of the company in advance and in writing.

### Observe Insurance Law

8. That the agent will not violate the terms of "The Insurance Act of 1917" or any amendments thereto in respect of rebating, discriminating, etc., or in any other respect and that the penalty for any such violation will be immediate dismissal from the company's service.

9. That the agreement shall not be deemed to be in any way altered or modified, nor any condition waived, unless such alteration, modification or waiver is made by the company in writing and states explicitly that it is intended to modify the agreement.

10. That the agent shall treat the agreement as strictly confidential.

11. That either party may terminate the agreement by giving to the other party notice in writing to that effect (sometimes a week's notice or a month's notice is required), but that such termination shall not in any way release the agent from any indebtedness due to him by the company and in connection with which and until same shall have been liquidated, the obligations and covenants of the agent under the agreement shall remain in full force and virtue.

### Benefits at Death, Termination and Retirement

The agency contracts of most of the Life companies now contain (a) provision for some continuation of commissions on the agent's existing business in event of the death or disability of the agent, or in event of the termination of his connection with the company, and (b) provision for some form of pension benefit on his reaching old age in the company's service.

The conditions governing these benefits and the payments granted under them are by no means uniform among the different companies and we cannot do more than review them broadly.

Let us consider first the benefits granted on death, total disability or termination of a contract. It is generally provided that no benefit will be granted after termination of a contract if the contract is terminated by reason of the violation of any of its terms. The benefit is further made conditional on the agency contract having been a minimum number of years in force. Such period, in the majority of cases, is made three full years. It, however, varies with the companies from two to four years. One company makes it two years in case of death or disability, but three years in case of voluntary termination of the agreement. Another usual condition is that the agent, during the period which the contract or agreement is required to have been in force as above, shall have produced a certain specified minimum amount of business in each of such years. The amount required in this connection is usually $50,000 yearly, on which at least one full year's premium has been paid in cash, and Term insurance and insurance on the agent's own life is excluded.

### Period of Benefits

The benefit granted to the agent or his estate if the above conditions have been fulfilled is the continuation after death, disability or termination of contract of the commissions which would have been granted in the terms of the contract on the agent's existing business, if he had continued in the company's service. It is, however, usually provided that the commission payments shall not in any event be continued for a period longer than that for which the contract had been in force at the time its termination took place. Other companies make the policy year to which such commission payments shall extend contingent on the period the contract has been in force. For example, if the contract provides that commissions under ordinary circumstances are payable up to the tenth policy year and the contract had been in force only three years at its termination, the commissions payable after the termination of the contract might be made to cease after the fifth policy year; if the contract had been in force four years, then to cease after the eighth policy year; if in force five years or more, then to continue to the tenth policy year. On the other hand, as an incentive to long service, some companies provide that commissions will be continued after the policy year ordinarily provided by the contract, if the agent has been, say, fifteen or more years in the company's service. For example, if the commissions ordinarily cease after the tenth policy year, it might be provided that if the contract were terminated by death or otherwise after fifteen years, the commission payments made after such termination would be continued to the twelfth policy year, while if the contract were terminated after twenty years' service, the commission payments would be extended to the fifteenth policy year.

Several of the companies make all commission payments made after termination of the agreement subject to a premium collection charge of from 1% to 2% of the premiums. It is usual to provide that any commission payments to be made after the agent has left the company's service shall cease if he enters the employ or is acting in the interests of any other life insurance company.

### Pension Benefit

This benefit, where granted by Canadian companies, is usually made subject to three conditions: (1) that the agent shall have reached a specified age, usually 60; (2) that the agent's contract with the company shall have been in force at least a specified number of years, usually twenty years; and (3) that a minimum amount of business shall have been produced by him in each contract year, on which at least one full year's premium has been paid in cash. In the majority of cases this amount of business is placed at $50,000 yearly. In one company it is made an average of $50,000 yearly. Another company makes the amount at least $50,000 yearly with premiums paid thereon in cash of at least $1,500.

The pension benefit granted on these conditions being fulfilled is usually a yearly income thereafter for life equal to the average yearly income from renewal commissions received by the agent in the last fifteen years, commissions in respect of premiums of the second policy year being excluded. The payment of this life pension is made conditional on the agent waiving his right to further commissions on all his existing business except commissions in respect of first and second years' premiums on such business. He is entitled, however, to receive all commissions on business written by him after the commencement of the pension. In some companies it is provided that should the agent die within five years from the commencement of the pension, the pension will be continued to the agent's estate for the balance of such five years.

**Our Bond Department**

This Bank has a complete Bond Department always at the service of clients. Constantly in close touch with financial markets, this service is invaluable to anyone contemplating investment of large or small amounts.

We deal in strongly protected securities, such as Government and Municipal Bonds.

**Why a Lawyer Should Draw Your Will**

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

## UPWARD MOVEMENT IN PERMITS

### Total Building Permits During August Show Increase of $2,695,099 Over July—Seventy Per Cent. Higher Than Last Year

Building permits issued in 56 cities showed a moderate upward movement during August, when the total value stood at $16,970,125, as compared with $14,275,026 in the preceding month, an increase of $2,695,099 or 18.9 per cent. The total, moreover, was $6,984,531, or practically 70 per cent. higher than August of last year, the 56 cities having issued permits to the value of $9,985,594 during that month.

Saskatchewan, Alberta and British Columbia showed increases in the volume of building contemplated as compared with July, while elsewhere there were declines. The building authorized in British Columbia, which was valued at $6,089,240, was 567 per cent. higher than in the preceding month. The expansion occurred mainly in Vancouver. Of the declines recorded in the remaining provinces, that of $1,554,867. or 21.2 per cent., in Ontario was the most decided.

As compared with August, 1921, Nova Scotia, New Brunswick and Manitoba reported less activity, the contractions being small in all cases. In the other districts the value of the building authorized showed increases, those of $5,207,152, or 590.3 per cent., in British Columbia, and of $1,372,139, or 31.2 per cent, in Ontario, being the most marked.

Of the larger centres, Vancouver alone showed expansion as compared with both July, 1922, and August, 1921. Montreal and Toronto registered declines in the former and gains in the latter comparison, while at Winnipeg there were losses in both comparisons.

Of the smaller centres, Westmount, Belleville, Oshawa, Stratford, St. Catharines, Windsor, St. Boniface, Saskatoon, Edmonton, Prince Rupert and Victoria recorded increases in both comparisons.

The following is a comparison of the value of building permits issued during August, 1922, July, 1922, and August, 1921:—

## WESTERNER SUPPORTS CANADIAN BANKS

### Credits are Granted Too Freely if Anything, and Too Much Capital Invested

A view of Canadian banking somewhat different from that usually ascribed to westerners is expressed in a letter recently received by W. M. Birks, president of the Montreal Board of Trade, from an Edmonton business man. It reads as follows:—

"During the course of the recent trip of your members through Western Canada statements appeared in the newspapers reported to have been made by Mr. J. H. Ashdown in Winnipeg, criticizing and condemning Eastern Canadian capitalists for not investing sufficient capital, and the banks for not granting sufficient credit in Western Canada. There was no opportunity given during the course of your short visit to Edmonton for any public utterance to be made in contradiction of Mr. Ashdown's statements, but I took an opportunity of stating to some of your members my entire disagreement with Mr. Ashdown's statements, and I now wish to give in greater length, my views on this subject in the hope that you will see fit to communicate them to your Board.

"I have been in Western Canada nearly 15 years, and have been in a position to observe the course of investments of capitalists of Great Britain and Eastern Canada, both as regards municipal corporations and private enterprises, and I am of the opinion that far too much capital has been invested in the West during that period, and that a very large proportion of it must have been lost or have become unremunerative. The position of the municipalities alone would be sufficient evidence of the excessive amount of capital so invested. As regards private enterprises, one cannot speak with as much freedom, but it would be interesting to learn how much capital has been lost in two such prime industries as coal and lumber.

"Western Canada has been in the position of a remittance man, and it has depended upon loans from outside sources rather than upon its own exertions. It must be evident to anyone who has given any consideration to the question, that a large part of the progress in Western Canada in recent years has been the result of expending borrowed money, and not on the hard work or efforts of the people themselves. The last ten years has been a period of little progress, due to the fact that in a few years from about 1910-1913, the capital that should have been spread over many years was expended, to a large extent unprofitably.

"As regards bank credits, my own opinion is that the banks grant credit too freely if anything, but as I am not in a position to learn what losses have been sustained in Western Canada during the last ten years, I will have to leave this part of the subject alone.

"In my opinion it would be a positive benefit to Western Canada if capital were withheld from it for some years, and so compel the people to live and progress by their own exertions.

"It is interesting to me to recall that during the period of depression which followed the outbreak of war, some public men in Western Canada blamed Eastern capitalists for having lent so much money. This was at least base ingratitude, but is, nevertheless, informative in view of the recent demand for more borrowed money.

"I could write on this subject at considerably greater length, but think I have said enough to express my views definitely and clearly."

## CANADIAN NATIONAL RAILWAY BOARD

### First Meeting Held in Toronto on October 10—Old Board Meeting at Same Time

The first meeting of the new board of directors of the Canadian National Railway was held in Toronto on Oct. 10. The retiring directors also held a brief session and formally executed the transference to the new directors of the Canadian National Railways, the Grand Trunk Railway, and the Canadian Northern Railway. Major Graham Bell, vice-president of the government controlled railways, presided in the absence of the president Sir Henry Thornton, who is on his way to England to wind up his affairs there before assuming his new duties in Canada. The retiring president and general manager, D. B. Hanna, presided at the final meeting of the former board.

### New Appointments

Following the meeting of the new directorate the following appointments were announced: W. D. Robb, vice-president and general manager of the Grand Trunk. S. J. Hungerford, vice-president and general manager of the Canadian Northern System. C. G. Bowker, general superintendent, Toronto, promoted to be vice-president and operating manager of the Grand Trunk Railway. W. R. Davidson promoted to general superintendent of Grand Trunk with headquarters at Montreal. R. A. Fish, general superintendent, Grand Trunk, Montreal, transferred to Toronto. Robert P. Ormsby, secretary of the Canadian Northern Railway, acting secretary of the new Board of Directors.

### No Interference

Hon. George P. Graham, Minister of Militia and Defence and acting Minister of Railways, handed out a statement to the newspapers after the meeting to the effect that Sir Henry Thornton, the new president, and his colleagues on the Board, will be given a free hand in their administration of the Government railways. Asked if it was the intention of the government to remove the headquarters of the system from Toronto, Hon. Mr. Graham said: "That is a matter which will be left entirely to the discretion of the new directors. They will be privileged to locate the headquarters at a place, which in their judgment, will work for the greatest success of the whole enterprise."

The acting minister of railways, who is filling the position in the absence of Hon. W. C. Kennedy who is ill, declared that the government controlled railways are the greatest public-owned utility in the world, and no doubt, with careful and proper management cannot but become a successful enterprise. Evidence of the future success of the government railways had been given under the guidance of the retiring president and general manager, D. B. Hanna.

Hon. Mr. Graham stated the annual inspection of the different systems will be proceeded with immediately, and the board started out last Monday to look over the eastern sections of the systems. Mr. Graham said Sir Henry Thornton will make the trip himself on his return from England. As large orders for rolling stock and rails had been already placed, it was essential that the directors should make an early inspection of the lines in order to insure delivery of supplies early next spring. It is expected that six weeks will be consumed in going over the lines.

### D. B. Hanna's Message

"It has been our constant aim to keep the Canadian National Railways free from anything that could be used to support a charge that the government's railway, steamship, express and telegraph services were being used for political purposes," said D. B. Hanna, in his good-bye message to the public, officials and employes associated with the system. "I can only say for myself, and those directors who retire with me, that nothing of the nature of political interference would have been tolerated while we were in charge. It is a necessary policy if efficient administration is to be obtained.

"In sending out this message of farewell, which will reach many of those with whom I have had practically a working lifetime's association, I desire to express my hearty appreciation of the friendly personal relationships and friendships which have resulted from our joint efforts to do the best in our power for the fine properties in which we were employed, and which properties I know we have felt are of such potential worth that they can be made great national assets. The way has not always been smooth and the work has been hard, but it has always been worth while because of those with whom I have had the pleasure of sharing the load."

**Verdun, Que.** Oct. 13th. Barns at the Monteith Bros., dairy farm, 2365 Lasalle road. Loss $5,000.

## MANITOBA SAVINGS BANKS

During the past year Manitoba Government's savings bank, with two branches in Winnipeg, has made a monthly profit over all expenses of $2,000, according to the annual report submitted to the provincial treasurer on October 13. The bank is averaging 30 new depositors per business day and now has 12,000 depositors. In the two years it has been in business it has accumulated deposits totalling $4,334,013, has paid off $33,544 advanced by the Government for initial organization, and now shows a net surplus of $10,000.

## CONFERENCE OF RESOURCES

A conference for the consideration of plans looking toward the control of natural resources will be held shortly in Winnipeg by representatives of Manitoba and at least one other Prairie Province, Premier John Bracken announced on October 17.

## ACCOUNTANT'S ASSOCIATION

At the annual meeting of the Accountants' Association in Montreal on October 17, the following officers were elected: President, L. Belanger; 1st vice-president, E. C. Baker; 2nd vice-president, L. E. Barry; secretary, A. J. M. Petrie; treasurer, J. T. Raymond; auditor, L. A. Hurtubise; directors, L. Belanger, E. C. Baker, J. A. Black, L. E. Barry, E. Briggs, J. E. Carpentier, T. Y. Foster, H. K. S. Hemming, H. F. Kerrin, L. P. Lortie, V. Pelletier, A. J. M. Petrie, J. T. Raymond W. T. Woodall.

## ONTARIO FIRE INSURANCE AGENTS

### Relations With Companies and Licensing Discussed at Annual Convention Held in Toronto This Week

The Ontario Fire Insurance Agents Association held its second annual convention in Toronto, October 17-18. John S. Dowling, of Brantford, in his presidential address referred to the success which had crowned the efforts of the Association in getting better control of unlicensed insurance in Canada. The Budget of last session contained a definite tax to be placed against all premiums paid by assured companies which are not duly licensed to do business in this country.

"While the amount of the tax is not as heavy as we advocated, yet I feel it is a step in the right direction," he said, "and will have two important influences on the assured. First, they will have to pay the tax, and, second, it will be annually brought to their attention that they are placing their business and sending their money outside of Canada. If they are good Canadian citizens it should naturally make them cast around to see if they cannot spend their money in Canada without disadvantage.

The address pointed out that one of the difficulties has been that there was little or no restriction in the matter of licensing agents. In some places people secured licenses to handle their own business. President Dowling said the matter of overhead and excessive commissions was one which would have to be cleared up. He suggested a strong committee to evolve a system that would do away with this evil.

Cecil Bethune, Ottawa, spoke on "Agents' Licenses"; R. H. Neeland, Fort William, dealt with "Resident Agents' Act"; John T. Truman, Hamilton, spoke on "Extending Our Association"; A. M. Bell, Midland, addressed the convention on the subject of "Local Agents' Advantage for Business." These addresses were followed by general discussions.

At a banquet held on Tuesday evening, E. P. Heaton, Fire Marshal of Ontario, addressed the Association on "Co-relation of Fire Insurance, Fire Protection and Fire Prevention."

### Licensing of Agents

C. Bethune, of Ottawa, stated that many agents have licenses who have no business to have them, some having no place of business and no indication to the general public that they write insurance. He cited as instances in Ottawa, a clerk in a Government department, and an employee of a corporation. The company manager, he said, is the root of the whole trouble: he should not appoint such agents. There was, however, a clause in the new Ontario law empowering the superintendent to refuse or cancel a license, and he might consult with a committee consisting of himself (the superintendent), a representative of the Agents' Association, and a representative of the companies, regarding such cases. Mr. Bethune urged that this power be exercised. It was pointed out, however, that where some one was found to be doing business without a license, there was no penalty, but all the superintendent could do was to require the person to take one.

It was also stated that the superintendent had asked the Canadian Fire Underwriters' Association to appoint a representative as the third member of the committee, but they had refused, as had also the Toronto Insurance Conference.

### Resolutions Passed

Resolutions were passed to the following effect:

1. Changing the name of the Association to "The Fire and Casulty Insurance Agents' Association."

2. Empowering the incoming board to apply for incorporation for the Ontario Fire and Casualty Insurance Agents Association.

3. To divide the province into five districts, eastern, northern, western, southern and central, with one vice-president and three or four council men in charge of each section, for carrying on the affairs of the Association.

4. That a permanent committee be appointed to render service to the estate of any deceased member, to protect his agency interests; this committee is to consist of the president and any others he may select.

5. The fiscal year to be changed to the calendar year and the present officers to continue to December 31st this year; the annual meeting to be held in October as usual.

6. That a special committee be appointed to deal with the drawing up of a standard form of agency contract between the companies and the agents; this committee consists of John T. Truman, J. K. Kernahan, and Jos. Murphy.

7. The Association went on record to the following effect:—

That it strongly resents the unfair practice of many insurance companies who pay excess or higher commissions to agents on risks located outside their local territory than that rate of commission payable in the territory in which the risk is located.

And that members of the Association will in future support only companies who protect the local agent and who restrict commissions to the local rate.

And further that due notice of this intention of the Agents' Association be forwarded to all fire and casualty companies: the following were appointed to deal with the above:—A. W. Bell, C. Bethune, J. T. Truman.

8. That this convention of Fire Insurance Agents of Ontario recommends to its members that they take up with those companies who are members of the Canadian Fire Underwriters Association the passing of a rule limiting commissions paid to brokers or agents of other provinces, whereby the local agent must receive a commission of at least five per cent. on all insurance covering property real or personal situated within the territory of the local agent. And that the Executive Committee of this Association use all proper means to further such a regulation.

### Suggest Change in Law

9. That this annual convention of Fire Insurance agents of the Province of Ontario hereby declares itself as being in favour of the inclusion of the following clauses in the Ontario Insurance Act.

1. No fire insurance company licensed under this Act shall make, write, place or cause to be placed, made or written any policy, duplicate policy or contract of insurance upon property, real or personal, situate in Ontario or described in any policy, duplicate policy or contract of insurance as situated in Ontario, except after the said risk has been approved by an agent of that company who is resident in this province and holds a certificate of authority from the superintendent and who shall sign or countersign all policies so issued and make a complete and proper office record thereof and receive the commission or any part thereof, when the premium stipulated in such policy, duplicate policy or contract of insurance is paid.

2. Nothing therein contained shall apply to direct insurance covering on rolling stock of railroad co-operation or property in transit while contained in said rolling stock.

3. No resident agent shall sign any blank policy or contract of insurance.

4. No resident agent shall give any power of attorney to persons residing outside the province of Ontario for the purpose of signing or countersigning any policy of insurance.

5. Any fire insurance company which issues a contract of insurance save as hereinbefore mentioned shall be liable for a penalty of not less than $100 for each contract of insurance so issued; and failing payment of the said penalty, upon request of the superintendent, shall have its license cancelled, and that the Executive of this Association be instructed to take this matter up with the proper authorities with all possible speed.

### Officers Elected

John S. Dowling, of Brantford, was re-elected president, and the other officers elected are:—

Vice-presidents—A. W. Bell, Midland; Cecil Bethune, Ottawa; E. Bonin, Port Arthur: Thos. Cook, Sarnia; John T. Truman, Hamilton; W. J. Burns, Windsor; Col. R. H. Neeland, Fort William.

Secretary-treasurer — Charles Priestman, Toronto.

Council—W. H. F. Ketcheson, Belleville; J. J. Mason, Bowmanville; W. E. Rispin, Chatham; S. L. Bradley, Cochrane; J. McDonnott, Elmvale; A. E. Lillie, Fort William; Hugh Murray, Hamilton; J. H. Burkholder, Hamilton; John K. Carrol, Kingston; G. H. K. Bingham, Kitchener; Jos. Murphy, Toronto; J. G. Gagnier, Windsor; V. Jackson, London; E. H. Neller, London; Geo. Mortimer, Niagara Falls; Wm. Martin, Jr., North Bay; Geo. Clark, Orillia; C. T. Kirby, Ottawa: T. E. Clendinnen, Ottawa; Alf. Stuart, Ottawa; Geo. Menzies, Owen Sound; R. Patterson, Owen Sound; L. S. Mackie, Pembroke; J. B. Jennings, Penetang; T. E. Burnham, Peterboro; J. K. Kernahan, St. Catharines: Geo. Geddes, St. Thomas; C. W. Burns, South River; J. Bassingthwaite, Sault Ste. Marie; J. W. Blair, Sault Ste. Marie; R. Thos. Orr, Stratford; C. H. Denton, Tillsonburg: Chas. C. Hall, Toronto.

## WILL COMMENCE OPERATIONS SHORTLY

### New Westminister Paper Mills Will Have Output of Fifteen Tons Daily.

Announcement is made by J. J. Herb, president of the Westminster Paper Mills, Ltd., of New Westminster, B.C., that with buildings completed and from twelve to fourteen cars of machinery on the grounds or en route from the east, the plant will commence to manufacture tissue paper about November 15.

Fifteen tons of crepe papers, plain tissue paper, toilet paper, towels, serviettes, bag papers and fruit wrap tissues will be the daily output. Mr. Herb expects to establish a good market for fruit wraps in the Okanagan Valley and other British Columbia fruit centres. The Westminster plant will be the only tissue paper factory west of Toronto and district.

Incorporated for $250,000, the officers of the Westminster Paper Mills, Ltd., include the following: President, J. J. Herb; sales manager, Michael Herb; secretary, H. M. Lord, and treasurer, A. M. Onkels.

---

## VALLEY FOOD PRODUCTS

The Valley Food Products, Limited, has been incorporated with a capital of $400,000, for the purpose of taking over the entire plant of the Nova Scotia Evaporators, Ltd., and establishing a dehydrating plant in the Annapolis Valley. The plant will be capable of employing a maximum of 2,500 hands within two years.

---

## NEW RECORD

According to recent advices the week ending September 17 saw several records beaten in the Abitibi Paper mills.

The daily production averaged 474.9 tons, with 775 pounds per inch of trim. No. 7 machine also made a new record of 89.49 tons on the 12th, and 92.32 tons on the 15th. The best previous record made on No, 7 was 87.56 tons.

The figure of 474.9 as the average daily tonnage for a week, is a good jump from the best previous record which was made in the week of August 6th, when 471.24 tons was made.

## OPPORTUNITIES FOR TRADE IN BRAZIL

### Demand for Canadian Goods in Southern Republic

"There are many wonderful opportunities for trade between Canada and Brazil, but neither Canadian Government or Canadian exporters are doing anything to develop those chances," said Mr. George M. DeVeer, who was in Halifax recently. He is a British resident of Pernambuco, one of the large commercial centres of the southern republic.

Mr. DeVeer, who has had for a number of years very intimate business associations with Nova Scotia and Newfoundland fish exporting houses has made a very close study of the opportunities which Brazil offers for Canadian trade. The situation he described as somewhat extraordinary. It was incomprehensible that between two such great countries with products so dissimiliar, no effort on the part of the Dominion of Canada was being made to place their proucts upon the Brazilian market and capture not a share of the trade, but a very large portion of it, for the Canadian exporter. Among the peculiar features of the conditions now existing which directly militate against any trade development between the two countries were the following:—

#### Trade Features

There is no money exchange between Brazil and Canada today. Money transfers are made either on the New York or London market—usually the latter.

There is only one Canadian Trade Commissioner in all Brazil.

The very first essential is for Canada to establish in the country a trade consulate similiar to the American with the most representative men procurable as her consuls.

Canadian goods are in demand, but are not available, owing to lack of transportation facilities.

Brazilians are dissatisfied with American goods because American export houses do not ship what they want

Better transportation facilities; adequate and efficient trade agents and consuls; the packing of goods as the Brazilians want them; the establishment of a money exchange between the two countries and the wide dissemination of knowledge regarding Brazil are absolutely essential to the development of Canadian trade.

Mr. DeVeer said that, if these matters were taken up in an efficient, energetic and liberal manner by the Canadian Government, Manufacturers' Associations, Export Associations, Boards of Commerce, individual exporters and the press, there should be no difficulty to develop an extensive trade between the two countries.

## VISIT DRUMMONDVILLE

A party of over fifty people went to Drummondville, Que., on October 9, in a special train from Farnham to look over the industrial development of the town of Drummondville. It is said that Farnham intends to sell its power plant to the Southern Canada Power Company. They went through the plants of the Jenckes Canadian Co. Ltd., the Canada H. W. Gossard Co. Ltd., the Butterfly Hosiery Co., Ltd., and the Dominion Silk Dyeing and finishing Co. They also visited the power plant of the Southern Canada Power Co.

## C. G. M. M. SERVICE

If the farmers of the Maritime provinces will guarantee shipments of produce, the Canadian Government Merchant Marine will inaugurate a two-boat steamship service, starting the end of October, between St. John and ports in the southern states. Such was the condition given by C. D. Shipley, Amherst, who attended a conference at Sackville on September 29, of representatives of the Canadian government merchant marine and maritime shippers.

Mr. Shipley said the merchant marine would expect the farmers of the maritime provinces to supply products each trip that would include 20,000 bags of potatoes, about 50 tons of hay, and about 5,000 bags of turnips. The proposed service would be between St. John, N.B., and Norfolk, Baltimore, Charleston, Savannah and Jacksonville, in the southern states.

# Decline in Canadian Trade

### Twelve Months Imports From United Kingdom Fairly Good—Imports from United States Show Considerable Reduction—Exports to Great Britain Increase Thirty Million Over Last Year

Although Canada's trade for the twelve months ending August 31, 1922, shows a monetary decline of about four hundred and sixty million dollars from the same perriod last year, there is no doubt that, had the same prices prevailed this year as during last year, the trade figures for the twelve months would have almost equalled the previous figures.

In order to bring out this statement more clearly it is necessary to make some comparisons. During the twelve months ending August 31, 1921, Canada exported 3,688,820 hundredweight of mechanical pulp for which was received an amount of $11,194,430. For the same period in 1922 a total of 6,356,264 hundred weight of mechanical pulp was exported. or almost double the previous amount, for which was received the sum of $10,419,599. Another instance is that of cattle, when in 1921 a total of 284,376 were exported valued at $20,396,077. During the same period of the present year 222,673 cattle, or 61,703 less than the previous year, were exported valued at $8,091,017.

The above are only a few comparisons made in order to show the reduction in prices, as compared with former years, and, of course, these reductions also apply to imports.

Considering the reduction in the price of commodities, imports from the United Kingdom, while being twenty-four million below last year, can be considered fairly good. On the other hand, imports from the United States show a considerable contraction from last year, being down by almost one hundred and ninety million dollars. The 1922 total is also lower than that of 1920 by almost forty-five percent.

With the United States putting on higher tariffs on imports into that country, Canada has found it necessary to turn to other countries for exporting her goods, and, of course, she naturally turns to her best customer, Great Britain, where exports have increased by thirty million dollars over last year. As was to be expected, exports to our neighbors across the line show a decrease from the two previous years.

A comparison of Canada's trade for the twelve months ending August 31, 1920, 1921 and 1922 is given herewith:—

SUMMARY OF THE TRADE OF CANADA.

1. — Imports and Exports of Canada by Main Groups.
Twelve Months ended August.

| Main Groups. | 1920<br>$ | 1921<br>$ | 1922<br>$ |
|---|---|---|---|
| IMPORTS FOR CONSUMPTION. | | | |
| Agricultural and Vegetable Products | 289,520,953 | 211,457,178 | 160,888,940 |
| Animal Products | 91,985,587 | 47,072,355 | 45,868,617 |
| Fibres and Textiles | 310,875,386 | 152,161,679 | 152,017,896 |
| Wood and Paper | 51,794,535 | 47,891,082 | 35,173,211 |
| Iron and Its Products | 228,509,213 | 182,101,077 | 116,547,375 |
| Non-Ferrous Metals | 60,412,391 | 41,458,373 | 32,275,636 |
| Non-Metallic Minerals | 152,089,080 | 190,262,480 | 116,057,801 |
| Chemical Products | 38,608,102 | 29,126,294 | 25,756,897 |
| Miscellaneous | 72,369,041 | 59,747,524 | 47,805,522 |
| Total Imports | 1,296,164,318 | 961,278,042 | 732,391,895 |
| Dutiable Goods | 850,756,218 | 665,762,157 | 487,006,744 |
| Free Goods | 445,408,100 | 295,515,885 | 245,385,151 |
| Duty Collected | 210,825,984 | 138,816,244 | 127,484,256 |
| EXPORTS, (CANADIAN). | | | |
| Agricultural and Vegetable Products | 374,283,128 | 450,596,902 | 333,280,076 |

# Ontario Oil Production Lower

By VICTOR LAURISTON

Official figures of the crude oil output for the various Ontario fields, for the six months ending June 30, 1922, show a decline from the same period in 1921. The aggregate output for the six months of 1922 is practically 76,003 bbls., compared with 83,674 bbls. last year, a decline of 6,671 bbls.

This represents the major part of the Canadian crude oil output. There is a limited production in New Brunswick, which will average 500 to 600 bbls. a month, and a some what similar, though perhaps slightly larger output, in southern Alberta, in the Okotoks field, southwest of Calgary.

There has also been an output from the Fort Norman area, where Imperial Oil, Ltd. has a little production from the Discovery Well; during the winter and spring this was merely nominal but in July it was increased to 70 bbls a day by deeper drilling. The Fort Norman production is however not shipped but is used in the north for engine and fuel purposes.

The Ontario crude output though it represents the major part of Canada's crude oil output represents also only about 2 per cent. of the crude oil required to operate the refineries of the Dominion. Most of Canada's requirements are supplied from the United States supplemented by some oil from Peru and Mexico.

Lambton county is still the largest oil-producing county in Ontario with an aggregate of 54,732-17-35 bbls. in 1922, compared with 56,851 20-35 bbls. in 1921. Kent county comes next the production there being 15,321 9-35 bbls, this year, compared with 20,893 3-35 bbls. last year. Middlesex, Elgin and Brant follow in the order named

Drilling for oil in Ontario is practically at a standstill. The older fields have been pretty thoroughly tested and determined; and their limits defined by drilling. The discovery of oil in the Trenton formation in Dover township a few years ago has stimulated deeper drilling; but so far the results have been rather disappointing, though some of this deep drilling is still being carried on. The chief producing areas have been yielding oil for a long time, Petrolia dating back to about 1860, the present Oil Springs field to 1881, and the Bothwell field to 1894.

The detailed figures for the various pools in Ontario for the six month period in 1922 and 1921 are given below:

| Pool | 1922 Bbls. | Gals. | 1921 Bbls. | Gals. |
|---|---|---|---|---|
| Lambton County— | | | | |
| Petrolia-Enniskillen | 31,552 | 18 | 33,428 | 19 |
| Oil Springs | 18,537 | 8 | 18,755 | 24 |
| Dawn Township | 216 | 34 | ....... | .... |
| Moore Township | 3,165 | 21 | 2,646 | 19 |
| Sarnia Township | 1,260 | 6 | 2,020 | 28 |
| Kent County— | | | | |
| Bothwell | 11,217 | 33 | 13,543 | 11 |
| Tilbury East | 126 | 32 | 432 | 5 |
| Dover West | 3,578 | 3 | 3,560 | 23 |
| Raleigh Township | 398 | 11 | 2,037 | 14 |
| Thamesville | ....... | .... | 1,319 | 20 |
| Elgin County— | | | | |
| Dutton | 246 | 1 | ....... | .... |
| Brant County— | | | | |

## SLIGHT INCREASE IN EMPLOYMENT.

### More Than Five Thousand People Working in August than in July.

According to reports received by the Employment Service of Canada, the volume of employment as reported by employers showed a further increase on a small scale during August, maintaining the upward movement evidenced uninterruptedly from the beginning of April, since when approximately 100,000 persons have been added to the staffs of the concerns reporting, a percentage gain of nearly 13 points.

A total pay-roll of 768,652 workers was registered by the 6,148 firms making returns for the month under review, 756,069 of these being actually at work at the end of August, as compared with 750,960 employees on July 31. This increase of rather more than 5,000 persons caused the index number to rise slightly from 93.1 on the latter date to 93.7 at the close of August, as compared with 88.7 for the corresponding month of last year. Nominal improvement had also been recorded at that time, but the expansion during the summer of 1921 generally was considerably less pronounced than in the last few months.

The volume of employment afforded in the manufacturing industries as a whole showed an increase during August, the gains in iron and steel and fruit and vegetable canning exceeding those in the other divisions. The commencement of seasonal operations in logging camps also caused noteworthy gains. On the other hand, activity in railway construction and on street railways, as well as in a few other industries, declined to some extent.

### Manufacturing.

The level of employment in the manufacturing division was higher during August than at any time since the middle of December, 1920, standing over 7 points above that than of August 31 of last year. Reports were received from 4,019 manufacturers employing 420,879 persons, as compared with 416,699 employees on July 31, an increase of 4,180 workers or 1 per cent.

Automobile, fruit and vegetable factories, copper smelters and refineries, tin can, boot, shoe, fur, pulp, paper, tobacco and electrical apparatus works were considerably more active.

On the other hand contractions were evidenced in saw-mills, rubber, textile and petroleum product factories. The tendency during August of last year was downward, the closing of the railway car shops at the end of the month having affected employment materially.

### Trade Unions.

There was a further slight increase in employment as reported by 1,474 labour organizations representing 148,408 members, of whom 96.4 per cent., were working at the end of August as compared with 95.9 per cent., at the end of July and with 91.3 per cent., in August of last year. This improvement, which was of a general character, caused the curve of employment in the chart again to be higher than at any time since September 1920, and the level for the month under review was only slightly lower.

Slight increases in activity, as compared with July, were indicated in all provinces except Nova Scotia and British Columbia, where the declines were nominal. Unions in all districts were considerably more fully engaged than in August of last year.

INCREASE YOUR INCOME

Suppose we tell you how in 6 months you can add 25% to your present income, or in a year how you could double it—will you be interested—of course you will—

# *Municipal Finance*

**Edmonton, Alta.**—For the period from January 1 to August 31, all the civic utilities show a surplus revenue over operating expenses plus interest, sinking fund and depreciation. The following statement shows the surplus or deficit of each utility:

| | Surplus | Deficit |
|---|---|---|
| Telephone | $ 54,765 | |
| Waterworks | 30,741 | |
| Electric Light and Power | 90,346 | |
| Street Railway | | $3,471 |
| Power Plant | 51,362 | |
| | $227,214 | $3,471 |
| Net Surplus | $223,743 | |

The net surplus is taken into current revenue as taxes, thereby relieving the tax levy on property to that extent.

It will be seen from the above statement that the only utility to show a deficit to the end of August is the street railway, but it is expected that with the increasing traffic during the winter months, this utility will show a profit over all expenses, including fixed charges at the end of the year. The whole system has been reorganized and the results can be judged when it is pointed out that in 1920 the street railway showed a deficit of $200,191. The utilities, as a whole, showed a deficit of $89,187 in 1920, compared with an estimated surplus this year of $400,000.

**Hamilton, Ont.**—Speaking before the board of control on October 3, W. H Davis, city treasurer, stated that during 1921 the net debt had increased to a greater extent than in any other year preceding the time between 1910 and 1920.

Mr. Davis explained that from January 1 to August 31, of the current year, Hamilton's gross debt had jumped to the alarming height of $1,625,698. This did not include the $750,000 Hamilton Hydro debenture issue for the erection of the commission's new quarters on King street east; neither did it include the following items: $139,000 debenture issue for the mountain roadway; $325,000 estimated expenditure required for the erection of the proposed collegiate institute; $250,000 for the new highway entrance on York street; $500,000 as Hamilton apportionment for the good roads scheme, and also the anticipated heavy expenditure for the sewage disposal plant.

"You will have to cut down on capital expenditures for the next two years, if you want to pull out all right," warned the treasurer.

**St. Thomas, Ont.**—The first months' operation of the city street cars with the seven-cent fare in vogue has proven highly satisfactory to the department and the experiment will be continued for another month at least, Manager Charles Johns reported to the city council that the total operating deficit for the period from August 26 to September 26 was $116, the smallest monthly deficit on record. The deficit for August of this year with the straight five-cent fare charged, was nearly $600, while the deficit in September, 1921, was nearly $1,000.

**West Hamilton, Ont.**—The rate of taxation for the current year has been struck as follows: School rate, 27.7 mills; county rate, 13 mills; township rate, 2.5 mills: and street lights, 2.4 mills, making a total of 46 mills on the dollar.

**Qu'Appelle, Sask.**—The tax rate for the current year has been struck at 19 mills on the dollar, an increase of 4 mills over previous rates. The rate is made up as follows: General and debentures, 29 mills; public school, 13 mills; high school, 5 mills; public revenue, 2 mills.

**Hamiton, Ont.**—Out of an appropriation of $595,792 for the year, the works department has spent up to the period ending September 30 an amount of $444,195.

**Peterborough, Ont.**—The total assessment of the city now stands at $24,547,095, which is an increase of $909,345 over last year.

**New Westminster, B.C.**—The city sold a total of twenty-nine parcels of land at the tax sale, and received a total of $4,498.

**Point Edward, Ont.**—Tax collections up to the end of September reached a total of $11,171.

**Hespeler, Ont.**—The assessment roll for the year has just been struck and shows the following assessments: Lands, $244,745; buildings, $1,302,495; business, $233,115; taxable income, $43,399; making a total of $1,823,754, or an increase of $12,000 over the previous year. The total population has also increased by 54 over 1922.

**Swift Current, Sask.**—At a representative meeting of ratepayers on October 5 the city council was empowered to execute an agreement with the city's creditors whereby the financial controversy is at an end for the next five years at least. At the end of this period a new arrangement, probably spread over forty years, will be entered into based upon the city's ability to liquidate as indicated by the experience during the coming five-year period.

Representattves of the bond holders agree to a proposal that the maximum interest assessment which could be levied in any one year of the five-year period would be three per cent.

**Hamilton, Ont.**—Up to the end of September, $39,671 in licenses of all kinds had been taken in by the city, as compared with $28,635 to the end of the same month in 1921. The estimated revenue for this year is $42,000.

**Regina, Sask.**—The city assessor's office collected during the month of September an amount of $68,199. Tax arrears were represented in this amount as follows: 1918, $7; 1919, $8; 1920, $3; and 1921, $19,734. The remainder represented $47,596 of 1922 taxes and $1,769 of sundry collections.

**Oshawa, Ont.**—H. James, tax collector, stated on October 13 that approximately 75 per cent. of the total amount of taxes due had been paid. Arrears are now bearing interest at the rate of 3 per cent. The total amount of the tax roll for the year 1922 was $330,827, while the amount collected up to October 10 was $250,685. Last year the total amount on the tax roll was $300,157 and the amount collected up to October 10 of last year was $227,000.

**Winnipeg, Man.**—The city's general civic expenditure for the eight months ending Aug. 31, was $200,000 below estimated expenditure, according to a statement presented to the finance committee. Appropriations for the period were $1,954,406 and expenses $1,732,335. The month's expenditure was $274,579 against an estimate of $251,131.

**Hamilton, Ont.**—The condition of the city's finances to the end of the first nine months of 1922 is revealed in a report on controllable expenditure issued by R. J. Menary, city accountant on October 10. Expenditures to date have reached a total of $1,903,580, which leaves $810,920 of the total appropriation of $2,614,501 with which to complete the three months of the year yet remaining.

**Montreal, Que.**—On October 7 Assistant City Treasurer Collins announced that the total receipts on the realty tax so far this year amounted to $8,534,127, as compared with $8,165,197 last year, representing an increase of $368,939. This sum is about 55 per cent. of the total amount due. The accounts settled to date number $24,861, or an increase of 1,219 over those paid at the same date a year ago.

**Kitchener, Ont.**—According to the fourteenth annual report the assets of the Kitchener Hydro-Electric system are $552,602, including balances and sinking funds, etc. Total assets are $653,652. Total liabilities are $253,381. The percentage of net debt to the total liabilities is 39.0 per cent.

**Victoria, B. C.**—At a meeting of the city council on October 2 it was decided that water rates on all quantities over the first 600 cubic feet will be increased two cents per cubic feet, the change to take place at once. The new rate will add $1,600 to the city's revenue this year and $6,000 for the twelve-month period in 1923.

**Kingston, Ont.**—The assessment report for 1923 shows that total assessment of the city is now $16,628,970, as compared with $16,248,323 during 1922, an increase of $380,647. Tax exemptions during 1923 amount to $5,348995, as against $5,091,560 in 1922. The population of the city has decreased from 22,234 to 21,975.

**Mimico, Ont.**—Assessment figures for the town, which have just been completed, show an increase of $570,000 over last year's. The new assessment of the town is now $3,060,000, as compared with $2,490,000 last year.

## MUCH TIMBER DESTROYED

Thirty million feet of spruce timber has been destroyed by fire in the McArthur timber limits on the Athabasca River, according to Col. R. H. Palmer, head of the forest service for Northern Alberta.

## UNION OF B.C. MUNICIPALITIES

### Resolution Passed Asking For Appointment of a Public Utilities Commission.

The Union of British Columbia Municipalities held its annual convention at Kamloops, B. C., October 4-5. C. F. McHardy, mayor of Nelson, was elected president, and J. J. Johnston, mayor of New Westminster, vice-president. The other officers elected were:—Second vice-president, Reeve L. E. Marmont, of Coquitlam; secretary, A. Wells Gray; executive, Reeve A. Lockley, of Esquimalt; Reeve W. H. Lembke, of Point Grey; Mayor H. B. Rochester, of Prince Rupert; Reeve R. D. McKenzie, of Surrey; Mayor W. Marchant, of Victoria; Mayor C. F. Costerton, of Vernon; Reeve J. Chamber, of Penticton, and Reeve J. F. Watson, of Saanich.

Prince Rupert was the place chosen for next year's convention.

### Resolutions

A resolution was passed containing a request to the provincial government for the appointment of a public utilities commission to consider and decide all disputes between municipalities and utility companies. This resolution was adopted after a spirited debate, many of the delegates being strongly of the opinion the matter should be left in the hands of the executive. Ald. Bruce Watson, of North Vancouver, was the chief advocate of the resolution, contending that under such an arrangement Greater Vancouver could deal more effectively with the B. C. Electric Railway Co.

Among the other resolutions adopted were the following:

Exemption of tax sale lands from succession duties in arrears against them.

Reference to the inspector of municipalities to decide whether a dispute with utility company must be referred to the ratepayers.

Amending the poll tax act so that payment of the current year's ordinary taxes exempts from payment of the preceding year's tax.

Requesting the provincial government to care for indigent prisoners discharged in a municipality.

A resolution opposing the dole system for relief purposes was also adopted, as was one favoring the collection of taxes, federal, provincial and municipal under one head.

## BOUGHT OWN PROPERTY FOR TAXES

In the County Court at Halifax on October 5, Judge Wallace delivered judgment in the City of Halifax vs. Branch, an action brought by the city against defendant for sewerage rates on a Yale street property. The property was originally bought by defendant in 1876. His Honor found a transaction with Mr. Shand at a later date did not affect the legal question in the case.

In 1910 a sewer was constructed on Yale street and it ran in front of this property, and the sewerage assessments were made in the regular way. Defendant did not pay the assessments on the property and it was sold by the city for taxes, after having been duly advertised as in his name. The property was bought in by the defendant himself for a sum less than the sewerage rates, and the ordinary tax deed was given to him.

"It is contended by defendant that the tax sale and the subsequent conveyance of this property by the city to the defendant under a tax deed canceled the liability for sewerage rates, and that the city having exercised its option and sold the land to the defendant, had no further claim upon the defendant for these assessments. But I cannot agree with this view. A careful examination of the relevant sections of the City Charter indicates that the assessment for the sewerage rates imposes not only a lean upon the real estate but also a personal liability. In my opinion this personal liability is not released by the fact that the owner of the property bought in the property at a tax sale. The city could not be expected to bid up this property. The statutory lien given the city operates as an additional security and remedy against an owner of real estate but does not discharge the personal liability even in the somewhat peculiar circumstances of this case."

His Honor adjudged the city entitled to judgment.

## MAKING STUDY OF AUSTRALIAN TRADE.

### Hon. J. A. Robb Will Sail For Australia on October 20.

In view of the visit of Hon. J. A. Robb, Minister of Trade and Commerce, who left Ottawa a few days ago to sail from Vancouver on October 20 for Australia, where he will continue, on behalf of the Canadian government, negotiations with the Australian government looking to the execution of a reciprocal trade, close study is now being given by various experts as to the trade situation between the Dominion and the Commonwealth. Detailed trade figures show that Canada's exports to Australia are at the present time almost ten times greater than Australian exports to Canada, and this rather one-sided position, it is expected, will play an important part in the negotiations.

### Imports Increase.

Imports from Australia, however, are increasing rapidly, while Canadian exports to Australia have decreased. In the twelve months ending August, imports from Australia more than doubled, as compared with the twelve months preceeding. In the year ending August, 1922, they totalled $1,362,782; in the twelve months ending August, 1921, $652,542. On the other hand, Canadian exports to Australia in the same periods were: 1922, $13,595,138; 1921, $15,169,966, a decline of rather more than a million and a half.

Negotiations for a preferential trade agreement with Australla have been under way for some months. The Canadian Manufacturers Association, in memoranda submitted to the government, have urged, in support of a preferential agreement, that Australia could well buy from Canada many products which she now takes from the United States, such as lumber and fish products. Other outstanding Canadian products which, it is contended, should have preference in Australia are agricultural implements, wood pulp, paper and paper products. In return, it is argued that Canada might take from Australia many of the dried fruits she now takes from the United States.

### Australian Appraisal.

Another point urged for consideration is the Australian system of customs appraisal. The Australian law, it is claimed, applies ad valorem on values which are based on the "home" market value of the goods in the country of export with the result, as a rule, that Australian duties on goods made in Canada are higher than on like goods produced in the United States.

Australia, the Canadian manufacturers have emphasized, is the one outstanding British English-speaking dominion that has not agreed to establish British tariff preferences with Canada and they argue that, if the Australian British preferential rates had been extended to Canada, a large proportion of the goods supplied to Australia by the United States could have been supplied by Canada.

# *Government and Municipal Bonds*

With war troubles in Europe diminishing at a fast rate, and financial conditions throughout the Dominion showing an improvement, the government and municipal bond market is showing symptoms of settling down for an active session during the coming winter.

Various influences point to this activity, such as the enormous amount of money which will be distributed after the crops have been harvested. It is generally estimated that the money received from the crops will be approximately two billion dollars.

Another factor entering into the discussion of the coming activity is the law of supply and demand. At the present time the supply of high class government and municipal bonds continues to be extremely limited, and a survey of the bond houses shows that the dealers are housecleaning in preparation for the coming Winter. With the exception of the twenty million Ontario issue, sales during the present month have not been very heavy, and practically all the issues were absorbed by investors immediately after being sold to the dealers.

Probably the most important feature in connection with the lack of offerings, is the condition of the New York market, where, it is stated, there is a fairly acute shortage of all kinds of offerings, and that there is a plentiful supply of money lying idle, waiting to be put into profitable ventures. This statement is brought out in the fact that the United States Government offered half a billion, 4½ per cent., 30-year bonds on October 8, and within a few hours after the project was made public, the offering was oversubscribed to almost double that which was first offered. If the condition of the New York market continues in this trend it is almost certain that American bond houses will be bidding for Canadian issues, and will be willing to quote a higher price than Canadian houses in order to secure the bonds. Should the market run in this course it will undoubtedly leave a dearth of bonds on this side of the line, and this in turn will have the effect of stimulating the Canadian market to increased activity.

The outlook for future issues continues bright with numerous municipalities preparing to issue debentures to cover their local improvements made during the past year. Whether the Dominion Government will make an issue this year is not definitely known at present, although it is generally anticipated that such an action will occur before the end of the year, as it is known that in the neighborhood of one hundred million dollars out of the total issue of $178,000,000 of the 1922 Victory Loan has been converted. The remainder of the issues will be paid in cash before December 1, so that it is probable that the government will make a definite announcement of its policy before that date.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Tenders close |
|---|---|---|
| Ottawa, Ont. | $2,639,883 | Oct. 20 |
| Vancouver Sew. Board | 300,000 | Oct. 26 |
| Montreal East, Que. | 250,000 | Oct. 30 |
| Verdun, Que. | 175,000 | Oct. 23 |
| Halton County, Ont. | 46,000 | Nov. 3 |
| Kenora, Ont. | 41,217 | Nov. 13 |
| Coaticook, Que. | 40,000 | Oct. 30 |
| Drummondville, Que. | 30,000 | Nov. 2 |
| Westbury, Que. | 18,500 | Nov. 6 |

**Halton County, Ont.**—Tenders will be received up to November 3, 1922, for the purchase of $46,000, 5½ per cent., 20-instalment debentures. D. Hutcheon, treasurer, Milton, Ont.

**Montreal East, Que.**—Tenders will be received up to 5 p. m., October 30, 1922, for the purchase of $250,000, 6 per cent., 15-year debentures, dated August 1, 1917, and due August 1, 1932. Debentures are payable August 1 and February 1 at the Bank of Hochelaga at Montreal and Quebec, or at the National Park Bank, New York, at the option of the holder. The debentures are issued in two series: series "A" comprising 300 debentures in denominations of $500 each; and series "B" comprising 100 debentures in denominations of $1,000 each. J. Emery Coderre, secretary-treasurer, 5430 Notre-Dame street, Montreal East.

**Coaticook, Que.**—Tenders will be received up to 5 p. m., October 30, 1922, for the purchase of $40,000 debentures. The issue is made up as follows: $10,000, 6 per cent., 15-instalment debentures payable June 1 and December 1 at the Canadian Bank of Commerce, Coaticook; and $30,000, 6 per cent., 20-year debentures, dated June 1, 1922, with interest payable June 1 and December 1. M. R. Chartier, secretary- treasurer.

**Kenora, Ont.**—Tenders will be received up to November 13, 1922, for the purchase of $11,217 consolidated debt, and $30,000 school debentures. F. J. Hooper, town treasurer.

**Drummondville, Que.**—Tenders will be received up to 8 p. m. November 2, 1922 for the purchase of $30,000 5½ per cent., 30-year school debentures. The bonds are in denominations of $500 and $1,000. Gaston Ringuet, secretary-treasurer of school commissioners.

**Westbury, Que.**—Tenders will be received up to 8 p. m. November 6, 1922 for the purchase of $18,500, 6 per cent., 20-instalment debentures. J. A. Girard, secretary-treasurer, East Angus.

### Coming Issues

**St. Lambert, Que.**—The ratepayers passed a by-law for the issuing of $975,000, 5½ per cent., 30-year debentures for various local improvements. Just as soon as permission is received from the provincial government, the city will call for tenders.

**Kenora, Ont.** —At a meeting of the council on September 25 they passed several debenture by-laws amounting to $19,282 for local improvements.

**Point Grey, B.C.**—The municipal solicitor has been instructed to prepare a money-by-law for the purpose of erecting an electric generating plant and street lighting system at an estimated cost of $135,000.

**Rolph, Buchanan & Wylie Twps. Ont.**—The council has passed a debenture by-law for $600 for school purposes.

**Preston, Ont.**—The council on October 2 passed a by-law authorizing the expenditure of $52,000 for school purposes.

**Caledon Township, Ont.**—On October 9 the ratepayers passed a by-law for the issue of $32,000, 5-year debentures for the purchase of a telephone system.

**Fernie, B.C.**—The ratepayers have passed a by-law authorizing the expenditure of $32,000 for school purposes.

**Montreal, Que.**—The Catholic School Commission will shortly be issuing $2,300,000, 5 per cent. 20-year debentures.

**Coaticook, Que.**—M. R. Chartier, secretary-treasurer informs "The Monetary Times" that the $40,000 debenture issue, for which tenders were called up to October 9, was not awarded on that date on account of the absence of the majority of the members of the council. The debentures are being offered again.

**Niagara Falls, Ont.**—The city council passed a by-law authorizing the expenditure of $100,000 for improvements to the electric light system.

**Parkhill, Ont.**—Ratepayers approved by-law authorizing improvements to water works system at a cost of $3,000.

**New Toronto, Ont.**—On October 16 the council passed a by-law authorizing the issuing of $67,500 debentures for the erection of a new school.

**Ford City, Ont.**—The Roman Catholic Separate School Board has passed a by-law authorizing the issuing of $14,000, 6 per cent., 20-instalment debentures.

**Brooklands, Man.**—The ratepayers have passed a by-law authorizing the expenditure of $40,000 for school purposes.

**Blenheim, Ont.**—The school board has asked the council to issue $40,000 debentures for the erection of a new school.

**Hanover, Ont.**—On October 16 the ratepayers passed a by-law authorizing the expenditure of $135,000 for additions to the waterworks system.

**Swansea, Ont.**—Ratepayers voted in favor of erection of a fire hall at a cost of $18,000.

### Bond Sales

**Wentworth County, Ont.**—Kerr, Flemming & Co., have purchased $188,339, 5½ per cent., 20-instalment debentures at a price of 100.427, the money costing the county approximately 5.45 per cent. Tenders were as follows:

| | |
|---|---|
| Kerr, Flemming & Co. | 100.427 |
| Bell, Goulnlock & Co. | 100.41 |
| Canada Bond Corp. | 100.39 |
| R. C. Matthews & Co. | 100.177 |
| A. E. Ames & Co. | 100.39 |
| Dominion Securities Corp. | 99.09 |
| A. Jarvis & Co. | 99.03 |
| Wood, Gundy & Co. | 98.65 |
| C. H. Burgess & Co. | 98.53 |

**Pointe Claire, Que.**—A. E. Ames & Co., were awarded $100,000, 6 per cent., 25-instalment debentures at a price of 99.788, the money costing the town about 6.02 per cent. A bid of 98.573 was received from Dominion Securities Corporation.

**Stettler, Alta.**—The town has sold an issue of $10,000, 7 per cent., 15-year debentures locally, at a price of 98, the money costing the town approximately 7.22 per cent. The proceeds will be used for the erection of a municipal skating rink.

**McGillivray Township, Ont.**—W. C. Brent & Co., have been awarded $12,505, 6 per cent., 10-instalment debentures at a price of 101.0076, the money costing the township approximately 5.80 per cent. Tenders were as follows:

| | |
|---|---|
| W. C. Brent & Co. | 101.0076 |
| MacNeill, Graham & Co. | 100.47 |
| Dyment, Anderson & Co. | 100.24 |
| Housser, Wood & Co. | 100.21 |
| R. C. Matthews & Co. | 100.09 |
| A. E. Ames & Co. | 99.53 |
| A. Jarvis & Co. | 99.50 |
| Canada Bond Corp. | 99.40 |

**Toronto, Ont.**—McDonagh, Somers & Co. have purchased privately an issue of $180,000 Toronto Housing Commission 5 per cent. gold bonds, maturing 1st October, 1953. The bonds are guaranteed unconditionally as to principal and interest by endorsement by the city of Toronto, and will be placed in the American market.

**Montreal, Que.**—A syndicate composed of Wood, Gundy & Co., and Guaranty Co., were the successful bidders for the $3,100,000, 5 per cent., 20-year debentures of the Island of Montreal Metropolitan Commission, paying a price of 93.7639 in New York funds, which means that the cost to the commission will be approximately 5.52 per cent. Alternative bids were asked for bonds payable in Canada or in United States. Bidding for the issues was keen, with very little variation in the offers. Tenders were as follows:

| | |
|---|---|
| | American Payment |
| Wood, Gundy & Co., and Guaranty Co. | 93.7639 |
| A. E. Ames & Co., National City Co., E. H. Rollins & Sons, and Bankers Trust Co. | 93.358 |
| A. Jarvis & Co., Blythe, Witter & Co., Blair & Co., and Municipal Debentures Corp. | 93.15 |
| | Canadian Payment |
| Hanson Bros.; Harris, Forbes & Co., R. C. Matthews & Co., R. A. Daly & Co., Rene T. Leclerc, and W. A. Mackenzie & Co. | 92.65 |
| Wood, Gundy & Co., A. E. Ames & Co., National City Co., and Gourdeau, Garneau. Inc, | 92.641 |
| McLeod, Young, Weir & Co., and syndicate | 92.53 |

**Vancouver, B. C.**—The following is the official list of tenders for the $250,000 5½ per cent., 30-year waterworks debentures awarded to Spitzer, Rorick & Co. With the exception of the first tender, which was for New York delivery, all other tenders were for Vancouver delivery.

| | N.Y & Can. | Can. |
|---|---|---|
| Spitzer, Rorick & Co. | 100.26 | .... |
| British American Bond Corp. | 99.38 | 98.57 |
| A. E. Ames & Co. | 99.28 | 98.17 |
| Miller & Co. and Brandon Gordon & Waddell | 98.199 | .... |
| Canada Bond Corp. | 98.51 | .... |
| Halsey Stuart & Co. and R. C. Matthews & Co. | 98.25 | 98.25 |
| J. E. Price & Co. and Rutter & Co. | 98.02 | .... |
| Pemberton & Son and Wood Gundy & Co. | 98.14 | 97.95 |
| Canadian Financiers Trust Co. | 97.63 | .... |
| Ladd & Tilton Bank, Lumbermen's Trust Co., Freeman Smith & Camp Co. and Ralph Schneeloch Co. | 97.12 | .... |

Two other bids were received after the advertised hour but were not dealt with.

## MORE GRAINS HANDLED

### Lake Shippers' Clearance Association Holds Annual Meeting At Winnipeg

The annual meeting of the Lake Shippers' Clearance association was held in Winnipeg on October 3. Of the 63 members of the association some 33 were present. Capel Tilt, president, presided and in the course of a few opening remarks called the attention of the members present to the fact that the association was in a sound financial condition, the reserve being $378,000 or an average reserve of $6,000 against each membership.

He drew special attention to the very carefully prepared table showing the amounts of grain handled by the asociation from the time it was organized in 1909 up to the end of the crop year of 1921. During 1921 the association handled by vessel and rail 270,000,000 bushels of grain which was 73,000,000 bushels more than was handled in 1920 and 142,000,000 more than the handlings of 1919 and nearly 200,000,000 more than was handled during the first year of the association's operators.

The total of 270,000,000 bushels shipped by the association from Fort William and Port Arthur is over double the quantity loaded from Chicago and treble the amount loaded out of Duluth in the same period and approximately 70,000,000 bushels in excess of Chicago, Duluth and Superior combined.

### Transfer Certificates

Continuing, Mr. Tilt said it was interesting to note that members appreciated the advantage of tranfer certificates when asking for deliveires and were using them more and more each year. In 1919-20 there were issued 4,557 transfer certificates for a total of 50,000,000 bushels of grain; in 1920-21 there were 10,245 transfer certificates issued for a total of 115,000,000 bushels. Last year there were issued 18,158 transfer certificates covering 220,000,000 bushels, which means that over 80 per cent of the quantity shipped during the past year was handled by transfer.

The election of officers resulted as follows: President, C. Tilt; Vice-president, Harry Swartz; secretary, Sid. T. Smith; treasurer, Alvin K. Godfrey; directors, Messrs. C. C. Field, F. J. Anderson, R. M. Wolvin.

## SOUTH SHORE TRADE BOARD

At the enth annual meeting of the South Shore Board of Trade, held at St. Lambert, Que., the following officers were duly elected for the ensuing twelve months: Victor Pigeon, past president; F. A. Covert, president; E. Drinkwater, 1st vice-president; J. A. Gareau, 2nd vice-president; R. J. Walker, 3rd vice-president; W. W. Condon, secretary-treasurer. The council was formed of three members from each city; one from each town and parish, as follows: St. Lambert, H. H. Craig, G. C. Palmer and A. N. Prendergast; Longueuil, A. David, E. F. Racey and S. Lavery; Montreal South, W. B. Scott; Greenfield Park, E. J. Allwright; parishes of Longueuil and St. Hubert, A. F. Stratton and F. W. Atkinson. Notwithstanding great difficulties, the board presented a favorable annual report, as well as a balance in hand of $250.

Dominion of Canada

**Ten-Year 5½% Renewal Loan Bonds**

Due November 1st, 1932

These Renewal Loan Bonds are an absolute obligation of the Dominion of Canada. Consequently, they rank the same and possess the same facilities for prompt and convenient collection of interest as do Victory Bonds.

We are in a position to fill orders at the best market price.

# *Stock Markets*

The past week on the Canadian security markets tended to show that the disturbing influences which have been affecting the market for the past two months or so, have almost completely disappeared and the market is once again settling down for further activity. The general trend, while being somewhat irregular in parts, showed a conservative forward movement during the week.

The main reason for this change in the market was, of course, the clearing of the European situation and the disappearance of the declaration of war. Other dominating influences also affected the course of the market, and probably the most important of these is the present crop movement. It is estimated that the crops will yield approximately two billion dollars, and should this prophecy come true, there is no doubt that at least part of the money will find its way into the stock market.

Another dominating influence affecting the market is the steady increase in business conditions from coast to coast, and the general opinion among the manufacturers is that the coming year will witness a decided impetus in all lines of manufacturing. Reports from the pulp and paper manufacturers show that they are running twenty-four hours per day, with sufficient orders on hand to keep them busy for many months to come. The steel industry is also showing a decided improvement, the Grand Trunk Railway having placed an order for 25,000 tons of steel rails for spring delivery. Other rail orders are expected shortly although no definite announcement has been made so far.

New financing by numerous concerns has been fairly heavy during the past month or so, and this indicates that conditions in this line are picking up rapidly, as should conditions be vice-versa, no new money would be required for extensions to buildings, etc.

Although the trading on the exchanges has shown a decided improvement the market is waiting for initiative and speculators are remaining cautious.

### Stock Listed

The London Stock Exchange has granted an official quotation to £2,000,000, 4 per cent., perpetual consolidated debenture stock, making the total amount listed £43,022,921.

### Capital Increased

Authority has been given to the Brazeau Collieries, Limited, to increase the capital stock from $4,000,000 to $4,500,000, such increase to consist of 4,500 preferred shares of $100 each.

### Mount Royal Debentures

An offering of $1,000,000 of the Mount Royal Hotel Co., Ltd., convertible 8 per cent. debenture bonds is being made in New York by the investment house of Throckmorton & Co. at par and interest to yield 8 per cent.

This is the unsold balance of the authorized issue of $7,000,000. Each $1,000 bond carries three shares of common stock, $100 par value. The bonds are convertible into the 8 per cent. cumulative preferred stock on July 1. 1923, on the basis of 10 shares for each $1,000 bond. These debentures will be secured by a lien on the entire property valued at $14,000,000.

### Abitibi Mines, Ltd.

An offering of 200,000 shares of Abitibi Mines, Ltd., is being made by D. S. Patterson & Co., of Toronto, at a price of 55 cents per share.

The capitalization of the company is 3,000,000 shares, par value $1, of which $1,000,000 has been issued, and the remainder, $2,000,000, is held in the treasury. The company has no funded debt and no preference shares.

The company has been formed for the purpose of taking over from the Canadian Mining Syndicate, Ltd., nine of their mining claims, approximately 360 acres, in the Lightning River district, which are now in an advanced stage of development and upon which it is proposed to begin operations at once.

### Streetsville Lumber Co.

An issue of $50,000, 8 per cent., cumulative preferred stock, with a bonus of 40 per cent., of common stock of the Streetsville Lumber Co., Ltd., is being offered by Oscar S. Moxley & Co., of Toronto. at $25 per share.

The company has an authorized capital of $75,000, 8 per cent., cumulative preferred stock, par value $25; and $75,000, common stock, par value $10. The company was incorporated August 4, 1922, with head office at Streetsville, Ont., to manufacture doors, window sash and similar mill-worked products. The plant has a capacity of upwards of 250 doors and 1,000 sash daily. The plant is now in operation and has sufficient orders on hand to take care of the output for some time to come.

The Pannill Door Co. of Toronto, have agreed to purchase, for a period of ten years, the entire output of the company, on a basis profitable to the Streetsville Lumber Co.

The preferred dividends are payable January 1 and July 1, and are guaranteed for ten years by the Pannill Door Co.

### Atlas Brick Co.

An issue of $60,000, 8 per cent., redeemable preferred stock of the Atlas Brick Co., is being offered by Kippen & Co., of Montreal, at a price of par, $100, with a bonus of 40 per cent., of common stock.

The stock is redeemable in whole or in part on any dividend date upon thirty days' notice at 110 plus accrued dividends, at the option of the directors. The above issue is part of an authorized issue of $300,000, of which $145,000 has been issued, including the present offering.

The Atlas Brick Company is under the direction of the Inter-provincial Brick Company, and by the uniting of the two managements enough expense is saved, it is claimed, to defray preferred dividends. The parent company has been in operation for eight years. The Atlas plant was acquired ealy in 1921. The property is at Milton, Ont., and consists of sixty-five acres with an abundant supply of shale for the manufacture of high-grade face brick. Since acquisition, the plant has been operated at its original capacity of 450,000 bricks per month. Served by the Canadian Pacific and the Grand Trunk Railways, it is in a good brick market and can ship to all points in Ontario and as far east as Halifax.

Earnings of the plant, after providing for all other charges, have more than met dividend requirements on the preferred stock now outstanding besides the present issue. Preferred dividends of 8 per cent. have been paid since incorporation. The directors estimate that, with the increased production, net earnings, after providing for depreciation, will amount to several times the preferred dividend. The surplus earnings should enable the company to put aside reserves and to pay common dividends within a reasonable period. The capitalization is claimed to be low compared with the capacity and earning power of the plant.

### Pacific-Burt Co.

A. E. Ames & Company are offering $350,000, 6½ per cent., 15-year first mortgage sinking fund bonds of the Pacific-Burt Company, Ltd., at a price of 97.50 and interest to yield 6.75 per cent.

The bonds are dated October 2, 1922, and are due October 2, 1937, with principal and interest payable April 1 and October 1 at the Bank of Nova Scotia in Toronto and Montreal, or in United States gold at the agency of the Bank of Nova Scotia in New York, at the holder's option. The bonds are in denominations of $500 and $1,000. Provision has been made for a full sinking fund to retire the entire issue at maturity. Bonds are callable in whole but not in any part on any interest date of sixty days' notice at 105 and interest until October 1, 1925: thereafter in whole or in part at 105 and interest up to October 1, 1930; and thereafter at 103¼ and interest.

The capitalization of the company is $500,000, 6½ per cent., first mortgage bonds, of which $350,000, this issue, has been issued; $650,000, 7 per cent., preferred stock, all of which has been issued, and $650,000 common stock, all of which has been issued.

The company is engaged in the manufacture of counter check books, sales slips, etc., and was incorporated in 1910 and has up-to-date and thoroughly equipped factories at Emeryville, San Francisco and Los Angeles. For the past four years ending March 31 last. the average net earnings were 4.7 times the bond interest requirements, while S. J. Moore, president, indicates that net earnings for the present year may be expected to be six times the bond interest.

### Bathurst Co.

The Royal Securities Corporation have purchased $1,500,000, 6½ per cent., first mortgage convertible sinking fund gold bonds, series "B," due June 1, 1941, of the Bathurst Company, of Bathurst, N. B.

The Bathurst Company in 1921 took over the Bathurst Lumber Company, which had been in successful operation for fourteen years. The company manufactures some 30,000 tons of sulphate pulp and approximately 30,000,000 feet of spruce lumber per annum. Its 2,563 square miles, which are estimated to contain 2,000,000,000 of spruce sawlogs and 10,000,000 cords of pulpwood. Timber areas are situated on rivers tributary to Bathurst Harbor, N.B., and the Baie des Chaleurs, Que. The company is one of the largest manufacturing enterprises in Canada. Its plants and hydro-electric development of 9,000 h.p. are of recent construction. At Bathurst the company has its own deepwater docks, from which shipments are made direct to the United States, South America, British West Indies, England and Europe.

Average sales for the last four years totalled over $2,900,000 per annum. Net earnings 1917 to 1920 inclusive averaged $577,778. Last year, in common with other pulp and lumber manufacturers, the company showed a loss after all charges of about $300,000, due to exceptionally adverse market conditions. Due to present improved business conditions, the company's plants are now running full and its current operations are showing a substantial profit.

The new issue of $1,500,000 of bonds is the balance of a closed first mortgage of $3,000,000, the first $1,500,000 of which having been distributed a year ago in the United States market by Gallaway, Fish & Company, of New York.

Properties securing the bonds have an appraised value of $9,250,000, plus over $1,000,000 to be spent on the new newsprint mill, making property values in excess of $10,000,000, against $3,000,000 of bonds outstanding.

Junior to the bonds are $9,774,200 of common shares, which shares are closely held mostly by directors of the company and wealthy banking and manufacturing interests in Montreal and Ottawa, Buffalo and the Lehigh Valley in Pennsylvaia. Common dividends of 6 per cent. were paid in 1917, 1918, 1919 and 1920, with a 3 per cent. dividend in 1921.

The bonds are convertible into an equal amount of common shares at any time, at the option of the holder, which is an unusually attractive feature of the issue.

# *Unlisted Securities*

In their weekly Comment on the Unlisted Securities market A. J. Pattison, Jr., & Co., say. Throughout the past week Standard Oil issues in Canada, Imperial Oil, International Petroleum and Mutual Oil all advanced in a substantial way with heavy trading in all three. The street was full of rumors of stock distribution or dividend on Imperial Oil and the fact that the directors meet to-day, Friday, and that some of those residing in New York were expected to attend the meeting, would make it appear that there may be something in these rumours. Most of the Industrial Bonds were firm with a fair amount of trading and an improved demand for the paper issues as Abitibi, Brompton, and Ontario Pulp sixes. Bank shares were firm with fair inquiry. Stocks were irregular with more trading and public interest than the week before, offerings were well taken. we look for a more active market with higher prices.

## GENERAL ACCOUNTANTS' ASSOCIATION.

An address was given on October 9 by Leon Mercier Gouin, D. C. L., to the members of the General Accountants' Association, in Montreal on the subject of commercial law, with special reference to commercial partnerships.

Alfred Lambert, president of the Chambre de Commerce commented on the address and congratulated the accountants on the work they were doing. He also voiced his opinion respecting the Bankruptcy Act, which he said was of first importance with the accountants who daily find themselves in touch with various classes of trade.

The lecture is the first of a series that will be conducted by the General Accountants Association, the meetings being open to the public. Ernest Guimont will address the Association on the Bank Act on October 23.

# Chartered Accountancy

**By Robt. W. Johnston, Chartered Accountant, St. Thomas Ont.**

(Part of an address before the St. Thomas Kiwanis Club Sept. 25.)

Everyone knows that an accountant is one skilled in accounts, and that accountancy is the art of keeping a systematic record of pecuniary transactions. Every capable bookkeeper is therefore an accountant, and many of them are exceptionally accurate and rapid workers in their particular sphere of work. One who has been employed in the same office for a long period gets to know thoroughly the details of that particular business, buying, selling, costing, financing, traffic arrangements and the like. Seldom, however, can such a man change to another highly organized business and make himself anything like so useful. He was a specialist at his old job, but has not sufficient knowledge of the theories underlying all business to enable him to quickly grasp the situation in his new position. The profession of chartered accountancy is supposed to provide men capable of acting in the capacity of an advisory business counsel, able to discuss any matter of record keeping, office organization, financing, etc; and from his extensive experience to recognize the weak points in any business in regard to which he may be consulted. He stands in the same relation to all matters pertaining to the organization and supervision of records of accounts and costs, that the architect bears to the erection of a building.

### Must Find Weak Spots

The architect must be equally familiar with the construction of a cottage, a hospital, a factory, or a palatial hotel, so the chartered accountant must have an intimate knowledge of the best forms of accounts in all classes of business, and when engaged upon a critical examination of them must know where to find the weak places where losses may occur. It is not expected of the architect that he should be a bricklayer or a plumber, neither must the chartered accountant be necessarily expected to be a bookkeeper in so far as the mere keeping of the records is concerned. or the speed with which he might add a column of figures or make a given number of postings. Like the architect he is a designer and creator, but he designs systems of accounts and costs, such that his client will obtain the required information from his books with the minimum amount of labor and expense. The bookkeeper or accountant is, therefore the workman, while the chartered accountant acts in an advisory capacity and is generally recognized by the former as his friend and ally. The work of auditing accounts is as old as the hills In many cases the auditor was regarded as a detective, a necessary evil, a bore and a nuisance. and many present day auditors are still nothing but that . The average township audit, for example, which is supposed to be some check against fraud. is conducted by one or two men who know much less about his accounts than the treasurer whose books they audit. He prepares a statement. sits by their side while they work so as to explain the entries to them, and they certify that the books and statement are correct They are of course of no assistance in an advisory capacity to either the treasurer or the township, and as they create a false sense of security, the treasurer, having no respect for their ability, is often tempted to wrong doing through their inefficiency. The capable auditor is regarded by those whose work he supervises as their best friend and ally on the road to success. They know his duties are more than merely to check over the accounts and certify that they are correct, and honestly kept. Both the bookkeeper and his employer already know this beyond a shadow of a doubt. What they want is a critical analysis of their financial statement, and in many a business this outside assistance has brought to light defects which when corrected, have led from difficulty and approaching disaster to smooth working and substantial success.

### Fortunes Lost or Made

One of the important functions of a chartered accountant is to certify to the accuracy of statements representing the financial position of businesses both as to their present assets and liabilities and their past profits or losses. Whether these certificates be published or only used for private circulation the public is deeply interested, for upon the presentation of the figures certified to the value of the business, or of its capital stock, will largely depend. Fortunes may be lost or made by errors creeping into such statements, or as it has been said by one of the most eminent authorities: "Auditing is much too serious a matter to be trifled with; the evil that can be wrought by an incompetent auditor is hardly less vital and is infinitely more extensive than that which may be exercised by an unqualified medical practitioner. The latter, if he be the possessor of an extensive practice, may poison two or three patients in the course of his career, but the former can, while confining his attention to the affairs of one undertaking, readily accomplish the ruin of thousands in a much shorter period.

"Realizing the necessity of some means by which the public can discriminate between the qualified accountant and the so-called expert accountant or public accountant, who is often a fairly good bookkeeper but temporarily out of a job, the legislative bodies of most countries have passed laws providing for the holding of examinations in accounts and conferring degrees in accountancy. The young man who wishes to prepare himself for this profession in Canada must prepare himself by years of study, both before and after passing his matriculation examination, and pass the necessary examinations for three years while gaining experience in a chartered accountant's office. His course of study is laid down for him during this period and he must submit his answer papers week by week to the examining board of the institute, so that they may be assured that he is not leaving his work for a final cram just before the annual examination. In this way the quality of the men who become practicing accountants in Canada must necessarily be high, and will no doubt compare favorably with the members of any similar body of professional men in any country. The candidate must of course be well versed in mathematics as a training for his reasoning faculties. To this should be added a large fund of common sense, caution and patience, while accuracy in his calculations and modes of thought and reasoning are absolutely essential. The man who will accept as correct the figures as they appear on the books of account because they contain no clerical error, or who will too readily accept explanations given him without further investigation, will never succeed as an auditor. It is necessary to know the reason for every step taken and once he is satisfied that a certain result is the true one he should have the courage to stand by it.

### Character and Brains

The relation which exists between the accountant and his client is a personal one involving on the part of the former an intimate knowledge of his client's most private affairs The accountant must therefore be worthy of the confidence reposed in him, and therefore both as to personal character and brain capacity only the best of each is good enough for the ideal man. As to his industry and ability to do intensive work requiring long hours at a stretch it need only be mentioned that on frequent occasions circumstances make it necessary to drop everything and disregard the clock entirely in order to get out a statement, the prompt preparation of which is exceptionally important.

In conclusion it may be said that the work of an accountant is not merely that of a detective, not merely a checking audit, not merely devising some means to avoid paying income taxes. The accountant's relation to the business is rather that of the architect to the building, or the physician to the family. The diseases of a business often need searching out by an expert. In spite of its losses in one department it may carry on for years because of exceptionally large profits in other departments. How much better it would be with the dead wood cut out. In other cases there is a constant drain which ultimately brings ruin. How much better to have every detail known, and the source of the trouble corrected before it is too late.

## WOMAN ADMITTED AS C.A.

To Mrs. Matthew J Crehan will go the honor of being the first woman member of the Chartered Accountants' Institute of Vancouver, as the result of a decision handed down on September 22 in the Supreme Court by Mr. Justice Morrison. Mrs. Crehan had been refused admission into the institute by the membership committee and carried the case to the courts. Mrs. Crehan had been on the stand but a few minutes when J. L. G. Abbott, solicitor for the institute, announced that in view of the evidence Mrs. Crehan had already given and of which they had previously been ignorant, the council would withdraw all objections to Mrs. Crehan's admission.

Mrs Crehan in giving her evidence, stated that she had done an accountant's work for various municipalities in the Okanagan, for South Vancouver and for several large business firms.

## SEEK BORROWING POWERS

Before the New Brunswick Board of Public Utilities in session in St. John on September 27, the Maine & New Brunswick Power Company, Limited, applied for permission to increase its issue of bonds by $250,000. The board ordered a hearing at the next meeting.

## TIMBER LIMITS SOLD

### Ontario Government Sells Two Large Areas

The Shevlin-Clarke Co. of Fort Frances, have successfully tendered on four square miles of timber area in the north of the township of Halkirk, on the north shore. and between Black Sturgeon Lake and Red Gut Bay, in the district of Rainy River. — berth is said to be very advantageously situated for the company's operations, and is regarded by the provincial department as containing very fine timber.

### Price Paid

The prices which the company is obligated to pay for standing timber are as follows: Pine, white and red, bonus $14,10, dues $2.50; spruce logs, bonus $7,05, Crown dues, $2; popular logs, bonus $6.05, Crown dues $2; jack pine logs, bonus $6.55, Crown dues, $2.50; jack pine ties, bonus 8 cents, Crown dues 10 cents; spruce pulp wood, bonus 80 cents per cord, Crown dues 80 cents per cord; other pulp wood, bonus 30 cents, Crown dues, 40 cents per cord; cedar poles, less than 30 inches, bonus 10 cents; Crown dues 25 cents; over 31 inches up to 40, bonus 15 cents, Crown dues 50 cents.

According to the contract terms, the timber is to be removed by April 30, 1924, and is subject to the usual manufacturing restrictions, and no export regulations. Timber must be manufactured in Canada. Although the berth is regarded as a very good one, the prices are said to be quite acceptable, from Ontario's standpoint.

## GROCERY SUPPLY CREDITORS

A meeting of the creditors of the Grocery Supply Service, Ltd., Toronto. was held on September 20 at the offices of the Trusts and Guarantee Co., Limited. C. S. Hamilton, for the assignees, acted as chairman. Inspectors were appointed to investigate.

The company assigned Sept 7th, with assets of $13,000 and liabilities of $25,000. Assets are composed of the contents of four retail stores at Hamilton, St. Catharines, Oshawa and Peterboro, and the warehouse in Toronto, which, since the assignment, has been operated by the Trusts and Guarantee Company, by order of the court.

Reasons for assignment are lack of funds to properly finance the undertaking, which hampered buying.

## DEVELOP SALT MINE

Alberta's government has decided to develop a salt mine. Premier Greenfield has issued instructions for boring operations to be started immediately in the extensive salt beds at Waterways near Fort McMurray. Tests conducted in previous years at McMurray proved the existence of salt deposits there and the field is believed to extend to Waterways.

The provincial government's idea is to develop big salt workings within easy reach of the government owned railways, the A. and G. W. whose terminus is at Waterways. The government has not yet decided whether it will market the salt itself or turn this part of work over to a private company.

# Stock Exchange Record

### SUMMARY OF SALES

The following is a summary of sales on the Montreal and Toronto exchanges for the weeks ended October 11 and 18:—

| Stocks | Wk. end. Oct. 11 | Wk. end. Oct. 18 |
|---|---|---|
| Montreal | 97,590 | 52,761 |
| Toronto | 21,893 | 20,092 |
| Total | 119,483 | 73,853 |
| Bonds | | |
| Montreal | $ 870,250 | $664,750 |
| Toronto | 374,950 | 208,900 |
| Total | $1,245,200 | $873,650 |

## How Clothing and Furnishing sales are increased
### *by Long Distance*

***Some quotations from recent reports:***

"Long Distance brought us so much business that we expect to enlarge our factory."

"Tried Station-to-Station service and find it very satisfactory for selling goods to distant points."

"Thanks to Long Distance we are able to carry on without a large stock of goods. We call up wholesalers for our needs."

"We call up customers in outside towns and make appointments for try-ons."

A well-known firm of Ottawa retailers writes "We often use Long Distance in preference to writing."

*We can tell you how to apply Long Distance to almost any business*

# Corporation Finance

**Ogilvie Flour Mills Co.**—Despite adverse trade conditions the company, during the year ended August 31 last, was able to show an increase of approximately 30 per cent., in net revenue over the previous year.

Net profits for the year amounted to $846,989, as compared with $636,303 in 1921 and $959,065 in 1920. The deduction of $140,000 distributed on preferred stock left applicable to common the sum of $706,989, as against $496,303 in 1921 and $810,065 in 1920. This was equivalent to 28.24 per cent. on common, as compared with 19.85 per cent. and 36.40 per cent. for 1921 and 1920, respectively. Deduction of $300,000 for the regular 12 per cent. dividend and the special bonus of $250,000 left a surplus of $156,989 which brings the balance at credit of profit and loss account to $1,866,875.

The balance sheet section of the exhibit reveals further moderate enhancement of the powerful working capital position of the company, which compared with the previous year as follows:

| | 1922. | 1921. |
|---|---|---|
| Current assets ..... | $10,455,013 | $10,209,788 |
| Current liabilities . | 2,269,229 | 2,331,903 |
| Working capital | $ 8,185,784 | $ 7,877,885 |

Few striking changes are shown in the balance sheet aside from the reduction of the item representing cash to $57,555 from $1,055,200 and the increase of investments are $7,562,955 from $6,189,521.

At the annual meeting of the directors on October 12, at which the annual report was presented, E. L. Pease, vice-president and managing director of the Royal Bank of Canada was elected to the board of directors.

W. A. Black, vice-president and managing director, pointed out that the favorable showing was made, despite many difficulties during the year under review. Transportation costs, which are higher for flour than for wheat, made it necessary to cut prices in order to retain a hold on the export trade.

Mr. Black said that the crop in the Northwest was turning out well in excess of estimates and of excellent quality, and this, he believed, would make up for changes in prices which had been necessary during the year. The millions of dollars which are going into the country to finance the crops must eventually move toward the merchants and wholesalers with a resultant benefit to trade.

C. R. Hosmer, president, said that the company was contemplating the establishment of a subsidiary to take care of the numerous investments of the parent company. While no definite date has been set for this action, it was a necessary move which would be made sooner or later.

The sale of some Winnipeg property of the company was approved by the shareholders present.

**Southern Canada Power Co.**—Both gross and net earnings for the month of August show an increase over the same month last year. The following is a comparison for August and also for the eleven months ending August 31:

| | Aug. 1922 | 1921 |
|---|---|---|
| Gross ....... ........ | $71,368 | $65,486 |
| Op. expenses .......... | 36,043 | 32,577 |
| Net .......... ....... | $35,325 | $32,909 |
| 11 Months Ending August 31. | | |
| Gross .............. | $773,027 | $681,299 |
| Op. expenses ........ | 345,864 | 344,943 |
| Net ................. | $427,163 | $336,356 |

**National Steel Car Corp.**—Although the company passed through a very trying year with very little business offered, yet R. J. Magor, president, makes an optimistic forecast of the future in the company's annual report for the year ended June 30, 1922.

Before providing for depreciation and interest, the net result of the operations was a deficit of $79,733, as compared with a net profit of $422,674 for the nine months preceding. Capital and surplus account at the beginning of the year stood at $2,820,324, but deductions, including the net loss from operations $79,733, depreciation reserve $73,470, interest on bonds $107,653 and interest on borrowed money $46,516, reduced the balance at the year's close to $2,513,950.

The balance sheet shows current assets valued at $2,746,341, as against current liabilities of $1,343,655. Inventories have been drastically reduced from $3,706,166 to $1,651,095. Accounts and bills receivable are down moderately from $1,197,682 to $1,030,233. Bank loans have been reduced from $1,827,373 to $770,001. Accounts payable, which stood at $1,173,776 for the previous year, are down to $573,654. Depreciation reserve now amounts to $752,767.

Approximately $80,000 was expended during the year in betterments to plant and equipment. The outstanding first mortgage bonds were reduced to the extent of $60,000, and $72,470 was charged against earnings to the credit of depreciation reserve, which now stands at $752,767.

In presenting the report President Magor points to the growth in car equipment orders in the United States, and to the fact that manufacturing plants on the other side have taken advantage of the slowness of this class of business in Canada to induce a large part of skilled labor on this side to take employment there. "Therefore, with the idea of maintaining your shop organization and keeping your works prepared for the domestic railway equipment business, which the development of Canada and its railway facilities will unquestionably demand at an early date, your management sought and obtained orders for the repairing of United States railway cars in addition to smaller Canadian orders. Export orders of this nature can only be obtained in competition with United States manufacturers, and as the value of the work done in Canada is subject to customs duties on the return of the repaired equipment to the country of origin, it cannot be undertaken with profit."

Continued unsettled world conditions has made it impossible for the company to undertake to any appreciable extent foreign railway equipment orders. Current material conditions are bad. The company now has a fair amount of unfilled orders on its books, the completion of which is being delayed on account of the material situation arising out of the recent coal and railway strikes in the United States.

It is pointed out in the report that a further amount was received from the French claims. These still stand on the books at $263,477. The entire equity in these claims has been turned over to the company, and any additional amounts received will go into the company's treasury.

**St. Lawrence Flour Mills Co.**—The annual report for the year ended August 31, 1922, shows a substantial increase in profits, the profits being up by twenty-two thousand over the previous year.

Profits amounted to $169,365, as compared with $147,801 the previous year and $215,077 in 1920. The heavy program of bond retirement is reflected in the small charge of $7,952, representing bond interest, as compared with $12,460 last year and $13,395 in 1920. The deduction of this item, together with $14,308 representing Government taxes, leaves net divisible profits at $147,103, as compared with $120,700 in 1921, and $173,249 in 1920.

After payment of $40,250 on the $575,000 outstanding preferred stock, there remains available for distribution on the $1,200,000 common, the sum of $106,853, or 8.9 per cent., as compared with the dividend of 6 per cent. This compared with $80,450 in 1921 and $132,999 in 1920. Distribution of $72,000 on common leaves a surplus of $34,853, which, with the addition of the previous surplus of $382,279, leaves a balance at credit of profit and loss of $417,132. It is noted, and this is about the only point where the effects of the period of depression can be found reflected in the statement, that this is the first year since 1917 that the company has not declared substantial bonuses.

There is but little change to be found in the balance sheet portion of the exhibit, from the strong working capital which the company habitually presents. There is a slight falling off in this respect, accounted for mainly by a shrinkage of about $40,000 in sundry debits.

The working capital position of the company for the past two years compares as follows:

| | 1922 | 1921 |
|---|---|---|
| Current assets .......... | $878,588 | $884,455 |
| Current liabilities ....... | 458,517 | 418,184 |
| Working capital ...... | $420,071 | $466,271 |

Elsewhere in the balance sheet there are no important changes. Total assets of $2,748,114 compare with $2,729,504, the increase being accounted for chiefly by a growth of about $25,000 in the item representing plant. Bonds outstanding are down from $154,040 to $97,465, while bank loans are reduced from $354,527 to $326,373.

**Russell Motor Car Co.**—The annual financial report of the company and its subsidiaries for the year ended July 31 last, shows a reduction in profits, as compared with the previous year.

Net profits stand at $117,499, as against $158,124, equivalent to 4.18 per cent. on common, compared with 9.2 per cent. a year ago and 38.8 per cent. for the corresponding period preceding. Regular dividends on preferred were met and dividends totalling 4 per cent. were paid on common.

The earnings statements of the past two years compare as follows:—

| | 1922 | 1921 |
|---|---|---|
| Net profits ..........$ | 117,499 | $ 158,124 |
| Balance forward ..... | 1,071,618 | 1,053,494 |
| | $1,189,117 | $1,211,618 |
| Preferred dividend ...$ | 84,000 | $ 84,000 |
| Common dividend .... | 32,000 | 56,000 |
| Investment reserve .. | 600,000 | ..... |
| Balance ...........$ | 473,118 | $1,211,618 |

In explanation of the reserve against investments, it is pointed out that the transfer of the large sum of $600,000 from the profit and loss account was carried out in order that the revaluation of the company's investments would be on a sufficiently conservative basis.

The balance sheet shows an increase in accounts receivable from $487,872 to $511,394; cash on hand amounts to $34,159, and Dominion of Canada bonds held $106,459. Investments in other companies are valued at $3,150,030, as against $3,464,793. Bankers' advances have been reduced from $320,000 to $142,000, and accounts payable from $79,947 to 48,672. Contingent account is unchanged at $216,075. Buildings, investments and insurance reserve now total $933,941, compared with $336,314.

Referring to the affairs of the individual companies embraced in this organization, President Lloyd Harris points out that the volume of business of the Canada Cycle & Motor Co., whose fiscal year ends December 31, promises to be considerably in excess of the previous year. The company is active in the prosecution of export trade in addition to its local business.

In respect of the one unsettled claim of the Russel Motor Car Co. Inc., Buffalo, N. Y., with the United States navy, it is pointed out that the parent company was awarded judgment to the extent of $50,000 by the courts over the settlement offered by the navy officials. As the company believes that the Court of Claims did not take into account the most important feature in connection with the claim, an appeal will be made to the Supreme Court of the United States.

Heavy inventories of relatively high-priced materials held by the Willys-Overland, Ltd., have been disposed of. "While business has not been on a sufficient scale during the past year," the President points out, "to permit of operation at a profit, it is believed that the condition of the company and the outlook in the trade are more favorable than they have been at any time in the past two years."

The Russell Gear & Machine Co. has negotiations under way for additional new work, which, if obtained, should be of value in making possible the successful operation of this plant. The company is giving some attention to the manufacture of radio parts.

**Temiskaming Mining Co.**—The annual financial statement for the year ended June 30 last shows a net profit of $1,120 for the year, as compared with a deficit of $135,765 for the eighteen months ended June 30, 1921.

The principal item under earnings is interest, which amounts to $16,720, and $1,006 was received from ore sales of residue at the smelter. Mine expenses amounted to $5,691, head office expense $2,741, and insurance $4,175. Current assets total $75,071, and investments stand at $279,922 in the Blue Diamond and Canadian Coalfields Co., and $290,000 in advances in Blue Diamond Coal Co.

## BUILDING YOUR BUSINESS

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district.

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

# BUYING AN INCOME

When you buy a good bond you are conserving your principal and buying an income.

Government and municipal bonds are secured by the good faith and credit of a municipality and its power to levy taxes for the payment of its obligations.

In buying such securities you are placing your principal in the class of investments which affords the maximum of safety and greatest assurance of prompt and regular payment of income.

Selections may be made at present from bonds of Canada's most representative Governments and Municipalities. There is a wide choice as to maturity, price and income.

*Suggestions on request.*

BANKING INVESTMENT INSURANCE INDUSTRY

# Limited or Joint Stock Companies—Dominion and Provincial[*]

By W. S. FERGUSON, C. A.

Director of the Department of Higher Accounting of the Shaw Correspondence School and lecturer in Accounting, University of Toronto.

This discussion of joint stock or limited companies is intended to deal, as far as time permits, with some of the outstanding features and their treatment in the accounts but is not intended to cover bond issues and sinking funds of corporations, which form a subject by themselves.

By joint stock we mean stock held in common. A joint stock company may be defined as: "A company or association of a number of individuals for the purpose of carrying on some business or undertaking, in which the shares of each member are transferable without the consent of the other partners." It must be noted in this connection, however, that we now have private companies in which the transfer of shares is restricted and the number of shareholders, exclusive of present or former employees who continue as shareholders, is also restricted and an invitation to the public to subscribe for either shares or bonds is prohibited. The shares in a private company, however, are, as in a pubilc company, personal estate and the purpose of the restriction is to preserve the privacy. Usually the consent of the directors in such a company is required if making a transfer. It is the fact that shares are personal estate that gives a company its outstanding feature of perpetual succession. It is termed a Limited Company because of the limit of the liability of the shareholders.

### Relation to Company Acts

It is perhaps important to note that, in dealing with the subject, we have regard more particularly to a company as formed under the Dominion Companies' Act or the provincial acts and that, in this connection, it should be noted that the partnership law of the provinces, except Quebec, excludes incorporated companies from the term partnership.

In this respect, there is some difference too as to the understanding as to a joint stock company as set out in the acts referred to and as understood in the United States. There is so much in the Dominion and provincial statutes that has a bearing on the accounts of Canadian companies, having regard to the form in certain respects and to legal requirements, that a general knowledge of these statutes is itself desirable in studying company accounts and statements.

In this connection, the difference should be noted between trade names, such as "The Automobile Repair Company" and "The Automobile Repair Company Limited," the first not being a corporation but the trade name of an individual registered under partnership law and without limited liability.

A joint stock company, in addition to its financial books, is required to keep books of record which include a copy of the letters patent, etc., names of present or past shareholders, with their addresses and calling, while such, and the names, addresses and callings of directors and also, where there is a share capital, the number of shares held by each shareholder, the amount paid in and remaining unpaid by each shareholder and particulars as to transfers. There will thus be a share ledger.

An accountant should not require legal enactment to direct him in the making of the best records but, where these are given or implied, they cannot be ignored.

### Double Entry Principle

In my opinion, it is clearly the intent of Canadian company Law generally that accounts of companies should be kept on the double entry principle. The Ontario Act requires books of account to be kept containing full and true statement of the financial transactions of a corporation as well as of its assets, money received and paid and the matters in respect of which it is received and paid and the credits and liabilities of the corporation. The company acts, both of the Dominion and province, provide that balance sheets shall be prepared containing full information relative to the financial standing of the company and set out in a form properly classified. The Dominion Act provides for an annual statement of income and expenditure.

In accounting, a balance sheet is recognized as a statement of assets, liabilities and capital taken from books kept by double entry. Any other statement of assets and liabilities is merely a statement of affairs. Again, a balance sheet should reflect the accounts in the Ledger. A statement of assets and liabilities, when books are kept by single entry, would not reflect the accounts. Viewing the matter from every angle,, then, it would seem that, properly to meet the requirements of law with respect to Canadian Companies, the application of the double entry principle is necessary.

A company is one having a capital divided into shares while a corporation includes a company, whether with or without share capital. An example of one without share capital would be a hospital trust or other organization not having gain as its object.

### Record of Shares

Shares are subdivisions of the capital. If the capital were not so divided, but in one mass, it would be termed Stock.

Usually, companies are permitted to change their capital from shares to stock, which involves entries in the books of record. This enables a transfer to be made of any amount while, if shares are transferred, it must be for the full amount of a share or shares.

Should capital be changed from shares to stock, an entry in the books of record will close out the share ledger and open in its place a stock ledger, the holdings of the individual stockholders being transferred. In this connection, it should be noted that stock must be fully paid up and will be recorded at the amount paid, in which respect it differs from shares.

In the financial books no entry is necessary if paid up capital only is shown in the capital account but if subscribed or authorized capital is shown, the accounts for these may be closed and an account for paid up capital only . There would appear to be no real harm in carrying the accounts for subscribed stock in such a case but only such an amount as is paid up is recognized as stock.

The face value attached to shares is termed the par value. If they are issued at a higher price, the excess is termed a share premium.

Capital stock account is credited with the par value only. The excess is credited to an account for premium on shares.

### Shares of No Par Value

Shares may be issued without par value, in which case the whole amount received goes to the credit of capital. This gives us a key to the real nature of share premium. It is neither revenue nor profit but a capital receipt and must not be confused with earnings nor distributed as dividend but may be applied to cover capital expensses, such as preliminary expenses.

Certain advantages are claimed for the issue of shares without par value. These include the following:

1. Attention is directed to the real, instead of to purely nominal or even fictitious values.
2. There is not the same likelihood of water being injected through inflating the assets to correspond with the amount of capitalization decided on, when this is in excess of the actual value of the consideration received for shares issued.
3. It will be fairer to investors, since they will not be misled through an arbitrary nominal value of, say $100 being attached to a share when the real value is possibly something entirely different.
4. Since the intent of the statute is that payment of the shares shall be in money or in property at its actual value, the capitalization and actual capital should more nearly harmonize.
5. It should operate against stock-watering.
6. The value of a share depends on the actual value of the assets, a proper basis.
7. Each share represents a proportionate interest in the assets of the corporation.
8. Speculation on false idea of values is discouraged.
9. It should give a sound basis for credit.
10. Confusion through issue of shares at a discount or premium, through separating the discount or premium from the nominal value, is avoided.

It is contended by some that these advantages in some cases at least, will be only apparent. This would appear to depend largely on the interpretation placed upon the provision in the Dominion Act, that the shares with no par value must be issued for cash or property at its actual value.

There is a difference between over-capitalization and having too much capital.

Over-capitalization has reference to the issue of shares in consideration of property for an amount in excess of its true value. It is in this way that water is injected into a company and we thus have the term watered stock.

Note will be taken of the various classes of shareholders, such as: common or ordinary; preferred; participating preferred; cumulative preferred; founders' shares; deferred shares, etc., and the capital of the various classes will be recorded separately in the accounts.

Following strictly the legal requirements, it may be noted that these would seem to have some bearing on the manner in which we record capital stock in the accounts.

### Shares in the Balance Sheet

Under the Ontario Act, the balance sheet must show the amount received on each class of shares—in other words, the paid up capital—which may be accomplished by showing in our capital account any one of the three terms: Authorized, subscribed or paid up, in the main capital account, but the balance sheet under the ominion Act requires that we show the amount of subscribed capital and the amount paid up. Since a balance sheet should reflect the ledger accounts, this last would appear to make it necessary that, to comply properly, we should carry an account for the subscribed capital, whether we do for authorized or not and, in the balance sheet, by deducting from the subscribed capital the amount unpaid, we extend the paid up capital as the capital of the company.

Should we carry an account for authorized capital it would naturally come into the balance sheet as an integral part of it and from

(Continued on page 14)

## INSURANCE ADJUSTERS ON THE SPOT

### Origin of Northern Ontario Conflagration Being Investigated by Ontario Government

Fire insurance companies interested in the Haileybury district held a meeting in Toronto on October 9 and appointed a committee, headed by Lyman Root of the Sun Insurance Office, to take in hand the settling of losses. The committee appointed a bureau of adjusters consisting of D. C. Edwards, W. H. Adamson, W. P. Thomson and John Kay of Toronto, and Messrs. Cheese (Cheese & Debbage), Kennedy (Dominion Adjustment Bureau.) and C. H. Turner, of Montreal.

These adjusters are now working in the north, making use of a private railway car. The arrangement is for the companies to supply the bureau with lists of their probable claims, i.e., commitments in the district. Some of the companies also have their own inspectors on the ground.

### Government Inquiry

Fire marshal E. P. Heaton is holding an inquiry into the fire, sittings having commenced in Toronto on October 23.

Since the fire occurred three weeks ago considerable light has been thrown on its origin and extent. John B. Laidlaw, manager of the Norwich Union Fire Insurance Society, is authity for the following account:—

"The district about Haileybury had been very dry for some weeks, and fires by settlers to clear up debris upon their land had set fire to the peaty soil, and there were consequently numerous smouldering fires in land which, in ordinary years, would be swampy. One of these smouldering fires set fire to some brush surrounding a small lake about three miles west of Haileybury. Word of this was brought into town, but nothing was done about it. On Wednesday, October 4th, a strong wind blowing from the west, fanned this fire at Cross Lake and also blew a great deal of smoke over the town. That day was very hot, and the brigade were called shortly after noon to save some dwellings west of the railway tracks that had been set on fire by burning grass. Some of these dwellings were destroyed and others saved ,and the brigade remained in the neighborhood of the railway station, wetting down its platform and protecting it. The station stood on the higher ground behind the town, about one-third of a mile back from Lake Temiskaming. It was a fairly large station of wooden construction roofed with wooden shingles.

### Station Catches Fire

"The town of Haileybury was laid out alongside the west shore of Lake Temiskaming, built on sloping land, extending from the lake up to the higher ground along the Temiskaming and Northern Ontario Railway line from Cobalt to New Liskeard.

"A little before four o'clock in the afternoon the roof of the station caught fire. The brigade were unable to put it out and in a few moments the station was a roaring furnace. Within a few minutes embers from it had set fire to the Anglican church and parish hall, two blocks distant, to the dwelling of Mr. Hennessey, a block farther on and to the roof of the Vendome Hotel on the lake front at the north end of the business centre of the town. All of these buildings were roofed with wooden shingles, as well as the station. The brigade were advised and hurried down to the centre of the town to try and fight these new fires, when the wind suddenly changed and blew from the north, practically a hurricane. The fires previously set were immediately spread through all the buildings lying to the south, and everything in their path was destroyed, the only portion of the town saved being that lying north of the line from the station to the Vendome Hotel, comprising about 75 dwellings.

"Haileybury had a fairly good system of waterworks, with reservoir on the higher ground near the station, also a steam fire engine to supplement the pressure at the higher levels. The fire engine had been used all afternoon, and was burned in the streets in the centre of the town. The heat generated by the conflagration was terrific, the rails of the electric car line being twisted, side-walks entirely destroyed, wooden culverts burned out of the roadways, and stone in the walls of the convent and cathedral turned to lime.

"The people were rescued largely by the help of automobiles, every one being commandeered to hurry the people out of the path of the flames, while many had to take to the lake.

### Put Up Brave Fight

"At New Lickeard, five miles north, a brave fight was put up. A dozen buildings, dwellings and stores, were burned west of the station and the roof of that station caught on fire, with two large holes burned in the shingles, and three or four buildings set on fire to the east of the tracks. The firemen were able to save that town, possibly because of rising ground to the west of the station, which may have broken the force of the westerly wind.

"Throughout the country the great heat and strong wind on Wednesday, first from the west and then from the north, and then towards evening again from the south, fanned the smouldering fires into a blaze, set fire to the dried grass and bushes, and what was to all intents a prairie fire swept the district, covering several townships. It is reported that 10,000 people have been rendered homeless, which would be 7,000 outside of the town of Haileybury. Several small towns were destroyed, and hundreds of farm houses burned. The fire entered Haileybury by the dried shingle roof of the railway station catching fire and immediately scattering embers over other shingle roofs in the town. Once the conflagration had been started by these four fires, it made no difference what kind of roof or what was the construction of the buildings in the path of the flame. Unfortunately the waterworks in Haileybury depended entirely upon electric power, and fires along the roadsides destroyed the poles carrying the wires, and consequently cut off the current just at the time when the wind changed and the conflagration proper was commencing."

## G. T. P. BRANCH BONDS

Commencing November 1, interest payments on the bonds of the branch lines of the Grand Trunk Pacific in the Provinces of Alberta and Saskatchewan, which were guaranteed by the Provinces, will be met through the Canadian National Railways. These branch roads will remain in the National system as feeders to the main line.

Provision for this action was made in the railway estimates passed during the last session of Parliament, when $800,000 was voted for the purpose of reimbursing the two Provinces for the interest paid by them since the Grand Trunk Pacific went into liquidation.

Refunds to Alberta and Saskatchewan will amount to approximately $500,000.

The branch lines in question include about 1,000 miles of railway and were constructed by the Grand Trunk Pacific Branch Lines Company, a subsidiary of the Grand Trunk Pacific, as feeders to the main Grand Trunk Pacific system. The bonds were guaranteed, and when the road went into liquidation these Provinces were forced to assume the interest payments and make good their guarantees.

## *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the past week, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Oct. 20 | Oct. 13. | Oct. 6 | Sept 29 |
|---|---|---|---|---|
| Ontario ........ | 13 | 13 | 22 | 26 |
| Quebec ......... | 28 | 29 | 18 | 19 |

# May Tax Municipally Owned Utilities

## Income Tax May Be Extended to Them—Government May Be Forced to Borrow in United States—Gold Basis Being Considered—Exports of Pulp and Paper Have Made a Substantial Recovery.

(Special to The Monetary Times)

Ottawa, Oct. 25.—The intimation recently given by Hon. Jasques Bureau to a deputation from the municipalities that he had been trying to get the law amended so that municipally-owned public utilities would pay their share of the federal income tax, the same as similar privately operated companies, is an indication that the demand for revenue may cause the putting on of the screws in this respect. So the municipal authorities need not be surprised if they are called on to pay a little more to the federal treasury.

Business is getting better, but the national revenues do not keep pace with it, the returns for the first six months of the current fiscal year showing total receipts of $203,107,000, as compared with $210,000,000 for the same period last year. Nor has the total expenditure declined; for whereas it was $144,747,000 for the same months in 1921, it was $152,000,000 for the same this year. Of course, the surprising feature is that revenue has kept up as well as it is, the showing having been much better than that in the United States. But the point of special importance is that expenditure is not being much reduced, and indeed, it would seem that to hold out much prospect of this in the near future, were to indulge false hopes. This leads one to the conclusion that the Government is pretty sure to take almost every dollar it can lay its hands on.

### War Loan Refunding

It is a disappointment that the country, for a while, is unlikely to be able to save much money through the refunding of its war loans, unless these operations are done in the United States. As during a war period governments usually have to borrow at a much higher rate of interest than is the case during normal times, they naturally expect to effect considerable savings through their refunding operations. This has been the exeperience in Britain since 1919, and it has been the experience in the United States, where an issue of $700,000,000, which matures in December bearing 4 per cent, is being retired by another bearing only 4¼. Now as the Conversion loan bears 5½, it is quite evident that to have to pay 1¼ per cent more than the United States Government is doing, will mean a much heavier burden on the shoulders of the Canadian taxpayer than the American is called upon to carry. Considerations such as these, will probably compel the Government to borrow where it can get money the cheapest.

The huge nature of the western crop, the Government officials now conceding that the yield of wheat for all Canada, will probably touch the 400,000,000 bushel mark, has made such demands on the railways that it is practically certain the Government will have to make provision for the buying of much new equipment. Indeed, this is the first matter to which Sir Henry Thornton will have to give attention. The fact that, owing to the blockade in the States not nearly as much grain can be moved out through Buffalo this year, as usually goes out, has made the demands on the railways all the heavier, for much more grain will have to go out all rail. This means much more hauling for the roads, but it also means that many more cars will be required to move the same amount of grain, than if the usual volume went out through Buffalo.

### Pulp and Paper Exports

Owing to public attention being centred on agriculture through the bumper crop the importance of pulp and paper in the recovery of Canada's export trade has not received the attention it has merited. During the six months ending September the value of domestic agricultural exports, mostly food, was $134,293,000, or $14,500,000 more than during the same period last year. But the exports of lumber, pulp and paper during that time were valued at $107,901,000, or $21,300,000 more than for the same months last year. And the increase is being well maintained. During September the exports of pulp wood, pulp and paper were $11,306,000, or about $1,200,000 more than during September, 1921. For the six months ending September they were $61,469,000, or about $6,500,000 more than for the same period last year.

That this increase in export values will be maintained is evident from the fact that even if there were no increase in the volume of shipments, the mere increase of $5 per ton of newsprint will mean an increase of about $6,000,000 in the total export value next year, to which must be added an increase also in the price of wood pulp.

But the demand from the United States is so heavy that the volume of these exports is bound to grow rapidly. Last month the exports of newsprint alone were 370,000 cwts. greater than they were in September, 1921; the exports of wood pulp were 560,000 cwts. greater, while 45,000 more cords of pulp wood went out of the country than during the same month last year. Of pulp wood, wood pulp and paper the United States alone took $1,242,000 more last month than it did a year ago. Figures such as these explain very largely the marked recovery in Canadian trade.

### May Resume Gold Basis

The probability of the Government, during the coming session of Parliament repealing those restrictions of the free passage of gold, which it was considered advisable to introduce when the war was in progress, is being much discussed. There is strong expectation that the practice of redeeming Government notes in gold will soon again be restored and that similarly the restrictions on the exportation of gold will be removed. At the same time it is probable that such action will be taken leisurely, rather than quickly, for there are many who think that the present standing of the Canadian dollar in the United States is due as much as anything to the heavy borrowing over there, and that the dollar might slip back somewhat, if this suddenly slackened. The fact that Canada is a heavy borrower, rather than a creditor nation, makes the future somewhat uncertain. If the Government does consider the suggested action advisable, it probably will be taken during the latter, rather than during the first part of the session.

### Immigration Policy

The representation recently made by the transportation interests to the Government for the adoption of a more vigorous immigration policy will probably produce more tangible results than all other efforts to date. The proposals submitted showed that the transportation interests know their business; that they know where they are going, and what they may reasonably expect in the way of results. Having also had a most extensive and varied experience in immigration, it may be assumed that their representations have had more effect than those of all other agencies. At the same time it is by no means sure that all the suggestions made will be acted upon.

The Government is being forced to adopt a more aggressive immigration policy, for a decrease of 35 per cent. so far this year in immigration, as compared with the even greatly reduced figures of 1921, inclines one to the view that the excess of immigrants over emigrants cannot be very large. This is a serious matter, when the greatly increased debt and taxation are taken into account. The facts of the situation would, through a falling off in business, be brought home much more strikingly to the public were it not for the flood of new money that is coming in from the United States.

---

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Colbalt Station for the week ended October 6th:—Mining Corp. 772,497; Nipissing Mining Co., 513,114; total, 1,285,611.

The following are the shipments of ore from Cobalt Station for the week ended October 13th:—Mining Corp., 261,501; Nipissing Mining Co., 555,140; total, 816,641.

The following are the shipments of ore from Colbalt Station for the week ended October 20th:—Mining Corp., 773,460; Nipissing Mining Co., 587,680; total, 1,361,140. The total since January 1st is 15,401,282 pounds or 7,700.6 tons.

## LIMITED BRANCH SYSTEM PLANNED

### Administration Would Restrict National Bank Branches to Meet Objections of State Bankers

(Special to The Monetary Times)

New York, Oct 25.—While it is understood here that the administration is determined to insist that Congress authorize national banks to establish branches in the states which permit state banks to exercise this right, it is believed that this authorization will be hedged about by restrictions which will make it less offensive to the so called country banker. The country banker has made it quite clear to Washington that he objects most strongly to the existence of national branch banks. As was made clear at the recent convention of the American Bankers Association held in this city, he fears the national bank as a competitor. But notwithstanding this feeling on the part of the country banker the President and the Comptroller of the Currency continue to regard the power to establish branches as being essential if national banks in some parts of the country are to continue to exist.

The desires of both parties to the controversy are to meet in a compromise. This compromise, in its legislative form, will grant national banks the right to establish branches in states where a similar right is granted state banks. Further national banks will be permitted to establish branches only in certain large centers in these states and only within the limits of the towns or cities where their headquarters are located. Such a compromise, the Administration believes, forestalls the main objections of the "anti-branch" bankers, but at the same time will enable the national banks to meet the competition of the state banks where competition is now proving serious.

### The Deep Waterways Issue

The St. Lawrence—Great Lakes Canal scheme of the International Waterways Commission has already been made a political issue in northern New York. It seems likely to be projected into the national political arena before long, if all reports regarding certain activities of the agricultural bloc in Washington are true. As is generally known, the farmers of the middle west are strong supporters of the project: they believe that such a canal would enable them to escape the high freight rates which are at present cutting the profits on exported food products almost to the disappearing point. Eager as usual "to give the public what it wants," the public in this case being the western farmer, the politicians from the agricultural districts are now said to be planning a bargain with the administration which would involve the trading of ship subsidy votes for "canal votes." If this "trade" is effected, Canada will hear more from this side of the line regarding the St. Lawrence canalization schemethan heretofore.

### Bond Issue Not Encouraged

Just preceding the recent meeting of the board of directors of the British Empire Steel Company, there was a report that the corporation's financial representatives were attempting to interest American investment bankers in a $20,000,000 bond issue. According to Canadian comment on this report, the corporation's representatives found the financiers cold to their suggestions. After their experience with the bonds of a certain well known Canadian steamship company, they were said to look askance at making a somewhat similiar deal with another Canadian organization.

## B. C. BOND DEALERS' ASSOC.

The following officers were elected at the annual meeting of the British Columbia Bond Dealers' Association, held in Victoria on October 12:—Hon. president, A. C. Flumerfelt, of the British American Bond Corporation, Victoria; president, J. R. Waghorn, of Waghorn, Gwynn & Co., of Vancouver; vice-president, H. A. Ross, of Ames & Co., Victoria; executive, E. B. McDermid, of the Royal Financial Corporation, of Vancouver; S. Burke, of Pemberton & Son, of Vancouver; F. E. Quinn, of the Canadian Financiers Trust Co., of Vancouver; Brig.-Gen. R. P. Clarke, of R. P. Clarke & Co., of Victoria, and Major Gus Lyons, of Burdick Bros., of Victoria. J. H. Talling, of the British American Bond Corporation was re-elected secretary of the association.

The retiring president, A. C. Flumerfelt, being in the east, J. R. Waghorn presided.

# Substantial Increase In Exports

### Canada's Trade For September Shows Fourteen Million Increase Over Last Year—September's Total Is Lower Than Previous Month—Total Imports Are Lower Than Last Year—Thirteen Million Increase in Exports

Although Canada's trade for the month of September is lower by eight million dollars from the previous month, there is, nevertheless, an increase of thirty-eight million for the six months ending September 30, 1922 as compared with the same period last year. The total trade for September also shows an increase of fourteen million dollars over the same month during 1921.

Total imports are only five hundred thousand above last year, but the duty collected shows an increase of almost half a million dollars over September last year. The largest increase in imports during the month was that of fibres, textiles and textile products, which are up by about three million from 1921. The other large increase occurred in iron and its products, which have increased by over two million dollars. The largest decrease was that of non-metallic minerals and products, which have decreased by over two million from 1921. Agricultural and vegetable products have also declined from last year.

The outstanding feature of the September statement is the substantial increase in total exports, which have increased by thirteen million dollars over the previous year. Every domestic export item shows an increase over September, 1921, with wood products and paper taking the lead, these being up by four million. The other large increase is that of animals and animal products, these having increased by three million dollars.

Details of the September statement with comparisons are given herewith:—

## IMPORTS ENTERED FOR HOME CONSUMPTION

## THE NATIONAL RAILWAY BOARD

Some of the provinces are bringing pressure to bear on the Dominion Government for representation on the directorate of the Canadian National Railways. New Brunswick is clamorous for a member, recollecting, no doubt, that it is not long since the headquarters of the Intercolonial were located in Moncton. On October 17 the board of trade of that city passed the following resolution:—

"Whereas, the administration of the Canadian National Railway system has been entrusted to a new Board of Directors and there has been announced a policy of efficient management and control designed to bring relief from the heavy burden of debt which this country is now bearing by reason of those railways;

"And, Whereas, the successful administration of the National Railways requires that the commercial and business life of every section of the Dominion be thereby promoted through a sympathetic and intelligent knowledge and appreciation of its needs and requirements, and will depend upon the promotion of a spirit of Canadian National interest and concern and of the consciousness that sectional development of parts of this Dominion at the expense of other parts will condemn the country as a whole to ultimate disintegration;

"And, Whereas, the enormous financial losses which in particular the industrial and commercial interests of New Brunswick have, during the past three years, suffered have been due directly to a wanton disregard of the rights of the people of New Brunswick to an equality of reasonable transportation service on the part of the National Railways;

'And, Whereas, on the new Board of Directors for the said railways the Province of New Brunswick is not directly represented;

"Now, Therefore, Be it hereby declared to be the sense of the Moncton Board of Trade in annual meeting assembled, that a proper and sympathetic appreciation of the commercial and industrial interests of New Brunswick, the more efficient and successful administration of the National Railways therein, the extension of equality of railway service to the Maritime Provinces, and the maintenance of solidarity of Canadian sentiment, interest and union demand the immediate appointment to the said Board of a member from New Brunswick."

A similar resolution had previously been passed by the St. John Board of Trade, and there is no doubt as to the feeling throughout the province. An increase in the size of the board would, however, increase the likelihood of political interference. The members of a small board will be rather chary of pushing the interests of the particular districts they may happen to represent. Were all the provinces represented they would on the other hand regard it as their duty to do so.

## THE MERCHANT MARINE

Among the follies committed in this country in war time was the construction of a fleet of merchant vessels. These are under the control of the Canadian National Railway Board, and the former directors, in their report on last year's operations, advised that the fleet be reduced to 37 ships. This is a matter that will have to be taken up by the new Board. The old board proposed the sale of 28 ships—two of 2,800 tons deadweight; 20 ranging in tonnage from 3,300 to 4,000; one of 4,000 tons; two or 4,900 tons, and three ranging from 5,021 to 5,181 tons.

No action has yet been taken upon this recommendation, which was brought to the attention of the House of Commons by Hon. W. C. Kennedy, minister .of railways and canals, in his statement on the operations of the Government Merchant Marine during the last session of Parliament. The recommendation, it is understood, is to be taken up by the new directors. In the meantime, some of the ships in the list have done some business under charter for the transportation of coal, and a half a dozen which had been tied up at Midland, Ont., were placed in commission a few weeks ago to carry grain from Fort William and Port Arthur to other Canadian lake ports. Insofar as those which have ben idle are concerned, the country has saved the cost of operating them ,but it has had to pay for their upkeep, and has suffered loss in interest and in depreciation.

## GRAIN MARKETING

One feature of the economic situation this fall is the rapidity with which grain is being marketed. There is less speculation on the part of farmers on the possibilities of a higher price than is often the case. One reason is undoubtedly the pressure which is being brought to bear on the farmers who have heavy debts to pay, while another is the shortage of accommodation for the large yield.

The volume of the movement has been so great at times as to exceed the capacity of the railways to handle it. Elevators have at times been obliged to refuse grain because they were full already. About the middle of the month it was reported that elevators on the Weyburn-Lethbridge branch of the Canadain Pacific were full, and threshed grain was lying in piles in the open fields. On the main lines, however, transportation and storage facilities were reported as adequate.

## MINING INVESTMENTS

According to some, all mining securities are bad. The record of northern Ontario and other fields disproves this view. Mining is essentially speculative, however, and on that account has probably suffered more in the way of fake flotations than has any other branch of industry. This is no reason for avoiding it, but is good reason for exercising unusual caution. The Toronto "Mail and Empire" suggests the following maxims:

Never buy a non-dividend stock or one that has not a substantial investment basis, unless you are prepared to suffer a considerable loss if necessary.

Never buy a stock listed or unlisted, without obtaining accurate information as to how much money it has in the treasury for working purposes, what is its capital, where the property is, what is its history, and, if possible, who are the moving interests in it. Obtain an intelligent understanding of the prospects of the mine.

Be careful of buying into new promotions that have no solid background. The game of promoters often is to take advantage of exuberant speculation to unload vast quantities of stock that represent nothing more than an area of ground, perhaps not prospected.

If buying a listed stock, deal through a broker who is not himself interested in promoting that stock. Have independent advice. Being "put into" stocks by interested parties is responsible for much loss.

Buy in times of dullness and reaction, rather than on the top of a strong upward swing.

Do not endeavor to "beat the tape." Remember there is a lot of manipulation in stocks that have a very fluctuating value. Mining stocks not on an assured dividend basis are exceedingly speculative. There is no standard for market values, save as insiders may regulate the prices, or as the public may be induced to buy or sell.

## METHODS IN RE-INSURANCE

Canadian life insurance companies are obliged to transfer a considerable part of their large contracts to other companies, not caring to risk too great a sum on a single life. The usual method is for a company to have a reciprocal arrangement with one or more companies, placing its surplus insurance with them and receiving theirs in return. If a company limits its own risks to $25,000 and gets a policy for $50,000, it will place the other $25,000 immediately with another company, and generally it is placed on exactly the same basis as that on which the first company wrote it. In other words, the second company accepts the standards of the first company for that particular risk at least, merely endorsing the policy for the amount it is to re-insure.

This is not always done, however. Sometimes a company will merely cover the surplus risk by a term policy. A young company may do this, expecting at a later date to be able to assume a larger proportion of the risk. Generally, however, a division of the risk exactly on the terms on which it is written is favored.

## WHY PRICES CANNOT BE FIXED SATISFACTORILY

The Ontario Government through a special Committee of the Legislature is conducting an investigation into wholesale trade in the province. Certain wholesalers who have already suffered from interference by the defunct Board of Commerce have expressed themselves as in favor of price fixing. What the wholesalers have in mind no doubt is the guaranteeing to them of an adequate margin of profit. Business conditions during the past two or three years have in many cases not enabled them to realize such a profit and they accordingly look with favor upon regulations which would not have been welcomed in more prosperous times.

The Government however has no intention of assuring a profit for any branch of trade. It is rather seeking for cases where the manufacturer fixes the price of his product and requires the purchasers to govern themselves accordingly. Such cases are fairly common and the effect is that the profits of the wholesaler and retailer on these particular lines is beyond their own control. Where a product is in steady demand by the public through extensive advertising by the manufacturer, dealers have no alternative but to handle it on the manufacturer's terms.

Such cases are not in themselves objectionable. It is only when the element of competition disappears, when all the producers of certain goods combine, and when conditions of production are such as to make it difficult for new concerns to enter the field, that regulation is required in the public interest. The fixation of rates and prices is complicated and difficult and tends to spread from one product to others which enter into it. Such was the experience of the Board of Commerce, for when the price of a product was fixed the manufacturers demanded that the price of their materials be also fixed. As conditions of production are continually changing, these prices had to be adjusted frequently.

Canada is at present experiencing a shortage of coal and though price fixing regulations are in force they cannot be said to be working satisfactorily. The product cannot be precisely standardized into different grades and the costs differ from district to district. The result is that the prices fixed can only be approximate.

The Ontario Town Planning and Housing Association suggests a tax of one mill to enable towns and cities to grow up in accordance with a definite plan. But what if they refuse to grow up in accordance with the plan?

Premier Drury of Ontario brought up a point which has been overlooked in the plans of the Canada Colonization Association, when at the meeting in Toronto last week he pointed out that there was no use in bringing settlers here unless they would be prosperous on the land. The settler who has been here a few years has cause to ask the Government why it makes farming so expensive, after being so anxious to have him farm. Tariff reduction, however, has no place in the colonization scheme.

## CHANGES IN CANADA PERMANENT

Owing to ill-health, John Massey has retired from the office of general manager of the Canada Permanent Mortgage Corporation. Mr. Massey has been associated for about fifty years with the Canada Permanent and one of its constituent companies, the late Western Canada Loan and Savings Company. At the amalgamation in 1900 he was appointed manager of the Ontario branch and in 1905 he and the late R. S. Hudson became joint general managers. The directors have appointed him to the office of second vice-president.

George H. Smith, who has for the past five years been assistant general manager, has been appointed general manager. Mr. Smith is nearing the completion of forty-one years in the service of the Canada Permanent. In 1888 he became secretary, which position he occupied for many years, was afterwards made superintendent of branches and about five years ago assistant general manager. A few months ago he was appointed to the directorate.

Charles S. Robertson, who has been in the Canada Permanent service for more than twenty-two years, has been appointed manager of the Ontario branch. Mr. Robertson has been for some time assistant manager.

Mr. Massey has also retired from the position of general manager of The Canada Permanent Trust Company and has been succeeded by Mr. Smith.

## WINNIPEG LIFE UNDERWRITERS

The Winnipeg Life Underwriters' Association held its first meeting of the season on October 7. J. T. Hanna presided.

# *Personal*

H. S. ANGUS, manager of the fire insurance department of Dale and Company, Montreal, has resigned to join D. C. Edwards of Toronto, in the adjusting business.

ERNEST H. BERTRAND, formerly assistant manager of the Banque Nationale has been elected a member of the Montreal Stock Exchange.

SIR HENRY W. THORNTON, who has been appointed president and general manager of the Canadian National Railways.

W. A. M. JONES has joined the Toronto office of Nesbitt, Thomson and Co., having previously been connected with Aemilius Jarvis and Co., Canadian Security Corp., and Campbell, Thompson and Co.

KELSO KING, manager of the Mercantile Mutual Insurance Company, Limited, Sydney, Australia, was in Montreal recently, having crossed from the Old Country in making his world tour.

RIGHT HON. BONAR LAW, who has been asked to form a Cabinet in Great Britain in succession to Lloyd, is a Canadian by birth, having been born in New Brunswick in 1858. He was elected to the British House of Commons in 1900, and in 1911 succeeded Mr. Balfour as leader of the Unionist party. He was Chancellor of the Exchequer from 1916 to 1921.

G. T. MILNE, the British Government senior Trade Commissioner in Canada and Newfoundland expects to leave for England at the end of November, and he will retire from the Imperial Civic Service early next February.

GEORGE H. SMITH, formerly assistant general manager, who becomes general manager of the Canada Premanent Mortgage Corporation.

W. C. FLAGG, chairman of the Fire Officers Committee, London, England, spent a few days in Montreal recently.

LUCIEN T. PACAUD, K.C., M.P., for Megantic, has been named general secretary to the Canadian High Commission in England. Mr. Pacaud, who succeeds W. J. Griffith as secretary, sent in his resignation as a member for Megantic, and will leave shortly for London.

FRED R. RUEFFER, cashier for the Ontario Equitable Life, Waterloo, has been appointed treasurer. Mr. Rueffer's insurance experience dates back to 1908, when he joined the Mutual Life of Canada. Through his long training he is well equipped for the position to which he has been elected. E. H. McKinney, M.A., who becomes Assistant Secretary, has been connected with the company almost from its inception. He is a graduate of Toronto University nd before joining the Ontario Equitable he was for some time in the service of McKay and McKay, Toronto.

# *Obituary*

JAMES HARDY, F.C.A., of the firms of Jenkins & Hardy and James Hardy & Sons, Toronto, died at Atlantic City on October 16th. The late Mr. Hardy was born in Nottingham, England, 68 years ago. He was a director of the Standard Bank, the Canadian Creosoting Co., and President of the Hamilton Stove & Heater Co.

## SOUTHERN ALBERTA WHEAT PRODUCTION

### Crops Not as Good as Reported—Threshing Now Completed—Lethbridge Coal Mines Operating

(Staff Special)

Lethbridge, Oct. 20.—Alberta has experienced the finest weather for the completion of farming operations that they have had for a number of years. Threshing is now completed in practically all districts but, although the crop in Southern Alberta is better than it has been for a number of years, it is not so good as reported some time ago. There is a great deal of shrinkage between the actual yield at the threshing machine and the reports that were given out. Many crops that were considered 25 bushels per acre, are not running more than 15 or 16 bushel to the acre, although in some districts crops as high as 25 to 35 bushel per acre are recorded.

### Coal Mines Busy

The mines around Lethbridge are now working to full capacity having started operations on Sept, 1st, after 6 months of idleness on account of miner's strikes, Lethbridge is the centre of a great coal mining district, the mines turning out over 4,000 tons of coal per day. About 2,000 men are employed in these mines and the monthly pay roll is in excess of $300,000. Lethbridge is also the natural gateway and distributing point for the Crow's Nest Coal field where about 2,000,000 tons of bituminous coal is produced annually. The city of Lethbridge is possibly the most important point in Canada just now as a centre of irrigation. There are about 140,000 acres of irrigated lands in the neighborhood of Lethbridge where prolific crops of alfalfa, grain, potatoes and vegetables are obtainable year after year with unfailing regularity.

### Calgary Gas Supply

The city of Calgary has come to an agreement with the Canada Western Natural Gas Co. in connection with the gas supply. They have been negotiating and having considerable trouble for some time. A reduction of $600,000 has been secured in the capitalization of the Company, and after Nov. 1, 1924, the Company is to be allowed 8% as an earning basis on $5,883,000, and the present rate of 48c. will be in force up to that time. The chief mediators in the difference between the Gas Company and the city have been premier Greenfield and mayor S. H. Adams.

Business in Calgary continues to be rather quiet and the benefit from this year's crop is not being felt to any great extent. Collections are exceedingly difficult to make, one implement Company reporting collections up to Oct. 15, only about one half as good as they were this time last year.

A strong movement of Alberta wheat continues to go through the port of Vancouver. Already this season over 3,000,000 bushels have been shipped that way.

## INCREASE YOUR INCOME

# President of Merchants Bank on Trial

### Summary of Evidence Before Court in Montreal—Witnesses at Previous Hearings Repeat Evidence—President Received Salary of $6,000—Relations of Bankers' Trust Company With Merchants' Bank

The trial of Sir Montague Allan, charged with negligently signing a return of the affairs of the Merchants' Bank for October, 1921, which is alleged to have contained false statements, began in the Court of Special Sessions, Montreal, on October 12. It was thought that since D. C. Macarow, general manager was acquitted on the charge of making a false return, the Government might forego the prosecution of the president, but when the Court met the charge was continued.

Witnesses who appeared in Court the first day included D. C. Macarow, who was freed in his case; Senator Lorne Webster, Hon. C. C. Ballantyne, former Minister of Marine and Fisheries; Farquhar Robertson, Gordon Finlayson, Trustee for the estate of Thornton Davidson and Company, whose collapse hastened the Merchants' Bank crash; J. Gillespie Muir former chief accountant of the bank; and J. M. Kilbourne, its secretary.

Evidence was scanty and consisted essentially of the filing of documents, letters. and official papers of the bank, all of which have been disclosed already during the various trials which have marked the celebrated case. Bundles of extracts from minutes of shareholders and directors' meetings of the Merchants' Bank circulars, bank statements and various documents which had been previously filed both in the Allan and Macarow cases were again placed upon the record and identified by Mr. Kilbourne. Briefly the latter recapitulated the role he had played in securing the signatures of D. C. Macarow, the general manager, and of Sir Montagu Allan, the president to the famous October return to the Government. Macarow had been found on a Saturday afternoon at the Mount Royal Club and Sir Montagu at his residence. It was the final day upon which the return might be sent to the Minister of Finance to save the Bank from penalty.

#### President's Salary

At the afternoon session it was disclosed that Sir Montagu Allan received an annual salary or honorarium of $6,000.

J. Gillespie Muir, former chief accountant of the Merchants' Bank reiterated his explanation of how, after the returns of the various branch managers were received they were examined at the head office by a clerk of his department and entered up in the general statement book, which classified their contents and from which he, in due course took the details required for the completion of the report for the Government. He first made a rough draft, worked on this till all the items balanced, and then made a clean copy which he signed and sent on to the general manager for his signature. He usually saw no more of it thereafter.

Questioned regarding the return of October, 1921, he said he had sent the first clean copy for signature on November 18. It came back with a request for a change regarding an item of $18,000 profits on foreign exchange. He had been told, but he did not remember by whom, that Sir Montagu Allan wanted this change made. Asked regarding a further change of $4,000, he explained that this had been made in his first rough draft. It might have been suggested by someone, he did not think it mattered. That was before anything had been sent to the general manager for his signature. No change was made in the books on account of the change in the report. No change was necessary.

#### Accountant Responsible

Asked what would happen in case a report from a branch could not be obtained in time for the government return, he suggested that he could use the previous report from that branch. At the close of Mr. Muir's evidence, Judge Decarie asked him who was the party in charge of the book-keeping system of the bank and who was responsible for giving instructions in the head office as to the system to be followed.

"As chief accountant, that responsibility falls on me," Mr. Muir replied.

"I am asking this," continued Judge Decarie, "because that may be of importance for the new law of 1923. The general manager has a great responsibility, but I think the chief accountant should have a share in the responsibility too."

Mr. Muir—"The chief accountant is generally the head bookkeeper, too. Of course, when I say the system emanates from the chief accountant, I should state that at the same time it is under the control of the general manager. It is the general manager's province to authorize any change in the bookkeeping. Therefore, though the chief accountant has control, it is under the control of the general manager."

Following on this question, Mr. Wilson wished to ask the witness by what order or authority he took no cognizance of the semi-annual statements in making up his Government returns.

"I never saw the semi-annual statements," witness replied.

"Why?" asked Mr. Wilson, but Mr. Geoffrion objected. If witness did not see the statements it was impossible for him to explain why he did not see them, unless Mr. Wilson were asking him for an expression of opinion, which was not allowed.

Meeting again on Friday, October 13, the Court received evidence from H. B. Loucks, formerly asistant to the chief accountant: Thomas Mackay, who had reported to Sir Montagu on the condition of the Montreal Branch: Charles D. Cornell, secretary of the Bankers' Trust Company, who gave details of operations of that organization; and W. A. Meldrum, former general supervisor of the Merchants Bank who testified regarding the various reports that were received at head office from the branches.

#### Information for President

Mr. Loucks stated that during the summer of 1921 he had been detached from his regular duties by the general manager, Macarow, to prepare a series of special returns said to be for the president. These returns were:

1. The history of all bad and doubtful debts with a statement of the exact balances.
2. The history of all call loans; and,
3. A list of loans and advances to officers of the bank.

"I gave the first statement to Sir Montagu Allan," continued Loucks, "and I later received it back from him when it was needed. The other two statements I never saw again although they, too, were supposed to be for the president. The matter used in compiling these statements was taken from the subsidiary books and not from the semi-annual statements or quarterly returns. I was asked for them early in the summer and given three months to prepare them. They were wanted for September."

#### Report on Montreal Branch

Thomas Mackay, an inspector of the Merchants' Bank, explained how he had been called to Montreal at the order of the president, who wanted him to make a report on the Montreal branch. Witness explained that he had presented an interim report in September, 1920, and a full report in 1921. This report showed among other things a deficit of $4,792,089 on the Thornton Davidson account and its subsidiaries, and $616,256 covering all other accounts. He delivered the report to Sir Montagu Allan in his office.

Judge Decarie: "At what date did you deliver it?"

"About the middle or the end of February 1921.

#### Bankers Trust Company

Charles D. Cornell, secretary of the Bankers Trust Co., was the next witness, and in reply to a request from J. J. Creelman, K.C., he read extracts from the minutes of a meeting of the directors of the company showing that on April 19, 1921, the company tendered to the Merchants Bank of Canada for the purchase of 3,305 unallotted shares of the bank at $160 per share ex-dividend, and that the tender was accepted in May of the same year. The directors present at the meeting were Sir Montagu Allan, F. Howard Wilson, D. C. Macarow, G. L. Cains, A. B. Evans and F. Ross. The witness asked if the shares were paid for by the Bankers Trust Co., and replied in the affirmative.

"Out of what funds?" asked Mr. Creelman.

"Funds borrowed from the Merchants Bank."

"How much money did the Bankers Trust borrow from the Merchants Bank to pay for this stock?"—"$528,800."

"Between the date of the acquisition of those shares in April and the end of October, 1921, were any of those shares sold?"—"Yes, 366."

"What was done with the proceeds of the sale of those 366 shares?"

"It was applied against the loan."

Mr. Creelman: "What was the amount of the loan still outstanding October 31, 1921?"

Witness: "$455,900.88."

"Have you a list of the shareholders of the Bankers Trust Co. as of April, 1921, and was the Merchants Bank of Canada a shareholder?"

"The Merchants Bank owned 2,482 shares out of a total of 2,500 shares."

"Are you able to say how many of the remaining eighteen shares were held by officers of the Merchants Bank of Canada?"

"All but three."

#### Statement from Branches

William A. Meldrum, who was general supervisor of the Merchants Bank of Canada for its western branches and also in the credit department, was questioned by Charles Wilson, K.C., relative to the reports that were made to the bank from the branches. He stated that there was a weekly change sheet showing the increases or decreases in all accounts over $1,000 during that week, quarterly liability statements and semi-annual statements which gave details of the accounts and the manager's remarks thereon. None of these statements were used in the preparation of the monthly return to the government as that was made up from special monthly returns sent in by the branches for that purpose. Witness further stated that all applications for credits over $25,000 went to the Board of Directors for consideration and when an application for credit was made there accompanied it all the details necessary to give a complete history of the account, similar to that retained in the branch office.

The witness stated that the quarterly statements did not have any appreciation of the value of the debt; that was contained only in the semi-annual statements.

The quarterly statements did not come in all at the same time, although they were every three months. The Ontario reports might come in at the end of August and the Manitoba ones at the end of September, so that they did not all come in together. The appropriations for bad debts were made once a year from the semi-annual report on April 30, in time for the annual meeting and managers were instructed to get these in promptly for that reason. There was not the same speed necessary for the September semi-annual return as that was not tabulated, only fyled.

#### Mackenzie Investigation

H. B. Mackenzie was then called, and said that he was asked by Sir Montagu on Aug. 25, 1921, to look into the affairs of the bank, as he (Sir Montagu) was not satisfied he was correctly informed as to its true position, and whether the "rest" account was intact. He made the investigation at his house, the material he required being secured by Sir Montagu and sent up to his house. He delivered his report on the afternoon on November 14, the gist of it being that the "rest" was impaired to the extent of some $8,000,000. He had a number of discussions with Sir Montagu on different items, and towards the end of the investigation Sir Montagu gave him some figures he had got out himself and he compared those with his own. The report was confidential and he was requested by Sir Montagu not to communicate it to anyone.

#### Edwards Examined

At the hearing on October 16, George Edwards, chartered accountant, was examined, and the evidence given was practically a repetition of that given at the Macarow trial. However, Mr. Edwards withdrew from some of the former positions taken up by him in regard to the classifications and laid down the view that while he did not think certain transactions had been properly classified, he was not called upon to state under what heading in the October Government return they should have been placed.

A sharp passage between counsel enlivened the proceedings which were dulled by repetition of evidence that had been heard four times over in connection with Merchants Bank affairs. Mr. Geoffrion, for the defence, claimed that the methods used by the prosecution would lead

### Case for Defence

On October 17 counsel for both defence and prosecution summed up their cases.—The defence argued that the report was correct; that if it had not been correct Sir Montagu still was not at fault, having no knowledge of the details constituting its inaccuracy; and that there was difference of opinion, and it was no negligence or fault to lean to the opinion favored by banking experts around him. The prosecution maintained that Sir Montagu must have known that the signing of a report known to be inaccurate, whatever the reason, could not be justified.

The three principal points of Aime Geoffrion's argument were: That in all the matters complained of by the Government expert accountant, Mr. Edwards, whose evidence Mr. Geoffrion dealt with specially, Sir Montagu Allen was not supposed to know anything of the details of these transactions; that even if he did know, they were quite correctly recorded; and that, in any case, there were at least two honest points of view possible, and in choosing between the two views Sir Montagu was justified in taking the view held by his expert advisers, the General Manager and the Auditors of the bank.

### Case of Prosecution

C. A. Wilson, K.C., in addressing the court for the Crown, made his argument in French, declaring that he was more familiar with that language than English, although the whole of the trials that have taken place so far have been in English.

Mr. Wilson said that the case did not present the difficulties that the Crown had been faced with in the Macarow case, because in the latter they had sought to establish that the return made had been a false return, whereas in the present one they had only to prove that it had been negligently made. Mr. Wilson contended that they had proved negligence in regard to overdue debts, the bank premises, the land security corporation, the National Liberty Bank, and the Bankers' Trust.

Either Sir Montagu knew of those transactions or he did not, argued Mr. Wilson. If he knew, then he was guilty of negligently signing a return that was false, and if he did not know he should have known. The evidence showed that he knew everything for he was a party to all the transactions. His sources of information were not only the Mackenzie report and the Allan Wilson report, but also the semi-annual, the quarterly and the weekly returns, and it was his duty to take cognizance of them. If he was not satisfied with the October return he could have attached a rider to it, the same as was done with a later report, or he could have held it back for further investigation. It would have been better for him to have delayed his report than to have signed a false return, as he knew it was so. If for any reason the return was not made within 20 days there was simply a penalty attached, and the Minister of Finance had the right to recover or not, as he saw fit.

### Thornton Davidson Losses

Coming to the Thornton Davidson account. Mr. Wilson insisted that Sir Montagu Allan knew what had been going on in that connection.

"Sir Montagu Allan knew that," said Mr. Wilson. "It is not a question of detail, it is not a small matter to be looked for through the hooks. He knew it ever since the bankruptcy. He knew it since they assigned. The details were furnished to Sir Montagu Allan item by item. This state of affairs was not produced like a clap of thunder in an afternoon. It was produced gradually. Thornton Davidson were not given $5,000,000 all at once. It developed a little at a time. Then suddenly in April it came out that their hidden reserve was gone. From that moment on the President asked for one report after another, and after he had the conviction himself that the returns were false he continued to sign them, without any reserve, without trying to protect himself, after having made his personal investigation and found that the reserves were exaggerated to the extent of four millions. Why did he not make a reserve in the October report? That might have brought about a run on the bank.

"That may be good finance, but the law does not say if you lose a million or two you shall not notify it because it might bring about a run on the bank."

## INSURANCE INSTITUTE OF TORONTO

### Educational Work Reviewed by G. C. Moore in His Inaugural Address

The opening meeting of the Insurance Institute of Toronto was held on October 17. Examination certificates were presented by W. A. P. Wood, actuary of the Canada Life, and Professor C. T. Currelly, curator of the Royal Ontario Museum, delivered an address on "The History of Money."

G. C. Moore, of the Imperial Life, in his inaugural address as president, dealt with "Agency Contracts in Life Insurance." Mr. Moore's address has already been published in The Monetary Times. Mr. Moore is actuary and assistant general manager, not secretary as stated last week. Mr Moore also reviewed the educational work of the Institute as follows:—

"At the close of last year there was in force in Canada nearly six billion dollars of Fire Insurance, with a premium income collection of over fifty and a half millions. There was in force in Canada nearly three billion dollars of life insurance, with an annual premium income of ninety-eight millions. In the other branches outside of these two main branches, that is, accident, sickness, automobile, guaranty, etc., there was written in Canada during 1921 twenty-six million dollars of premiums. How rapidly the business of insurance has expanded in Canada to these enormous figures is shown by the fact that the amount of fire insurance in force in Canada is six times, and life insurance eight times, what it was when our Institute was organized some twenty-three years ago. My reason for quoting these figures is that we may to some extent visualize the amount of office work entailed in taking care of this vast volume of business and that we may endeavor to realize what a great army of office employees must be engaged in the various insurance offices throughout Canada, which army is ever rapidly increasing to keep pace with the rapid expansion of the business.

"At the present time the Insurance Institute of Toronto is the only institute or body of any kind in Canada that furnishes educational facilities along practical insurance lines to this great body of insurance office employees. Among all the good purposes which the Institute serves, this one of education is paramount. The Institute wishes to make itself a very real factor in promoting insurance knowledge and developing greater efficiency among the insurance office staffs of Canada. Insurance, no matter of what kind, depends upon pubic good-will and public favor. We went to be able to feel that in the insurance business, which is one of the most important factors in the economic life of Canada, the public is getting at least as expert and capable service as in any other line of business.

"This is viewing the educational work of the Institute in its broad sense. Let us look at it for a moment in its relation to the individual office employee. The one type is he who having secured a position in an office feels that he has reached a time to which he has been looking forward with anticipation, because, to his way of thinking, it is a time when he shall be earning money, when he shall be free from studies and be his own master after office hours are over. He does his office work conscientiously, but does not take any particular interest in it. In fact, he finds it somewhat irksome. He feels that he can learn during office hours all that it is necessary to know regarding the particular branch of insurance in which he is engaged, and he fondly trusts that careful work and any natural aptitude which he possesses will carry him to the top. Rarely, however, are his hopes realized, and if this spirit towards the life work which he has taken up is maintained, if he continues to let his craving for pleasure dominate and override his ambition, he cannot with reason grumble if he sees himself outdistanced and if he has eventually to reconcile himself to a business future of uninspiring routine work and mediocrity.

"The other type of office employee is one who having secured a position in an insurance office and being freed from school discipline and home restraint, develops within himself an inner control which balances the removal of the former outer control. He realizes that his previous education is but the ground-work upon which to build the specialized education necessary to fit him for, and enable him to make the most of, the life work he has chosen. He realizes that the particular department in which his work might lie is correlated with all other departments of the business and that a knowledge of all is necessary, if he is to see his own work in its proper perspective and to do it in the most efficient manner. He is quite content to make whatever sacrifice of pleasure is involved in investing a few evenings a week in the study of his particular branch of insurance, for he knows that no other investment is likely to bring him in as high returns. Increased knowledge of his work brings added interest in it. Because of this interest he finds suggestions and sees possibilities never thought of by the uninterested type of employee. He fits himself for whatever advancement in his calling his other qualities might warrant. He has confidence in himself and his whole future life is apt to be one of greater achievement, prestige and success.

" 'What is it,' asks one writer, 'that brings one man success in life, and what is it that brings mediocrity or failure to his brother? The difference,' he says, 'cannot be in mental capacity. There is not the difference in mentalities indicated by the difference in results. There seems only one conclusion to be reached, which is that some men succeed because in earlier years they have cheerfully made the sacrifices and paid the price that was bound to bring success, while others, although claiming that they were just as ambitious and were just as desirous of succeeding, were unwilling to make that sacrifice or pay that price. The question each young man has to ask himself then is this—"Am I willing to make the necessary sacrifice for the next few years to secure thereafter the comfort, the rewards, the prestige and glory that go with achievement and success. or shall I be content to tread the beaten paths that are for beaten men?"

"This is the question I leave with the young men of the Institute.

"In conclusion, may I express my appreciation of the honor you have done me in electing me to the presidency of the Institute. Whether my year of office is going to be a success will, in my own mind at least, be judged by the interest taken this year in the Institute examinations. I ask the cooperation of all the members of the Institute to make the year a record one in that respect."

## WANT AGENTS LICENSING ACT

### Field Men in British Columbia Favor It—Board Agents Prohibited From Doing Business With Non-Board Agencies

(Special to The Monetary Times)

Vancouver, Oct. 14.—A draft of a proposed provincial act for the licensing and qualification of insurance agents and adjusters was adopted at a meeting here on Thursday attended by the executive committees of seven different insurance organizations of British Columbia. The insurance interests represented at the meeting will press for the passage of the act at the forthcoming session of the legislature and it is understood that practically all the fire and life agents in the province are in favor of the measure. Heretofore no provincial license has been required to engeage in the insurance agency business. Last year a similar act failed to pass the house but a strong deputation is arranging to visit Victoria this month in support of the proposed bill.

The abrogation of the so called "Non-intercourse rule" of the B.C. Fire Underwriters' Association whereby board agents are prohibited from doing business with non-board agencies was the subject of a three-hour session on Thursday between a committee of the B.C. Fire Underwriters' Association and fire insurance agents from Vancouver, Victoria and New Westminster. No decision was reached but a joint committee of agents and Board officials was appointed to further investigate the subject.

## EXCHANGE ON RAILWAY RATES

The rate of exchange in connection with shipments of freight between points in Canada and the United States from October 15 to October 31, inclusive, will be one-eighth of one per cent. No surcharge will be collected on international freight or passenger business.

## WANT LUMBER DUTIES REMOVED.

### British Columbia Operators Want Sales Tax Removed.

At a meeting of the Victoria Chamber of Commerce, held on October 2, a resolution was adopted by the directors regarding reciprocity with the United States in certain lumber products.

The resolution takes into consideration the passage of the new United States tariff, which empowers President Harding to impose a duty on Canadian lumber imports into the United States similar to the present Canadian duty on American lumber.

J. O. Cameron, one of British Columbia's leading lumber operators, and the sponsor of the resolution, said that the United States constituted the most dependable market Canadian lumber had today, and that a stiff tariff on Canadian exports to that country would impose a severe handicap on the industry.

The B. C. Lumber and Shingle Manufacturers' Association and the Associated Boards of Trade will be asked to take similar action, and the matter will be brought to the attention of Premier Mackenzie King and the Ministers of Trade and Commerce, Customs, Finance and Public Works.

The resolution asks not only that the duty on imported lumber when planed on more than one side be removed, but that the extra sales tax now imposed on lumber imports be eliminated as well.

## FOUR NEW FILM COMPANIES

Three motion picture production concerns have been formed in the maritime provinces and one in Newfoundland through the efforts of Ernest Shipman, of New York City. The first organized was the New Brunswick Films, Limited, which will film the novel of fishing life, "Blue Water," by Captain F. W. Wallace. The scenes will be taken along the Bay of Fundy for this photoplay and the scenario will be by Faith Green. The second firm organized by Mr. Shipman was the Halifax Films, Limited, which will produce another fishing story by Captain Wallace, "Viking Blood." A company was also formed in Newfoundland, with headquarters in St. John's. This concern will film "Fogged," an original story of Newfoundland fishing life. The fourth company is the Prince Edward Island Films, Limited, which will produce a film based on life on the island of the Gulf of St. Lawrence.

The underwriters of the stock of New Brunswick Films, Limited, which is capitalized at $100,000, are J. M. Robinson & Sons, of St. John and Montreal. An advertising campaign is being instituted in behalf of the stock selling.

## COAL OUTPUT

That the return toward normal conditions in the coal mining industry has commenced is apparent from a review of statistics collected for the month of June. In the month of June the total output of all grades from Canadian mines amounted to 811,066 tons as against 720,535 tons in the preceding month. Compared with the average for June during the three years 1919-20-21 the output amounted to 79 per cent., of the record for these years.

Imports from the United States increased 28 per cent., over the amounts for the preceding month.

We own and offer Holt, Renfrew and Company, Ltd. 6½% 1st mortgage 15 year gold bonds.

For 85 years the record of the company has been honourable and progressive.

Average earnings over the past six years have been more than five times the annual bond interest requirements.

Net assets are equivalent to over $3400 for each $1000 bond.

It carries our recommendation.

PRICE: 100 and accrued interest yielding 6.50%.

## LIMITED OR JOINT STOCK COMPANIES

(Continued from page 3)

which we may, by deducting the amounts subscribed and unpaid, extend the paid up capital. If no account is carried for authorized capital and we desire to show it in the balance sheet, it will be as a memo only.

Having referred to cumulative preferred shares, we should observe that if the dividends on these are in arrears, the arrears will not constitute a liability, for there is no liability for dividends until declared. It is the preference that is cumulative and this means that the arrears must be made up, if there are distributions of profits, before anything is given to other classes of shareholders. It does not mean there must be a distribution. The information must, however, be given with a financial statement and this may be done in the form of a memo so that all classes of shareholders may understand their position.

### Increase and Decrease of Capital

1. Increase of Capital.

The accounting of an increase in capital does not present any special features. The entries for the increases will be similar to those made to record the original capital. Increase may be made in Dominion or Ontario Companies after 90% of capital stock is taken up and 50% paid thereon.

2. Reduction of Capital.

Conditions leading to reduction of share capital:

(a) Impairment of capital;

(b) Capital in excess of the wants of the company.

Reduction may be effected by:

(a) Cancellation of paid up capital (unrepresented by available assets or lost—Dominion).

(b) Extinguishing or reducing liability on any of its shares in respect of share capital not paid up.

(c) Paying off any paid up share capital which is in excess of the wants of the company.

(d) A clause in the English Act relating to joint stock companies has been incorporated in some of the Canadian Acts, which provides that "When a company having a share capital has accumulated a sum of undivided profits which, with the sanction of the shareholders, may be distributed among the shareholders in the form of a dividend or bonus, it may by special resolution return the same or any part thereof to the shareholders in reduction of the paid up capital of the company, the unpaid capital being thereby increased by a similar amount."

### Unpaid Shares

Should a reduction in share capital involve a reduction in the liability in respect of unpaid share capital or a payment to shareholders of paid up capital, the creditors are entitled to object to the reduction. In Ontario companies, liability of shareholders to creditors at the time of reduction cannot be reduced.

If capital stock is unrepresented by assets, it means that there will be a deficit and, to eliminate this impairment, after compliance with legal requirements, an entry in the accounts will be made transferring from capital stock to capital reserve the amount of the reduction and this capital reserve, by a further entry, is applied to the impairment, the result being a balance sheet with possibly a capital reserve and no impairment.

The shareholders have not given away anything but have merely adjusted the records to bring them into accord with the facts and to give a fair appearance to their financial statements, at the same time relieving them of the necessity of making up the impairment out of net profits before dividends are again declared. This is an accounting feature that many concerns have resorted to in recent years, while passing through unusual conditions.

To record the reduction of liability in respect of unpaid shares, an entry is required reducing subscribed capital and crediting subscription or subscribers, with corresponding adjustments in the share records.

### Undivided Profits

The application of undivided profits to capital would appear to present a problem. The question is: How can we apply profits, constituting part of the equity of shareholders, to capital, which constitutes another part of such equity.

Suppose that a company with $500,000 subscribed and $300,000 paid up on its capital, with accumulated profits in reserve fund of $250,000 decides to apply $100,000 of this in reduction of its paid up Capital. The procedure in the accounts will be to charge capital with a cash payment of $100,000, thus recording the reduction. This will not meet the situation fully, however, if we do not protect a similar amount of net profits from distribution and, hence, a further entry transferring from reserve fund to a capital reserve, $100,000.

In connection with the share issue, it should be noted that a subscriber is liable to creditors for the unpaid amounts on his shares, should they first have taken action against the company and are unable to collect their claims. The subscriber may set off against the amount due by him any amounts that the company owes him, except for dividends or salary as president or director.

It quite usually happens that when subscriptions are invited for shares they will be received in excess of the amount desired and be only partly allotted, which requires that we make a distinction between an **applicant** and a **shareholder** or **subscriber**, particularly if a payment is required with the application and so we have received amounts which we must return.

When this is the case and the balance is payable in a number of calls, it is desirable that we keep a separate account for each call.

### Forfeiture of Shares

If, after the demand or notice described, any call made by the directors is unpaid, the directors will have the right either to take action in the courts to enforce the payments with interest or, according to the terms of the regulations governing their company, to declare the shares forfeited. Such shares so declared forfeited then become the property of the company and may be disposed of as the by-laws or other regulations provide, but in disposing of them they must receive sufficient that with the amounts already received will cover the par value of the shares and any premium that is required.

It is sometimes provided that in disposing of shares that are forfeited, sale may be made either of all or of sufficient that the excess realized will be sufficient to cover the arrears on the balance, in which case these shares may be given back to the original holder.

It should be noted that when a forfeiture has taken place, the original subscriber, or the one then holding the shares, remains liable until the full amount is recovered.

When shares are forfeited and reissued so that the amount realized, together with what was obtained from the original subscriber, exceeds the par value, this excess is best treated as premium on shares, which in effect it is. It is much better to be designated as such rather than as profit or forfeited shares.

### Treasury Stock

The term "Treasury Stock" is applied by different authorities in two distinct senses. Some apply it in the sense of referring to the unsubscribed share capital, which is thus described as being "in the treasury." Others again use the term to mean "Donated Stock" i.e. share capital which has been issued fully paid up and later donated to the company, through a transfer to the treasurer, by the holders, that it may be reissued by the company at any price obtainable, for the purpose of obtaining working capital.

When applied as first referred to, no accounting features are involved beyond an understanding of the term in the sense it is used. If used to refer to donated stock, as described, it is at once brought into the accounts and its relation thereto should be clearly understood and the benefits derived therefrom clearly recorded separate from earnings.

### Share Discount

It is generally recognized that a trading or other industrial company cannot issue shares at a discount, though they may pay a commission to a person either in consideration of his subscribing to the capital stock or procuring subscriptions from others.

In a company such as a mining company, however, if proper procedure is complied with, shares may be issued at a discount and this brings up the necessary accounting for the discount.

This condition again brings out the difference from the accounting viewpoint between such shares being issued without par value and issued with par value as, under the former method the question of discount does not arise.

Such a discount being recorded on one side of the accounts and the capital stock recorded at par on the other side, may be eliminated out of future earnings but in the meantime, if deducted from the par value, shows clearly the amount of actual paid up capital.

In practice we find, very often, common shares given as a bonus to the purchasers of preferred shares or bonds. This does not mean that shares may be given as a bonus when originally issued. They must first have been given for some consideration, fully paid up, and as they then become the personal property of the holder, he may then give them away as a bonus. The consideration is very often services in promoting a company, or goodwill. What the consideration is, as long as it is legal, is not the material factor. They must have been issued for some consideration in the first place.

It follows then that the entries in the accounts, to show the issue of such shares, will be at some time prior to their being given as a bonus and the only entry necessary, when they are given as a bonus, will be in the books of record to show the transfer from one holder to another.

The term bonus stock is often applied, also, to shares issued as a stock dividend, particularly if in addition to the usual cash dividend.

### Acquiring a Company

If a company acquires the business of another concern on the basis of a balance sheet of an earlier date, the books not being closesd at the time of transfer, a line must be drawn, at the end of the year, in the account, to distinguish between earnings prior to acquisition and earnings afterwards. Earnings are represented by assets. Hence, any earnings between the date of the Balance Sheet taken as a basis for purchase and the date of actual acquisition mean that the tangible assets have in that period increased by the amount of profits over the amount shown in the balance sheet and, from this it follows that if we have set up an intangible asset (Goodwill) for the excess of purchase price over the net value shown in the balance sheet, it will have been recorded at an amount too great by the profits earned in the meantime.

A company cannot earn profits prior to its organization and, in this case, may consider as its profits only the earnings since it actually acquired the business. An adjustment at the end of the year must be made in the accounts, transferring from the net profits for the whole year to the credit of goodwill, or other fixed asset, the amount of profits estimated as earned between the date of the balance sheet and the date of acquisition. If, in lieu of these profits, the purchaser pays interest on the purchase price, such interest, up to the date of acquisition, increases the purchase price and so offsets the profits for the same period.

If a company acquires assets from another concern at less than their book value, the difference will not constitute a profit. Thus, if an asset carried in the books of the vendor at $50,000 is acquired for $40,000, we should not consider the difference a profit but either deduct it from the fixed assets or hold it as a reserve against current assets, or partly both. An essential feature to profit-earning is realization and, until realization has taken place, a profit is not certain.

### "Writing Up" Assets

In the same way, should a company estimate, by appraisal or otherwise, that its fixed assets are worth more than shown in the books and they write them up by a charge to the asset account accordingly, the credit side of the entry should be to an account for reserve for appreciation and, even if shown under the head of capital surplus, should be designated separate from any profits. The element of realization is again lacking and hence there can be no true profit that would be available for distribution. Should the asset be realized and the profit thus become a fact, it is not income for tax purposes but an accretion of capital and should be recorded accordingly.

Limited companies frequently obtain a large part of their capital by the issue of bonds, on which interest is paid. This calls for care in the preparation of the operating accounts or statements. Interest on borrowed capital is not an operating charge but represents the cost of obtaining capital to operate with. The statement is so often made that "if we did not have to pay the interest the amount would be available for dividends" that the situation should be closely examined.

### Return on Capital

Suppose a company has a paid up capital of $300,000, a reserve fund of $200,000 and has borrowed, by a bond issue, at 6%, $100,000;

also that its net profits, after paying interest, amount to $54,000, which is 18% on the paid up capital. Such a statement of return would be very misleading. In our profit and loss account we will first show the operating profit before the interest charge is made, i.e. $60,000. This is what a total capital of $600,000 has earned and so indicates an earning capacity of 10%. We now bring in the charge for interest, followed by bringing down a net profit of $54,000 which. on shareholders' equity of $500,000 indicates a return to shareholders on their total equity of 10 4/5%. If further capital had been issued and the loan paid off the return to shareholders on their total investment would be the earning capacity of 10% only. It is not enough then to eliminate the interest in the accounts. It is better to show the whole operation. The shareholders are now receiving a higher return than they would if capital had been issued for the amount of the bonds, because money borrowed at 6% is earning 10%, they receiving the benefit of the difference.

The above features, as they relate to a statement of earnings, all go to show that we cannot be too accurate, from the viewpoint of facts, when preparing statements for a limited company.

### TO TEST ROOFING MATERIALS

#### Committee of Dominion Fire Prevention Association Calls Meeting in Montreal.

Roofing materials in respect of fires will be investigated by a committee of the Dominion Fire Prevention Association, a meeting having been called for October 27, at the Engineering Building, McGill University, Montreal, to arrange for testings. The committee, as appointed recently by the secretary, G. D. Finlayson, of Ottawa, consists of Professors McKay, French and Johnston of McGill University, professors of civil engineering, highway and municipal engineering, and chemistry, respectively.

This action follows the passing of the following resolution at the last annual meeting of the association at Ottawa, Sept. 29 and 30, 1921:—

"WHEREAS conflagrations and fires which spread to adjoining buildings annually destroy property of immense value both in Canada and the United States, and

"WHEREAS the danger of such fires is said to be largely increased by the prevalent use of combustible roofing materials, and

"WHEREAS it is desirable for the information of the general public that the comparative combustibility of the various roofing materials be determined,

"WE, the Dominion Fire Prevention Association in convention assembled, do hereby recommend that an impartial committee of technically competent persons be named by the president and secretary of this association to test and report upon the qualities of the various roofing materials now sold and used in Canada. The report of this committee should be made to the executive Committee of the association for approval and for subsequent transmission to members and other interested parties.

"We would further recommend that the investigation and report of the committee deal as exhaustively as possible with the following specific points:—

(a) Combustibility; (b) Liability to communicate fire to other property; (c) Comparative Costs (At factory, from dealers and applied to roofs in various parts of Canada); (d) Durability and cost of maintenance); (e) Appearance on roofs; (f) Treatment of combustible roofings to render them fire resistive (Inclusive of methods and costs of such treatment when applied to materials prior to their use, after being placed in position upon roofs and when applied to existing roof coverings'; (g) The adoption of standards for roofing materials and designation in accordance therewith of each material reported upon.

"The committee should be empowered to make use of all available reports and impartial tests of roof coverings and in dealing with wooden shingles it is suggested that proper cognizance be taken of the species of lumber used in their manufacture and also of the manufacturer's grading."

# *Recent Fires*

Fire losses in Canada during the week ended October 25th, are estimated by The Monetary Times at $604,200, compared with $61,000 the previous week. The details are as follows:—

**Amherst, N.S.**—Oct. 14th. Residence occupied by Teddy Legere, South Albion street. Loss $2,000, insurance, $1,000.

**Beaconsfield, Que.**—Oct. 18th. Club house, residence and two barns belonging to V. C. Fuller. Loss $7,000.

Labrecque & Co., Wolfe Street, lumber, the following companies are interested: Queen $16,850; Montreal Mutual $5,000; Mercantile of St. Hyacinthe, P.Q. $5,000; Queensland $4,100; Fire Ins. Co. of Canada $1,500; Phoenix of London $1,000; Mount Royal $1,000. Total $34,460. Loss about $12,000.

**Sudbury, Ont.**—According to figures provided by Fire Chief Gravelle, fire losses for the first nine months of 1922 have almost reached the total losses of 1921, which totalled $88,667. The losses up to date amount to $85,350.

### QUEBEC BLUE GOOSE

The annual meeting of the Quebec Pond of the Blue Goose was held in Montreal on October 9. E. P. Heaton, fire marshal of Ontario, and Chief Chevalier, of the Montreal Fire Department, were the principal speakers. The basic relationship of fire insurance was to fire protection and fire prevention, said E. P. Heaton. This same relationship was shared by the fire department of every city. It was the chief duty of the fire department to prevent fires, and not to put them out.

The speaker showed how the whole system of fire protection was based on fire insurance, had been caused by and dictated by fire insurance. In olden days there were individual fire brigades to prevent and put out fires. These individual brigades were employed by the fire insurance companies to protect the property insured. If a property insured by one company got on fire, the fire agents hired by that company would have to put it out; the other brigades would let it burn. As time went on the business of fire protection began to develop; the fire bucket gave place to the hand pump; then the steam pump; and finally the modern gasoline pump.

In 20 years the population of Canada had increased 65 per cent. In that time the liability undertaken by insurance companies had increased over 500 times; while the fire waste had developed 214 per cent. Canada's fire waste was to-day appalling. Comparisons had been made to the fire waste per capita of England and other European countries with that of Canada. But the speaker affirmed that this way of comparision was foolish. These countries had thousands of citizens living in poverty, and could not be compared with this new country. Fire was the most destructive agency Canada had, and as his listeners were engaged in the business of helping those who suffered from fire, Mr. Heaton called upon them, in their own interest, to minimize the ravaging results of this great enemy.

### BANK SAFE NOT DAMAGED

The Banque d'Hochelaga announces that the contents of its safe at Haileybury were not damaged by the recent fire. The bank is carrying on business in temporary quarters at Haileybury and North Temiskaming.

### NEW INCORPORATIONS

(Continued from page 18)

(Louis P. Crepeau) Montreal, $100,000; Haliburton & White, Ltd., (Wm. M. Haliburton) Montreal, $49,000; Max Segal, Ltd., (Max Segal) Montreal, $20,000; Leduc & Fils, Ltd., (Ferdinand Leduc) Beauharnois, $49,000.

Saskatchewan—Niven Construction Co., Ltd., Govan, $20,000; Thomas Automatic Roller Screen Co., Ltd., Moose Jaw, $24,000; Miner Hardware and Motor Co., Ltd., Abbey, $25,000; Masterson Motors, Ltd., Regina, $40,000.

### SALMON PACK BETTER

According to the latest available returns the British Columbia salmon fishing returns this season will be much better than anticipated. Up to September 16th, 5,077,584 pounds of salmon had been packed in 105,783 cases, each case containing 96 half-pound tins of salmon.

Although sockeye was the principal catch, 43,344 cases being packed, 37,830 cases of pink or humpbacks went to swell the pack. There are three varieties of springs, red, pink and white, and they filled 11,389, 958 and 4,016 cases respectively. Cohoes supplied the filling for 6,202 cases, blue backs 622, and chums 1,422.

### BRITISH HONDURAS

"There is an extraordinary strong desire in British Honduras to increase its trade with Canada," G. R. Stevens, Canadian trade commissioner in Jamaica, has advised the Department of Trade and Commerce. "Indeed," Mr. Stevens adds, "in no part of the West Indies is Canadian sentiment and the desire for Canadian participation in their markets so marked. That is very sound business upon the part of British Honduras. They feel that they have been at the mercy of American jobbers for a long time and that competition will improve prices. This is unquestionably correct. In addition, the acquisition of the Canadian Government Merchant Marine has had a marked effect upon freight rates from the American gulf ports."

### PEACE RIVER PETROLEUM

Creditors of the Peace River Petroleum Co., Toronto, on September 20 met and appointed inspectors to collect the assets of the company, consisting of nominally $79,033 worth of machinery. The company assigned August 25th, with nominal assets of $82,277.18 and liabilities of $14,550.08.

The reason for the assignment is that the company have exhausted all the capital raised in developing wells in the Peace River district which failed to prove up. Hopes were held that one of the wells would be realized on, but the failure of the last well to prove up caused the assignment. The company has no cash on hand to pay creditors with, but hope to realize on the machinery at the well.

### EAST KOOTENAY POWER

The East Kootenay Power Co., which is supplying electric power to the Canadian Consolidated Smelting Co., as well as to several municipalities, has closed a contract to supply its electric power to the Hillcrest Collieries, Limited, and is now selling power to every one of the coal mines in that territory. This is a striking demonstration of the possibilities of lowering the cost of power production through the efficient development of hydro-electric plants. These coal companies find they can buy hydro-electric power more cheaply than they could manufacture it from their own coal at their own pit heads.

# Signs of The Times

BY E. L. CHICANOT

Good times are to a certain extent a state of mind which is at the same time exceedingly contagious, and apt to spread in an extraordinarily rapid manner over the entire country. Develop an optimistic frame of mind, a conviction that things are brighter than the majority would have one believe, innoculate one's neighbor with the same happy virus, and the contagion seizes the whole country and brings better and more prosperous conditions in its wake through sheer force of will. It is the permeating influence of such a spirit that creates achievement and impels man to constructive effort. If the average man can only read the signs of the times aright he has a guide which cannot take him far astray.

Canada since the war has been struggling through a period of depression unequalled for its severity in national history, but she has undoubtedly suffered to a much less extent than most countries materially involved in the Great War. Adverse times, for the greater part, struck the Dominion unexpectedly, few people being conscious of their approach. More prosperous times seem to be coming to them just as warily, creeping upon them with muffled tread, and likely to burst upon them just as unexpectant and unready. This is not a mere matter of opinion but the conclusion to be drawn from reading the signs of the times, the unquestionable logic of cold, hard figures of production.

### Evidence At Hand

Canada today, as a matter of fact, is in a position to be envied and more people will be appreciative of the fact in a short time than they are today. Just now the general public is blundering on in a vague of doubt, unheedful of material evidence on every hand. It is forced to see a certain inclination to return to normal conditions in the declining prices of commodities but pessimistically grumble that this is offset by the drop in wages. It talks gloomily of the coal situation this winter and after the bitter experiences of the past few years is inclined to regard changes in the economic situation with a good deal of skepticism. The general public refuses to be stampeded into an optimism which may be rudely dissipated.

Yet with the year having progressed so far as it has there is scant possibility of being led astray. Canadians do not realize what a really wonderful year 1922 has been and is going to be for the Dominion. Blindly groping for some material hope to hold on to, they miss the real concrete evidence and at the end of the year a few will read statistics of production and in such definite and indisputable proof of prosperity will wonder they did not see greater things for the past year. It is better now to read the signs of the times aright and instill that sense of optimism than at the end of the year to enjoy the twelve months in retrospect.

### Cost of Living

First there is the cost of living. There is not a shadow of doubt but that this is coming down. The index number of wholesale prices was lower in June than in any month since June 1917. The average cost of a weekly family budget of twenty-nine staple commodities in sixty cities of the Dominion is now $10.28 a week compared with $11.82 last year and $15.95 in 1920. The same budget in 1914 cost $7.83 so that the tendency to get back rapidly to prewar prices is evident.

Canada has little reason to feel at all disquieted with her trade which is showing a very gratifying growth and is larger this year than it has ever been. The Dominion now leads the world in per capita exports with the amount of $150 for every man, woman and child resident in the land. Taking the total amounts there is a pleasing balance between exports and imports. The only point of criticism in the trade is the inequality of business between Canada and the United Kingdom, which works rather to the detriment of the British Isles than Canada, and which, in any case, all indications point to being steadily rectified.

The fact that the Canadian dollar is now at par in the United States is due no less to the equalization of export and import trade, a situation largely brought about by the Republic itself through its tariff, than to the universally acknowledged soundness of the Dominion and its stability of condition.

### Fordney Tariff

The much dreaded Fordney Tariff, which threw a section of the Canadian populace into a panic, has done its worst and left the Dominion but little affected. In many ways the legislation has worked to Canada's benefit developing a greater reliance and dependance on herself and bringing about the manufacture at home of certain agricultural products it was wont to ship across the border. The diverting of the products of the prairies to Canadian seaports has occasioned greater business in these sections and a larger volume of employment. Above all it has forcibly driven home the fact that the Dominion is an integral constituent of the British Empire and that greater security and independence is to be found in developing trade with the other countries composing the red circle than with one at whose mercy it is placed at a change of policy. The one remaining difficulty, an export market for Canadian cattle, remains, and this there is no longer any doubt will be solved shortly with the removal of the British embargo.

Indications of a resumption of trade on a large scale with the British Isles have been evident since the commencement of the year and Canada has been visited by many representatives of British business interests of an influential standing. More concrete evidence is present in the many British industrial establishments in Canada this summer which there is every assurance is merely the vanguard of a larger army. These are supplementing branch plants of United States firms which since the opening of the year have followed the previous trend in a manner quite unprecedented.

### Crop Outlook

The Canadian crop is a bumper uniformally heavy in all grains and roots over the entire Dominion, and of a substantial acreage. It balls but a little short of the sensational yield of the year 1915 of which farmers still speak with a sort of hush in the voice. This has largely solved such unemployment problems as Canada had. At the beginning of August Ottawa estimated that there were 45,000 men out of employment in the Dominion, and the first call for harvest help was for 41,000 men, with the trains beginning to run from the East on August 4th. When it is considered that a harvester, even at the comparatively low rate of wages prevailing this year, can accumulate something like $350 before the conclusion of the harvest and threshing season, there remains little reason for any unemployment problem this winter.

After a most depressing year in 1921 the past spring and summer have shown an activity unreached for some time in all the mineralized regions of the Dominion, and indications are that there will be substantial increments at the end of the year in the production figures of practically all minerals. Much capital was forthcoming from England last winter which is now assuring the previously hampered development of Northern Manitoba. Gold is expected to reach a new production record in British Columbia and the copper output show very pleasing figures this year. Oil prospecting and gold dredging in Alberta are stated to be very encouraging. Conditions could not be brighter in Northern Ontario where gold, silver and nickel will show increases this year and new discoveries are continually extending the capacities of the fields. Modifications in the mining regulations have brought about prospecting and developing in promising sections of Quebec which have previously been neglected and this province is expected to show an increase in gold mining.

### Timber Situation

The timber situation is highly gratifying. At the rate at which she produced newsprint for the first six months of the year Canada is going to have an output this year greater than ever in her history, approximating 1,250,000 tons, equivalent to more than double the output of any year prior to 1917, or equal to the United States production last year.

This is owing to the strong demand from the United States where about fifty per cent of that country's imports from Canada represent wood, pulp and paper. Indications are the same in timber shipments. The port of Vancouver had a record year in 1921 but 1922 is expected to even exceed this in the matter of water borne lumber. The export of timber from Montreal has up to date doubled the figures of 1921 whilst shipments from the port of Quebec are fifty per cent in excess of those at the same time last year. Large timber deals in Nova Scotia and New Brunswick this summer augur much greater activity in the timber trade of the Maritimes.

The fishing industry is having a banner year in every section of Canada where it is followed. There are bright prospects in practically every district and in every species of the commercial catch. The smelt fishery of New Brunswick has been in excess of the catch for some years and so has the lobster catch of Prince Edward Island. Salmon and cod fishing in Quebec are reported to be better than at any time during the past thirty years. Nova Scotia sent out a bigger fishing fleet from her shores this year and according to reports the catches to date have justified the augmentation. Fishing on the inland lakes of the North-West is reported to be exceptionally good this year; and according to reports from the Pacific coast, British Columbia expects a salmon catch greater than that of 1920 and 1921 and the equal of that of 1919.

### Building Trades

The same healthy indications are evident in building construction the volume of new erections so far this year being in excess of any year since 1914. Even the tourist traffic to Canada has substantially increased this year, the number of visitors from the United States to Quebec alone doubling over last year and amounting, it is estimated to 250,000. This traffic is no unimportant item but is to be considered a prime resource when it is considered that these visitors will this summer and fall leave in Canada the sum of $18,000,000.

In a rough survey such as this there seems scarce a fly to be found in the ointment of Canadian productive life, and the path would appear clear and uninterrupted to brighter times. Canadians had as well realize this now and toil on in the fervor of a vigorous optimism rather than wait for the termination of the year for each man to discover in round figures just what his brothers have been doing.

Prosperity may take the country all unaware just as adversity did, and a certain amount of foresight is necessary. According to all advices, capital both from the United States and the British Isles is coming into the country at a very gratifying rate. Canada with her enormous wealth of resources has nothing to fear once development is under way but other factors are necessary. A people of less than nine millions is certainly altogether inadequate to undertaking the development of a Dominion of such an extent , and one measure of preparation should be the provision of people to complement the flood of capital.

---

## NEW PRODUCTS MANUFACTURED IN CANADA

### Canadian Salt Co. Produce Chemical Used in Many Industries

For the first time in Canada, the manufacture of liquid chlorine was begun this week at the Sandwich plant of the Canadian Salt Co.

Alterations in the Sandwich plant, which make possible the manufacture of liquid chlorine, have been under way for some time, and the first shipment of the product was made this week. The present capacity of the plant is ten tons of liquid chlorine per day. The Sandwich plant is devoted to the manufacture of caustic soda by the electrolysis of salt brine, which is pumped up from the company's wells, drilled to a depth of approximately 1,600 feet, where nature has provided an inexhaustible vein of salt.

The chief use of liquid chlorine at present is in the bleaching of sulphite paper pulp, a product which finds its way into almost every bit of paper used, except the more expensive grades of special rag papers. Sulphite pulp is one of the constituents of newsprint.

Chlorine is also used by textile manufacturers for bleaching, and in the synthesis of many important organic chemical compounds.

---

## ACQUIRES SITE

On October 4, the Dominion Alloy Steel Corporation took over its site at Sarnia from the Dominion government. The site is a portion of the Indian reserve lying immediately south of Sarnia, and has a river frontage of over half a mile. The purchase price was slightly over $300,000.

## *New Industries*

The Peninsular Cord Tire & Rubber Co. have definitely decided to locate their factory at Hanover, Ont., and are at present negotiating for the purchase of two acres of land, where they propose to erect a modern factory for the manufacture of tires, tubes and rubber accessories.

A new company, capitalized at $250,000, for the manufacture of biscuits and confection, has obtained a site of four acres in Brantford, Ont., and where, within a short time, they will commence the erection of a factory.

With a capital of $200,000, divided into 20,000 shares at $10 each, the Fraser Valley Woollen Mills Ltd., has recently been incorporated and is at present looking for a suitable site, on which to build a factory. It is probable that the city of New Westminster may get this new company.

The Swanson Iron Works have commenced business at Fort William, Ont., where they are manufacturing all classes of structural iron work.

The Welland Cotton Mills, Ltd., with an authorized capital of $1,000,000, and head office at Welland Ont., has been incorporated for the purpose of manufacturing cotton yarns. The first of two units will be erected shortly, and will be devoted to the manufacture of coarse cotton yarns, suitable for carpets, rugs, hammocks and general cotton knitting trade. In this unit the company will also manufacture hose and belting duck and the minimum capacity will be 2,500,000 lbs. of finished goods per annum.

### WILL NEED MANY MEN

Several thousand bushmen will be required by the lumber manufacturers of Ontario west of the Great Lakes this winter, according to estimates of the Employment Service of Canada. Several hundred are being sent to these camps each week and the demand is becoming more and more insistent.

Depletion of stocks during the past summer owing to heavy building demands in Eastern Canada and the United States is responsible for the camps being put back on full strength again.

### REVIEWS TIMBER DEAL

What is familiarly known in Ontario as the "Backus deal" was described on Oct 16 by E. W. Raney, attorney general for the province, at a meeting of the Young Mens' Club of the Toronto Board of Trade. There were, in reality, he pointed out, three deals, and the history dated back to about 1915. At that time, Mr. Backus was operating a paper mill at Fort Francis, using timber from Nova Scotia and the Government of the day made an agreement with him regarding an area near Lake of the Woods. This agreement was renewed by the present government, the timber dues being fixed at a higher level, and when limits at English River were offered for public tender the bid of Mr. Backus was highest. With these supplies assured, Mr. Backus is proceeding with the construction of a mill and power development at Kenora. At the same time, pointed out the speaker, the government has power to increase the dues, provided the increase is uniform throughout the province.

# *Municipal Finance*

**Brantford, Ont.**—According to the annual report of the city assessment department there has been a decrease in the population of the city of 1,532. The total population for the year 1921 was 31,362, while that of this year is quoted at 30,109.

The total increase in general assessments is given at $292,250 with a total decrease in income of $344,040. There is also an increase in exemption amounting to $112,425, together with a total increase in tax assessment of $179,825.

During 1921 the total assessment of the city amounted to $26,342,000.

**Brighouse, B.C.**—At the tax sale on September 30 the municipality disposed of twenty lots at a price of $1,500. About 120 lots reverted to the municipality.

**Montreal, Que.**—The city treasury has received $7,920,370 toward the payment of the $13,000,000 odd that it is estimated the real estate tax of $1.35 per $100 of valuation will realize.

This is more than three-quarters of a million in excess of that paid at the same period last year and in number of accounts showed that 3,108 more people had paid their dues than twelve months ago.

**Montreal North, Que.** By their failure to record their objection to the increase when the polls were opened according to law on October 10 the citizens accepted the increase of their water rates to each house from $8 to $12. The increase was made so as to provide an additional income of $3,564 with which to pay the interest and sinking fund charges on the loan of $40,000 which the Metropolitan Commission sanctioned for the construction of new water mains. The Montreal North council's agreement to raise the tax is thus supported by the rate payers.

**Kitchener, Ont.**—On October 9 City Treasurer E. Huber announced that tax collections for the year has totalled $670,000, out of a possible $710,000. Last year the tax collections amounted to $647,000.

**Verdun, Que.**—At a meeting of the council on October 9 the annual financial report was presented and showed a surplus for the closing year. For the fiscal year ending October 31st the revenue was $576,196, and the expenditure $523,792. All revenue and expenditure had been adjusted to the beginning of the new financial year, November 1st, and the figures mentioned will hold good. The surplus is given at $52,404.

Revenue exceeded estimates by $44,044, while expenditure exceeded estimated expenditure a year ago by $23,293, the extra expenditure having been allowed only with the heavier revenue.

The increase in revenue, over and above the estimates of a year ago, is due, in part, to increases in the water tax returns, the city owning its own plant, and in the business done by the civic electric plant, the increases being approximately $12,000 and $6,000 respectively.

The tax rate was fixed at $1.45 per hundred dollars, compared with $1.50 last year and $2.165 two years ago. Tax paying property is valued at $19,021,620.

The estimated revenue for the year 1922-1923 is $573,498, and the estimated expenditure $560.950, leaving an estimated surplus of $12,548. Of the revenue expected, $275,716 is from general taxation (14½ mills,) water rates at 6 per cent. rental, $102,000; $21,750 business taxes; $14,000 licenses; special tax for local improvement and snow removal, $29,110; $61,000 from electric light charges; $7,000 amusement taxes, and the balance from various small accounts, and also $20,250 the fixed rate, from the city of Montreal, for the great quantity of land which Montreal owns in the neighboring municipality, and on which it does not pay a regular rate of taxation.

Estimates of expenditure show $239,110 needed for bond interest, sinking fund, loss on bond sales, provincial government charges, charities and war fund, and a further $35,550 for what may be termed office accounts, viz., salaries, stationery, advertising, etc. The works committee requires $72,000, providing for the department of the city engineer generally; the police and fire departments $59,175; recorder's court, $1,575; health department, $16,400; City Hall, $4,500; parks, $11,190; contingencies, $9,200; water works, $55,600; tric light, $56,700.

# Canada's Net Debt Shows Decrease

### Three Million Decline in Net Debt From Previous Month—Gross Debt Also Lower—Total Revenues Increase Two Million Over August But Is Ten Million Lower Than Last Year

A further decrease in the net debt of the Dominion of Canada is shown in the statement for the month of September, the debt being lower by over three and a half million dollars from the previous month. This decrease compares unfavorably with that of September last year, when, during that month, there was a reduction in the net debt of over twelve million dollars, the debt standing at $2,332,668,903 at the end of the month.

Total revenue collected during the month, while being ten million lower than last year, has increased by over two million dollars from the previous month. The largest increase during the month was that of income taxes, which are up by almost three million. In comparison with total revenue to the end of September, there is a decline of seven million from the same period last year.

After having shown a tendency to decline for the past few months, expenditures are now taking the opposite trend and are up by five million dollars from August, and also three million above September of last year. However, in comparison with total expenditures to the end of September, there is a decline of five million dollars from last year.

The September statement with comparisons is given herewith:—

STATEMENT

OF THE PUBLIC DEBT AND THE REVENUE AND EXPENDITURE of the Dominion of Canada, as by Returns furnished to the Finance Department to the night of the 30th September, 1921 and 1922.

| PUBLIC DEBT | | | 1921. | 1922. |
|---|---|---|---|---|
| LIABILITIES | | | $ cts. | $ cts. |

## PULP PRICE ADVANCE.

### Situation Shows Improvement-Riordon Co. Announces Advance In Price.

During the past month or so there has been a marked strengthening of the whole pulp manufacturing situation in Canada, and one of the most important and encouraging trade developments of the year is the announcement that the market for wood-pulp has reached a point where price advances are a possibility.

The Riordon Company on September 23 advanced the price of bleached sulphite $10 per ton for all other than contract business which, in the case of pulp represents nothing like the proportion of output that contract newsprint does. Accompanying this advance in prices there is reported by reliable authorities on the market, an increasingly strong demand, it being stated that mills are filled up with orders for the remainder of the year.

Not only has there been improvement in the market for the higher grade of pulp, but it is interesting to note that the groundwood market has also shown a stiffening tendency. A month ago quotations were $27 to $28 a ton, while new business is being done at $32 to $34 per ton for Canadian ground-wood.

Then again the board mills which, it will be remembered. withdrew their prices early in the month, have re-entered the market with new quotations which are up from $10 to $15 per ton on the various grades. The stronger tendency is perhaps not quite so pronounced in the case of book and fine papers, but in the case of these also there is a firming demand.

### Further Increases

A further increase in paper prices is shown in the announcement that the Canadian Export Company has started making contracts for newsprint for the first six months of next year on a basis of 3.75 cents per pound, of $75 per ton. An announcement of this sort has been expected, as it was known that Canadian producers had met at New York recently probably to discuss conditions anent to the marketing of their product next year. Recent strength of securities of newsprint producing companies on the local stock market has been regarded as anticipating an advance in the price estimates ranging from $75 to $80.

The increase mentioned applies only to the companies represented by the Canadian Export Paper Comapny, that is, Laurentide, Brompton and Price Brothers, representing a daily tonnage of upwards of 700 tons. It is understood that there was serious discussion of $80 newsprint, but that it was decided that the $75 rate would hold the market better than the higher one and eliminate the danger of any artificial curtailment of consumption.

Just what the action of other big newsprint producers will be remains to be seen. That some of them favored the $80 rate is known, but the contract price decided upon by the Canadian Export Paper Co. has, in the past, owing to the large tonnage handled by this company, been the ruling price for contract paper from Canadian mills. The recent advance by International Paper to $80 per ton for its spot paper was taken to mean that this company would renew its contracts for the first part of 1923 at that figure.

# Government and Municipal Bonds

Although the bond market has maintained a level of comparative quietness during the past month or so, there has been a gradual strengthening in the undertone and the general opinion among the bond dealers is that with the turn of the month the market will witness an aggressive session.

From all appearances the Canadian market is in a receptive mood for new financing, as, although there has been a large amount of bonds issued during the month, practically all the large issues were sold across the border, thus leaving very few choice issues to choose trom. This shortage of offerings will probably be overcome next month as there are several large issues coming due then.

The feature of the week was the sale of the Ottawa issue, amounting to over two and a half million dollars. The issues attracted widespread interest, bond dealers from Canada and United States tendering attractive prices with very little variation in the offers. The issue was quickly subscribed when placed on the New York market.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders Close |
|---|---|---|
| Montreal, Que. (R. C. Schools) | $2,000,000 | Nov. 9 |
| Sandwich, Ont. | 397,000 | Nov. 6 |
| Montreal East, Que. | 250,000 | Oct. 30 |
| Sydney, N.S. | 142,000 | Nov. 18 |
| Halton County, Ont. | 46,000 | Nov. 3 |
| Kenora, Ont. | 41,217 | Nov. 13 |
| Coaticook, Que. | 40,000 | Oct. 30 |
| Prescott, Ont. | 30,000 | Oct. 30 |
| Drummondville, Que. | 30,000 | Nov. 2 |
| Westbury, Que. | 18,500 | Nov. 6 |
| Minnedosa, Man. | 6,000 | Nov. 1 |
| St. Bernardin-de-Montreal, Que. | 100,000 | Nov. 6 |

**Kenora, Ont.**—Tenders will be received up to 3 p.m., November 13, 1922 for the purchase of $30,000, 6½ per cent., 30-year school debentures, and $11,217, 6½ per cent., 31-years consolidated debt debentures. F. J. Hooper, town treasurer. See official advertisement in this issue.

**Sydney, N.S.**—Tenders will be received up to November 18, 1922, for the purchase of $142,000 debentures for various local improvements. James J. Curry, city clerk.

**Sandwich, Ont.**—Tenders will be received up to November 6, 1922 for the purchase of $397,000, 6 per cent., various maturity debentures. E. R. North, town treasurer. This is the issue for which tenders were invited up to October 24, but after a consultation the town council decided to extend the time limit to November 6.

**Montreal, Que.**—The Montreal Catholic School Commission will receive tenders up to 12 o'clock noon, November 9, 1922 for the purchase of $2,000,000, 5 per cent., 20-year debentures, dated November 1, 1922. Alternative bids are asked for bonds payable in Montreal, and bonds payable in Montreal and New York. Ayme Lafontaine, secretary, 87 St. Catherine street West.

**Minnedosa, Man.**—Tenders will be received up to November 1, 1922 for the purchase of $6,000, 6½ per cent., 10-annual instalment debentures. J. A. Lamont, town clerk and treasurer.

**Prescott, Ont.**—Tenders will be received up to October 30, 1922 for the purchase of $30,000, 5½ per cent., 20-year debentures. F. Rowe, town treasurer.

**St. Bernardin-de-Montreal, Que.**—Tenders will be received by the school commissioners up to November 6, 1922 for the purchase of $100,000 debentures.

### Coming Issues

**Richmond Hill, Ont.**—Ratepayers have voted in favor of constructing a skating rink at a cost of $15,000.

**Winnipeg, Man.**—Within a short time the city will offer to the public an issue of debentures amounting to approximately $80,000.

**Simcoe, Ont.**—The town will shortly be issuing approximately $50,000 debentures for the erection of a new school.

**Chatham, Ont.**—The Separate School board has authorized the sale of $20,000 of debentures for school purposes.

**Point Grey, B.C.**—The ratepayers will shortly be asked to vote on a by-law authorizing the expenditure of $200,000 for the erection of a municipal lighting system.

### Bond Sales

**Ottawa, Ont.**—A syndicate composed of Dominion Securities Corporation and Dillon, Read & Co., were the successful bidders for the $2,639,883, 5½ per cent., 10, 15, 20 and 30-annual instalment debentures, paying a price of 101.871, which means that the cost to the city will be approximately 5.32 per cent. Alternative bids were asked for bonds payable in Canada only, and payable in Canada and United States. Widespread interest was taken in this issue and the bidding was very keen, with little variation in the offers. Tenders were as follows:

| | Payable in Can. only | Payable in Can. and U.S. |
|---|---|---|
| Dominion Securities Corp. and Dillon, Read & Co. | 99.177 | 101.871 |
| Wood, Gundy & Co. | 98.84 | 100.088 |
| G. A. Stimson & Co., White, Weld & Co., Redmond & Co. and Blodgett & Co. | | 100.877 |
| Harris, Forbes & Co. | | 100.823 |
| A. E. Ames & Co., Bankers Trust Co. and Old Colony Trust Co. | | 100.48 |
| Nesbitt, Thomson & Co. and Equitable Trust Co. | | 99.558 |
| National City Co., United Financial Corp., Harris, Forbes & Co., R. C. Matthews & Co., W. A. Mackenzie & Co. and R. A. Daly & Co. | 99.41 | |
| Hanson Bros., A. E. Ames & Co. and Rene T. Leclerc, Inc. | 99.517 | |
| R. C. Matthews Co., Halsey, Stuart & Co. and Blair & Co. | | 100.9296 |
| Kerr, Flemming & Co., Lee, Higinson & Co., Spencer, Trask & Co. and Warner & Co. | | 100.579 |
| A. Jarvis & Co., McLeod, Young, Weir & Co. and Gairdner, Clarke & Co. | 99.65 | 101.01 |
| McLeod, Young, Weir & Co., Kissel, Kinnicutt & Co., W. R. Compton Co., First National Bank and E. Lober Stokes | | *101.613 |
| Housser, Wood & Co. | | 101.45 |
| R. A. Daly & Co., Hanson Bros. and W. A. MacKenzie & Co. | 98.84 | 100.71 |
| Canada Bond Corp., Brown Bros. & Co., Stacy & Braun and First National Co. | 99.939 | 100.127 |

*New York payment and delivery.

**North Bay, Ont.**—R. C. Matthews & Co., have purchased $20,000, 5½ per cent., 10-annual instalment debentures at a price of 96.53, the money costing the town about 6.25 per cent. Tenders were as follows: R. C. Matthews & Co., 96.53; Wood, Gundy & Co., 96.03; and C. H. Burgess & Co., 95.26.

**Fort Erie, Ont.**—An issue of $40,000, 5½ per cent., 20-instalment school debentures has been sold to Municipal Bankers Corporation, at a price of 97.27, the money costing the town about 5.83 per cent.

**Trafalgar Township, Ont.**—A. E. Ames & Co., have purchased $15,000, 5½ per cent., 10-instalment debentures at a price of 98.51, the money costing the township approximately 5.80 per cent.

**Verdun, Que.**—McLeod, Young, Weir & Co. have purchased $175,000, 6 per cent., 20-year debentures at a price of 102.87, the money costing the city approximately 5.75 per cent. Tenders were as follows:

| | |
|---|---|
| McLeod, Young, Weir & Co. | 102.87 |
| Hanson Bros. | 102.79 |
| Rene T. Leclerc, Inc. | 102.25 |
| Wood, Gundy & Co. | 101.28 |
| Dominion Securities Corp. | 101.11 |
| L. G. Beaubien & Co. | 99.77 |

## THRESHING WAS DELAYED

### End of September Found Work Nearly Completed, However, Quality of Grain is Good

The Dominion Bureau of Statistics issued on Oct. 11, a bulletin compiled from the reports of crop correspondents at the end of September on (1) the quality of grains at harvest time and (2) the condition of root and fodder crops. Correspondents report generally that although threshing was somewhat delayed by bad weather during the earlier part of September, a good progress was made later on and at the close of the month threshing in most sections was completed or nearly so.

### Quality of Grain Crops

On the whole, the quality of the grain crops throughout Canada this season is excellent. Measured in percentage of the average weight per measured bushel for the decennial period 1912-21, the figures for all Canada are as follows: Fall wheat 99; spring wheat and all wheat 100; barley, rye and buckwheat 99; peas, beans, flax and corn for husking 98; mixed grains 101. By provinces, the quality is as follows: Prince Edward Island—Wheat 100; oats 104; Nova Scotia—Wheat and oats 98; New Brunswick—Wheat 99, oats 102; Quebec—Wheat, buckwheat and flax 99, oats 103, barley and rye 100, peas 96, beans 98; Ontario—Fall wheat 99, spring wheat 97, all wheat 98, oats and barley 101, rye 100, peas, beans, buckwheat, flax and corn for husking 99; Manitoba—Wheat and oats 103, barley 102, rye 99, flax 93; Saskatchewan—Wheat 104, oats 100, barley 99, rye 102, flax 98; Alberta—Wheat 98, oats 94, barley 93, rye 96, flax 91; British Columbia—Fall wheat 95, spring wheat 93, all wheat 94, oats 91, barley 99, rye 93.

### Root and Fodder Crops

The condition at the end of September, expressed in percentage of the annual average yield for the ten years 1912-21 is as follows:

Canada: Potatoes 98, turnips, etc., and sugar beets 97, fodder corn 100, alfalfa 95. Prince Edward Island: Potatoes 97, turnips, etc. and fodder corn 100. Nova Scotia: Potatoes 96, turnips, etc. 98, fodder corn 103. New Brunswick: Potatoes 83, turnips, etc. 96, fodder corn 101. Quebec: Potatoes 95, turnips, etc. and fodder corn 97, alfalfa 101. Ontario: Potatoes and fodder corn 101, turnips, etc. 98, sugar beets 97, alfalfa 94. Manitoba: Potatoes 99, turnips, etc. 100, fodder corn and alfalfa 103. Saskatchewan: Potatoes 96, turnips, etc. 98, fodder corn 100, alfalfa 94. Alberta: Potatoes 87, turnips, etc. 88, fodder corn 96, alfalfa 92. British Columbia: Potatoes 85, turnips, etc. 90, fodder corn 94, alfalfa 89.

## CANADIAN PACIFIC CROP REPORT

The twenty-seventh and final crop report of the season was issued on October 16 by the Agricultural Department of the Canadian Pacific Railway. Weather during the past seven days has been fair and moderately warm, turning colder at the week-end, with slight snow flurries. Harvesting and threshing throughout the Prairie Provinces are practically completed. A few isolated districts have some grain to thresh, but it is said that everything will be cleaned up this week. Yields generally have proved up to expectations, and in the majority of cases have been more than realized.

Live stock will go into winter quarters in very good condition, the report says, with ample supplies of food in store. There is a good crop of potatoes. Farmers are anxious to secure a market, but the price offered is not sufficient to meet expenses of lifting and shipping. Plowing is 40 to 50 per cent. completed. Farmers in Saskatchewan are generally well satisfied with out-turns this year. The live stock and feed situation is satisfactory.

Threshing may now be considered complete in Alberta, according to the report farmers are busy plowing, and 60 per cent. of this work is accomplished.

In the Edmonton, Dunvegan & British Columbia Railway district harvesting is about completed and fall plowing is in full swing. It is anticipated that there will be a larger acreage than last year.

## COLONIZATION ASSOCIATION'S PLANS

### Payments by Settlers to be on 32 Year Plan, With Option of Paying off Earlier

Plans of the Canada Colonization Association were laid before a representative gathering of about 400 business men of Toronto at a meeting held on Oct. 13, by Sir John Willison, president, M. A. Brown, vice-president, and Geo. C. Creelman, who is in charge of its work in the east. Sir John Willison stated that the situation was never better for immigration, and pointed to the fact that the United States had ceased its open door policy as an opportunity for this country. The government, he said, had taken the stand that it cannot deal in private lands, nor can it select districts for settlement. It could supply capital but not credit. The Association would fill in these needs, and if it accomplished its purpose would add at least one province to the federation, lighten the financial burden, and reduce freight charges.

### Thirty-two Year Plan

Mr. Brown reviewed the history of the organization, illustrating by the case of Medicine Hat the need of municipalities for population and industries. The lure of free land can no longer be held out for settlers, at least in the case of land near the railways, so a long payment plan extending over 32 years has been adopted. No principal was required for three years, he said, but in ten years the land must be improved sufficiently to raise a mortgage to pay off the balance due the vendor, should he want it. The $1,200,000 raised by the Association would be a working capital for a few years. The vendor must pay $2 per acre selling commission, which is what he would pay to a private agent. The services of local land agents in the United States are to be enlisted, for one per cent. commission, and after meeting other outlays the Association plans to have 50 cents per acre for its own purposes.

### Obtaining Settlers

Mr. Creelman stated that the Association should get as near as possible settlers in Great Britain, to explain the opportunities and select suitable immigrants, making no extravagant claims regarding the opportunity here.

### Premier of Ontario.

Hon. E. C. Drury attending the meeting as a guest, pointed out that there is no use in getting people on the land unless they can be prosperous and contented there. Our external obligations must be met by exports, chiefly of farm produce and the cost of producing it must be lessened.

---

## PLANT REOPENED

On October 2 the Canadian Locomotive works at Kingston, Ont., were opened, and the company will proceed with contracts for the renewal of locomotives, manufacturing part and making repairs.

The general manager, Wm. Casey, stated that the work at present called for about 10 per cent., of the staff, but he was not in a position to say what would develop in the immediate future. About 75 men will be employed now. The plant has been closed down for fourteen months.

Exchange for
Long Term Bonds

If you hold bonds maturing within the next few years, we suggest that you consider now the wisdom of exchanging them for long term securities.
If you will send us a list of your early maturing bonds, we shall be pleased to submit definite exchange proposals.

# *Stock Markets*

Closely following the trend of Wall Street, the Canadian security markets experienced a decided weakness throughout the list, and the trading was not so broad as formerly. Although there were no sensational drops, declines ranging from a point or two were characteristic of the entire list.

As the industrial and political situation both in Canada and the United States has shown an improvement, there has been nothing that would seem to indicate other than the constructive side. With the crop movement reaching its momentum at this time of the year it was generally anticipated that such actions would materially influence the stock market, but a survey of the market seems to indicate that such action has failed to materialize.

In spite of the weakness on the market, traders were inclined to favor some issues which have remained dormant for some time, and probably the most active group during the week was that of textiles. Most of the issues in this category made some interesting gains, and more particularly Dominion Textile, which has probably scored the largest gain of any security during the week. Steel stocks played with British Empire Steel issues moving into the limelight, but this movement died down towards the latter part of the week, and was superseded by a forward movement in Canada Steamship issues. This movement also died down and the market continued along its former line.

The paper group, as a whole, was inclined to the weaker side, and as this group usually shows the true trend of the market, the market from all appearances shows few signs of resuming activity.

### Selling to Customers

The Southern Canada Power Company, Limited, is the first light and power company in Canada to inaugurate a customer ownership campaign, that is, to sell its securities to the customers in its territory through its employees.

This campaign which was to be for ten days, was commenced on October 16, and the territory which comprises over 50 municipalities in the Eastern Townships—was divided into five districts under the supervision of the local superintendents. The entire issues were disposed of by October 19.

### Dividend Rescinded

The secretary of the Toronto Stock Exchange writes as follows: "Notice has been received from the Detroit United Railway that the resolutions adopted by the directors of the company declaring a stock dividend of two and one-half per cent. payable 1st September and 1st December, 1921 respectively, have been rescinded, as they had failed to obtain the sanction of the Michigan Public Utilities Commission."

### Parsons Ocean Power Co.

In connection with the article on the Parsons Ocean Power Co. in "The Monetary Times" of September 8th., it was stated that the capital stock of $500,000 was divided into 100,000 shares of $5 each. This was an error; the capital stock is divided into 5,000 shares of $100 each.

## ALLEGE BRYANT WAS PARTNER

That Norris P. Bryant was a secret or silent member of the now defunct stock exchange house of Fairbanks, Gosselin & Co., and as such is responsible for the obligations of that firm, which went into bankruptcy in January of this year, was alleged in a petition presented on October 20 in the Bankruptcy Court before Justice Panneton in Montreal. The petition had been formally served and was presented by George Campbell, K.C., on behalf of Gordon W. Scott, trustee for the creditors of the firm of Fairbanks, Gosselin & Co.

November 3 is the date set for the hearing on merits, and request will be made to have Mr. Bryant declared a bankrupt as member of Fairbanks, Gosselin & Co., and to make application of his assets toward the settling of the debts of that firm, which amount to about $600,000.

Through his lawyer, I. Popliger, Mr. Bryant has filed a reply to the petition, in which he made absolute denial of any connection with the firm above mentioned in the capacity of partner.

## BRINGS BACK CANADIAN SECURITIES

### Million and Half Formerly Held by Citizens of Enemy Countries—One Case of Forgery

Bringing back with him approximately $1,500,000 of securities formerly in the ownership of enemy nationals, Thomas Mulvey, K.C., Under Secretary of State for Canada and Deputy Custodian of Enemy Property, has returned to Ottawa after spending the last few months overseas in connection with the business of the Clearing House and the settlement of enemy debts. Some extraordinary claims were encountered, but so far only one actual case of forgery in connection with a claim has been met with. Many claims, however, are still under investigation.

One of the important results of Mr. Mulvey's trip, which took him to England, Holland and Germany, was the reaching of a settlement with the Public Trustee in London as a result of which some $6,000,000 in securities will be turned over to Canada. Of this amount some $700,000 has been delivered.

Another result was the settling up of a means of direct correspondence between Canada and Austria and Hungary in Clearing House matters. Heretofore there was no direct communication with these countries, in which, as well as in Germany, there were held many large amounts of Canadian property and shares in Canadian industries such as the C.P.R.

German Government officials and others were all pleading "poverty and persecution by the allies," and there was an apparent design to delay as far as possible, payment of allied claims made against the German Government and its nationals. The visit, however, had resulted in straightening out many misunderstandings and bringing a settlement of claims against enemy countries much nearer.

# *Unlisted Securities*

In their report on the Unlisted Market of last week, A. J. Pattison Jr. & Co. say that trading was dull, and that with the exception of the Oil Stocks, changes in price did not create interest. The Oil shares, which have been on the upward trend for some time past, showed a decided tendency to sell off, Imperial Oil dropping to 117, with but little stock changing hands on the break. International Petroleum lost 2 points to 21½-22½, holding well at these figures up to the close. Industrial Bonds are not in as much demand as formerly, and while prices show no signs of receding from present levels, it does not appear that they will move higher in the near future. Brompton 8's remain 103¾ bid, and Spanish 8's 104½ bid.

Durant Motors displayed a decided tendency to ease, though the quotation remains at 11-12. Offerings of this stock, which were very limited, can now be had in fair sized blocks at present levels. For a time there was a short interest standing under the market, and in an attempt to cover the market was forced up. The stock appears to have been obtained, and the covering support withdrawn. Both Massey-Harris and Cockshutt Plow Preferred were in fair demand on reports of improvement in the agricultural industry. Home Bank and Sterling Bank changed hands in small lots at unchanged figures. Canadian Westinghouse at 116 bid shows an improvement of one point, no stock being offered at anywhere near the bid price. Whalen 7% Debentures were offered in fairly large blocks at 64-67 without finding a quick market. A speculative interest has developed in Loew's Theatre stocks, which have been practically unmarketable for many months. The bid prices do not reflect any great amount of confidence on the part of the buyers in the immediate future of these enterprises.

## INSTITUTE OF ACCOUNTANTS

The tenth annual meeting of the Institute of Accountants and Auditors of the Province of Quebec was held on October 17 and the following officers were elected for the coming year: President, M. L. J. Lacasse; first vice-president, C. H. Skelton; second Vice-president, L. E. Potvin; treasurer, H. J. Ross; secretary, Henry Viau; council, J. J. Robson, J. A. St. Denis, Miles Birkett and J. E. Couture, Hull.

## STOLE BANK CHEQUES

James Lacker, 25, was on October 12 found guilty of stealing two parcels of cheques valued at $30,000 from the Molsons Bank, Montreal, having taken them from an automobile stationed outside one of the bank's branches on August 11 last.

## BROKER TO BE EXTRADITED

Jules Gosselin, member of the defunct brokerage firm of Fairbanks-Gosselin, has been located at Paris, and a demand has been made by a number of his creditors that he be extradited to Canada, where he is wanted in Monteral in connection with the alleged theft of $500,000 from creditors.

The matter was brought to the attention of the Attorney-General of the Province of Quebec, who gave assurances that the serious nature of the accusation would not require the usual lengthy procedure to have the wanted stock broker extradited. His return to Montreal and Canada was promised without the legal formality of making out the papers necessary in cases of extradition.

# AN APPEAL

## for Relief for the

# Northern Ontario Fire Sufferers!

10,000 sufferers in the fire scourged North appeal to you now for immediate relief.

10,000 men, women and little children who have lost their homes, their employment, their clothing, their property, must be fed every day, must be clothed against the rigorous cold, must be temporarily sheltered—to give them a fighting chance to get on their feet again.

## The Northern Ontario Fire Relief Committee

has been put in charge of this relief work by the Ontario Government, and appeals to all Ontario to extend immediate assistance. Will Ontario's City Councils, Town Councils, all governing bodies, please take this matter under consideration at once and vote liberal grants for relief? Will all the members of liberal-hearted Ontario business firms, and men, women and children, make immediate contributions to help their stricken North Country fellow-citizens?

### A Great Calamity in the Face of a Northern Winter

The staggering completeness of this fire calamity baffles description. The fire fiend worked well nigh complete destruction over an area of about 1,600 square miles. Over 1,500 homes were destroyed, and the property loss will probably reach eight to ten million dollars. Ten thousand people are practically destitute, in need of daily sustenance, in need of clothing, and at least temporary shelter, and all this on the verge of a Northern winter.

### A Train Load of Supplies Every Day

The Northern Ontario Fire Relief Committee was at work within two hours after receipt of the terrible news of the holocaust. Within 24 hours the first relief train from Toronto was in Cobalt—ready with food, clothing, tents, etc., for the sufferers, and every day since then a fully loaded train of supplies has been speeded north, for distribution at Cobalt by a commitee under the direction of Mr. A. J. Young, of North Bay.

### Only "Temporary Relief" Is Asked For

The Northern Relief Fire Committee does not rebuild homes, nor restock stores, nor erect public buildings. It simply feeds hungry children and men and women from day to day. It hopes to clothe the destitute adequately against the stark northern cold. It hopes to provide some kind of temporary shelter amidst the blackened ruins, to give the helpless fire sufferers at least a fighting chance to re-establish themselves.

### From Prosperity to Ruin—Will You Help?

The Dominion Government and the Ontario Government have each made initial contributions of $100,000 to assist the fire sufferers. Scores of municipalities and public-spirited business houses and individuals throughout Ontario are asking an opportunity to assist. The opportunity is here and now.

### The Red Cross Are Co-operating With the Committee

Contributions of clothing, household equipment, etc., made in Toronto, may be sent to the Toronto Red Cross Emergency Depot at 94 Adelaide Street West, Toronto.
Similar contributions from points outside Toronto may be made to the local Red Cross depots, or consigned direct to the Red Cross Commission at Cobalt, Ontario.

### Money Contributions to the Committee

All money contributions should be sent to the Northern Ontario Fire Relief Committee, Royal Bank Building, Toronto.

### What is the Northern Ontario Relief Committee?

It is a group of representative public and business men appointed by the Ontario Government to handle the relief work in connection with the terrible fires in the North Country in 1916. The Committee was authorized to continue to function by the Supreme Court of Ontario, and now has been asked by the Ontario Government to handle the present relief campaign. Over 110,000 pounds of groceries, 123,000 pounds of provisions, and great quantities of bedding and clothing have already been forwarded.

## TAX ON DOMINION PROPERTY

The appeal in the case of the city of Montreal vs. the Attorney-General of Canada was allowed by the Judicial Committee of the Privy Council on October 24. This was an action brought by the city of Montreal against the Attorney-General of Canada, as respondent, and against the Attorney-General of Quebec as intervener. The question at issue was as to the liability of Dominion-owned property to Provincial taxation, also the validity of the Provincial statute with reference thereto.

## INCREASED PAYROLL

Basing their calculations on returns from 532 firms, whose statistics show that in 1921 the payroll amounted to $18,180,962, with an average number of wage earners of 14,500, British Columbia government officials are of the opinion that the payroll for the lumber industry in 1922 will reach an amount of over $20,000,000.

The general resumption of building operations, followed by an increasing demand for lumber, had the result this year of speeding up the industry. It is confidently expected that this year will show a big increase over 1921, and the $20,000,000 mark is said to be on the conservative side.

## EDDY CO. PROTESTS NEW ASSESSMENT.

### Secretary F. J. Taylor Says of Assessment Raised New Match Co. Will Move.

Appearing before a meeting of the Hull Board of Trade on Oct. 11, called to discuss the increased assessment on the E. B. Eddy plant, John F. Taylor, secretary, stated that the company considered the raising of the assessment from $2,000,000 to $7,000,000 unjust, and that if the city of Hull did not see fit to reduce this to $5,000,000, the Eddy Co. would take the matter to court for adjustment.

He stated also that the company had started work on a new match plant in the city limits, and that on receipt of the notice of the increase the work was suspended and will remain suspended until the matter is settled. He explained that he was not making a threat at all, but that the company could just as easily locate this building outside of the Hull city limits and be just as well off. He also read a number of letters from towns in Ontario offering free sites and exemption from taxes if the company would build the plant there.

### History of Firm

Mr. Taylor traced the history of the firm's dealing with the city. After the big fire which practically wiped out the plant, the city went to the company and offered it exemption from taxes as long as it wanted it. The company at that time wanted to be fair, and refused exemption, but accepted a fixed assessment of slightly over $2,000,000. Recently notice had been received that this assessment was raised to $7,000,000. The company considered it unfair, and Mr. Milne and other representatives of the firm met the council and stated that they would be willing to pay taxes on a $5,000.000 assessment. Mr. Taylor emphasized that the company wanted justice only, and if this was not forthcoming amicably it would take the matter to law.

## VISIT POWER PLANT

A party of nearly 200 business men and civic officials from Winnipeg, Brandon, St. Vital and St. James visited the works of the Manitoba Power Company at Great Falls and White Mud Falls a few days ago. A. W. McLimont, vice-president and general manager, pointed out that the capital invested in the work was subscribed by working men and business people who were by no means capitalists, but the faith thus demonstrated in the future of Winnipeg, by hundreds of strangers, should, he felt, be supported by the Winnipeg people themselves.

Dr. Halpenny endorsed a statement by Mr. McLimont to the effect that the new work of the Manitoba Power Company would assist the Winnipeg Civic Hydro, rather than harm it. He added that he did not think the Farmer government of Manitoba would do anything foolish, but he feared that their insistence that the province was only agricultural might prevent them from seeing its industrial possibilities, while the Manitoba Power Company was doing its utmost by developing power to demonstrate the greater wealth available from development of the natural resources, such as water power. He also complimented the company on its sanitary and comfortable camps.

## DIVIDEND NOTICES

### BANK OF MONTREAL

NOTICE is hereby given that a DIVIDEND of THREE per cent. upon the paid up Capital Stock of this Institution, has been declared for the current quarter. A BONUS of TWO per cent. has also been declared for the year ending 31st October, 1922, both payable on and after FRIDAY, the FIRST DAY OF DECEMBER next, to Shareholders of record of 31st October, 1922.

The Annual General Meeting of the Shareholders will be held at the Banking House of the Institution on MONDAY, the FOURTH DAY OF DECEMBER next.

The Chair to be taken at Noon.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR
General Manager.
Montreal, 20th October, 1922. 67

# *Corporation Finance*

**Ottawa Light, Heat & Power Co.**—The following is a comparison of earnings for the eight months' period ending August 31, as compared with the same period last year:

| | 1922 | 1921 |
|---|---|---|
| Gross earnings | $1,079,797 | $1,031,239 |
| Operating expenses | 754,931 | 737,870 |
| Net earnings | $ 324,866 | $ 293,369 |
| Bond interest | 125,851 | 123,797 |
| Surplus | $ 199,015 | $ 169,572 |

**Tretheway Silver-Cobalt Mine, Ltd.**—The annual report for the year ended June 30, 1922, now going forward to shareholders, shows a deficit of $1,199,137 for the year. The assets are largely made up of 400,000 shares of the Castle-Trethewey Mines, Ltd., which are valued at $400,000. The deficit at the end of June, 1921, amounted to $764,042. Since that time, however, the company has sold its assets to a new company known as the Castle-Trethewey Mines, Ltd., for 400,000 fully paid shares of the new company. The deficit account shows that $306,767 has been written off.

**Western Canada Flour Mills Co.**—Due to operations being conducted on a declining market, the value of wheat and flour at the close of the year being practically on a pre-war basis, net profits for the year ended August 31 last are slightly lower than the previous year, being $318,125 as compared with $325,970 in 1921.

The interest on bonds absorbed $70,560, leaving a residue from the year's operations for dividends of $247,565, which was equal to approximately 9 per cent. The company brought forward $202,103 from the previous year, making the total for appropriation $520,228. Dividends took $230,000 and the balance carried forward into the current year was $219,668. Working capital shows an increase of $68,303.

This is the first time in several years that substantial special dividends have not been declared.

The profit and loss figures for the past three fiscal years compare as follows:

| | 1922 | 1921 |
|---|---|---|
| Profits | $318,125 | $325,970 |
| Bond int. | 70,560 | 74,703 |
| Balance | $247,565 | $251,267 |
| Dividends | 230,000 | 222,500 |
| Balance | $ 17,565 | $ 28,767 |
| Prev. bal. | 202,103 | 548,335 |
| Balance | 219,668 | $577,102 |
| Spec. div. | | x375,000 |
| P. & L. bal. | $219,668 | $202,102 |

x—Stock dividend.

The liquid positions of the company shows further strengthening, current assets showing a margin of $1,023,084 over current liabilities, as against surplus current assets of $954,781 last year. The working capital for the past two years is as follows:

| | 1922 | 1921 |
|---|---|---|
| Curr. assets | $2,167,092 | $2,448,507 |
| Curr. liabilities | 1,144,007 | 1,493,726 |
| Work, capital | $1,023,084 | $954,781 |

The most noticeable change in the balance sheet is the disappearance of Victory bonds to the amount of $469,650. This is more than made up for in the current position by a reduction in bills payable from $474,560 to $442,307; an increase of nearly $300,000 in inventories, which stood at $1,511,919, and a reduction of about $340,000 in bills and accounts payable, which are shown at $1,051,819.

**National Steel Car Corp.**—At the annual meeting of the directors held on October 16, R. J. Magor, president, stated that future prospects of the company were promising, and that there was, approximately three and a quarter million dollars' worth of business in sight. Several new orders had lately been received, and the outlook was encouraging, he added.

Mr. Magor emphasized that one of the recent orders for new cars was the first the company had received in two years from any Canadian railway. As railways in the United States had been buying new cars continuously since January 1, making a total to date of 120,000, it was felt that Canadian railways would now be doing the same. Conditions in the United States usually were six months ahead of conditions in Canada, either favorably or unfavorably.

The company is now in a strong position with quick assets and double current liabilities, Mr. Magor stated. The plant is very efficient and on a good operating basis. The equipment and organization are in a condition to well take care of any new business. The only serious situation at present was due to the shortage of cars, which made it difficult to get prompt delivery of raw materials. This would not be rectified, Mr. Magor hazarded, until priority is given on the railways to the moving of raw materials for car builders to complete the orders they now have on their books, including the manufacture of new cars and the repairing of old cars.

"The car builders of Canada," he continued, "at least for a considerable time, can only look to the Canadian Railways for additional new business, as it is impossible to secure any new import orders on account of the foreign and political situation."

Appointment of a new board of directors was as follows:—Robert J. Magor, chairman; Sir John Gibson, Hamilton; Donald Symington, Baltimore; D. B. Dewar, Hamilton; Lester B. Churchill, New York; Henry H. Pierce, Hamilton; F. A. Skelton, Hamilton.

Officers were re-elected as follows:—president, Robert J. Magor; vice-president, Donald Symington and F. A. Skelton; secretary-treasurer, Lester B. Churchill.

**Calgary Power Co.**—Both gross and net earnings for the year ended December 31, 1921 show an improvement over the preceding year. Gross earnings from operations amounted to $292,557, as against $280,529 for 1920. Miscellaneous earnings brought the total up to $303,724, as compared with $291,041. Operating expenses were slightly higher from $54,022 to $64,684, leaving net earnings of $239,040 as compared with $236,118 in 1920. Interest charges on bonds amounted to $164,687, as against $177.759, leaving net profits carried to surplus of $74,352, as compared with $58,358 during the previous year.

After appropriating $50,000 for depreciation and bond discount, the balance remaining at the credit of surplus account and carried forward was $199,955, as against $177,217.

Total assets are up slightly from $5,201,626 to $5,235,106.

**Marconi Wireless Telegraph Co. of Canada,**—At the annual meeting on October 19 the annual report for the year ended was presented and showed a profit for the year, before provision for depreciation, bad and doubtful debts and contingencies of $12,253. This added to balance forward from the previous year gives a total of $422,629, which was distributed as follows:—Depreciation and amortization of patents, $95,988; bad and doubtful accounts and contingencies, $40,000; and special expenditures, $29,628. This left a balance at profit and loss account carried into the current year of $257,013.

The balance sheet shows current assets of $647,288, against current liabilities of $247,346 or a net working capital of $399,942. Property and plant account stands at $1,205,433; patents etc., $4,491.881; investment in subsidiary company, $45,678; capital stock outstanding, $5,525,000; mortgages, $49.000; reserves, $346,379. Current assets are made up of cash, $25,657; Canadian war bonds at par $50,000; receivables, $264,060; and inventories, $307,571. Current liabilities comprise bank loans, $78,175; and payables, $169,171.

The changes made at the annual meeting indicate that important plans are under consideration for the Dominion. The British company will be represented on the board of directors of the Canadian concern by the appointment of Henry W. Allen. At the same time C. G. Greenshields, K.C., of Montreal, will assume the presidency of the company, succeeding A. E. Dyment, who will become vice-president.

The directors in their annual report made reference to the program of expansion that has been under consideration in the Dominion, by saying: "Your directors have recognized that, in order to develop to the full the possibilities presented in the Canadian field, considerable expansion of your company's activities would have to be carried out. Certain negotiations have been pending with that end in view. The proposals involved in these negotiations, when carried into effect, would enable your company to embark upon a program of energetic development in the operating field. The adoption and carrying out of a broad policy of expansion in this field offers the brightest possible prospects for the future. It is hoped that at an early date a definite announcement may be made which will be of great interest to shareholders."

**Trinidad Electric Co.**—Net earnings of the company for the four months are as follows: May, $10,366; June, $10,021; July, $10,670, and August, $10,052.

**Carriage Factories, Ltd.**—The annual report for the year ended July 31, 1922 shows that the company experienced a loss on the year's operations of $348,627, which is made up of a loss on the company's operations of $228,645, and a loss in connections with the Canadian Briscoe Motor Co., of $119,982. Miscellaneous adjustment of $1,898, makes the total loss $350,526.

The company's balance as of August 1, 1921, was $658,888, but the deficit at August 1, 1921, was $116,041, which is deducted from the surplus brought forward in the balance sheet. Hence, the balance carried forward into the current year was reduced to $191,421.

The balance sheet shows current assets of $484,225, as compared with current liabilities of $100,774, which leaves net working capital of $383,451. These figures are in striking contrast with the year previous, not so much in the reduction in net working capital, which was $112,029, but in the heavy decrease in liability to banks. A year ago the company owed the banks $375,831, as against only $58,624 at the close of the year under review. Accounts and bills receivable were also reduced from $352,813 to $175,345. Total current assets the previous year were $900,340 as against current liabilities of $404,860.

**Cuban Canadian Sugar Co.**—The net results of the company's operations during the year ended June 30, 1922 shows a considerable improvement over the preceding year. Measured in terms of dollars, the improvement over the previous year amounted to no less than $1,465,936, an operating profit of $595,016 for the year under review, comparing with an operating deficit of $870,920 the previous year.

After operating and maintenance expenses, payment of bond and other interest and making liberal allowance for depreciation, the statement shows a net profit for the year of $48,129, as compared with a total deficit of $1,786,699 the previous year. Giving effect to the net profits of the year ended June 30, 1922, the total profit and loss deficit stands at $1,415,500.

Further betterment is to be found in the balance sheet figures, including an improvement to the extent of $308,974 in working capital position, compared with a year ago. Sugars on hand total about half a million over those of 1921, reflecting the broader operations of the company. Accounts payable are down nearly 50 per cent., to $216,708, while advances on sugars are down nearly half a million to $540,567. On the other hand there appears in the balance sheet under review, a bank loan of $183,021, and notes payable are up over $300,000. Properties have been written down by about $200,000.

**Trans-Canada Theatres, Ltd.**—At a special general meeting held on October 16, it was stated that business was well ahead of last year, while advance bookings are, perhaps, as promising as they have ever been. This change in the outlook for the company is largely due to the greatly improved business in the smaller towns. Just what has brought this about is difficult to determine. One director expressed the opinion that it might be due to the fact that the big successes of two years ago are just reaching the smaller Canadian centres this season. Another suggestion was that general industrial improvement was reflected in the betterment, the cases of Kingston and Hamilton being cited, there having been a considerable industrial revival in these two cities.

The opinion was ventured that the end of the present fiscal year will show as good a result as that of 1919, when conditions particularly favorable to the theatre business prevailed, this in spite of the fact that three dead months will be included. A number of liabilities have been eliminated and several large projects which may develop in the near future were hinted at.

Bonds
Guaranteed by
Canadian Provinces

Bonds issued by Canadian Railway Companies are often guaranteed by endorsement, both as to principal and interest by one of the Canadian Provinces. In effect these bonds are doubly secured, and for technical reasons only, they may be purchased to yield a higher rate of interest than is obtainable from bonds which are a direct Provincial obligation. Our list of offerings includes a number of such investments.

## Have You Any Money In the Bank?

THERE is an old-fashioned theory which some people still cling to—that a bank wants no dealings with them unless they have "lots of money." Such is not the case with this bank; you will be welcomed whether you have $1 or $1,000 to deposit. Open an account with what you feel you can spare now and add to it regularly as "pay day" comes around. It is a comforting feeling to know that you have several hundred dollars put away safely in the bank.

# Mistaken Kindness

A man's confidence in his wife is sometimes expressed by making her the sole executrix of his will.

It is an affectionate compliment to leave everything in her hands to do with as she pleases, but is it really a kindness to add to her bereavement a burden of care—and to make her future comfort and the raising of her children dependent upon her own inexperienced management?

Consider the comfort and independence that will be hers when that estate is prudently administered by

# Current and Call Loans Increase

### Deposits on Demand Show Fifteen Million Increase—Deposits After Notice Are Lower—Twelve Million Increase in Current Loans in Canada—Call Loans Abroad Reduced—Circulation Shows Eighteen Mlilion Increase.

| | Sept. 1922 | August 1922 | Sept. 1921 | Yrs. Inc. or Dec. | Mths. Inc. or Dec. |
|---|---|---|---|---|---|
| Deposits on demand | $ 490,185,205 | $ 475,415,834 | $ 534,307,452 | — 8.29 | + 3.11 |
| Deposits after notice | 1,158,462,380 | 1,164,069,400 | 1,263,763,852 | — 8.34 | — .48 |
| Current loans in Canada | 1,114,678,735 | 1,102,446,692 | 1,239,637,351 | —10.08 | + 1.11 |
| Current loans elsewhere | 145,609,779 | 145,119,753 | 151,489,861 | — 3.89 | + .34 |
| Loans to Mun. Canada | 77,280,415 | 75,330,339 | 83,851,274 | — 7.73 | + 2.60 |
| Call loans in Canada | 106,982,838 | 99,939,844 | 106,729,270 | + .24 | + 7.71 |
| Call loans elsewhere | 172,037,983 | 176,838,615 | 183,290,756 | — 6.09 | — 2.73 |
| Circulation | 176,918,869 | 158,086,569 | 186,797,922 | — 5.31 | +11.92 |

The movement of Canada's immense grain crop is reflected to some extent in the September statement of the chartered banks of Canada, although the full movement of the crop is not usually felt until the following month.

In making a comparison of the September bank statement with that of the preceding month it will be seen that, with the exception of two, all the principal items show a decided increase over August. On the other hand a comparison with the bank statement for September last year shows that every principal item has decreased, and in four instances the decreases amount to over twenty per cent. These decreases can partially be explained by the fact that the purchasing power of the dollar has increased during the year, the index number of wholesale prices standing at 220.5 at the end of September, as compared with 232.7 at the end of the same month last year, and 326.6 at September, 1920.

### Gold Holdings Decrease

Gold holdings during September are down by over one and a half million from the preceding month, but on the other hand, the Dominion note circulation is up by almost ten million dollars, the increase being due to the crop movement. The following is a comparison of changes in holdings of coin and notes during the months of August and September:—

| | |
|---|---|
| Gold and sub-coin in Canada | —$ 109,579 |
| Gold and sub-coin elsewhere | — 1,418,786 |
| Total changes | — $1,528,365 |
| Dominion notes in Canada | +$9,944,833 |
| Dominion notes elsewhere | — 4,713 |
| Total changes | +$9,940,120 |

### Current Loans Up

Current loans in Canada have shown an increase of over twelve million dollars over August, due, of course, to the demand for credit for crop movement purposes. The movement of current loans has, on the whole, been downward, and with the exception of July and August of this year, current loans have reached the lowest level since October, 1919, when they totalled $1,104,940,160. The following tables show the trend of this account for the past six years:—

| Sept. | | Sept. | |
|---|---|---|---|
| 1917 | $ 855,306,953 | 1920 | $1,417,520,756 |
| 1918 | 942,802,018 | 1921 | 1,239,637,351 |
| 1919 | 1,058,572,202 | 1922 | 1,114,678,735 |

The trend of current loans abroad seems to indicate that the banks are conserving part of their resources in order to finance business requirements in Canada, as there was only an increase of half a million dollars in call loans abroad as compared with the previous month.

### Call Loans Increase

In conjunction with the buoyancy on the stock markets call loans in Canada have shown a decided increase over August, they being up by seven million dollars. This is the best showing since December last year when call loans amounted to $113,071,089, and the September total also shows an improvement over the same month last year.

A substantial reduction in call loans abroad would seem to indicate that the banks are restricting credits for stock market purposes in New York, and using the money to advantage in Canada. September's total is the lowest since March of this year, and also is eleven million lower than for September last year.

The following table illustrates the trend of the current and call loan accounts in Canada since September a year ago:—

| Loans | Current in Canada | Current in Canada |
|---|---|---|
| 1921 | | |
| September | 1,239,637,351 | 106,729,270 |
| October | 1,243,748,818 | 105,362,186 |
| November | 1,210,101,634 | 104,392,115 |
| December | 1,174,053,434 | 113,071,089 |
| 1922 | | |
| January | 1,138,151,455 | 102,630,461 |
| February | 1,143,538,489 | 100,379,637 |
| March | 1,149,187,869 | 103,638,801 |
| April | 1,162,975,332 | 102,005,932 |
| May | 1,140,425,500 | 101,239,898 |
| June | 1,117,844,707 | 99,804,892 |
| July | 1,104,122,176 | 96,770,236 |
| August | 1,102,446,692 | 99,939,844 |
| September | 1,114,678,735 | 106,982,838 |

### Liquid Assets Ratio Down

A very slight decline, amounting to only .05 per cent., in the ratio of liquid assets to public liabilities is shown during the month of September as compared with the previous month. The ratio during September stood at 49.45 per cent., as against 49.5 per cent. for August. There was a slight increase in the ratio of quick assets to total liabilities, the ratio being 23.32 per cent. during September and 23.09 per cent. during August.

### Circulation Increases

The movement of the Canadian grain crop was the principal cause for the eighteen million increase in the note circulation during September. This total is the highest since last December, but is lower by ten million from September last year. With the crop movement gaining momentum during October it is generally anticipated that the circulation will show a decided increase over September, but during the months following October, the downward trend will again commence.

### Demand Deposits Up

The fifteen million increase in deposits on demand can be practically traced to the crop movement, as when a grain broker receives an advance from the bank, it is usually credited to his account, and in all probability the full amount advanced is not used during the current month, but is left until such time as it is required.

Deposits after notice are again on the downward trend, being lower by six million from August and also lower than September last year. The six million decline is in all probability due to such expenditures as tax payments. The following table is a record of deposits for the past thirteen months:—

| | Deposits on demand | Deposits after notice |
|---|---|---|
| 1921 | | |
| September | 534,307,452 | 1,263,763,852 |
| October | 565,650,636 | 1,251,323,839 |
| November | 555,901,712 | 1,252,227,394 |
| December | 540,942,522 | 1,240,807,268 |
| 1922 | | |
| January | 487,153,169 | 1,233,208,401 |
| February | 488,079,674 | 1,231,349,001 |
| March | 484,233,074 | 1,230,628,840 |
| April | 502,370,799 | 1,218,195,262 |
| May | 494,185,496 | 1,197,789,747 |
| June | 505,757,856 | 1,181,404,188 |
| July | 492,442,491 | 1,175,781,711 |
| August | 475,415,834 | 1,164,069,400 |
| September | 490,185,205 | 1,158,462,380 |

In spite of the fairly heavy tax payments, loans to municipalities show an increase of two million over the previous month, but are lower by six million from September last year. The two million increase seems to point to municipalities holding back their bond issues until the bond market is in a more receptive mood.

Details of the September bank statement are given elsewhere in this issue.

## NATIONAL RAILWAYS IMPROVED

### Expenditures of Past Few Years Beginning to Show Effect, Says Director

The directors of the Canadian National Railways have completed their tour of the system and have secured information of which they will make use when they meet to consider the requirements of the roads during 1923. Major Graham A. Bell, deputy minister of railways and a member of the directorate, who returned to Ottawa on October 27, said that the National Railways were beginning to benefit from the construction and betterments carried out during the past few years. He stated that the railways had moved from the Prairie provinces to the head of the Great Lakes fifty per cent. more grain than they had moved at the same time last year. This applied to the Canadian Pacific Railway as well as to the Government lines. Mr. Bell said that the decreases in railway rates had been felt by the railways, and the revenues of the National Railways in the months of September and October, because of those reductions, were about three million dollars less than they otherwise would have been. However, the great grain crop in the western provinces and the excellent crops, in other parts of the Dominion had increased the volume of the railway business to such an extent as to compensate them for the reductions in rates. The wheat crop in the southern portions of the prairie provinces, Mr. Bell said, was extraordinary, and was good in the northern districts. He did not think the average for the whole grain growing section had ever been equalled.

Major Bell said that the traffic on the Grand Trunk Pacific had increased. This was to a large extent due to co-ordination of lines which had been accomplished and which made it possible to route freight originating on certain Canadian Northern branch lines over the Grand Trunk Pacific. Major Bell said he had noted some new settlement along the National Transcontinental Railway, particularly in the province of Quebec. The Government of that province has adopted a group scheme of colonization the effects of which, the Deputy Minister of Railways says, are noticeable almost as soon as one crosses the boundary line from Ontario into Quebec.

## LIFE INSURANCE PRESIDENTS

Herbert C. Cox, president of the Canada Life, is vice-chairman, and Thos. B. Macaulay, president of the Sun Life, is a member of the reception committee which will serve at the 16th annual convention of the Association of Life Insurance Presidents in New York, December, 7th—8th.

## NEW TRUST BUSINESS IN SEPTEMBER.

### Only One Corporation Issue Recorded But Individual Estates Were Fairly Numerous.

The National Trust Co., was appointed trustee for the $200,000 bond issue of Parrish and Heimbecker, Ltd.

The Canadian Guaranty Trust Company has been appointed administrator for the estate of Geo. McFarlane, who left an estate valued at $22,000.

The London and Western Trust Company has been appointed administrator for the estate of Dr. Chas. S. Moore, of London, who left an estate valued at $122,195. The company is also administrator for the $72,321 estate of J. A. Sutherland, of London.

Under the terms of the will of Rufus S. Hudson, Toronto, the Canada Permanent Trust Company was appointed administrator. The estate is valued at $92,932.

The Western Trust Company has been appointed administrator of the will of P. Hodel, of Earl Grey, Sask. The estate is valued at $38,249.

Probate of the will of James Webster, Toronto, has been granted to the Trusts and Guarantee Company. The estate is valued at $5,928.

The Mercantile Trust Company has been granted probate of the will of Byron F. Richardson, Hamilton, who left an estate of $44,759.

The Toronto General Trusts Corporation has been granted probate of the will of William Simpson, Toronto. The estate is valued at $44,996.

Under the terms of the will of Thomas Honeyford, Toronto, the National Trust Company has been appointed administrator of the estate. The estate is valued at $18,941.

The Toronto General Trusts Corporation has been granted probate of the will of Albert Wells, of King Township, Ont., who left an estate of $34,044.

The Chartered Trust and Executor Company has been granted administration of the estate of William Page, Toronto, who left an estate valued at $29,921.

Probate of the estate of Hector McFadyen, Toronto, has been granted to the Trusts and Guarantee Company. The estate is valued at $12,808.

The National Trust Company has been granted probate of the will of Prof. John J. Mackenzie, Toronto, who left an estate of $19,643.

# *Business Conditions*

General business conditions in Canada are much the same as a week ago, but any change that has occurred is favorable and the prevailing sentiment in practically all commercial and industrial lines is more optimistic than it has been for many months, according to dispatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal cities. Although caution is still being exercised in some quarters, whoesalers at almost every important centre report a steadily growing demand for seasonable staples, with buyers displaying a dispostion to extend their operations further into the future, which is considered a reflection of satisfactory harvests, recovery in the lumber, mining and paper and pulp industries, well maintained building activity, and improvement in iron and steel. The financial situation is becoming relatively easy and collections are slightly better.

Montreal reports steady improvement in general business conditions, retail trade being seasonably active and wholesalers receiving a steady run of orders for the leading staples. The leading industries in this city and vicinity are now fairly busy, and prospects for the next few months, at least, are thought to be encouraging. Collections are fairly satisfactory.

Business at Quebec is close to normal in volume for this period, and merchants in that city are looking forward to an average winter's trade. Collections still drag.

# *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the past week, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:

| | Oct. 27 | Oct. 20 | Oct. 13 | Oct. 6 |
|---|---|---|---|---|
| Ontario | 19 | 13 | 13 | 22 |
| Quebec | 41 | 28 | 29 | 18 |
| Manitoba | 4 | 11 | 10 | 6 |
| Alberta | 5 | 4 | 6 | 0 |
| Saskatchewan | 2 | 5 | 1 | 3 |
| British Columbia | 5 | 3 | 2 | 3 |
| Nova Scotia | 2 | 2 | 2 | 3 |
| New Brunswick | 0 | 2 | 3 | 1 |
| Prince Edw. Is. | 0 | 0 | 0 | 0 |
| Newfoundland | 1 | 1 | 0 | 1 |
| Total | 79 | 69 | 65 | 57 |
| 1921 | 63 | 68 | 42 | 60 |

# *Railroad Earnings*

The following are the approximate gross earnings of Canada's transcontinental railways for the first three periods in October:—

| | 1922 | 1921 |
|---|---|---|
| **Canadian Pacific Railway** | | |
| October 7th | $4,829,000 | $4,383,000 |
| October 14th | 5,147,000 | 4,898,000 |
| October 21st | 5,466,000 | 5,261,000 |
| **Canadian National Railway** | | |
| October 7th | 3,262,024 | 2,918,593 |
| October 14th | 3,473,811 | 2,198,593 |
| October 21st | 3,444,912 | 2,918,593 |
| **Grand Trunk Railway** | | |
| October 7th | 2,167,914 | 2,302,861 |
| October 14th | 2,263,[illegible]32 | 2,177,140 |
| October 21st | 2,377,050 | 2,234,431 |
| | 5/32d | 1/8d |

# *Exchange Quotations*

Closing rates in Toronto Wednesday, compared with the preceding week, were as follows:

| | Oct. 25 | Nov. 1 |
|---|---|---|
| London | 443.75 | 445.65 |
| France | 6.92 | 7.02 |
| British W. I. | .92½ | .92⅞ |
| Jamaica | 4.45½ | 4.47½ |
| Belgium | 6.41 | 6.51½ |
| Denmark | 20.07 | 20.13¾ |

## STANDARD TRUSTS vs. PULICE

### B. C. Supreme Court Reversed on Appeal.—Probate Ordered of Roundy Will.

The decision of the Supreme Court of British Columbia in Standard Trusts v. Pulice, reported in these columns on July 7th, has been reversed by the Court of Appeal. The decision of the Supreme Court was that Pulice had exercised undue influence over the late F. R. Roundy when drawing his will under which Pulice benefitted to the extent of $15,000. The Court of Appeal held the will valid, the testator of sound and disposing mind and Pulice entitled to the bequest of $15,000. The sister of the testator who had obtained an order to take care of him, benefitted to the extent of $35,000.

The deceased was an aged Vancouver prospector and had made his will prior to a stroke of paralysis, appointing The Standard Trusts Company executor. At the trial the sister alleged undue influence by Pulice but Chief Justice Macdonald held: "There is to my mind no evidence, worthy of consideration, of undue influence, but in order to procure the setting aside of the will on this ground an attempt was made not only to blast the character of the appellant, but that of the notary who drew the will, although there is nothing on which to base it except suspicion, which can always be called up in cases of this kind.

"Without going minutely into detail," said His Lordship, "the evidence conveys to my mind the impression of a disinclination on the part of the deceased to put himself under the control of this sister."

"The sister appealed to the courts when she failed to persuade her brother to go home with her, and after perfunctory examinations of the deceased, an order was made and the sister took him to her home. He lived for more than a year after this and the evidence is that he was quite well aware that he had made the will and had given the bequest in question to the appellant, yet he did not revoke the will or make any change in the disposition of his property. The suggestion is that the sister did not wish to ask this owing to his condition, but that suggestion, in my opinion, is not entitled to very much weight."

# Economy Must be Foremost Consideration

## Paring of Estimates for Canadian National Railways as Well as Other Departments Will Be Required—Fielding Still Absent in Europe—May Be No Government Loan This Fall—Canada's Delegates Active Overseas.

(Special to The Monetary Times)

Ottawa, November 1.—Reports to the effect that there is a strong probability of important portions of the Grand Trunk in Ontario being electrified should be received with reticence. No one knows what Sir Henry Thornton may do, and in the matter of electrification it may be said with certainty that he himself does not know, not having had the opportunity to study the matter. It may be that some corporations are figuring on electrification, especially those that have power to sell, but the conversion from steam to electricity as a motive power on important portions of railway involves a great deal more than the securing of sufficient power.

Electrification costs a great deal of money. For one thing it would involve the scrapping of steam railway equipment, to the extent of many millions of dollars. Indeed so many millions would have to be scrapped that on the present basis of the cost of power, it would be impossible to figure out appreciable savings through the lower cost of operating. After all, factors such as these determine the question.

### Must Restrict Expenditures.

There seems to be an impression abroad that all Sir Henry Thornton will have to do is to pull out the throttle of expenditure, and launch new enterprises regardless of cost. Such an impression is quite erroneous. It is undoubtedly true that the minimum proposals he may make will require the expenditure of many millions; but one is also warranted in saying that he will be instructed to pare his estimates to the bone.

The great problem confronting the Government today, whether it be in providing money for railways or for anything else, is—where will the money come from? Undoubtedly the Government could raise in New York all the money that might be needed to put the Canadian National in the best of shape and to meet its large deficits for several years. But this is not the consideration that will decide the Government's action. It may be taken for granted that financing done for the Canadian National will be guided by considerations that guide railway financing generally all over the continent. Now the returns on railway investments do not warrant the borrowing even of all the money that the railways require. This factor will restrict borrowing for the Government roads, just as well as it restricts it on privately-owned ones.

At present it looks as though Sir Henry Thornton would have to ask for a great deal more money for new equipment than was asked this year, and if the savings on operation are not sufficient to keep the total within the amount last session, then there may be difficulty in getting a bigger vote through. It is hard to see how much greater economies can be effected in the national expenditure, outside of Soldier Settlement and Soldiers Civil Re-Establishment, and when savings do not amount to more than a few millions, they do not count much in a total of about $400,000,000.

### Moving the Grain Crop.

The railways, both Government and Canadian Pacific, are doing wonderful work this year in moving the huge crop. It is true that in some places there may be congestion; but in this respect Canadian producers are in a paradise as compared with those in the United States. No better evidence of this could be desired than the information that during a recent week American roads supplied Buffalo with only 1,660 cars for grain, as compared with 1,600 cars a day required. Fortunately the Canadian Pacific has been able to set a fast pace in car handling, and this has so stimulated the Canadian National, with the result that surprising records for car movements are reported all along the line.

### Government Financing.

Mr. Fielding's delay in returning home, for some reports would indicate that he may not be back much before December, is considered as an indication that the Government will not do much more financing before the first of the New Year. When in London Mr. Fielding undoubtedly consulted the best financial authorities on the prospect of financing being done to advantage in England, and being a shrewd financier at all times, any decision he makes will be with a full knowledge of the facts.

Between attending to the Assembly of the League of Nations, the International Labor Conference, negotiating trade treaties with France and possibly Italy, and assisting in the drafting of the legislation for the removal of the British cattle embargo, Messrs. Fielding and Lapointe have done quite a little work during their visit to Europe. Reports from the officers of the League are to the effect that Mr. Lapointe made a particularly good impression at the sessions of the Assembly of the League. From all account High Commissioner Larkin's good business methods did much to prepare the way for the ministers on several matters.

The entrance of the Duke of Devonshire to the Colonial Office, while it has aroused keen interest here, is not considered as of outstanding importance. It is thought that because of his experience as Governor General of Canada, he acquired a knowledge of overseas opinion that will be very valuable to him, and prevent him from making mistakes. He will not have as many big ideas as Winston Churchill had, but for all that, he may get further.

### Representative at Washington.

Reports to the effect that Lord Shaughnessy may accept the position of Canadian representative at Washington are not taken very seriously here. Born in the United States, and having had a very successful career in this country, he is well suited for the post, but it is considered unlikely that at his age, for he is now 69, he would embark on a new and such uncertain career as diplomacy. Sir Charles Fitzpatrick, who is only about two months younger than Lord Shaughnessy, has the luck of falling into soft things in the form of appointments no matter which party is in power; but it is considered improbable that he has ambitions in the direction of serving Canada in the United States. Certainly it would be a much more onerous position than that of lieutenant governor of Quebec.

### London Appointment.

The retirement of Lucien Pacaud from the House of Commons and his subsequent appointment as associate secretary to High Commissioner Larkin in England, with the understanding that on the early retirement of W. L. Griffith he becomes virtually the deputy in that office, has occasioned surprise in some quarters. Pacaud, who began life as a newspaperman, is also a lawyer and a good business man, having made money in asbestos mining. He knows the Continent well; his family is in France at present, and he likes the life across the water. The Canadian colony in London has been complaining that nearly all the appointments in connection with the High Commissioner's office are held by other than native born Canadians, and so it has seemed wise to appoint a native son.

With the entrance of Canada into the League of Nations and into the International Labor Conference, the duties of High Commissioner have become much enlarged as compared with what they were before the outbreak of the war, and it is believed that Mr. Pacaud will be able to render excellent service especially in matters relating to the Continent. Incidentally he was one of the best speakers among the French-Canadians in the House of Commons who use the English tongue.

---

## BANK ROBBERY

Burglars broke into the Standard Bank at Stouffville, Ont., on the morning of October 25, drilled the safe, and escaped with approximately $10,000 as well as a number of securities. The exact extent of the loss is not yet known owing to all the books and papers being scattered in general confusion on the floor. All wires were cut and every precaution taken, indicating the work of professional safe blowers.

---

## COMMONWEALTH BANK AS MODEL

### Western Farmers May Advocate One Like It For Canada—What New York Bankers Think of Proposal.

(Special to The Monetary Times)

New York, Nov. 1.—According to reports here during the past week, the United Farmers of Manitoba are preparing to demand early in the coming year the formation of a national bank in Canada similar to the Commonwealth Bank of Australia. The information received from Western Canada indicates that the discussion of the constitution of the Australian Government bank which will regale the members of some five hundred branches of the United Farmers during the coming winter will be merely preliminary to a demand which will be made in the House of Commons during the forthcoming discussion of the Bank Act that some such banking scheme as the Australian Parliament adopted in 1911 be tried out in Canada.

According to one Canadian banker who has just returned from a trip through western Canada, this demand will be based not only upon the claim that the chartered banks have failed to give the Western Canadian farmers the credit they need but that a bank such as the Commonwealth Bank of Australia can be started without capital. While, according to The Monetary Times' informant, the Western Canadian farmer is being duly impressed by what he is told of the things the Australian bank is doing for the Australian farmer, it is the claim that the bank started without capital and now has assets of over one hundred and forty million pounds sterling which is making the greatest impression. This latter fact is being seized upon by all the advocates of cheap money as the main reason why the Canadian people should consider the formation of a similar bank in Canada.

### How the Bank Started.

Local representatives of Australian banks, well acquainted with the history of the Commonwealth Bank of Australia were much amused by the report that the Canadian farmers believed that the Australian bank has started without capital. They pointed out to The Monetary Times that while in a way this may have been true in reality it was far from being the truth. For, as they pointed out, it was true that the Commonwealth Bank of Australia has never sold stock nor bonds, and had never made use of the right granted it in 1911 to issue debentures, it had taken over bodily the Australian postal savings banks, with deposits which in 1914 totalled over four million pounds sterling. Furthermore the bank from the beginning had the credit of the Commonwealth of Australia behind it and was in 1920 granted the privilege of handling the Australian currency. Capital, in the popular sense, was hardly necessary in the case of a bank which could start business with a ready made business and deposits running up into the millions and which had behind it all the resources of a rich and prosperous country such as Australia.

Those best acquainted with the charter and workings of the Commonwealth Bank were inclined to believe that while the bank had been an undoubted success it was rather difficult to see how such a bank could be started in Canada. The chartered banks and the Canadian Department of Finance perform most of the functions in Canada, the Australian bank performs in Australia; to attempt to form such a bank as the Commonwealth Bank in Canada would mean either a duplication of banking facilities or the handing over by the chartered banks and the Department of Finance to a new institution of duties which so far as can be seen at present they are performing as well as a new bank could.

---

## WOODMEN OF THE WORLD

Reports submitted at the regular fall meeting of the Canadian Woodmen of the World showed that the net assets of the order have been increased by $101,515 during the last year. The assets now amount to $1,206,155. An increase in membership was also reported.

Legislation is being sought by the order to amend the act under which it was incorporated so that cash surrenders can be made on its insurance policies and annuities and endowment policies can be issued.

## NOTE CIRCULATION INCREASES

### September Statement Shows Six Million Increase Over Previous Month.

Principally due to the crop movement the note circulation of the Dominion Government during September shows a considerable increase, amounting to six million dollars, as compared with the previous month. The month's circulation, however, is lower than for the same month last year, when the total was $259,923,195.

A further increase in gold held for redemption of Dominion notes, is shown during the month, the total being up by slightly over two million dollars, and is also higher than September last year, when the total was $80,645,895. As the gold held for redemption was not equal in proportion to the increase in circulation, the percentage was reduced from 39.11 to 38.95 per cent.

The position as at September 30 was as follows:

| | |
|---|---|
| Provincial | $ 27,710 |
| Fractional | 1,234,201 |
| $1 | 17,038,381 |
| $2 | 12,525,264 |
| $4 | 36,171 |
| $5 | 2,795,790 |
| $50 | 3,750 |
| $500 | 2,914,000 |
| $1,000 | 5,731,000 |
| Legal Tender for Banks | |
| $500 | 4,500 |
| $1,000 | 834,000 |
| $5,000 | 128,780,000 |
| $50,000 | 62,795,000 |
| | $234,719,768 |

| | |
|---|---|
| Gold held Sept. 30th, 1922, by the Minister of Finance | $ 94,640,552 |
| Gold reserve to be held on savings Banks Deposits— 10 p.c. on $32,131,432.30 under The Savings Banks Act | 3,213,143 |
| Gold held for redemption of Dominion Notes | $ 91,427,409 |
| Dominion Notes outstanding against deposits of approved securities, under Finance Act, 1914, and Chapter 4, Acts 1915 | $ 112,015,745 |

## LOSS TO T. AND N.O.

Damage done to the Temiskaming and Northern Ontario Railway by the forest fires which swept Haileybury and Cobalt district, amounted to over $500,000, according to Lieut.-Col. L. T. Martin, one of the commissioners of the railway. Col. Martin stated that while the loss is practically covered by insurance, the extra re-building and replacement cost will greatly affect the net returns of the railroad for the year.

## BANK OF MONTREAL BONUS

Directors of the Bank of Montreal have declared the regular quarterly dividend of 3 per cent., and the customary yearly bonus of 2 per cent., both payable December 1 to shareholders of record October 31. The annual distribution on this basis is 14 per cent. For the years 1912 to 1918, inclusive, a bonus of 1 per cent. was distributed annually, but December 1, 1920, the additional allotment was doubled, and has been met regularly since at this rate.

## TAX ON BANK PROFITS

Judgment was handed down by the Nova Scotia Courts recently in the case of Glace Bay vs. Royal Bank, the decision being against the town. Some months ago the three banks protested on an assessment made by town assessor Campbell on income or profits made in Glace Bay by the institutions. The matter came up in local appeal court and the banks decided to take the matter to court if the town would persist in its course.

The position taken by the counsel for the banks was that all profits made in Glace Bay went to the head office. These amounts were taxable there. Thus if the money were taken in Glace Bay the banks would be paying double taxation. This was the chief argument advanced by the banks. Judge Finlayson in giving his decision in the case of the Royal Bank of Canada ruled that the town's bank assessment is illegal.

## ONTARIO FIRE INSURANCE AGENTS

### Increase in Expenses Not Due to Agents' Commissions—Growth of Fire Insurance Reviewed

Two men prominent in the insurance world addressed the Ontario Fire Insurance Agents' Association at its convention held in Toronto recently.

#### Expenses and Commissions

G. D. Finlayson, Superintendent of Insurance, stated that, although expenses in the insurance business had greatly increased, it would be a fallacy to attribute this rise to an increase in agents' commissions. While the ratio of expense in the insurance business had risen in 1921 from 29.9 to 39.45, the former figure representing the ratio for 1920, the agents' commission had increased from 18.9 to 21.08, said the speaker, in substantiation of his arguments. Mr. Finlayson thought that the subject of compulsory fire protection, although beset with many difficulties, could be best discussed by a body of the nature of the Fire Agents' Association.

#### Growth of Insurance

John B. Laidlaw, Canadian manager of the Norwich Union, pointed out that fire insurance written by Dominion licensed companies had increased from $171,000,000 in 1869 to $6,191,000,000 in 1921, by 35½ times, or by 40 times when the $406,000,000 written by the provincial companies in 1921 was included. Premiums had increased from $1,775,539 in 1869 to $50,654,600 in 1921, by 26½ times, or by 30 times when the $5,010,302 received by provincial companies was included. Meanwhile population had increased by about three times.

Urging the agents to defend rather than to knock the insurance business, Mr. Laidlaw held that the agency system is superior to the branch system. "How else," he asked, "could fire insurance be introduced into every village and hamlet." The Ontario licensing system was improved, he said, having formerly been merely a means of taxing the business. He warned the agents against awakening hostility on the part of the public, pointing to what had happened to other businesses which the public had thought were not giving the service they should. Being the point of contact with the public, the latter judged the business by the agents. Moreover, they should emphasize the fact that what they were selling was fire prevention, with an indemnity thrown in.

## POST OFFICE SAVINGS BANK

A slight decrease in deposits and a slight increase in withdrawals is shown in the July statement of the Post Office Savings Bank, as compared with the previous month's statement.

Total deposits are down from $213,000 in June to $212,856 in July, and are considerably lower than July, 1921, when deposits totalled $287,480.

There was an increase of two thousand dollars in deposits during the month, but they are lower than for July last year, when withdrawals amounted to $751,629.

The following is the statement for the month of July:—

| | |
|---|---|
| Balance in hands of Minister of Finance on 30th June, 1922 | $23,641,264 |
| Deposits in Post Office Savings Bank during the month | 212,856 |
| Deposits transfered from the Post Office Savings Bank of the United Kingdom to the Post Office Savings Bank of Canada | 7,011 |
| Interest allowed to depositors on accounts closed during month | 2,776 |
| | 23,863,909 |
| Withdrawals during the month | 595,571 |
| Balance at the credit of depositors' accounts on 31st July, 1922 | 23,268,337 |
| | 23,863,909 |

## TORONTO ACTUARIES CLUB

At the last regular meeting of the Actuaries Club, of Toronto, held recently, John D. Buchanan, actuary of the London Life Insurance Company was elected president of the club and A. W. Johnston, secretary.

## PLAN STRICTER REGULATION

### Montreal Fire Commissioners Would Prevent Payment of Claims Before Investigation.

Proposed amendments to the statutes governing the office of the Fire Commissioners of Montreal are outlined by Commissoners R. Latulippe and W. F. Ritchie in a communication they have addressed to the provincial Legislature, which is receiving the attention of Premier Taschereau and Hon. A. Galipeault, Minister of Public Works. These proposals have received the approval of the Board of Trade, Chambre de Commerce and other public organizations, it being considered that such legislaton will considerably decrease the loss by fire in the city.

#### Outline of Changes

The following is an outline of the new proposals:

Fire insurance companies are forbidden to pay any claim made in respect of a fire before an investigation shall have been held into the origin of such fire, provided such investigation be held within thirty days following the fire. A fine of $100 shall be imposed upon any company violating this law.

The fire commissioners shall have the power of preventing any fire insurance company from issuing a fire insurance policy in favor of a person or corporation whose negligence has caused a fire, for a time to be specified by the law. A fine of $100 shall be imposed upon any insurance company violating this law, and a similar penalty shall be imposed upon any person or corporation having a fire insurance policy issued in his or its favor during suspension.

#### Fine for Negligence

Upon the sworn complaint of a taxpayer the Fire Commissioner may bring before him any person whose negligence may cause a fire, and, after proof made, may order him immediately to cease exposing his neighbors to the liability of suffering damage by fire. If such a person neglects and fails to conform with the order of the Fire Commissioner, he shall be liable to a fine not exceeding $50 and not less than $10 for each day he neglects or fails to conform to such order.

The office of the Fire Commissioner shall be substituted in place of the Recorder's Court for the enforcement of the regulations concerning the prevention of fires.

The latter amendment was introduced in view of the complaints of the fire inspector's department in connection with the difficulty they find in bringing before the Recorder's Court a person charged with violating the city regulations with regard to fire prevention. It has been stated that the roll of this court being always very heavy, it is necessary to wait several days before the trial can be held, and in the meantime the imprudence is continued. They contend that because of these delays they sometimes omit bringing the person charged before the recorder at all, whereas the complaint could be heard within 48 hours if brought before the Fire Commissioner's Court.

## COMMISSION ON GROUP INSURANCE.

Commission on a policy of group insurance formed the basis of discussion in an action to collect $1,014.25 taken by W. C. Breedlove against the Metropolitan Life Insurance Company which was dismissed by Justice Archer sitting in Quebec Superior Court recently.

Breedlove was an agent of the Mutual Life in 1919 and claims that he succeeded in interesting Canadian Cottons in group insurance for their employes. As his own company did not then handle this line of business he placed a policy with the Sun Life, the Travellers' Life of Hartford, and the Metropolitan. Later he says he negotiated with the Cornwall and York mills in placing a policy on which the initial premium was $5,095.98.

He asked the court to sanction his right to a commission of 20 per cent on the $5,000 and 15 on the surplus, according, he insisted, to trade practice.

The company refused to acknowledge his demand denying that he was their agent, and that he had placed the insurance, which they claimed had been handled by one of their own staff.

The court gave its decision on the proof offered, and came to the conclusion that Breedlove had no legal claim to the commission.

# The Monetary Times

Trade Review and Insurance Chronicle

OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

**Address:** Corner Church and Court Streets, Toronto, Ontario, Canada.

**Telephone:** Main 7404. Branch Exchange connecting all departments.

**Cable Address:** "Montimes, Toronto."

**Winnipeg Office:** 1206 McArthur Building. Telephone Main 3409. G. W. Goodall, Western Manager.

TORONTO, FRIDAY, NOVEMBER 3, 1922

## THE GOLD BASIS

The restoration of payment of gold in Canada would be welcomed in the financial and business community, and it is intimated from Ottawa that such a step is contemplated. One of the last factors in our war-time inflation would in this way be removed. The advance of the Canadian dollar to par in New York has been remarkable, in the face of an adverse trade balance with that country, and the fact that their's was a gold dollar, while our's is not. The change in the trade position in recent months has been one reason for the recovery, however, for while we still have an adverse balance with the United States our general position has been reversed. The following figures illustrate this:—

| 5 mos. end. August | Imports | Exports |
|---|---|---|
| 1920 | $597,890,603 | $454,390,487 |
| 1921 | 319,009,763 | 277,413,949 |
| 1922 | 303,597,326 | 316,640,663 |

Our balance with the United States, while still very heavy has been reduced, the latest figures being as follows:—

| Fiscal year ended March, 1922. | |
|---|---|
| Imports from U.S. | $515,960,902 |
| Exports to U. S. | 293,906,643 |
| Balance | $211,954,259 |
| Five months ended August, 1922 | |
| Imports from U.S. | $201,000,000 |
| Exports to U.S. | 135,000,000 |
| Balance (approx.) | $ 66,000,000 |

It is evident, therefore, that with our currency restored to its former strength, the Canadian dollar would be in a strong position, if our trade keeps up its present showing.

## BRITAIN'S POLICY

Andrew Bonar Law, the new premier of the United Kingdom, has announced a policy of which we may take heed at the present time. Perhaps as he was born in Canada we may feel more inclined to do so. In his speech accepting the leadership of the Conservatives Mr. Bonar Law, according to the New York Times, merely touched upon the policy for which he stood, preferring to leave its exposition in full for a speech to be delivered in Glasgow, his own constituency. He spoke of the need of tranquillity, freedom from adventures and from commitments at home and abroad. He pledged himself to stand by the Irish Treaty as long as the Irish continue to try earnestly to carry it out, but he said he could free himself from all feeling of responsibility for what was now going on in Ireland. Moreover he added a word as to his personal health. As is known, Mr. Bonar Law resigned eighteen months ago because he was in a dangerous condition due to increased blood pressure. He informed his hearers that an eminent specialist had expressed the opinion that he could now resume political work with a fair amount of safety, so he warned them that the experiment might be a failure and that he once more' might have to retire from active life.

"Tranquillity, freedom from adventure and from commitments" is typically conservative, though in Canada we may have failed to notice Conservatives as being more adverse to commitments, in the form of borrowing, than in other parties. And although Conservatism in its party form is at present out of favor here its fundamental principles are peculiarly acceptable at the present time. What we want is a few years steady production, payment of interest in full and reduction of overhead charges. This will not only lighten our burdens but will also restore the confidence of investors in our ability to carry on in the capacity of a producer, not in the capacity of a remittance man.

## CANADIAN BONDS IN ILLINOIS

The Insurance Superintendent of the State of Illinois has prohibited insurance companies there from investing in Canadian bonds. A Chicago insurance company in a letter to a Toronto bond house, outlines the position as follows:

"Under the laws of the State of Illinois, the Insurance Superintendent has the right to say whether or not we shall be permitted to invest in foreign bonds. He takes the unusual position that he will not permit us to invest in Canadian securities, and has demanded that we sell the several millions we already have on hand, of Canadian securities. He has declared to me that he does not consider the Canadian bonds any better than some of the European bonds, among them the Irish bonds. He has threatened us with prosecution under the law unless we dispose of our Canadian holdings. I do not know the cause of his attitude in this respect. We have not, and will not dispose of your Canadian issues. However, as he has au- as highly as anything else we have. His attitude in this respect is unfair to our organization, and to the Canadian and American bond dealers who have in late years handled so many of your Canadian issue. However, as he has authority in the matter ,we will not for the present invest further in Canadian securities."

Canadian bond dealers are trying through the Investment Bankers' Association of America, to have the order rescinded, and they have a good case to present. In fact, the comparison of Canadian with European bonds is quite unjustified. The percentage of loss in connection with investments in Canadian government and municipal bonds is probably less than in the case of similar bonds of the United States. True, our financial position is not as strong as theirs, but except in the case of a few municipalities there are ample assets behind our securities.

The views of the Illinois officials are not by any means typical of those held by investors across the border. Though criticisms of our too free borrowing habit is often proffered, authorities by their statements and by their actions show their faith in the general soundness of Canadian securities. The New York Evening Post in a recent issue, says:—"Conservative investors who have canvassed the possibility of bond investments among the various groups of American issues may without turning away from the gilt-edged classes continue their search profitably by examination of the Canadian lists."

Again in commenting on the rise of the Canadian dollar, the New York Herald says:—

"As measured on its home soil, the Canadian dollar is taller now by a fraction of a cent than the dollar of Uncle Sam. A Toronto street car conductor has refused a United States dollar on the ground that it was not worth its face value in Canada and that he must protect his employers' interests. It is true that the owner of the snubbed Yankee dollar complained to the railroad management and that the conductor was reprimanded, but the fact remains that our dollar is below par in Canada. That our northern neighbor should be proud of this is natural. It is only a short time since Canadian currency was at a discount of 16 to 17 per cent. in United States money.

"The change registers a story of prosperity and sound business conditions of which any country would have a right to be proud. Several things have combined to bring about this happy state of affairs.

"In the first place Canada has turned an adverse balance on international trade into a favorable balance, and of course, the very foundation stone of foreign exchange is imbedded in foreign trade balances.

"Again Canadian Governmental and industrial loans have met very favorable receptions in the American money markets.

"Large amounts of money have been spent in Canada by bootlegging outlaws. A substantial boost to Canadian prosperity came from these two sources.

"American motorists have contributed. In the last twelve months 60,000 American cars crossed into Canada. On the basis of an assumed even day trip and the expenditure of $25 a day for each car, it is computed by Canadian statisticians that the total of American money thus left with our neighbor, reached upward to $100,000,000. This is not a staggering amount to be sure, in these billion dollar days, but it is a tidy sum."

## AUTOMOBILE FATALITIES

While accidents in connection with the automobile traffic seem more frequent every day, records show that in the City of Toronto there has been a reduction in the number of fatalities in proportion to the number of vehicles in use. The Ontario Safety League is authority for the following figures for Toronto:—

In 1912 there were 17 fatalities.
In 1913 there were 28 fatalities.
In 1914 there were 21 fatalities.
In 1915 there were 11 fatalities.
In 1916 there were 18 fatalities.
In 1917 there were 26 fatalities.
In 1918 there were 37 fatalities
In 1919 there were 49 fatalities.
In 1920 there were 67 fatalities.
In 1921 there were 48 fatalities.

The league pointed out in presenting certain recommendations to a special committee of the Ontario Legislature on October 24, that the fatalities in 1922 were 5.5 per thousand of vehicles in use and in 1913 6 per thousand. In 1914 there was a reduction to 3 per thousand which they attribute to prevention work. The ratio for the succeeding years was:—1915, 1.3; 1916, 1.3; 1917, 1.3; 1918, 1.6; 1919, 1.7; 1920, 1.9; 1921,1.1. Had the ratio continued as in

1913, there would have been 1,048 killed, whereas there were only 277.

It is small comfort to those affected, however to know that the deaths are fewer in proportion to the number of vehicles. The fact remains that fatalities in 1921 were nearly three times what they were in 1912. In other words one's chances of being killed by a motor car in Toronto are now at least twice as great, allowing for the increase in population.

This was no discredit to the Ontario Safety League, which has conducted one of the most effective educational campaigns on record in this country. But it is evidence that stringent laws and rigid enforcement are required as well.

### UNITED STATES AS A CREDITOR

"Better Times through Foreign Trade" was the slogan of a convention of the American Manufacturer's Association held in New York last week. One of the speakers was Sir George Paish, the British economist and editor, who. judging from the following remarks did not know about the slogan:—

"The very fact that up to the war the United States was a debtor nation and was consequently more anxious to sell than to buy, has prevented the American people from realizing that the extraordinary change which the war has effected in their fortunes by converting them from a debtor to a creditor nation demands a change in their point of view.

"Clearly a creditor nation with a large income from foreign investments must be willing to buy more than it sells if it is to receive payment for the interest due it. The produce may come in as imports or it may be consumed abroad by tourists, but in some way or other a creditor nation must be willing to take payment of the produce it is still selling and of the interest which is due it, in the goods and services of other nations or it cannot be paid.

"The suggestion has been made with regard to Great Britain, which owes to the United States Government a debt of about a thousand million pounds, that payment should be made in the present foreign investments of Great Britain, not inter-allied securities, but in prewar securities.

"This could be done. Great Britain could give to the United States in payment of her debt a thousand million pounds of Canadian, Argentine, Australia, Indian, South African or other securities, and the debt could be paid off. But this would not solve the problem. It would definitely deliver Great Britain from its obligations but it would not make any essential change in the situation.

"The United States does not need to purchase the products of the countries in which Great Britain placed so much of her pre-war savings any more than she needs the produce of Great Britain, indeed she needs them less. Canada pays Great Britain for her interest in wheat; the United States does not need the Canadian wheat. Canada would still have to sell her wheat to Great Britain in order to pay the interest due, and Great Britain, which needs Canada's wheat would still be faced with the task of remitting the necessary funds to the United States to meet interest payments."

Now that the United States has a tariff sufficiently high to satisfy the most ardent protestionists, it does not seem so well satisfied. Perhaps it has in some degree Canada's habit of passing legislation and looking at it critically afterwards.

## *Personal*

EDWARD J. FREAM, secretary of the United Grain Growers, Limited, has resigned his position.

A. W. NICOLL has been appointed Canadian manager of Furness Withy & Co., succeeding the late J. R. Binning.

LORD SHAUGHNESSY, has been elected to represent the Canadian policyholders on the board of trustees of the Mutual Life Insurance Company of New York City.

C. HOWARD SMITH, president of Howard Smith Paper Mills, Limited, has left for an extended trip to the Far East. He will first visit the business centres of China and Japan and later proceed to Australia and New Zealand, stopping at the Phillipine Islands on the way.

ROBERT D. TAYLOR, of The Robt. Taylor Company, of Halifax, has been elected by the Nova Scotia members to serve on the Board of Directors of The Canadian Credit Men's Trust Asociation.

R. O. MACKAY TURNER, has been appointed manager of the Toronto office of the United Financial Corporation, Limited.

JOHN S. DOWLING, of Brantford, was re-elected president of the Ontario Fire Agents' Association at its recent convention in Toronto.

## *Obituary*

BYRON LEDERER, aged 50, president of the Birmingham Motors, Ltd., Peterboro, Ont., died suddenly in Toronto on October 23rd. The late Mr. Lederer's home was in Brooklyn, N.Y.

MARMADUKE RAWLINSON, died at his home in Toronto on October 16th. The late Mr. Rawlinson was born in Lincolnshire, England, 70 years ago, and came to Toronto about 45 years ago. Mr. Rawlinson was a director of the Continental Life Insurance Company.

### INDUSTRY AT THE COAST.

#### Large Residential Building Program Carried Out in Vancouver—Tourist Business Assumes Large Volume.

(Staff Special)

Vancouver, October 28.—The business outlook in Vancouver, while somewhat quiet, at the present time, seems to be in better shape than it has been for the last two years. Quite a large building program has been carried out in Vancouver, especially in the Pt. Grey district. Also the C.P.R., continues to develop Shaughanessy Heights, the residential district of Vancouver, to considerable extent this season.

The lumbering and mining industries are both fairly active, as indicated in an interview with J. R. Davison of the Vancouver Publicity Bureau. Mr. Davison says:—

"There are many indications of better business in Vancouver. Our basic industries are getting in a better position as adjustments to new conditions become more nearly complete.

#### Condition of Industries.

"Mining has made a decided forward movement this year. The lumber mills are for the most part busy, and one result of the new tariff of the United States will be to give a decided advantage to the local shingle industry. The fishing industry has had a better season than was anticipated, and the authorities are working hard on the problem of restoration of the runs. With the data now available it is anticipated that a solution will be soon reached. Agriculture is an exception as owing to the dry season the returns in some districts are, considerably below the average. The marketing of the fruit crop of the Okanagan and other valleys has been a disappointment to the growers this year.

"A very satisfactory condition in Vancouver is the constant growing recognition of this as Canada's Pacific port. The tonnage this year has shown a very remarkable increase over any previous year. The shipment of this year's grain crop through Vancouver has already equalled last year's total for the whole year, and last year's record was itself 14 times that of the previous season. The fact that this port operates 365 days in the year, and that the Panama Canal has made practical, shipments to the United Kingdom at good rates, is beginning to be realized by the producer in the prairie provinces, and as a result the volume of shipments this way will seem to be limited only by the facilities for storing and handling. Of this year's shipment over 80% is for the United Kingdom.

"Another outstanding business of this year has been the large increase in the tourist trade. We have had an unusual number of conventions, and travel by rail by ship and by automobile has been very good, indeed. I have not the total figures available, but there has been a marked increase, and these visitors have left many millions of dollars in this city in hard cash."

### ELEMENTS OF CONTRACTS DESCRIBED

#### Toronto Barrister Addresses Meeting of General Accountants' Association—Governed by Nine Rules.

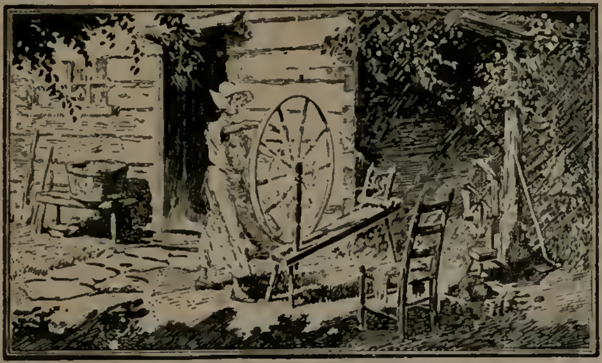
Frederick A. A. Campbell, B.A., of the firm of Macnaughton & Campbell, barristers, delivered a lecture on the elements of contract before the members of the General Accountants' Association, in Toronto, on October 26. He outlined the rules governing offer and acceptance, that is, the methods by which the parties are brought together. The nine rules which he dealt with are:—

1. Every contract springs from the acceptance of an offer.
2. An offer or its acceptance, or both, may be made either by words, or by conduct.
3. An offer is made when, and not until, it is communicated to the offeree.
4. Acceptance must be communicated by words or conduct.
5. Acceptance is communicated when it is made in a manner prescribed or indicated by the offeror.
6. Offer creates no legal rights until acceptance, but may lapse or be revoked.
7. The offer must be intended to create, and capable of creating legal relations.
8. Acceptance must be absolute and must correspond with the terms of the offer.
9. An offer need not be made to an ascertained person, but no contract can arise until it has been accepted by an ascertained person.

#### Two Classes of Contract.

Mr. Campbell then went on and dealt with the two classes of contract known to English laws. Formal contracts (that is contracts under seal) and simple contracts. Formal contracts depend for their validity, on their form. That is certain contracts must be under seal, such as the contracts with the corporations, with certain exceptions. Simple contracts depend for their validity on the presence of consideration, that is to say, in some benefit to the promissor or loss to the promisee granted or incurred by the latter in return for the promise of the former.

He pointed out that certain simple contracts cannot be enforced unless written evidence of the terms of the agreement and the parties to it is produced, by reason of the Statute of Frauds and the Sale of Goods Act.



Pioneers not Specialists

The early settlers spun yarn and made their own garments, not from desire but as a result of necessity. At times, to make the bare necessaries of life, they had to neglect their objective which was the clearing and settlement of land. Pioneers were not specialists.

Present day specialization has been made possible largely through the concentration of the investors' savings employed in government, municipal and corporation bonds.

Æmilius Jarvis & Co., Limited, are specialists in the investment field.

Without obligation you may have your name placed on our list to receive the "Investment Guide."

"All Men Think All Men Mortal But Themselves"

It is quite a natural thing that we should all look forward to living out our full threescore years and ten. But so confident are some in this regard, that even in the light of mortality statistics, they will not admit that it is essential to insure against an early demise. All men, however, must admit that it is at least advisable to provide for old age, and a Great-West Life Insurance Policy will take care of both contingencies. Rates are low and returns are high. Let us send you particulars. Write stating age at nearest birthday.

## Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

# Co-operative Credit and The Banks

### By A. B. BARKER

The banks are again on the carpet in the West on the old charge that they are discouraging borrowing through co-operative organizations. The bank managers specifically deny this but as the charge persists, it is undoubtedly a case of complete misunderstanding either by accident or design. The object of an organization of this kind is to supplement the credit of the individual borrower. Now in trying to state the facts of the case it must first be clearly understood that there is no question as to the intention of the borrower to repay as agreed when the loan is applied for. It is purely a matter of his ability to carry out his promises. A loan is a contract and in all contracts the ability of the parties to carry out their agreements is of almost greater importance than their willingness. A man can be made to fulfil a lawful promise if he is in a position to do so but if he has not the power, to try to force him is wasted effort. When a loan is wanted then the essential point to be settled, assuming that the borrower intends to repay, is whether he will be able to do so.

Now a bank obtains its funds from which its loans and discounts are made by buying them from its depositors, and in order to obtain them has agreed to repay them on demand. It follows therefore that in making loans the advances must be as liquid as possible. To insure this it further follows that the loans must be confined to that class of business dealing with the production and exchange of goods and not for the purpose of investing in the means of production, machinery and plant, buildings or land.

### Bank's Resources Limited

There is another feature about bank loans which does not appear to be appreciated as fully as it deserves. The community in general when thinking or speaking of these loans seems to assume that the funds loaned originate with the bank and apparently base their opinions according. This false impression is likely to remain until it is clearly understood that the banks do not produce credit in the sense of creating it but simply trade in it just as a grocer trades in butter and eggs. Like him the bank buys credit from one part of the Community and sells it to the other but while the grocer buys from the few and sells to the many the bank buys from the many and sells to the few. This difference makes it necessary to keep a larger proportion of its assets liquid than in the case of the grocer for if the latter should find his sales falling off and his receipts reduced in consequence he will have little difficulty arranging renewals of his obligations without loss of credit. With a bank it is different. It cannot ask for an extension of its liabilities and remain in business. It must pay on demand.

### For All Classes of Business

Also a bank is organized to assist all classes of the producing and trading community, and all legitimate business is entitled to its proper consideration. If all classes of business required funds at the same time all would be on short allowance. Fortunately the requirements of all business are seasonal and when business is functioning properly each class of borrower will repay his loan at the end of his season and these funds are then available to the next class in its turn and so on. With regard to loans to farmers it may be stated that as the industry is basic, it might even be termed the most important of all, it is entitled to special consideration. This consideration however must be in connection with funds for operation only. If a farmer has depleted his working capital in order to add to his land holdings, he is no more entitled to be carried by the banks than is a manufacturer who has undertaken a building program and hopes to lean on the bank if his business is not up to expectations, and he falls down on his building payments.

A bank's loanable funds are limited strictly by its resources and these come from its deposits. To continue in business the bank must make a profit and to make a profit it must use the deposits it takes in. To provide each class of business with the accommodation to which it is entitled it follows that each class of borrower must pay up at the end of his season. If for any reason one class does not so pay as agreed it is obvious that the next in turn under the circumstances must go short. This is true whether the borrowers are farmers or traders. With the former, however, the difference in volume of turnover must be considered. The farmer is frequently depending on one turnover during the year while the trader has several but does not this fact make it more essential that bank loans to farmers should be confined entirely to providing funds for operation?

### Co-operative Borrowing.

The theory of co-operative borrowing is that the association borrows and lends the funds so obtained to its members, the idea being that the object for which the loan is sought has been investigated by the committee and this body satisfied that the applicant will be able to repay as agreed. In order to ensure the organization working on strictly business lines it is necessary that the obligations assumed by it be unforceable to make certain of this there must be either, ample capital invested or the members must support the organization with their own credit. These organizations have small capital and the only way then is for the members to pledge their credit. Without the joint credit of the members, the obligation of the association means little and because this has been refused is probably the reason why loans to these organizations have been turned down, the ability to pay as agreed has not been clearly shown.

One western Editor not long ago stated that in his opinion the west was suffering not from lack of credit, but from a surplus of it. He thought the trouble was that credit had been given too freely and that in consequence obligations in connection with land purchasees had been undertaken in far too great volume and the working capital of the community depleted on this account. This would go to support the claim of the banks that a big percentage of the loans asked were to keep up land payments and not for farming operations.

## HOME BANK WINS CASE

In the Court of Appeal in Montreal on October 25, judgment was read in the case of C. H. Cahan, K.C., and the Home Bank, the court upholding the finding of the Superior Court and dismissing an objection to the admission of a paragraph in the statement of facts in an action by which Mr. Cahan is suing the bank on a number of cheques alleged to have been drawn and deposited by his son to his own account.

The bank asked the rejection of the claim that the younger Cahan had acted in the same way in dealing with the Corporation Agencies, Limited, a concern for which he acted under power of attorney from his father in the matter of drawing and receiving cheques. The Superior Court found in favor of the bank, and the Court of Appeals now upholds its judgment.

This decision is a sequel to the action taken by C. H. Cahan in connection with heavy defalcations incurred by his son, C. H. Cahan, K.C., whose present location is unknown.

## BANK ROBBERS FAIL

After gaining entrance through a window and marking off the vault preparatory to making use of explosives, bandits were unsuccessful in their attempt to rob the Holmfield, Man., branch of the Bank of Toronto on October 18. They were evidently frightened away from their work, although before leaving they obtained some furs and silverware from a dwelling house attached to the bank. Holmfield is a southern Manitoba town close to the international boundary.

## BRITISH INCOME TAX

All British subjects resident in the colonies or abroad, who derive income from which British Income Tax has been deducted have a claim for repayment of the whole or a part of sucn tax. This is a fact that few colonials realize, according to Wilfred T. Frye, income tax specialist, of London, England, who is now in Canada on a business trip.

# *Bank Branch Notes*

During the month of September, the following eight branches of Canadian banks were opened:—Hochelaga-Ste. Eulalie, Que.; Imperial-Richards Landing, Ont., made a sub agency to Sault Ste. Marie; Nationale-Montreal (Notre Dame de Grace); Nationale-Chaudiere Station, Levis, Que.; Royal-Trinidad, Cuba; Royal-Guines, Cuba; Toronto-Saskatchewan; Union-Hamilton, King St. East; Union-Spadina Avenue, Toronto.

The following four branches were closed:—Dominion-Portage Ave. and Kennedy St., Winnipeg; Imperial-St. Thomas, Ross and Wellington Sts.; Royal,—Montreal, Place d'Armes; Margaree Harbour, N.S.

Announcement was made on October 25 by George Campeau, superintendent of branches of the Provincial Bank of Canada, that plans to build three new branch banks at Windsor, Ford and Walkerville, at a cost of $400,000, are under way. The Windsor bank will be located at Victoria avenue and London street, where a site has already been secured. The Walkerville building will be at Ottawa and Lincoln road, and the Ford branch at Charles street and Drouillard road. Plans for the three buildings will be completed in time for work to start early in the new year.

## PROPOSE MUNICIPAL BANK

The Quebec Council at the meeting of the amendments to the charter committee on October 5, endorsed the project of creating a municipal bank where residents could place deposits up to a total of $1,000,000, returning 3 per cent. interest. They even decided to seek powers to that effect from the Legislature at the next session.

Through Ald. LeSage, Ald. Tremblay moved that powers be given to the city to organize a municipal deposit bank where the total amount deposited by citizens and returning 3 per cent. could reach $1,000,000. According to Ald. Tremblay the system had been adopted in the United States and had proved most successful. This suggestion was adopted.

## DOMINION GOVERNMENT SAVINGS BANKS

The September statement of the Dominion Savings Banks shows that deposits have declined and withdrawals have increased, as compared with the previous month.

Deposits are shown from $87,632 during August to $71,593 during September, and withdrawals on the other hand have increased from $158,127 to $170,116.

The following is a comparison of balances at the end of August and September:—

| | Aug. 31 | Sept. 30 |
|---|---|---|
| Victoria | $1,044.276 | $1,024,528 |
| Charlottetown | 1,681,178 | 1,659,298 |
| St. John | 4,175.843 | 4,142,977 |
| Barrington | 61,305 | 61,137 |
| Halifax | 2,202,828 | 2,179,947 |
| Kentville | 222,646 | 221,941 |
| Sherbrooke | 54,451 | 54,176 |

## BANKER ARRESTED

L. T. Rand, formerly manager of the Bank of Commerce at Ituna, Sask., was on October 12 committed for trial on three charges of forgery at Melville. It is alleged that these forgeries were committed at Ituna during 1920 and 1921 and that the moneys procured from the bank in this manner were diverted to his own uses.

Rand was recently moved to Stafford, Sask., and his successor at Ituna became suspicious when he found it impossible to collect three notes in the bank's possession which are now alleged to have been forged.

## TRUST COMPANY REGISTERED

The Osler and Nanton Trust Company has been registered under the Trust Companies Act, of British Columbia. The business of the company in British Columbia is limited to acting as trustee under a mortgage or charge created by an incorporated company to secure its debentures, and to investment of its own funds and of funds held by it as agent.

## BRITISH TRADE IS LOSING

### United States Has Advantage of Proximity to Canadian Market

G. T. Milne, who is retiring from the post of Senior British Trade Commissioner in Canada, has some interesting observations to make regarding our trade relations. In an interview published in the "Montreal Gazette" he says:—

"Of Britain's export trade to Canada one cannot say that it is entirely satisfactory. On the contrary, from investigations which I have been making, it appears that while the per capita imports from the Mother Country during last trading year were only 43 per cent. in excess of those of 1902, the per capita expenditure on imports from the United States during the same period increased by 168 per cent. As the increase in population between 1901 and 1921 was nearly 64 per cent., it will be seen that Britain has not even maintained the relative position. Further, it may be mentioned that, during last year, the per capita imports of British goods into the Argentine Republic, which is a foreign country without any preferential tariff to Britain. exceeded the per capita value of the imports from the Mother Country to Canada during the same period. After making every allowance for the dislocation of industry caused by the war, the great coal strike last year, the then growing trade depression in the Dominion and other factors, the position of Britain's export trade to your great Dominion must be looked upon as far from satisfactory."

### U.S. Competition

"The most obvious cause for the decline, or at least stagnation, of Britain's exports to Canada," Mr. Milne added, "is the proximity of the United States, and to a lesser degree, owing to a rapid development of manufacturing in the Dominion. What is taking place is quite natural, but a further explanation of Britain's unsatisfactory position is to be found in the failure on the part of British firms to study the Canadian market thoroughly, and to adapt themselves as far as possible to its needs. It is possible, I think, that some firms consider that they can get business more readily in some markets than they can in Canada, and, in my opinion, there is little doubt that Canada is the most difficult market in the British Empire for the home manufacturer.

"Two possible policies appear to me to be worthy of study in connection with this market. The one is the opening of branch establishments carrying stocks for distribution throughout the Dominion. In this way some of the advantages held by our great competitors to the south could be countered. Another suggestion is that the question of establishing a branch factory is at least worthy of thorough investigation in many cases. While there may not be either the same reason or the same facilities for a British firm opening a branch in Canada as there is for an American firm, investigation of such a possibility alone would, for many of our home firms, be a liberal education."

## ASSETS SOLD

The assets of the Prince Rupert Pulp and Paper Co., Ltd., were sold on October 13 by the order of the court to the Prince Rupert Holding Co. for $300,000. The Holding Company was the only bidder at the sale. A cash deposit of $30,000 was paid into court. The sale of the assets was ordered some time ago by Justice Morrison.

# The British Canadian and General Investment Company, Limited

**Report of the proceedings at the Eleventh Annual General Meeting of the Company held at the Registered Offices, 4, Moorgate, London, E. C. 2, on Monday, the 9th day of October, 1922, at 12.30 o'clock in the afternoon, Mr. Charles P. Johnston, Chairman of the Company, presiding.**

The Chairman said:

It is a matter of the greatest regret to us that we are unable for the first time for many years to recommend the payment of a dividend upon the Ordinary Stock of the Company.

I am bound to say that I personally never contemplated such a contingency arising, as for years past our revenue has been remarkably steady, and we have dealt with the Accounts in such a conservative manner that I thought we could safely rely on at any rate maintaining our dividend at last year's rate, and I had every hope that we might even increase it to some extent.

The main causes of the falling off in our profits have been referred to in our Report, viz., the bad weather which prevailed during the harvesting period and more particularly the tremendous and rapid fall in the prices of all farm produce.

You may be able to form some idea of the difficulties which have been experienced when I tell you that according to the report of the Government Census Bureau the field crops of Canada as a whole were estimated to be worth some £100,000,000 sterling less than in the previous year, and the average price received by farmers in Saskatchewan for their wheat was only 85 cents a bushel, against $1.55 in 1920 and $2.32 in 1919. The result was that very few of them could make any payments on account of either interest or principal, and our affiliated companies in the Province were consequently unable to collect more than a small portion of the amounts due to them, and were in their turn unable to pay us the interest on the Debentures held by us.

I have referred on several previous occasions to the question of Taxation and have warned you that it would rapidly become a serious matter for us. You will see from the Accounts how serious it now is. English Income Tax is £500 more than last year, that iniquitous tax the Corporation Profits Tax amounts to over £400, whilst we have paid over £2,000 for taxes in Canada.

We hope to recover a substantial portion of the Canadian Taxes, but I cannot even begin to explain to you the complications which have arisen in this connection or the amount of intricate and difficult work which has been involved. If you were to read the voluminous correspondence and had been present at the numerous interviews which have taken place with the Revenue Officials, you would, I think, be amazed. We are at the present moment awaiting answers from the Authorities, both in England and in Canada to our latest communications, and you may rely on our doing our best to recover the largest amount possible. I am afraid, however, that for some time to come we shall have to face heavy charges in this connection.

So much for the past. What of the future?

In view of all that has happened, I altogether decline to assume the role of a prophet.

Last night by way of penance I read through all the speeches I have made as Chairman of this Company during the last ten years, and I find that ever since the commencement of the war I have consistently warned you of the difficulties which must inevitably be experienced during the period of reconstruction which would follow, but I have always expressed the greatest faith in the ultimate prosperity of Canada. That faith I still hold, but after last year's experience we must await the result of the marketing of the crop, which from all accounts has been a very good one in most districts. I have read dozens of reports from all kinds of sources. and there seems no doubt as to both the quantity and quality of the crop, but prices are very low and there is much leeway to make up. The Premier of Saskatchewan has stated that debtors must be leniently dealt with and that the Province has never been so near the necessity of a moratorium, but apparently prominent Canadian bankers do not consider that the financial situation in the West warrants extreme measures.

It seems to me after carefully studying and collating all the various reports, that the crop will bring a very large amount of money into Western Canada, and that we may expect some improvement, I hope even a considerable improvement as a result, but that the disasters of last year are not going to be anything like entirely put right by the results of one crop. There are other considerations which have been very ably dealt with in articles by Mr. Sanford Evans, who used to be a member of our Advisory Committee in Winnipeg, and was afterwards associated with the Canadian Wheat Board. It would take too long to go into all the questions he raises, but the effect on my mind is to emphasize the absolute necessity of promoting immigration into Canada as rapidly and effectively as possible. Immigration has fallen off very largely indeed of recent years, and I feel convinced that the great unoccupied areas of the West should be settled as quickly as possible and as far as possible with men of British stock.

One very unfavorable feature is the Tariff recently adopted by the United States. I have here a list of the duties given by the "New York Financial Chronicle" covering many columns of small print. I will only give you three as specially affecting our Canadian interests. Cattle weighing over 1,050 lbs., (that is all fat cattle) 2 cents a pound. Wheat 30 cents a bushel, which is equivalent to over 30 per cent. of the value of wheat in the Winnipeg market today. Both these were previously free of duty. The duty on apples has also been increased from 10 cents to 25 cents a bushel. I think this Tariff will eventually harm the United States more than the countries against which it is aimed; but in the meantime it can hardly fail to do much damage to exporting countries such as Canada. The obvious moral is that the various parts of the British Empire, which as a whole can produce all the necessaries of life should get together and in every possible way promote inter-Imperial Trade. I see I preached this doctrine to you as long ago as 1916, and the events of the past few years when country after country has proceeded to build Tariff walls of ever increasing height seem to me to make the matter one which is not merely desirable, but of immediately pressing necessity.

This is admirably and concisely put as follows in a note in the "Canadian Gazette" of the 28th September, dealing with the problem presented by the U.S. Tariff:—

> "The real way to tackle the problem is to clear the channels of inter-Empire trade so as to increase the self sufficiency of the Empire in the matter both of essential food supplies and manufactures."

The Accounts and Balance Sheet and the Directors' Report thereon were adopted.

The appointment of Lieut.-Col. R. F. Cottrell as a Director of the Company was confirmed. Mr. R. F. Bury was re-elected a Director of the Company, the Auditors were reappointed, and the proceedings terminated with a cordial vote of thanks to the Directors and Staff.

---

## C.P.R. COACH SHOPS SHUT DOWN

The Coach Shops of the Canadian Pacific Railway from coast to coast have been closed down for an indefinite period.

According to the management of the railway, this is due to a falling off in the passenger traffic. The stoppage is expected to have a profound effect on the shopmen's crisis.

More than 2,500 men will be thrown out of employment by the stoppage. Of those more than 1,700 will be employed at the Angus shops.

The closing of the car shops may only be of short duration, it was indicated on October 12 at a conference between the Canadian Pacific Railway management and the Federated Trades Committee representing the men who have been thrown out of employment by the stoppage.

The conference which was sought by the men's representatives, took place at the Windsor Street offices of the C.P.R. While no date was given for the reopening of the shops, the indications were that the stop may be only of a short duration. Until they are reopened, conferences will be held from time to time between the management of the railway and the officers of the Federated Trades.

## MAINTAIN RATES TOO HIGH

### Vancouverites Resent Criticism of Their Fire Protection, and Turn Criticism on Insurance Companies

(Special to The Monetary Times)

Vancouver, Oct. 24.—A heated controversy about Vancouver fire insurance rates and the relative hazard here as compared to other cities, developed yesterday when some of the leading business men of the city attended a large meeting addressed by J. Grove Smith, Dominion Fire Commissioner and J. A. Thomas, provincial Fire Marshall. After the two government officials had stressed the necessity for greater fire protection and pointed out the danger of a conflagration along the waterfront, their statements were challenged by William Dalton, chairman of the insurance committee of the Employers' Association. Mr. Dalton referred to the speakers as "Calamity Gentlemen" and stated that Vancouver had never had a calamity since 1886 and that there was no fear of one with the present fire fighting equipment available. He asserted Vancouver's fire loss was low but insurance rates were high. He said insurance companies had collected $20,000,000 from British Columbia in five years and paid out only $6,000,000 in losses and that the balance of $14,000,000 had gone into somebody's pockets. Fire Commissioner Smith said that Mr. Dalton had overlooked the cost factor in the conduct of the business.

Mr. Smith declared that Vancouver had the maximum fire hazard and that any fire prevention engineer would confirm the statement. He prophesied that at some time, when weather conditions were adverse, the city would lose a large area of property by fire.

#### The Companies' Side

J. L. Noble, secretary of the B. C. Fire Underwriters' Association, in reply to Mr. Dalton's attack upon the companies, said that the meeting had been called to discuss fire prevention and that another public meeting should be held at which the insurance companies' side of the question would be fully explained, and their rates justified.

Fire Marshall Thomas told of the dangers of a waterfront conflagration and said that he had no jurisdiction over that area. He was going to make certain recommendations to the Dominion Fire Commissioner regarding improvements there, after which his responsibility would cease.

#### Allege High Rates

E. G. Munday, secretary of the Employers' Association, also attacked the insurance companies for alleged high rates. He stated that he was organizing Burrard Inlet waterfront property-owners into a company which would build a fire boat, the cost to be met by the savings in fire insurance premiums which would result. Mr. Smith replied that it had been his intention to get financial aid from the Dominion government to build a fire boat but if a local company was to be formed his action would be unnecessary. Mr. Smith suggested the placing of a high pressure pipe line along the south shore of False Creek with a salt-water pumping station on Granville Island and monitors installed on the premises of each lumber plant.

The Vancouver Board of Trade, which recently took up the matter of Vancouver fire insurance rates, has expressed its satisfaction with the rate reductions now being made by the Underwriters.

## CLAIM FIRE INSURANCE

A claim for a total amount of $14,500 against three insurance companies is being made by the Colonsay Hotel Company, in consequence of a fire which completely destroyed the hotel and contents October 3, 1920. The original action by the members of the hotel company was taken before Justice MacLean and a jury at Saskatoon. He gave judgment for the plaintiff for nearly the whole amount of the claim. Reversion or alteration of this decision is sought in the Court of Appeal by the Canadian National Fire Insurance Company, the Union Insurance Society of Canton, Limited, and the British Crown Assurance Corporation, Limited, with each of whom the hotel was partially insured. They originally were concerned in three separate actions, but these were all consolidated before the trial.

## NORTHERN ONTARIO FIRE LOSS

Insurance companies doing business in the Haileybury district promptly formed an adjusting bureau to operate on the spot. Total insurance loss will probably be about $3,000,000. Premier Drury estimated the total damage at seven or eight million, which probably includes merchandise and timber as well as property. The following is a partial list of insurance companies' losses:—

| | |
|---|---|
| Alliance of London | $ 88,000 |
| Atlas | 225,000 |
| British America | 2,000 |
| British Colonial | 21,000 |
| Caledonian | 105,000 |
| Commercial Union | 224,000 |
| Continental | 5,000 |
| Employers' | 160,000 |
| Globe and Rutgers | 38,000 |
| Guardian | 115,000 |
| Glens Falls | 50,000 |
| Home | 40,000 |
| Hand-in-Hand | 12,000 |
| Imperial Und. | 45,000 |
| London and Lancashire | 270,000 |
| London Assurance | 6,700 |
| London Guarantee | 125,000 |
| Merchants Marine | 2,175 |
| Motor Union | 1,750 |
| Mercantile | 75,000 |
| National Provincial | 8,200 |
| Norwich Union | 125,000 |
| Niagara | 50,000 |
| North America | 50,000 |
| North West | 3,000 |
| Northern | 225,000 |
| Nova Scotia Und. | 35,000 |
| North Brit. and Mer. | 150,000 |
| Phoenix of London | 100,000 |
| Palatine | 18,600 |
| Queensland | 10,000 |
| St. Paul Fire and Marine | 60,000 |
| Scottish Metropolitan | 5,000 |
| Sun | 225,000 |
| Temiskaming Mutual | 32,000 |
| Union of Canton | 40,000 |
| Union of London | 12,000 |
| Union of Paris | 30,000 |
| Western | 50,000 |
| Yorkshire | 160,000 |
| Total | $2,999,425 |

## WANT GROUP INSURANCE

Preliminary steps were taken on October 25 in anticipation of the inception of group insurance policies and a pension fund for fire and police employees in the province of Quebec, outside the cities of Montreal and Westmount. The latter two municipalities have already arranged these advantages for the police and firemen, and an effort is now being made to bring other cities in the province under the same system.

Another meeting will be held on November 8, in the Sun Life Assurance Company building, Montreal. A Dubeau, chief of the fire and police station, Verdun, is president of the committee in charge.

## SOUTH VANCOUVER INSURANCE

The council of South Vancouver, B.C., on October 19 passed the following resolution:—

"This council protests most emphatically against the gross discrimination shown by the commissioners in the distribution of the municipal insurance policies, and that the matter be drawn to the attention of the government.

"We find of schedule insurance nearly 50 per cent is given to three agents, two of which are not South Vancouver agencies."

Insurance figures investigated totalled for municipal buildings and other assets $142,450, on which the premium was $1,799; insurance on schools, $703,476 and corresponding premium $2,759, making a total insurance of $845,926 and total premiums, $4,558.

## WILL INVESTIGATE FIRES

At a special meeting of the Canadian Fire Underwriters' Association held at Ottawa on October 23 authorization was given for the formation and expense entailed of a special department to look into all suspicious fires, employ detectives and, if of incendiary origin, pursue the matter to a finality, seeing that the delinquents not only do not receive the insurance money but in lieu, well earned punishment.

## NEW LIFE BUSINESS SHOWS INCREASE

### September Total is Nearly Two Millions Above Last Year—Death Claims Also Increase

According to reports received by "The Monetary Times" from representative Canadian companies, new life business issued during the month of September shows an increase over the same month last year.

#### New Business

| | Sept. 1921 | Sept. 1922 |
|---|---|---|
| Company A | $3,711,308 | $4,756,921 |
| Company B | 2,297,575 | 2,482,839 |
| Company C | 1,511,960 | 1,157,412 |
| Company D | 714,000 | 718,241 |
| Company E | 783,825 | 689,500 |
| Company F | 3,075,617 | 4,135,869 |
| | $12,094,285 | $13,940,782 |

With the exception of two, all the companies show an increase in death claims paid during September, as compared with the same month last year. Details of the September statement are given herewith:—

#### Death Claims Paid

| | Sept. 1921 | Sept. 1922 |
|---|---|---|
| Company A | $288,592 | $415,263 |
| Company B | 23,392 | 35,434 |
| Company C | 31,937 | 53,705 |
| Company D | 14,500 | 8,510 |
| Company E | 15,599 | 20,792 |
| Company F | 81,451 | 59,531 |
| | $455,471 | $593,235 |

## LIABILITY FOR PRAIRIE FIRE

### Insurance Company Must Pay Where Risk Was Re-insured on Owner's Demand

The Appelate Division of the Supreme Court of Alberta recently reversed the decision of the Supreme Court in the case of St. Paul Lumber Co. Ltd. v. British Crown Assurance Corporation, which was an action on a fire insurance policy.

The Dominion Law Reports contain the following summary of the facts and the decision which was reversed:

"A fire insurance policy contained the following typewritten clause. It is understood and agreed that this insurance also covers loss or damage arising from or traceable to Prairie Fires. It being warranted by the assured that the several locations named herein on which lumber are piled shall be entirely surrounded by ploughed ground and in no way exposed to bush hazard.

"The Court held that the warranty related only to loss or damage arising from or traceable to prairie fires and that the defendant was freed from liability as the loss sued for did not arise from and was not traceable to a prairie fire."

"When an insured makes an explicit communication to the agent of an insurance company that the lumber to be insured is on a clearing in a bush and the insurance company refuses the risk on the ground that it is exposed by heavy underbrush, but on the demand of the agent places the insurance with another company, the insuring company cannot escape liability on the ground that the insured omitted to communicate such material fact to it, within the meaning of a statutory clause in the policy."

## BURGLARY INSURANCE CASE.

The Court of Appeal, in Montreal, recently dismissed the case of Herman Cohen against the National Surety Company of New York, in which it sought revision of a Superior Court judgment which had assessed the claim at $165. The company was sued on a burglary insurance policy, Cohen claiming $5,000 on the grounds that his premises on Craig street had been burglarized and valuables stolen to the value of $10,353.

The appeal was dismissed because no regular books were kept by Cohen as required by the policy, and the lower court's decision was upheld.

# Recent Fires

Fire losses in Canada during the week ended November 1, are estimated by The Monetary Times at $231,100, compared with $604,200 the previous week. The details are as follows:—

**Chartersville, NB.** Oct. 26th. Outbuildings belonging to Mrs. E. F. Fraser and house and barn belonging to Thos. Clark. Loss $10,000.

**Chatham, Ont.** Oct. 29th. Barn on the farm of Joseph Matt, ninth concession of Dover.

**Cloverdale, B.C.** Oct. 19th. Home of W. Stokes on the Stokes' road.

**Edmonton, Alta.** Oct. 19th. D. R. Fraser Lumber Company's yards. Loss $8,000.

**Elginburg, Ont.** Oct. 27th. Home of E. H. Stover. Loss $1,000.

**Guelph, Ont.** Oct. 22nd. Barn on the farm of Will Mountain, 32 Sideroad, Caledon township. Loss $16,000 with a small amount of insurance.

**Harwood, Ont.** Oct. 30th. Barn belonging to John Shearer.

**London, Ont.** Oct. 28th. Farm of Archibald Steel, lot 5, concession 14, London township.

Oct. 25th. Old Dominion Abbatoir plant. Loss $30,000.

**Marbleton, Que.** Oct. 28th. Marbleton House, owned by L. B. Hill.

**Montreal, Que.** Oct. 30th. Home at 13 Anderson street.

Oct. 31st. Building at 34, 36, 36a Notre Dame street west. Loss $25,000.

Oct. 27th. Building at the rear of 1774 St. Denis street. Loss $1,000.

Oct. 29th. Home of E. Phillips, 288 Mackay street. Loss $500. Home of Stanislas Malo, Germaine street, Montreal North. Loss $3,000.

**Napanee, Ont.** Oct. 28th. Huycke's Garage, corner of Centre and Bridge streets.

**Newboyne, Ont.** Oct. 31st. Barns and stables of Joseph Preston.

**Norwich, Ont.,** Oct. 29th. Livery stables of Dr. Roy Riddle, V.S. Loss $6,000, partly covered by insurance.

**Ottawa, Ont.** Oct. 30th. Residence of W. J. Lynch, 371 Daly Ave. Loss $3,000, covered by insurance.

**Owen Sound, Ont.** Oct. 27th. Barn belonging to Herman Taschke, near Desboro. Loss $8,000, insurance $3,500.

Oct. 29th. Steadman Printery, 1042 2nd Avenue east.

**Port Dalhousie, Ont.** Oct. 29th. Building owned by P. Shaw.

**Quebec, Que.** Oct. 31st. Sawmill and manufacturing plant of the E. T. Nesbitt Company, 74 Tenth avenue, Limoilou. Loss $100,000.

**Toronto, Ont.**—During the month of October, Toronto's fire loss was $76,406 with 212 alarms.

## ADJUSTMENT BOARD.

Walter P. Thompson, insurance adjuster, who has been in northern Ontario for some weeks as a member of the board of adjusters of the insurance companies, arranging for the settlement of fire losses, returned to Hamilton on October 31. He stated that the bulk of the adjustments have been made, but that two members of the board are still in the north clearing up some of the smaller local claims. The total amount to be paid out by the various companies interested will be known in the course of a week, Mr. Thompson said. It will run into seven figures.

## NATIONAL SURETY COMPANY.

The National Surety Company of New York announced on November 1 the appointment of a Canadian board to supervise its activities north of the frontier. The personnel of the board is as follows:—

General Sir Arthur W. Currie, Hon. Raoul Dandurand, Sir Mortimer B. Davis, Dr. W. L. McDougald, John W. Ross, Hon. Lorne C. Webster, Hon. J. M. Wilson, Clarence F. Smith, director, Montreal City & District Savings Bank and Home Bank, is managing director of the Board.

## CASUALTY CLAIMS ASSOCIATION

The Casualty Claims Association, a new Toronto organization, held its first meeting on October 11, under the chairmanship of W. H. Rooke, of the London Guarantee and Accident Insurance Co. In outlining the objects of the association Mr. Rooke explained that for some time the claims men of the Toronto companies had felt that if they could meet together for the discussion of problems and difficulties which they individually met with in their work the result would be most helpful to them all and would improve the service rendered by the claims departments to the companies and their clients. This was the main idea, mutual assistance by discussion of problems. A secondary aim was the social side, the meeting together of all the fraternity. So far, said Mr. Rooke, the association had appointed but three officers, himself as chairman; R. J. McGowan (Employers) as vice-chairman, and N. W. Helwig (Norwich Union) as secretary-treasurer. He asked for nominations for an executive committee of three. The meeting appointed Messrs. Cox of the Imperial, McLean of the Hartford, and Freeborn of the Canadian Surety, to form the executive committee.

N. P. F. Death, an automotive expert, read a paper on the common causes of self-ignition fires in automobiles.

# Further Decline In Prices

## Index Number For September Is Two Points Lower Than Previous Month—Both Decreases and Increases Fairly Well Proportioned—Price of Coal Declines.

During the month of September there was a further decrease in the index number of commodities, as compiled by the Department of Labor, the index number standing at 220.5, as compared with 222.8 during the previous month, and 232.7 during September last year.

Both decreases and increases during the month were fairly well proportioned, there being six increases and the remainder showing decreases. The largest increase occurred in dairy products, which are up by 15 points to 198.0. The other increases were miscellaneous groceries; textiles; metals and implements; house furnishings; and miscellaneous. The increases in the majority of the items were only small, but are considerably lower than last year.

With coal once more coming into Canada the price of this commodity has declined, being down by sixteen points from the previous month. The other large decrease was that of grains and fodders, which are lower by eight points. The other decreases in the various commodities are only for minor amounts.

Details of the September statement with comparisons are given herewith.

| | | Index Numbers | | | | |

### NEARLY COMPLETED

The new factory of the Dominion Combing Mills, Limited, situated at Trenton, Ont., is just about completed. All that remains to be done is the roof and part of the third storey. The company will have approximately 100,000 square feet of space. Machinery is now on its way from England, and it is the intention of the contractors to have everything ready so that the machinery can be installed immediately upon its arrival. The company will employ about 100 persons.

## STEEL INDUSTRY SHOWS IMPROVEMENT

### Grand Trunk Places Order for 25-000 Tons of Rails—Other Orders on Hand

An order for twenty-five thousand tons of 100-pound steel rails for delivery next spring has been placed by the Grand Trunk Railway, it was announced at British Empire Steel headquarters on October 13. The order insures an uninterrupted winter's work for the 3,000 men employed at the Sydney steel plant, because other orders in hand will keep the mills going until Christmas, and the spring delivery feature will enable the company to wait until the first of the year before rolling steel for the Grand Trunk.

#### Equipment Orders

In an interview on October 16, W. W. Butler, president of the Canadian Car and Foundry Co., stated that probably one of the first matters to receive the attention of Sir Henry Thornton, the new head of the Canadian National Railways, would be the matter of equipment.

Mr. Butler pointed out that it was now about four months since a decided impetus in business was felt by the manufacturers of equipment in the United States, and added that it usually took just about such a period of time for a reflection to be felt in Canada. But in the case of the National Railways there was another reason and perhaps more important reason for a delay in re-equipping, namely the change in the board of directors. Mr. Butler also mentioned that in addition to the National lines he believed the C.P.R. to be in need of a considerable amount of equipment, and believed that orders from that source are to be expected.

Recent inquiry by the Grand Trunk for prices on approximately 7,000 cars is considered significant, and Mr. Butler anticipated that in the course of the next two or three months equipment companies in this country will have received orders from the Canadian roads of no inconsiderable size.

The Canadian Car Company is at present engaged on repair work for the Grand Trunk on 1,500 cars, with more in anticipation from that source shortly. In the matter of business from the United States, Mr. Butler was rather pessimistic, stating that new building was naturally prohibited by the tariff, and that even in the matter of repair work the constant changing of tariff regulations at Washington would likely make such work impossible.

There does loom up for the company, however, prospects for export business, that is to various parts of the British Empire. The last export order that the company received was that from the Soviet Government last year, an order which amounted to about two million dollars.

#### Unfilled Orders

At the annual meeting of the National Steel Corporation on October 16 it was stated that the company has uncompleted orders amounting to three million dollars on their books.

Although no definite information has been received to date, it is rumoured that the Canadian Bridge Co., of Walkerville, will receive large orders for structural steel for the mammonth new Ford Motor Co. building at Ford City. It is estimated that the order will total between $500,000 and $1,000,000.

The output of British Empire Steel Corporation wire mill at Sydney, N.S., will be doubled by the installation of $50,000 worth of new equipment.

# New Incorporations

Authorized capital of $27,581,900 is represented by companies whose incorporations were reported to The Monetary Times during the week ended October 28, compared with $15,342,900 the previous week. A comparative summary by provinces is as follows:—

| | Wk. ended Oct. 21. | Wk. ended Oct. 28. |
|---|---|---|
| Dom. .. | $4,490,000 | $14,915,500 |
| Alb. .. | 385,000 | ........ |
| B. C. .. | 750,000 | 1,295,000 |
| Man. .. | 270,000 | 570,000 |
| N. B. .. | 347,000 | ........ |
| Ont. ... | 8,544,900 | 9,852,400 |
| P. E. I... | ........ | 45,000 |
| Que. .. | 447,000 | 904,000 |
| Sask. .. | 109,000 | ........ |
| Tot. . | $15,342,900 | $27,581,900 |

The following is a list of companies recently incorporated under Dominion charter with head office, authorized capital and the name of one of the directors:—Maxwell Cummings, Ltd. (John A. Engel) Montreal, $50,000; Williamson Fur Co. Ltd. (Walter A. Merrill) Montreal, $100,000; Marentette & Feys, Ltd. (Chas. P. McTague) Windsor, $50,000; Superior Ladies Hats Manufacturing Co. Ltd. (Jos. Cohen) Montreal, $25,000; National Economy, Ltd. (Auguste Mathieu) Montreal, $500,000; Bernard, Hamel, Ltd. (Ulric Bernard) Montreal, $40,000; Film and Slide Co. of Canada, Ltd. (Geoffrey S. O'Brien) Toronto, $10,000; Shawinigan Foundries, Ltd. (Lawrence Macfarlane, Montreal, $40,000; McNiven Bros. Co. Ltd. (Thos. Gibson) Toronto, $50,000; John Hyde Audit Corp. Ltd. (Waldo W. Skinner) Montreal, $50,000; St. Hyacinthe Distillery Co. Ltd. (Hon. Wm. J. Shaughnessy) Montreal, $3,000,000; Canadian Industrial Alcohol Co. Ltd. (Arthur R. Holden) Montreal, $10,000,000; English & Scotch Woollen Co. Ltd. (Walter Panneton) Montreal, $1,000,000; Canada Colonization Assoc. Ltd. (Sir John Willison) Winnipeg, $500.

### Provincial Charters

McMaster) Montreal, $45,000; Shoe Deliveries, Ltd. (Allan H. Simpson) Montreal, $20,000.

## MINING PROPERTY FOR SALE

The Bluenose Gold Mining Co. of New Glasgow, N.S., will receive tenders up to noon, November 2. 1922 for the purchase of the property, buildings and plant of the company, situated at Goldenville, Guysboro County, N.S.

The property offered comprises mining rights in the province of Nova Scotia, including leases on 223 areas in Blocks 3, 4 and 5, Sherbrooke Gold District and situated in the village of Goldenville, N.S. (each area being 150 feet on the length of the lodes by 250 feet depth across the lodes, containing 37,500 square feet each, making a total acreage, including roadways between these areas, blocks, etc., of say two hundred acres). The western block of areas has a combined length of areas of over 4,000 feet on the course of the leads and is situated on the highest ground in the district.

## GOVERNMENT SELLS PULP WOOD CONCESSIONS

On October 17 announcement was made that the Ontario government had sold two pulp wood concessions to provincial bidders.

The successful tenderer for the right to cut pulp-wood on a 160 acre tract in the Township of Gorham, in the Thunder Bay District was John Keivu, a lumberman of Port Arthur. The price paid was $3.05 per cord for spruce pulpwood, and $1.75 per cord for other pulpwood, the price in both cases to include both his bonus and the customary Crown dues.

Important pulpwood concessions in the Temiskaming District are involved in the sale of the timber rights on a tract of land in Shackleton Township comprising some 40½ square miles. The limits have been advertised for sale since the latter part of September, and the successful bidder is the Hawke Lake Lumber Company, of Monteith, Ontario which agrees to pay $1.80 per cord for the spruce pulpwood on the property, 85 cents per cord for other pulpwood, and $3.80 per thousand feet for any spruce and poplar timber which it may cut. The limits are said to be, however, almost entirely a pulpwood proposition.

### LARGER CATCHES LANDED

#### Fishing Industry Shows an Improvement During September

Weather conditions were favorable for fishing on the Atlantic coast during the month of September, and during the first half of the month on the Pacific coast, with the result that larger catches of fish were landed.

The total quantity of sea fish landed at both coasts during the month was 1,317,935 cwts., with a value to the fishermen of $2,906,527, while during September, 1921, there were 1,026,553 cwts. landed, valued at $2,520,047.

The catch of cod, haddock, hake and pollock during the month was 778,379 cwts., compared with 653,889 cwts. in the same period last year. The Lunenburg banking fleet arrived during the month from the Grand Banks with a good catch. There were 57,789 cwts. of hake taken, compared with 19,998 cwts. in September, 1921.

There were 17,129 cwts. of mackerel taken compared with 9,742 cwts. This brings the total catch for the season up to 220,280 cwts., compared with 126,426 cwts. last season.

### JENKINS AND HARDY

On account of the death of the late James Hardy it has become necessary to rearrange the personnel of the firm of Jenkins and Hardy, chartered accountants, of Toronto, which has been in existence since 1857, as also the allied firm of James Hardy and Son, financial agents. Thomas Jenkins continues to be the senior member of the first mentioned firm, and with him will be associated Arthur J. Hardy, who was connected with his father's business for 22 years. A. J. Hardy will continue the business formerly conducted by James Hardy & Son, having taken Harold J. Badden into partnership with this object in view. The title of the firm will be changed to Hardy and Badden. Mr. Badden was associated with the old firm for a period of seventeen years.

### TIME LOSS BY STRIKES

The time loss due to industrial disputes was less during September than during the previous month but greater than during September, 1921, according to information which has been collected by the Department of Labor. There were in existence, at some time or other, during September, 1922, 18 strikes involving about 15,275 work people with an estimated time loss of 91,000 working days, as compared with 24 strikes involving 24,006 work people and 437,017 working days in the previous month of August. In September, 1921, there were 26 strikes involving 3,948 work people with an estimated loss of 59,849 working days.

### LOGGING OPERATIONS

The Bucklin Lumber Co. of New Westminster, B.C. is entering on a logging operation, tapping a stand of 800,000,000 feet in the upper Pitt River Valley. The company expects to have an output of 75,000 feet per day.

### WORKING FULL TIME

For the first time in two years the car department at the Ogden C.P.R. shops at Calgary are working full time. At Edmonton the Canadian National Railways are spending a quarter of a million in building the first unit of the Western car shops.

### NEW T. OF B. OFFICERS

Eighty-two ocean and coasting steamers were berthed in Montreal harbor on October 10, and the port accordingly establishes a new record for the largest number of ships in harbor at one time, exceeding by four the total of 87 ships in port on September 7, 1921. The above figures do not include a considerable number of vessels here from the Great Lakes.

All indications point to this record being broken again in the next few days, as many ships are now in the gulf and river bound for Montreal and others are on the way from transatlantic ports. The great majority are coming for grain.

Accoding to present showing the harbor's shipment of grain in 1922 will considerably exceed the record total of last year, which was 138,453,980 bushels.

### NEW HARBOR RECORD

Following his transfer to Toronto as assistant general manager of the Bank of Toronto there, H. B. Henwood was succeeded in his former position as second vice-president of the Montreal Board of Trade by H. B. Mackenzie, treasurer, while Arthur Vaillancourt from the Council will fill the position of treasurer. A D. Anderson was then named a member of the Council in Mr. Vaillancourt's place.

This was decided upon at the regular meeting of the Council on Oct. 18. The appointments will continue until the end of January.

### OPERATIONS COMMENCED

The American Optical Company at Belleville, Ontario, has commenced operations recently, and has shipped its first carload of "Made-inCanada" products.

### MILL ENLARGED

In order to increase the capacity of its St. John, N. B., mill from 60 to 80 tons of sulphite pulp a day, the Nashwaak Pulp and Paper Co. Ltd., is reconstructing practically every department. New improvements include a boiler system, Jensen acid system, new screens and modern improvements to their drying system.

### CONGESTION OF COAL AT MONTREAL

Quite an unusual situation has arisen in Montreal port and that is with respect to coal which is pouring into the harbor on every alternate grain tramp which would otherwise have come over in ballast. It is now admitted in shipping circles that there is a coal congestion as well as a threatened congestion in grain. Several boats with coal cargoes have been tied up near Longue Pointe for days at a time because all the other coal wharves in the port were occupied. Over one hundred thousand tons of Welsh hard coal has been brought here recently in ocean bottoms and during the past week the receipts from the sea totalled over 20,000 tons.

### MILL REQPENED

The Sissiboo Pulp and Power Company's plant at Weymouth, N.S., which has been closed down for the past two weeks, undergoing repairs, resumed operations recently.

The Strength of Water Power Securities
Strikes, deflations, inventories to mark down, and all other afflictions of the average industrial security have had but little effect upon strategically located Water Power Companies.
The services of Power Companies have been but little affected by changing business conditions. On the contrary, most of them are showing steadily increased earnings, both gross and net.
Our experience which extends over many years, convinces us that they are the most desirable securities, combining safety with a generous interest return.

# *Municipal Finance*

**North York Township, Ont.**—On October 16 the township struck their assessment rates for 1922, the figures set having application from Aug. 11, the date upon which the new municipality received its status. The general school rate of 3.4 mills for last year was lowered to 1.8 mills. During the early part of the year there had been a general expenditure of $75,000 in the north by York Township, and it was decided that the rate could not be less than 14 mills for the remainder of the year, with only $30,000 or less to work upon. The general school rate of York Township, from which the new municipality seceded, is 4.3 mills, and the general expenditure 15.2.

**Vancouver, B.C.**—A direct saving to the city of $50,000 will be effected on January 1 next, when the city on that day retires $1,321,000 worth of short-term treasury notes. Of that amount only $300,000 worth is due on the first of the year, but with the improvement in the financial situation, more especially as far as the city is concerned, it has been decided to pay off the remaining $1,021,000 and thus save a year's interest, in addition to lightening the city's financial burden to that extent.

**Galt, Ont.**—The assessment returns for 1922 show that the total assessment is now $13,974,490, an increase of $1,162,075 over last year. The total taxable assessment is also up from last year, standing at $11,763,565, or an increase of $1,003,490.

The population of the city has decreased from 13,332 to 13,222.

**Edmonton, Alta.**—For the eight months' period ending August 31 the controllable expenditures amounted to $842,234, while the actual estimate was $842,230.

Revenue derived from departmental fees and licenses amounted to $142,072, or somewhat less than what had been estimated. While the license department had exceeded the quota, there was less of a yield from the police and engineer's departments than what had been estimated. The miscellaneous revenue, including surplus profits on utilities, amounted to $277,961. The total tax collections for the period amounted to $2,783,363, made up of $2,263,000 for current payments and $520,362 for arrears.

Non-controllable expenditures, such as advances to the public and separate school boards and library board, amounted to $12,074 while there was $153,295 for bank interest, exchange and discount. The proportion of general debenture interest and redemption charges for the period was $477,822. The report shows that the grand total of current expenditures was $2,285,427 against total appropriations for the year of $3,425,934.

Salaries and wages on current account amounted to $532,183 while those in connection with the utility departments amounted to $562,328, or a total of $1,094,511. For the month of August alone, salaries and wages on general account were $62,641 with $65,019 for utilities.

**Preston, Ont.**—The total assessment of the town is now $3,307,361, an increase of $38,031 over the previous assessment. The population now stands at 5,576, an increase of 29 over the previous year.

**Victoria, B.C.**—In preparation for the complete overhaul of the city's civic financial machinery, J. McL. Muirhead, assistant city comptroller, and F. W. Ismay, city auditor, are in Edmonton investigating the Edmonton city treasury and accountancy methods which are said to be the most efficient in western Canada.

Announcement that the city planned to install the Edmonton system was made at the city hall after the civic finance committee had become convinced that this move would be the cheapest and best way of commencing the work of remodelling the city's financial methods. The Edmonton system, it was explained by city council members, was installed by A. N. Mouat, now British Columbia comptroller-general.

**North Bay, Ont.**—An increase in both population and assessment is shown in the revised figures presented to the council on October 16. The total assessment of the town now stands at $6,736,596, an increase of $331,465 over 1921. The population is now 11,768, or an increase of 366 over the previous year.

**Beauport, Que.**—Application will be made shortly by the village to be incorporated into a town.

**Regina, Sask.**—Speaking before the Kiwanis Club on October 17 Commissioner L. A. Thornton stated that with a gross debt of $12,000,000 the city still has a margin of borrowing power amounting to approximately $3,000,000.

Outlining the city's system of financing, the Commissioner stated the net per capita debt in the city was $250, or, with the debt incurred by investments in utilities deducted, $150. Of the funds raised by taxes, 19 per cent. is placed against capital debt, 51 per cent. is spent by boards outside the control of the council, leaving only 30 per cent. to be expended by the council for general municipal purposes.

**Montreal, Que.**—By a majority of 23 to 8 the city council resolved to insert in the Montreal bill for the forthcoming session of the Legislature a clause to repeal the bachelor tax. This levy brought in $100,000 in revenue at a time when the money was greatly needed, but it had been attacked in the courts as being discriminatory and vexatious. The tax had, however, always been upheld in court.

**Vancouver, B.C.**—A bylaw authorizing the city to borrow the sum of $700,000 from the bank, in anticipation of this year's civic revenue, was given its necessary reading by the council on October 9. The bylaw mentions that of the $5,861,158 estimated due the city in taxes this year, the sum of $1,100,000 remains unpaid. The $700,000 is necessary to meet current expenditures.

**Lachine, Que.**—Permanent civic employees of the city have been notified that their engagements expire November 30 next, and that some of them will be re-engaged in accordance with the city's 1923 budget.

The notice is the result of the council's decision to practice strict economy in the future. Some of the offices now held under the civic administration will be abolished, it is said.

**Edmonton, Alta.**—At a meeting of the council on October 12 they approved the reductions in electric light, water and street railway rates for children. The revised rates will go into effect on November 1, and will result in a reduction of approximately $30,000 in utility revenue for the remainder of the year.

---

## BOND DEALERS' NEW BRANCH

Browning, Harris, Northey & Co., brokers, of Hamilton, with branches at St. Thomas and Belleville, have opened a new branch at London, Ont., in the Royal Bank building. G. M. Harris, formerly inspector of postal services for London division, is manager of the local branch. Municipal, provincial and corporation bonds and debentures are handled.

---

## OSHAWA'S FINANCES CRITICIZED

### Auditors Find Gross Carelessness in Keeping Records—Drastic Recommendations Made

Chaotic conditions, which have apparently been existing for years, in Oshawa's affairs are being terminated by a report of the auditors appointed by the provincial government at the request of the town council. The report was partially read at a meeting of the council on October 27.

Drastic recommendations to correct alleged evils are made by the auditors, Oscar Hudson & Co., of Toronto, the most outstanding of which is that the offices of town treasurer and town clerk be separated, each official being directly responsible to the council. It was recognized in the report that the present staff is not large enough to do the work, and it is noteworthy that there is no suggestion of mis-appropriation of funds. The criticism made is that lack of proper records, absence of records, and incorrect records were the rule rather than the exception. The officials were not at all seized with the responsibility of their positions and gross carelessness abounded.

### The Report

The report says in part: "Owing to the lack of proper and well-kept records and of definite, precise information, the preparation of correct statements was very difficult, and the audit unduly lengthened. I regret to say that no part of the accounting work can be said to have been efficient. Not only were the books in a very unsatisfactory condition but the provisions of the municipal and other acts were not carried out in many cases, causing great loss of town revenue."

Among the outstanding delinquencies revealed were: Failure to collect taxes and penalties involving losses amounting to several thousands annually; unequal division of taxes, prejudicially affecting the general body of ratepayers; misapplication of funds raised for specific purposes; "consistent contravention" of many of the provisions of the statutes. It was pointed out in the report that there had been no tax sales since 1914, and that there was not a list of tax arrears from 1917 to 1921. The annual penalty of 10 per cent on tax arrears could not be added because of the condition of the collector's rolls, and, as a result with compounding the interest the loss to the town would be about $10,500 in the four years.

### Recommendations

The auditor's recommendations are summarized as follows:

1. Statements to be immediately sent by town clerk to all taxpayers in arrear 31 December, 1921.
2. Vigorous action to be taken to collect taxes in arrear.
3. Offices of town treasurer and town clerk to be separated. Town treasurer to be responsible direct to council for all accounting work and the finances of the municipality.
4. Complete plan of town to be prepared for use of assessor.
5. General revision of assessments necessary.
6. Assessment roll to be prepared in accordance with recognized principles; all columns added and clerical work thereon completed in an efficient manner.
7. Collector's roll to be prepared from assessment roll, amount of taxes recorded under proper headings, the order of assessment roll to be closely followed. All columns to be added in ink and balanced across; proper summary to be made, officially entered on rolls signed by clerk. No erasures to be permitted.
8. Collector's roll to be returned at the date fixed by the council and statements rendered to defaulting taxpayers as shown on collector's arrears lists.
9. Percentages to be added annually to taxes in arrears as authorized by statute.
10. Estimates to be carefully prepared to enable council to make proper appropriations for expenditures.
11. Capital receipts and disbursements (i.e., proceeds for debentures and payments for construction work) to be kept in separate bank account and not mixed up with current receipts and disbursements.
12. Taxes assembled in block to be regularly transferred to new owners in the manner provided by statute.
13. Under no circumstance may monies raised for one purpose be used for another. The law provides proper means of raising money for all legitimate purposes and these must be adhered to.
14. Debenture and coupon account at bank to be utilized exclusively for payment of debentures and interest as they fall due.
15. Tax arrears to be brought forward into a new collector's roll at time of preparation of same.
16. Receipts of tax monies and other cash to be handled as recommended under tax collections and cash.
17. Passing of accounts and recording of amounts to be treated as indicated under minutes and bylaws.
18. General ledger to be used as per verbal directions and illustrations given to Mr. Hare and Mr. Miller.
19. Court of revision decisions and assessments to be recorded as required by law and alterations on roll to be made in red ink.
20. Fidelity bonds to be obtained for all officials and juniors handling the town's cash.
21. Deposits for sewer connections and plumber's fees to be paid into bank. The account to be in the town's name.
22. Payrolls to bear the certificate of town engineer and foreman's time books to be regularly initialled. Time books to be held for audit.
23. Poll tax receipt to be carbon-duplicate as all other town's receipts.
24. Collector's cash book to be added and balanced page by page and kept up to date.
25. All cash collections to be deposited in bank daily intact. A sufficient sum to be provided for the departments as change.
26. Co-operation with bankers is essential in town's interests. All probable financial requirements should be carefully thought out in order to give the bankers adequate notice of the financial requirements from time to time.

## MILLERS SHOULD EXPORT MORE

### Hon. Thos. Low Contends Flour Trade Can Be Greatly Enlarged.

Speaking at the annual banquet of the Dominion Millers' Association, held in Toronto on October 18. Hon. Thomas A. Low defended the endorsation of the farmers' request for the wheat board, which was opposed by the millers.

The Minister contended the Government would not be justified in obtaining the complete satisfaction of one group at the price of causing unrest and discontent in the Western Provinces. The action of the Government, he claimed, was really beneficial to the millers, for it was decidedly of advantage to them that the producers of the raw material of their great industry should be contented and confident.

The good faith of the Government to guarantee protection to the millers was evidenced by the fact that the Minister of Trade and Commerce who was a miller was entrusted with the legislation, and by the further fact that the flour and milling interests were exempted from certain clauses that might have been prejudicial.

The Minister thought that despite the fact that milling was one of the largest and important industries in the Dominion that a much larger proportion than 70,000,000 bushels out of the 300,000,000 bushels of wheat grown in Canada should be manufactured into flour by the millers.

He urged his hearers to develop their industry and to build up the export trade, which they could do with advantage to themselves and to the well-being of the community generally. The opportunity was theirs, as with improved transportation facilities and the ever-growing demand for Canadian products in the foreign markets the volume of exports could be doubled in the next decade.

## FORD PRICES REDUCED

### Canadian Car Prices Cut from $50 to $85

Price reductions on Ford automobiles ranging from $50 to $85 were made on October 17. The cut is to take effect immediately. Wallace R. Campbell, president Ford Motor Company of Canada, announced that the announcement came shortly after a report to the same effect was made in Detroit. The reduction there, however, is only $50, and applies to every model.

These are the lowest prices at which Fords have been sold in the history of the company, it was said. The reduction in Canada came unexpectedly, there being a reduction ranging from $30 to $60 less than a month ago.

## NEW ASBESTOS MILL

The Asbestos Corporation of Canada will shortly erect an additional mill at a cost of approximately $500,000. The mill will be one of the most modern and up-to-date plants and it is expected will materially reduce cost of production. It is expected that the contract for construction will be made as soon as satisfactory agreement has been arrived at with the Quebec Government for elimination of royalty tax on the export of asbestos. According to officials, no new financing will be necessary for erection of new plant, cash resources now being over $2,500,000.

# *Government and Municipal Bonds*

An unnatural quietness seems to have settled over the market during the past week, and although the demand for bonds has been fair, there has not been the usual activity which characterizes this period of the year when there is an abundance of surplus money. The cause for this unsettlement is in doubt, but part of it may be traced to the New York bond market, where conditions are inclined to be soft. Recent advices from New York indicate that the market has overcome the disturbing influences and is preparing for an aggressive session. Such conditions as these should materially help in restoring activity in the Canadian bond market.

After making a survey of conditions in Canada it will be seen that the present time is ripe for an active bond market. During the past few months, practically all the large issues have been sold across the border, thus leaving the Canadian market in a condition to absorb all the forthcoming issues. Another important item bearing on the situation is the large amount of money which will be circulated shortly. Victory bond interest payable on November 1 and December 1 will yield about fifty milion, and also the recent conversion of Victory Bonds, which will be payable about the first of December, and which is estimated at approximately $100,000,000. There is also the money from the crops to take into consideration, and with all this surplus money available there is no reason why the bond market should not show a decided active session.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Tenders Close |
|---|---|---|
| Montreal, Que. (R.C. Schools) .......... | $2,000,000 | Nov. 9 |
| Sandwich, Ont. ...... | 397,000 | Nov. 6 |
| Sydney, N.S. .......... | 142,000 | Nov. 18 |
| St. Bernardin-de-Montreal, Que. ......... | 100,000 | Nov. 6 |
| Pembroke, Ont. (R.C. Schools) .......... | 60,000 | Nov. 15 |
| Halton County, Ont. .. | 46,000 | Nov. 3 |
| Kenora, Ont. ........ | 41,217 | Nov. 13 |
| Prescott, Ont. ....... | 30,000 | Nov. 20 |
| St. James, Man. ...... | 25,000 | Nov. 10 |
| Westbury, Que. ...... | 18,500 | Nov. 6 |
| Hampstead, Que. .... | 185,000 | Nov. 14 |
| Bagotville, Que. ...... | 75,000 | Nov. 14 |
| Oakville, Ont. ....... | 58,400 | Nov. 10 |
| Chateauguay, Que. .... | 20,000 | Nov. 14 |
| Niagara Falls, Ont. .... | 100,000 | Nov. 7 |

**Hampstead, Que.**—Tenders will be received up to 4 p.m. November 14, 1922, for the purchase of $185,000, 6 per cent., 40-year debentures, dated November 1, 1922 and payable at the head office of the Royal Bank of Canada. Lewis Brimacombe, secretary-treasurer.

**Sydney, N.S.**—Tenders will be received up to November 18, 1922, for the purchase of the following debentures: $40,000, nurses' home; $30,000, sidewalks; $25,000, sewers; $25,000, water; $15,000, detention home; and $7,000, parks. The entire issue bears interest at the rate of 5½ per cent., and is payable in 20-years. Bonds are in denominations of $1,000 each, with interest payable semi-annually. James J. Curry, city clerk.

**Bagotville, Que.**—Tenders will be received up to 10 a.m. November 14, 1922, for the purchase of $75,000, 6 per cent., 20-annual instalment debentures. Bonds are dated November 1, 1922, and are payable at Bagotville, Quebec and Montreal. Adjutor Potvin, secretary-treasurer.

**Oakville, Ont.**—Tenders will be received up to 5 p.m. November 10, 1922, for the purchase of the following debentures: $31,200, 5½ per cent., 20-annual instalments; $24,400, 5½ per cent., 10-annual instalments, and $2,800, 5½ per cent., 30-annual instalments. Percy A. Bath, town clerk.

**Chateauguay, Que.**—Tenders will be recieved up to 7.30 p.m. November 14, 1922, for the purchase of $20,000, 6 per cent., 20-year debentures. The bonds are dated November 1, 1922, and are payable at any branch of the Bank of Hochelaga in the Province of Quebec. Hector Villard, secretary-treasurer.

**Prescott, Ont.**—Tenders will be received up to November 20, 1922 for the purchase of $30,000, 5½ per cent., 20-year school debentures. F. Rowe, town treasurer.

**St. James S.D. No. 7, Man.**—Tenders will be recveived up to November 10, 1922, for the purchase of $25,000, 6 per cent., 20-annual instalment debentures. W. R. James, secretary-treasurer, 374 Madison street, St. James, Man.

**Pembroke, Ont.**—The Roman Catholic Separate School will recieve tenders up to 6 o'clock November 15, 1922, for the purchase of $60,000, 6 per cent., 20-annual instalment debentures. A. J. Fortier, secretary-treasurer. See official advertisement in this issue.

**Niagara Falls, Ont.**—Tenders will be received up to 4 p.m. on November 7 for $100,000, 6 per cent., 20-year electric light debentures. W. J. McMurray, city treasurer.

### Coming Issues

**Saskatchewan**—The following is a list of authorizations granted by the Local Government Board from September 23 to October 14:

School Districts: not exceeding 8 per cent., Fishponds, $6,000, 15-years annuity; Stephan, $2,300, 15-years; Bresylor, $800, 10-years; Lewvan, $4,000, 10-years.

Rural Telephones: not exceeding 8 per cent., 15-years annuity: Quill Plains, $3,455; Coventry, $3,150; St. Victor, $3,300; Flaxcombe North, $575; Kerrobert Southern, $375; Fern Glen, $475; Scotsguard Pioneer, $2,500; Camberley, $1,200.

Villages: Dubic, $1,000, 8 per cent., 7-instalments; Lloydminster, $1,000, 6½ per cent., 7-years; and $1,000, 6½ per cent., 10-years.

**Sandwich, Ont.**—On October 16 the council passed a by-law authorizing the expenditure of $266,000 for school purposes.

**Montreal, Que.**—On October 17 the council passed a by-law authorizing the issuing of $4,000,000 debentures for local improvements. The bonds will be issued for a period not exceeding 40 years, with interest not exceeding 6 per cent., payable half-yearly.

**Burlington, Ont.**—At a meeting of the high school board on October 17 it was decided to ask the council for $22,000.

**Stratford, Ont.**—At the municipal elections in January the ratepayers will be asked to vote on a by-law authorizing the expenditure of $10,000 for the erection of a comfort station.

**Rockwood Mun., Man.**—V. W. McFarlane, secretary-treasurer informs "The Monetary Times" that the municipality will not be offering any debentures for sale this year.

**Grantham Township, Ont.**—The township has been granted authority by the Ontario Railway Board to issue $35,000, 20-year school debentures.

**Montreal, Que.**—The city has two war loans falling due shortly amounting in all to $13,000,000. The first loan for $6,900,000 is due December 1, 1922 and the second loan of $6,100,000 becomes due May 1, 1923. The loans are payable in New York.

**Bolton, Ont.**—On October 17 the ratepayers passed a by-law authorizing the expenditure of $5,000 for the erection of a new town hall. Fifteen year debentures will be issued, bearing interest at the rate of 5½ per cent.

**Sandwich, Ont.**—Town Council passed twenty-one debenture by-laws to raise money, amounting to $50,000, for local improvements. Twelve more by-laws are yet to be acted upon amounting to $60,000, making a total of $110,000.

**Owen Sound, Ont.**—The ratepayers will be asked on January 1 to vote on a by-law authorizing the issuing of $16,000 debentures for the purchase of new fire equipment.

**Galt, Ont.**—At a meeting of the public utilities commission on October 23, it was stated that by-laws had been passed for three issues of waterworks debentures, totalling $41,650, which are now ready for sale. The city clerk has been requested to sell these bonds and also to get other issues passed for immediate sale.

**Vancouver, B.C.**—Indications are that the taxpayers will be asked at the December election to pass upon proposals for $643,000 expenditures. These are summarized under six by-laws: $100,000 for general waterworks distribution, $100,000 for sewers, $100,000 for roads improvements, $68,000 for fire protection in Stanley Park, $25,000 for purchase of a Grandview school site, and $25,000 for municipal hall construction purposes, $154,000 previously voted to the parks board for general development of parks purposes.

**Prescott, Ont.**—All tenders which were called for up to October 30 for the $30,000, 5½ per cent., 20-year school debentures have been rejected, and new tenders are being asked for.

**Montreal East, Que.**—All tenders for the $250,000, 6 per cent., 10-year debentures have been rejected.

**Hamilton, Ont.**—The city has $109,000 debentures on hand for wire purposes, and these will be issued when the work is carried out.

**St. Lambert, Que.**—The Minister of Municipal Affairs has approved the issuing of $975,000 debentures to be made by the town.

### Bond Sales

**Ontario,**—Housser, Wood & Co., were the successful bidders for the $375,000, 6 per cent., 40-year Hydro-Electric Power Commission of Ontario debentures, paying a price of 109.03, which means that the cost to the province will be approximately 5.44 per cent. The bonds are guaranteed by the province, and the proceeds will be used in connection with the Essex County Railway. Tenders were as follows:

Houser, Wood & Co., 109.03; G. A. Stimson & Co., 108.351; Dominion Securities Corp., 108.29; R. A. Daly & Co., 107.39; C. H. Burgess & Co., Canada Bond Corp., and MacNeill, Graham & Co., 107.27; A. E. Ames & Co., and Wood, Gundy & Co., 107.21; Gairdner, Clarke & Co. 107.15; Dyment, Anderson & Co., 107.11.

**Brantford, Ont.**—An issue of $145,000, 5½ per cent., 20-instalment debentures has been purchased by Dominion Securities Corporation.

**Dover Township, Ont.**—Gairdner, Clarke & Co., have purchased $25,050, 6 per cent., 10-annual instalment debentures at a price of 100.25, the money costing the township approximately 5.95 per cent. Tenders were as follows

| | |
|---|---|
| Gairdner, Clarke & Co. ............... | 100.25 |
| Dyment, Anderson & Co. ............ | 100.21 |
| Harris, Forbes & Co. ................ | 99.77 |
| Canada Bond Corp. ................ | 99.50 |
| A. E. Ames & Co. .................... | 99.36 |
| R. A. Daly & Co. ...................... | 99.10 |
| Mackay-Mackay ........................ | 99.00 |
| Wood, Gundy & Co. .................. | 98.50 |

**Coaticook, Que.**—W. L. McKinnon & Co., have purchased $40,000, 6 per cent., 15 and 20-instalment debentures at a price of 102.93. The following is a list of tenders: W. L. McKinnon & Co., 102.93; McLeod, Young, Weir & Co., 99.82; Dominion Securities Corp., 99.30875; and Hanson Bros., 98.877.

**Saskatchewan**—The following is a list of debentures reported sold by the Local Government Board from September 23 to October 14:

School Districts: Clydesdale, $2,000, 7½ per cent., 15-years, to J. F. Mitchell, Hart; Stelcam, $1,300, 7¾ per cent., 10-years, to C. C. Cross & Co.; Kempville, $6,000, 8 per cent., 6-years, to Regina Brokerage & Investment Co.; Otthon. $11,000, 7¼ per cent., 20-years, to C. C. Cross & Co.; Lintlaw Village, $6,000, 7¼ per cent., 15-years, to Waterman-Waterbury Co.; Witchekan Lake, $3,500, 8 per cent., 15-years, to Waterman-Waterbury Co.; Argonne, $1,000, 7½ per cent., 10-years, to C. C. Cross & Co.; Farmer, $4,000, 7½ per cent., 15-years, to Waterman-Waterbury Co.; Fort Qu'Appelle, $4,000, 7 per cent., 15-years, to G. Moorhouse & Co.; Gratton R. C., $12,000, 7 per cent., 10-years, to Nay & James.

Rural Telephones: 15-years: Connaught, $450, 7¾ per cent., to C. C. Cross & Co.; Nipawin, $5,700, 7¾ per cent., to W. D. Craig, Regina; Pibroch, $7,000, 8 per cent., to Regina Brokerage & Investment Co.; Alford, $450, 8 per cent., to W. D. Craig, Regina; Coventry, $3,150, 7½ per cent., to C. C. Cross & Co.; Scotsguard Pioneer, $2,500, 8 per cent., to T. Taylor, Regina.

Moose Jaw, $30,000, 6 per cent., 30-years to Wood, Gundy & Co.

---

### BANK OF COMMERCE DIVIDEND

The board of directors of The Canadian Bank of Commerce at a meeting held 20th October declared a dividend of 3 per cent. for the quarter ending 30th November, together with a bonus of 1 per cent., payable 1st December to shareholders of record of 15th November. The transfer books will be closed from the 16th to 30th November, both days inclusive.

This is the third year that the bonus of 1 per cent .has been paid.

## COAL COSTS HIGH

### Burning of Coal in Big Steel Plants Not Economical

Speaking at a special meeting of the Sault Ste. Marie Board of Trade on October 20 Hon. Harry Mills, Minister of Mines, said, "We must do away entirely with the use of coal in the operation of our industrial plants. We must evolve some means economical, feasible and commercial, whereby substitute for coal may be utilized, and I feel confident that this will be obtained and will revolutionize industries, and so one of the greatest problems which confronts us will be solved," he said. He said the benefits that would be derived from the development of the low grade iron ore fields in Northern Ontario would be of nation-wide importance.

### Best Steel Plant

J. A. McPhail introduced the question of the low-grade iron ore in this district, which was the principal reason for Mr. Mill's visit to the Sault and district.

"We have here the largest and best steel plant in the country," Mr. McPhail said, "but it is like a morgue now, only some parts of it are running. The big cost in connection with the steel plant was the assembling of raw material. For every dollar spent in Canada for wages two dollars are spent for transportation," he said, "and if the iron ore which is right near doors could be utlized by our plants it would mean a great difference to that industry." At the present time he said, coal and iron are shipped from the United States almost entirely.

### Need Ore in Quantities

Mr. McPhail said he had learned that the ideal steel could be manufactured from a 50 per cent. mixture of magnetic and siderite after they had been treated, and both of these ores existed here in good quantity. In a few years, he prophesied, the mining and treating of iron ore would be one of the leading industries.

If the iron ore fields could not be developed without obtaining a bonus, he thought it would show the development could not be done economically, and, as Toronto papers prophesied, developments would be postponed. If ore could be proved up in sufficient quantities, however, to warrant the securing of a large capital to back the move, said Mr. McPhail, the situation would be different.

## ASBESTOS ROYALTY

The announcement has been made that the Quebec Cabinet has reduced the royalty on asbestos from $5 per ton to $2.50, in accordance with a request made by a number of asbestos mine owners and others interested in the industry. The reduction, however, is subjected to certain provisions contained in the Order-in-Council.

MONTREAL

**New Issues Are Scarce!**

Due to the accumulation of harvest funds and the heavy payment of Victory Bond interest, Autumn is normally one of Canada's heaviest investment periods. This year, there will also be available for investment the large sums paid to holders of Victory Bonds which mature on December 1st. This latter money was obtained in the United States last Spring by the Dominion Government, and therefore represents new investment money in Canada.

As new issues of Government and Municipal bonds in Canada up to the end of September amounted to only 37% of last year's new issues, a shortage of high-grade bonds seems inevitable.

We therefore suggest that you invest now and assure yourself of the substantial interest rates now prevailing.

# *Stock Markets*

Irregular trading was the only outstanding feature of the Canadian stock markets during the past week, and, although several issues showed signs of strengthening, and in some instances gained as much as a point or more, this upward tendency soon vanished, and with two or three exceptions, joined the general recession.

The general trend of the market was on the sluggish side, and although the decline was in most cases gradual, and was accompanied by several temporary rallies, the chief idea of the investors was to liquidate their stocks just as soon as possible. Towards the latter part of the week under review there was evidence of some resistance in certain quarters which seems to point to an early termination of the downward trend of the past few weeks.

Interest on the market was of a variety during the week, the public first turning their attention to some other security. Paper issues came in for a fair amount of trading, but on the whole were inclined to be weak. Utilities and textiles featured the trading during the latter part of the week, but these were also thrown over, and the market continued on practically the same trend as during the first part of the week.

### Wm. Davies Co.

Nesbitt, Thomson & Co., Otis & Co., and Kissell, Kinnicut & Co., are offering $2,500,000, 6 per cent., first mortgage 20-year sinking fund gold bonds of the William Davies Co., Inc. The bonds are dated November 1. 1922.

The company, which was established sixty-eight years ago, is the largest packer of hog products in the British Empire, and the fourth largest exporter of hams and bacons in North America.

The assets of the company are four times as great as the bond issues, and the company's earnings over a period of seven and a half years are eight and three-quarter times the bond interest.

Bonds are in denominations of $100, $500 and $1,000 with interest payable in Cleveland, Montreal and Toronto on May 1 and November 1.

The bonds are being offered at a price of 99 and interest, to yield about 6.09 per cent. They are redeemable as a whole, on thirty days' notice at the following prices: at 105 and accrued interest up to November 1, 1932, and at prices decreasing ½ of 1 per cent., for each twelve months thereafter until November 1, 1942, inclusive, and thereafter until maturity at 100.50 and accrued interest.

### Stock Offering

The Bankers Securities Corp., Montreal and Toronto are offering stock of the Holding Consolidated Gold Mines, Ltd., at 50 cents per share. The capital stock of the company is $5,000,000, divided into 5,000,000 shares of stock at par value of $1. The mines are situated next to the Hollinger mines in Ontario, and construction work in this connection is now being pushed forward.

### Holt, Renfrew Bonds

Harris, Forbes & Co., and A. Jarvis & Co., are offering an issue of Holt, Renfrew & Co., Ltd., bonds at a price of 100 and interest to yield 6.50 per cent. The capitalization of the company is $1,000,000 common stock all of which is outstanding; $1,000,000 7 per cent., preferred cumulative stock, all of which is outstanding; and $1,000,000, 6½ per cent., first mortgage sinking fund bonds, of which $600,000, this issue, is outstanding. This offering is part of an issue of which particulars were given in "The Monetary Times of August 18.

### Gold Mining Bonds

Jackson-Laing & Co., of Toronto are offering 200,000 shares of the Lightning River Gold Mines, Ltd., at 50 cents per share. The authorized capital of the company is $3,000,000, all common stock, which is fully paid and non-assessable, with a par value of $1.

The company was incorporated in 1920 for the purpose of taking over the Howey-Cochenour-Willans properties, consisting of 14 claims and since that time the company has increased its holdings to 24 claims, giving a total acreage of 1,150 acres.

### Stock Listed

Additional debentures stock of the Montreal Tramways Co., to the amount of $500,000 has been listed on the Montreal Stock Exchange.

### Carbondale Coal Co.

An issue of 35,000 shares of the Carbondale Coal Co., Calgary, is being offered at $1 per share by Heywood and Co., of Vancouver. The capitalization of the company is $450,000, and the proceeds from this issue will be used for completing developments and increasing the output.

### Stock Offering

The Boundary Oil Co. Ltd., of Edmonton are offering 28,000 shares to the public at $1 per share. The total capitalization of the company is $50,000, with no personal liability.

The company has a lease of 320 acres near the town of Coutss, Atla., and at the present time has complete drilling outfits at the oil wells ready to begin operations.

It is stated that no salaries are being paid to any director or officer of the company, and that no promotion stock has been given to any person or company.

### National Radio Corp.

An offering of 200,000 shares of common stock of the National Radio Corp. Ltd., is being made by the International Securities Corp., of Montreal at $1 per share.

The authorized capital of the company is $500,000, divided into 500,000 shares of common stock of $1 par value, fully paid and non-assessable. The company has no bonds or preferred stock.

### Offering Treasury Stock

The Buckingham Mines, Ltd., has issued a letter to brokers throughout Canada and the United States offering a block or any part thereof of 100,000 shares of treasury stock to the highest bidder. The Trusts and Guarantee Co. are acting as agents for the company and will receive the bids made up till October 30, after which date the allotment will be made.

According to the company's letter no bid under 25c a share will be considered. It is stated that no commissions will be paid or allowances of any kind made to promoters, the full proceeds of the sale of this block of shares is to be handed by the trust company to the treasury of the Buckingham. The money raised in this way is to be used in the development of the Buckingham property.

The Buckingham property is located in West Shining Tree, consisting of approximately 155 acres. Until recently the property has been controlled and operated privately by Columbus, Ohio, coal interests. A short time ago Toronto interests secured control and are planning to thoroughly develop the mine. Active work at the property is to be commenced shortly.

### Mining Stock

An offering of 400,000 shares of common stock of the Porcupine Grande Gold Mines, Ltd., is being made by the Canadian Minerals Finance Corp., of Toronto, at 25 cents per share. The par value of the stock is I, and the authorized capital of the company is 5,000,000. The company owns two claims of 160 acres each and has an operating lease on eight claims comprising 309 acres in the Porcupine gold area.

The proceeds of the sale will be used for the development and equipment of the property.

---

## TYRE INVESTMENT TRUST

The Tyre Investment Trust, Ltd., formed in 1917 to acquire the Dunlop Rubber Co. (Far East), Ltd., and an interest in the Dunlop Tire & Rubber Goods Co., Ltd. (Canada), is making public offering in the London market of an issue of $200,000 7 per cent. first mortgage debenture stock at 97½. From July, 1925, onward, payment will be made to the trustees of the debenture stockholders of an annual sum of £20,500, to be applied to purchasing the debentures in the open market or redeeming the stock by drawings at 102½. The parent company owns $3,150,000 fully paid common stock of the Canadian Company out of a total issue of $4,962,500, and the entire interest of every kind in the Dunlop Rubber Co. (Far East). According to the prospectus the Canadian Company during the year 1920 paid the dividend on its preferred shares to date, but neither this company nor the Far Eastern companies declared a dividend upon their ordinary shares. The Canadian and Far Eastern companies have no future contracts open in raw materials, with which they are well supplied.

# *Unlisted Securities*

In the report issued on the unlisted market of last week, A. J. Pattison Jr. & Co. say that the market was exceedingly dull with but little public interest either way. Prices did not show any inclination to ease, and contrary to what might have been expected, a few specialties were distinctly firm and recorded gains.

The report, for the year ending June 30th, issued by the Cockshutt Plow Company, was, from the point of view of profits, exceedingly disappointing. While from the point of view of assets and liabilities their statement was satisfactory, still even the most optimistic could hardly have looked for the movement upward which occurred, and which carried it to the high point of 50½, where all offerings were readily absorbed. Later on the stock eased to 49 bid, and at this point was in more demand than previous to the issuing of the statement. A somewhat similar condition occurred following the publication of the Famous Players report, though the stock was not as actively traded in. Home Bank was in steady demand at 92 with but little stock offered near this price. Sterling Bank was also in demand, at one time as high as 102½, and this ex-dividend 2%. Canadian Westinghouse recorded a spectacular gain to 120 bid, offered at 126, selling at one time as high as 123½. Western Grocers preferred aws in demand at 59, but no offerings could be obtained in this market. Manufacturers Life was in demand at 44-45, some stock changing hands at these figures. Durant Motors were decidedly weak, selling off from the close of last week of 11-12, to 10-11, with quite large blocks obtainable around the offered figure. Alberta Pacific Grain preferred gained 1½ points to 88 bid, with no stock offered.

---

## PUBLIC SERVICE CORPORATION

At the meeting of the Board of Directors of the Public Service Corporation, a subsidiary of the Shawinigan Power Co., held on October 5, four new directors were elected as follows:—James Wilson, of Montreal, Hon. P. J. Paradis, J. H. Fortier and Eugene Tanguay, of Quebec. The latter, who was manager of the company, was appointed Director. The officers elected were: President, Julian C. Smith; Vice-President, Howard Murray; Treasurer, W. S. Hart; Managing Director and Secretary, Eugene Tanguay. The other directors are: C. H. Branchaud, Milton Hersey, John T. Ross, J. Emile Tanguay, C. E. Taschereau and George Parent, M.P.

The usual quarterly dividend at the rate of 5 per cent. was declared. Receipts were announced by the President as being higher than those of the last quarter, and business most satisfactory.

## TAX REDUCED ON ASBESTOS

### Government Action in Cutting Royalty Will Boost Production

An order in council has been passed providing for a reduction in the royalties collected on raw asbestos in the province of Quebec in accordance with a request made recently by a delegation of representatives of asbestos interests, which waited on the provincial cabinet. The reduction sought was from the present 5 per cent. rates on the gross value of asbestos valued at the shipping point to 2 per cent.

The Government has agreed to cut the present royalty by 50 per cent., making it two and a half per cent. The order-in-council is made effective from the 1st of January last, because no royalties have been collected since that date. The total amount collected in 1921 exceeded $200,000, but officials of the Department of Mines estimate that the reduction in royalty will so add to the production that the revenue derived from this source will be largely increased.

### Beneficial Results

The signing of the order-in-council authorizing the reduction of the royalty rates on raw asbestos from five to two and a half per cent. has been received with considerable satisfaction by the mining companies in the Black Lake and Thetford districts. This is expected to result in a marked improvement in the asbestos industry, and will be of particular benefit to the mines in the Broughton district, where the quality of asbestos is of a somewhat lower grade.

It is interesting to note that while the shipments of asbestos over the Quebec Central Railway in 1920 totalled slightly in excess of 170,000 tons, this was reduced to 75,000 in 1921, while 1922 shipments promise to be better than those of last year.

### Lower Prices

On the 1920 basis the mining companies will be saving $425,000, and this reduction will enable many companies to ship their lower grades as well as by-products. It may also result in slightly lower prices of the better grades. There are still large supplies of asbestos on hand, but the market has been decidedly better of late and better times are looked forward to. Activity in the asbestos regions, producing 80 per cent. of the world's supply, will improve conditions throughout the townships and will unquestionably be reflected in the traffic over the Quebec Central.

## ENLARGING PLANT

The Dominion Iron and Steel Company is commencing a $50,000 addition to the equipment of the wire mill at Sydney, which will double the output capacity for galvanized wire. The new installation is a galvanizing frame which will enable the company to turn out 120 tons of galvanized wire for fencing, per day, in place of the 60 tons possible with the present equipment. Increase of foreign and domestic orders for this type of product have made the addition to the mill equipment advisable.

Most of the structural work in connection with the erection of the new frame will be done at the plant by the company's employees. The addition will be completed about January or February in readiness for next spring's wire business, and the construction during the winter will tend to keep up employment in the wire mill during that normally slack period.

WHEN WINTER COMES
SPRINKLER PROTECTION IS TESTED

Automatic Sprinklers afford the most efficient private fire protection, but, because of the hazards of freezing, defective materials, overheating, careless employees, swinging belts and falling tanks, water damage due to sprinkler leakage frequently occurs.

Freezing is the chief cause of sprinkler leakage losses. The shortage of coal during the coming cold months, and the use of substitutes, will multiply the danger of freezing. Every agent has an obligation to protect his clients from such losses through the medium of Sprinkler Leakage Insurance.

Our organization is prepared to safeguard policy holders by thorough inspection and to give agents complete technical and underwriting service in handling this class of business. Our reputation carries an experience of more than a half century of satisfaction to those we serve.

If you desire our co-operation, write us TO-DAY.

## TRADE ON THE PACIFIC

Canada has a commercial exchange with Asia (including Japan but excluding Russian and Turkish Asia) worth $43,000,000 a year. With Oceania she does business to the extent of $20,000,000 a year, while with Mexico and the countries of South America bordering on the Pacific her trade is valued at $14,000,000 a year. In the aggregate this trade is about evenly divided between imports and exports. With Asia, the two accounts almost balance; Oceania sells us $5,000,000 worth of goods and takes $15,000,000 of our produce, but Mexico and the West Coast of South America send us $11,700,000 worth a year and take only $2,200,000.

The whole subject of trans-Pacific trade will be gone into by the Pan-Pacific Commercial Conference which opened at Honolulu, Hawaii, on October 25th. Mr. F. C. T. O'Hara, deputy minister of Trade and Commerce, will represent Canada.

For the information of the delegates to this gathering, the External Trade Branch of the Dominion Bureau of Statistics has compiled a small pamphlet of trade figures, showing, in summary and in detail, Canada's business in the Pacific and Far Eastern fields. Believing that the figures contained in this publication will be of interest and value to many Canadian business houses, a limited number of extra copies have been printed and are being distributed to subscribers to the regular publications of the Bureau of Statistics.

# *Stock Exchange Record*

## SUMMARY OF SALES

The following is a summary of sales on the Montreal and Toronto exchanges for the weeks ended October 25 and November 1:—

## HOLLINGER MINE

Simons, Agnew & Co., stock brokers, have just issued for free distribution an interesting historical record in book form covering the story of the Hollinger property at Timmins, Ontario, in which a quarter interest was once sold for $55. Mining authorities now place valuation on the company's potential ore reserves at only a little less than a billion dollars.

## DEBENTURES FOR SALE

### $41,217.94
### TOWN OF KENORA, ONTARIO

### Debentures for Sale

Sealed Tenders addressed to the undersigned and marked "Tenders for Debentures" will be received by the Town of Kenora up to 3 p.m. Monday November 13th 1922 for the purchase of the following Debenture Issues.

$30,000.00 6½% 30 year Public School Debentures, dated Aug. 1st, 1922, maturing July 31st, 1952. Interest payable half-yearly on the 31st January and 31st July.

$11,217.94 6½% 31 year "Town of Kenora Act 1913" Consolidated Debt Debentures, dated June 30th, 1922, maturing December 31st, 1953. Interest payable half-yearly on the 30th June and 31st December.

Note:—

Dividends have been paid on the 7% Preferred Stock to December 31, 1920. No dividends have been paid to date on the 6% Prior Preference Stock which was issued at varying dates in 1921 and 1922.

We have examined the books and accounts of The Goodyear Tire and Rubber Company of Canada, Limited for the year ending 30th September, 1922.

We have satisfied ourselves that all charges to Property Accounts are in respect of actual additions, and sufficient provision has been made for accruing depreciation. The stocks on hand have been taken and valued by the Company on the basis of present market or cost prices, whichever were lower; the bad debt reserve is considered sufficient to provide for all doubtful accounts; the call loans and bank balances were confirmed by certificates, and we have taken all reasonable precautions to satisfy ourselves that all liabilities as at 30th September, 1922 are included in the Balance Sheet.

And we certify that the annexed Balance Sheet is drawn up so as to show the true financial position of the Company as of that date and the results from the operations for the year ending 30th September, 1922, according to the best of our information and the explanations given to us and as shown by the books of the Company.

Price, Waterhouse & Co., Auditors.

# Corporation Finance

**Cockshutt Plow Co.**—Due to the decline in farm products preventing the farming community from purchasing necessary farm implements, the earnings for the year ended June 30, 1922 show a considerable decline from the previous year, the earnings standing at $5,656, as compared with $624,292 for 1920.

Despite the sharp decline in earnings, the liquid position of the company remains relatively little changed from last year, the surplus of current assets over current liabilities being $6,008,618.14, against $6,229,861 a year ago. Bank and other loans are slightly lower at $1,872,970, compared with $1,903,430 in 1921. The credit balance carried forward on the profit and loss account is $3,192.

Dividends on the preference stock, however, were maintained at the rate of one per cent., quarterly, the directors drawing on the balance at credit of profit and loss for this purpose.

The directors feel, the report says, that unless conditions should materially alter for the worse, they will be justified in continuing the present rate during the present year, subject to the approval of the stockholders.

In his remarks to the shareholders the president, Col. Henry Cockshutt, explains the disappointing showing as follows: "The great fall in the price of farm products in Canada prevented the farming community from replenishing their stock of implements as is usually the case in normal years. Then the uncertainty as to tariff changes was a further factor against normal purchases being made. As a result business in all lines of implements fell to an unprecedented extent in Canada during the year, and your company suffered from this in common with others.

"At the same time the foreign business of the company, owing largely no doubt to the general fall in agricultural prices showed an even greater falling off, this being furthur accentuated by the great discrepancy in foreign exchange." The annual meeting will be held on November 28.

**Castle-Tretheway Mines, Ltd.**—The first statement to be issued by the company for the period ending June 30, 1922, shows a loss of $7,693, being excess expenditures over the receipts since the inception of the company in January of this year. While the operations showed a loss for the period, results must be considered very satisfactory, to quote President J. P. Bickell, who points out that 338,000 ounces of silver have been added to the ore reserves.

"The production of high-grade ore alone was practically sufficient to pay the cost of mining and development," according to President Bickell's report. He further states: "The present ore reserves of 640,000 ounces and the favorable results being obtained from development, warrant the erection of a reduction plant when hydro-electric power is available. This matter is being investigated, and meanwhile development and the sorting out of high-grade shipping ore from development rock will be continued."

**McIntyre-Porcupine Mines, Ltd.**—A gross recovery of $585,868 for the quarter ended September 30 is shown in the statement of earnings issued by the company. This is the first official quarterly statement to be made public and is likely to be continued. It shows net earnings before plant depreciation of $268,035.

The statement for the quarter is as follows:—

| | |
|---|---|
| Gross recovery .............. | $585,868 |
| Costs, including development. .. | 308,816 |
| Operating earnings .......... | $277.052 |
| Non-operating earnings ....... | 9,122 |
| | $286,174 |
| Less accrual for taxes for quarter | 18,139 |
| Net earnings before plant depreciation. ....... ........ | $268,035 |

**Demerara Electric Co.**—The following are the net earnings for the months of June, July and August: June, $7,199; July, $5,650, and August, $4,931.

**British Empire Steel Corp.**—At a meeting of the board of directors on October 18, Roy Wolvin, president, issued a statement to the effect that he had been unable so far to make the proposition sufficiently attractive to the financial houses with which he had been negotiating.

After taking occasion to point out that current reports bearing upon the proposed deal had not originated with the company, Mr. Wolvin in his statement says: "The first half of this year's operations have been unsatisfactory due to conditions in the steel industry, but the general situation is now very much better. The company's labor difficulties have been cleared up and our coal miners are now working under an agreement which runs until January 1, 1924. We are producing coal to the maximum capacity of our mines, and will continue to do so until the close of the St. Lawrence River navigation, and the prospects for winter coal production are much better than usual.

"By the close of the shipping season we will have shipped over 700,000 tons of iron ore to Germany, and, I believe, have established our ore for future use with the large steel plants there.

"We are operating two blast furnaces out of the total of four at present operating in Canada, and as soon as the St. Lawrence season closes, we will blow in a third furnace.

"There is a moderate amount of export steel business, in addition to an improved domestic trade, and we have contracts for some rails to be rolled this winter, and there is additional rail business to be placed. An acute car shortage is developing, and the Canadian railways need freight cars, which should result in good business for our car-building plant. The entire situation is much better, and costs of production are getting back to normal.

"Although at the last general meeting of the company a larger scheme of financing was contemplated, it has been decided as a result of the improved conditions that the same necessity does not now exist."

For several months negotiations have been going on between President Wolvin and his executive and important financial interests which, if the terms had been accepted, would have meant the provision of a large amount of additional money, which, it was understood, the corporation needed. Among the alleged terms on which the money would be advanced was a sweeping change in the directorate and the installation of an executive entirely in sympathy with the interests which planned to raise the money, amounting to several millions of dollars.

**B.C. Electric Railway Co.**—Net earnings for the month of August totalled $225,734, as compared with $215,202 for the same month last year. Aggregate gross earnings from July 1 to August 31, 1922, amounted to $1,677,046, as against $1,684,309 for the corresponding period in 1921. Net earnings for the period totalled $448,393 as against $419,338.

**Canadian Pacific Railway Co.**—A further betterment in the position of the company is shown in the September statement of gross and net earnings, which is chiefly due to the flood of traffic which resulted from the passing of the coal and railway strikes.

For the second consecutive month net earnings show an increase over the net of the corresponding month of 1921. This very encouraging showing comes as a result of gross earnings being more than two millions greater than for any month this year, the highest, in fact, that they have been since November, 1921, together with a drop of more than one and one-half millions in operating expenses, this being the most substantial decline since January of the present year. The gross earnings for September, 1922, were the third heaviest in the history of the company, being exceeded only by September of 1920 and 1921. Only two previous Septembers have resulted in a better net showing, these occasions having come in 1915 and 1916. Net is at its highest since October, 1921. It was exceeded only once in 1921 and once in 1920. With the increase noted for September of this year, net earnings for the year to date stand only two and one-half millions below those for the corresponding period in 1921.

Gross earnings for the month amounted to $18,149,528, as compared with $19,494,761 for September, 1921, a decrease of $1,345,233. Working expenses were $13,563,595, as compared with $15,174,711, a decrease of $1,611,116. This left net at $4,585,932, as compared with $4,320,049 for September, 1921, an increase of $265,883. For the nine months of the current year, gross earnings were $124,826,771, a decrease of $11,560,856. Operating expenses were $105,518,422, this being a drop of $8,968,534, leaving net at $19,308,349, a decrease of only $2,592,321.

**Twin City Rapid Transit Co.**—A considerable improvement is shown in the gross and net earning statement for the month of September, as compared with the same month last year. Gross income amounted to $213,357. as compared with $124,636, and net income totalled $122,299, as against $34,587.

**Quebec Railway, L. H. & P. Co.**—A slight increase in gross and a substantial increase in net earnings is shown in the statement for the month of September.

The net earnings for the month of September were $89,293, being an increase of $16,338 over the corresponding period of last year. The most significant part of the statement is in the decline of the operating ratio for the month of September from 71.76 per cent. last year to 66.35 per cent. for September of this year. For the month of September, net surplus, after all fixed charges was $41,799, contrasted with $28,606 of September last year, an increase of $13,192.

The statement for the nine months ended September shows a very substantial increase in gross earnings, and as the operating expenses were below 70 per cent, (as contrasted with 74.56 per cent. for the nine months of 1921), the net surplus was consequently some $163,000 in excess of the surplus of last year. The actual net surplus for the nine months was $235,798. against $72,454 for the same period of 1921.

**Famous Players Canadian Corp.**—The annual report for the year ended August 31, 1922, shows that profits amounted to $320,388 as against $380,838 for the previous year. Including the balance carried forward of $114,396 there is available for the payment of dividends an amount of $434,735, and after dividends the balance stands at $114,735.

The balance sheet shows assets valued at $11,402,087. Theatre properties are placed at $5,294,120, as against $5,146,881; franchises, contracts and leaseholds at $8,516,390, against $8,467,390; accounts receivable at $114,300, compared with $684,086 a year ago; cash in banks, $180,883, as against $138,088; and inventories of suuplies, etc., $13,643, compared with $28.110. Accounts payable are higher at $681,939, compared with $564,737. The capital stock outstanding remains unchanged at $12,500,000. Assets and liabilities of subsidiary companies have been included in toto in the balance sheet. Mortgages on theatre property have been reduced by $92,622, and now stand at $814,057.

Vice-President J. P. Bickell comments on the company's position as follows:—"The year under review must be considered as one during which theatrical enterprises generally were just emerging from a period of very abnormal depression. Consequently, the profits of your corporation may be regarded not only as most encouraging, but as evidencing its earning possibilities during normal years. It is gratifying to note that the earnings of the corporation for the first eight weeks of the year commencing August 28, 1922, reflect a very substantial improvement over the same period of last year. In view of the improved conditions of the business, your directors are confident that this year should show materially enhanced earnings."

**Barcelona Traction, L. & P. Co.**—The September report of operations shows that gross earnings amounted to 3,810,785 pesetas, as compared with 3,164,126 for September, 1921, an increase of 646,659. Operating expenses were higher at 1,558,455 pesetas, compared with 1,168,129. Net earnings amounted to 2,252,330 pesetas, compared with 1,995,997, an increase of 256,333.

Aggregate gross earnings from Jan. 1 to Sept. 30 reached a total of 33,633,681 pesetas, as compared with 27,032,902 for the corresponding period of 1921, and aggregate net earnings 20,263,877, as compared with 17,009,755, a gain of 3,254,122 pesetas.

**Canadian Western Lumber Co.**—Production for August totalled 12,940,200 feet, compared with 6,862,696 for August, 1921. Lumber sold reached a total of 13,495,900 feet, compared with 9,578,166. The price realized was $345,916, against $217,310.

Aggregate lumber manufactured from January 1 to August 31 amounted to 73,430,483 feet, compared with 62,365,914 for 1921; aggregate lumber sold 81,177,645 feet, against 61,483,065; and price realized $1,895,770, compared with $1,657,793, an increase of $237,977.

# Quebec Legislature Now In Session

### Control of Coal and Foodstuffs Forecast in Speech from Throne—Reorganization of Quebec Railway Light Heat and Power Company— Liquor Commission Reports Sales Over Fifteen Million and Profits Over Four Million.

Quebec province is holding its legislative session early. In announcing this decision on September 13 Premier Taschereau said:—

"The care of the highways built by the government is the most serious problem and the most urgent it has to study. So as to lessen the financial obligations of the municipalities, and in order to help as much as possible the agricultural class, the government has decided to take full charge of the maintenance of these great highways, the nicest of the whole Dominion. The government, however, cannot take unto itself the enforcement of such a decision without the authorization of the legislature. By holding the session this fall we will also be in a position to adopt measures to remedy the coal shortage which places our province in such a serious position."

#### Speech from the Throne

The session opened on October 24. The lieutenant governor in his speech from the throne made reference to the fuel situation as one which required a controlling authority. He said in part:—

"The shortage of coal which has lasted for some time past and which may recur another year calls for the setting up of a controlling authority whose powers can also cover foodstuffs if unforeseen circumstances should render this necessary. You will be asked to consider the form and extent of the powers to be vested in this controlling body.

"The present state of our provincial finances admits of the government carrying out more efficiently its roadways policy. It will propose amendments to the Maintenance and Repair of Roads Act, so as to allow of its assuming sole charge of the maintenance of certain provincial and district highways, thus ensuring a quicker, better planned and perfect execution of all necessary works, whilst at the same time relieving municipalities of a heavy burden.

"The last federal census has given rise to many complaints and the municipal authorities in several towns believe that there are many omissions in it. As an incomplete census must injure the Province and deprive it of part of its revenue, the government wish to be authorized to take a fresh count of the population in certain towns so as to verify the figures.

"A Bill will be submitted to you for improving the fisheries in the St. Lawrence which are capable of becoming for our people an important source of riches and of aiding the rapid development of the North Shore and Gaspesia.

"As the pulp and paper industry is one of the most important and profitable in our Province, it is desirable that men should be trained in technical knowledge and also as skilled workmen to direct its operations. You will therefore be invited to approve the establishment of a paper-making school.

"To render more efficacious the means of preserving our forests and perfecting the training in forestry already given in Quebec, your approval will also be asked of a school for forest guards."

#### Quebec Light, Heat and Power

There will, it appears, be legislation affecting several corporations. It is proposed to give effect to the reorganization of the Quebec Railway, Light, Heat and Power Company by dividing this corporation into three companies to be known under the respective names of the Quebec Tramways Company, the Quebec Power Company, and the Quebec Gas Company. Authorization is to be asked for these three companies to do business in 42 counties in the province, covering Central Quebec, Lake St. John, and the South Shore, from St. Hyacinthe to Gaspe and Bonaventure counties. In connection with the power development, it is estimated that within 100 miles of the City of Quebec there are water powers of some 500,000 H.P. awaiting development, and it is reported on good authority that president E. A. Robert, of the Montreal Tramways Company, and the Quebec Railway, Light, Heat and Power Company, plans for the exploitation of some of this power by schemes calling for the expenditure of millions of dollars. This would create power interests centralizing around the Quebec Power Company that would make the Quebec district very desirable for the establishment of many new industries, besides opening up new territory and creating new development particularly in the Lake St. John region, which today is noted for its natural resources.

The promoters of the Quebec and Chibougamou Railway, who have already expended $250,000, are asking for a subsidy of $8,000 per mile and 4,000 acres of land.

#### Metropolitan Commission

A change in the name of the Metropolitan Commission of the Island of Montreal to that of the Montreal Metropolitan Commission will probably be proposed, while amendments to its charter will also be sought so as to give it wider powers in the guaranteeing of loans floated by the commission. It has been found in the past year that there is little guarantee legally provided in the charter for those who take up the bonds of the commission. Should the commission be disbanded the bond holders would have to recover from each of the municipalities under the jurisdiction of the commission its proportion of the bond, and while in the case of Montreal and one or two of the suburban cities surrounding it this would not be a difficult matter, it would be another question securing payment of any share of bonds from some of the municipalities whose financial condition has been so bad as to bring about the formation of the commission in order to help them. The proposal is to make all the municipalities jointly and severally responsible for the bond issues of the commission.

The control of School Commissions borrowing powers, which up to now had been left to the superintendent of public instruction, will probably fall under the jurisdiction of the Department of Municipal Affairs, a decision to announce this important change having been reached by the Provincial Government. Taxpayers thus will be given ample protection through the fact that the financial conditions of the municipalities and the school commission will be under the immediate control of one man.

#### Municipal Affairs

The Hon. Jacob Nicol, Provincial Treasurer, as Minister of Municipal Affairs, tabled a report which stated that 81 municipal loan bylaws representing an aggregate of $16,397,963.59 had been sanctioned by the Lieutenant Governor in Council, while 85 by-laws other than loan by-laws were disallowed. For workmen's dwellings the amount placed at the disposal of municipalities by the Federal Government was $8,686,568 and 28 municipalities had adopted a program for the use of $7,043,000 of this grant, and according to the estimate of the department 580 houses will be finished before the first of January next.

The report of the Hon. J. E. Perrault, Minister of Colonization, Mines and Fisheries points out that in the past two years $2,536,137 had been spent in colonization work, particularly opening roads and building bridges in new districts. Missionary work in the New England States had resulted in the repatriation of 626 families composed of 2,471 individuals. Production in the mining industry had dropped from $28,392,939 in 1920 to $15,522,988 in 1921, but there had been a steady improvement in the market in the last few months.

The value of the mining production, which was of $28,392,939 in 1920 has fallen down to $15,522,998 in 1921 according to the mine report, which however adds there has been an improvement in the last few months.

The fish and game revenues this year have reached $350,000, an increase of $36,000 over the previous year. Instead of four hatcheries the Provincial Government has now under its control six establishments of that kind.

In the course of the year 1921-22, 618 companies have been incorporated in this province representing a total capital of $83,689,999, and 67 licenses to do business here were granted.

#### Finances of Schools

A review of the assets and liabilities of the various school corporations of the province was given by the Provincial Secretary. The total value of property taxable for school purposes for the year ending June, 1921, was $1,534,513,924. The assets of the 1718 corporations amounted to $61,195,630.31 and the liabilities $42,638,543, leaving a surplus to the credit of the corporation of $18,557,087.15. The receipts during the school year were $22,147,091.41 including Government grants of $635,077.76 and after meeting expenditures, including $6,722,061.30 for salaries for teachers, there was a balance in hand of $1,123,084 as against $1,182,586.95 for the previous year.

For the City of Montreal the estimated value of taxable property is placed at $458,963,360 for Catholic schools and $161,400,286 for the Protestants. The sinking fund of the Protestant Commission was $1,024,355 and that of the Catholic Commission $474,839.

The receipts of the Catholic Commission during the year under review totalled $5,210,589. and that of the Protestant Commission $4,048,620, the expenditures leaving a balance in the hands of the Catholic Commission of $336,801 and of the Protestants $88,117.

#### Liquor Commission

The first report of the Quebec Liquor Commission shows that the total sales for the period ending on the 1st day of May last amounted to $15,213,801 with gross profits reaching $4,133.485; expenses of all kinds reduced these revenues to $2,869,010. The surplus of $4,000,000 announced already includes the revenues from licenses and from the beer sale which have reached $784,232. The Commission in their report refer to the fact that higher revenues are expected for the year 1922-23.

---

## METROPOLITAN LIFE AGENTS

A convention of Toronto and district representatives of the Metropolitan Life Insurance Company was held in Toronto recently.

---

## MANITOBA FARM LOANS

After several months' suspension through lack of funds, the Manitoba Farm Loans Association will commence operation shortly, the Provincial Treasurer having advanced a line of credit amounting to $500,000. This action follows the recent announcement that the Bracken Government is in favor of farm loan schemes, under which money is advanced to farmers to be repaid in thirty years on first mortgages.

Amendments to the Farm Loans Act are under consideration and it is possible that in the future the Association will be able to float its own debentures.

## BRITISH COLUMBIA ELECTRIC RAILWAY.

### Passenger Traffic Decreased Last Year, But Sale of Electricity Increases.

(Staff Special)

Vancouver, Oct. 31.—Hydro-electrical development work of considerable magnitude is now being done by the British Columbia Electric Railway company adjacent to Vancouver, to supply the increasing demand for electric current. At present, work is going on at Stave Lake, estimated to cost $1,000,000 and plans are under way for further development as the demand requires, costing in all $10,000,000.

The British Columbia Electric Railway company has almost completed the installation of a fourth generator of 13,000 capacity at its Stave Lake plant, bringing its total power plant capacity up to 136,000 h.p. It is now intended to raise the present dam, remove the spillway to a new location at the Blind Slough and make provision for a fifth generator which will be supplied by the additional water storage as a result of the raised dam.

The power resources of the company available for development include water rights on Alouett Lake, water rights further down the Stave River and on Jones Lake. These projects when completed will, it is estimated, provide 150,000 horse power which is sufficient to supply Vancouver and the lower mainland for a considerable time according to the rate at which the demand increases.

### Increasing Demand.

Vancouver and New Westminster are developing rapidly as industrial centres and with the exception of lumber mills and other industries which develop power from waste fuel, every industry uses electric power supplied by the central station company. The demand for electric current has been increasing rapidly since the conclusion of the war and while a lull took place in the rate of increase about the beginning of 1922, it is again going forward. For the first eight months of 1922 the output of the generating plant on the mainland was 165,620,564 kilowat hours compared with 149,733,289 for the same period of 1921, an increase of 10.7 per cent.

### Volume of Business.

The company had, in 1921, 52,487 electric light and power meters on the mainland, compared with 37,459 in 1914. In the latter year it delivered to its light and power customers on the mainland 64,129,692 kilowatt hours compared with 113,909,973 kilowatt hours in 1921. In the same period the horse power of motors connected rose from 29,562 to 54,553.

One reason for the increase in demand for electric current has been the building activity. In 1921, some 2,000 new homes were built in Vancouver and the adjacent municipalities, practically all of which required electric light connections. The present year shows even greater building activity and even with reduced cost of building, the amount represented in the permits issued is higher.

In the first six months of 1921, the company made 1,102 new meter connections whereas in the first six months of 1922 it made 1,665 new connections.

### Decrease in Traffic.

In common with street railways in general all over the North American continent, the British Columbia Electric Railway has for the last year had a decrease in traffic, due to a number of causes. There is no decrease in population but owing to a number of industries cutting down activity and to stringent economy by many residents, car riding has decreased. Traffic is recovering and is practically on a par with the autumn of 1921. It is expected that with the rapid recovery of business that is taking place, traffic will soon be back to normal.

Remarkable development is taking place in the gas field. The British Columbia Electric Railway company has recently completed a new plant at Vancouver at a cost of $500,000, manufactured by the West Gas Improvement company. It has a capacity of 1,000,000 cubic feet a day, the standard being 450 B.T.U.

The output of gas by the company has doubled since 1917. At the present time in spite of conditions, there is an increase of 8 per cent. over last year. The mileage of mains has increased from 138 in 1916 to 151 today and the number of meters from 13,742 in 1916 to 19,206 today.

## Business Condition s

Despatches to Dun's Review from branch offices of R. G. Dun & Co. in the principal cities state that retail trade in the Dominion of Canada has been stimulated in numerous districts of late by more seasonsable weather, and wholesalers at the leading distributive centres report a steady run of orders for winter clothing, footwear, dry goods, groceries, and other staples. The tendency towards improvement in the more important industrial lines continues, and both country and city merchants are operating with more confidence, a condition that is reflected in a growing disposition to extend their commitments further into the future. Collections, as a whole. are better, and prospects generally are regarded as highly encouraging.

Montreal reports that retail demands for seasonable merchandise have increased with the advent of wintry weather, and wholesalers of furs, clothing, footwear, dry goods, woollens ,etc., are receiving a satisfactory run of orders for prompt and future delivery, while manufacturing activity is well maintained and collections are improving.

Both wholesale and retail trade at Quebec have been benefitted by recent weather conditions and, while buyers continue to operate cautiously, prospects are regarded as more satisfactory than they have been for a considerable period. Collections, however, remain slow.

Business at Toronto, both wholesale and retail, is in well maintained volume, and in the former division, though individual orders are not, as a rule, large, they are numerous and, in the aggregate, represent a quite satisfactory total. The demand for furs, clothing, footwear, and millinery is especially good, and collections are coming in more freely.

Retail business in the Far West and Northwest is steadily improving in most sections and though wholesalers in Winnipeg, Saskatoon, Regina, Calgary, and other centres complain that buyers are very cautious in their operations, they report that the demand for dry goods, clothing, footwear, hardware, furniture, jewelry, and other staples is slowly improving. Collections are still slow.

## Exchange Quotations

Closing rates in Toronto, Wednesday, compared with the preceding week, were as follows:—

| | Nov.1 | Nov. 8 |
|---|---|---|
| London | 445.65 | 446.00 |

## Railroad Earnings

The following are the approximate gross earnings of Canada's transcontinental railways for the month of October:—

**Canadian Pacific Railway**

| | 1922 | 1921 |
|---|---|---|
| October 7th | $ 4,829,000 | $ 4,383,000 |
| October 14th | 5,147,000 | 4,898,000 |
| October 21st | 5,466,000 | 5,261,000 |
| October 31st | 7,410,000 | 7,351,000 |
| Totals | $22,852,000 | $21,893,000 |

**Canadian National Railway**

| | 1922 | 1921 |
|---|---|---|
| October 7th | 3,262,024 | 2,918,593 |
| October 14th | 3,473,811 | 2,198,593 |
| October 21st | 3,444,912 | 2,918,593 |
| October 31st | 4,451,702 | 4,169,420 |
| Totals | $14,632,449 | $12,205,199 |

**Grand Trunk Railway**

| | 1922 | 1921 |
|---|---|---|
| October 7th | 2,167,914 | 2,302,861 |
| October 14th | 2,263,732 | 2,177,140 |
| October 21st | 2,377,050 | 2,234,431 |
| October 31st | 3,347,872 | 3,028,900 |
| Totals | $10,156,568 | $ 9,743,332 |

## Canadian Failures

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended November 3, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Nov. 3 | Oct. 27 | Oct.20 | Oct. 13 |
|---|---|---|---|---|
| Ontario | 26 | 19 | 13 | 13 |
| Quebec | 31 | 41 | 28 | 29 |
| Manitoba | 9 | 4 | 11 | 10 |
| Alberta | 3 | 5 | 4 | 6 |
| Saskatchewan | 2 | 2 | 5 | 1 |
| British Columbia | 6 | 5 | 3 | 2 |
| Nova Scotia | 4 | 2 | 2 | 2 |
| New Brunswick | 3 | 0 | 2 | 3 |
| Prince Edward Is. | 0 | 0 | 0 | 0 |
| Newfoundland | 0 | 1 | 1 | 0 |
| Total | 84 | 79 | 69 | 66 |
| 1921 | 66 | 63 | 68 | 42 |

# Loop-holes in Federal Taxation System

### New Taxation Hardly Necessary if Present Sources Can be More Fully Utilized —Tax Exemptions, Especially of National Railway Lines, Means Loss of Millions of Dollars—The United States Demand for Embargo on Canadian Grain

(Special to The Monetary Times)

Ottawa, November 8.—In the effort to get more federal revenue, it is unlikely that new taxes will be resorted to as much as there will be a general tightening up so as to make those at present in existence yield more. The impression is that considerable smuggling is being done that can be ended, and in proportion as this is cut out the exchequer is better off. But at best this will not swell the receipts appreciably.

It is much more probable that an attempt will be made to cut out some of the exemptions that at present eat very deeply into the revenue. The views of Hon. Jacques Bureau as to the exemption from the Federal income tax enjoyed by the publicly-owned utility companies are well known; but it is not so well known what the exchequer loses thereby. It is quite probable that an attempt will be made to make up for this loss through the exemption of the income tax on corporations and the extension of the sales tax so as to cover sales of power, etc. Obviously this would be favored by certain interests, for it would mean that the public would pay the income tax rather than the corporations themselves. Those who favor the proposal say that it would bring in millions.

The tax exemptions are a big problem to all governments. In the United States the income tax is being very seriously cut into through the rapid increase of tax-exempt securities, which the federal government ,to a very large extent, is powerless to control, municipal bonds being exempted by the constitution. As is well known this class of securities grows faster than almost any other. In this respect, however, Canada is much better off than is her big neighbor, for while her tax-exempt securities are increasing rapidly, ours are gradually being reduced.

#### Exemption of Railways.

Very few people in this country realize the extent to which the nationalization of railways is eating into the taxable revenue. Last year on the 39,771 miles of single track operated in Canada the tax accruals were $9,421,040, or at the rate of approximately $236 per mile. In the United States the less than 250,000 miles of Class A roads paid $279,700,000, or at the rate of $1,120 per mile. And there was a considerable milage outside of this class. As a matter of fact while nearly 400 miles more of railway were operated in Canada last year than in 1920, the tax accruals were $140,000 less. Of the $9,421,000 paid, $5,540,820 came from the Canadian Pacific. The Canada Southern which operated only 397 miles of line, had taxes amounting to $279,220, whereas the Canadian Northern with 9,717 miles had taxes amounting to only $1,169,704. These figures are cited merely to show one of the leaks.

It is a mistake to think that the public does not pay, for while some of the things it may own, are exempted from taxation, the practice now is to make good this loss through an increase in the Sales Tax, which is hardly equitable, since to some extent it shifts from the shoulders of those who get the service, the direct charge for it and very often places it on the shoulders of those who do not get the service.

#### Representation at Washington.

The demand by the United States Farm Bureau for an embargo on shipments of Canadian grain to the United States is forcing to the front the necessity for better representation in the United States. At present, any group with influence at Washington has practically its own way in advocating restrictions on imports, or on goods merely passing througn in bond, it matters not how injurious such measures may be to the general trade interests of the United States, or how inequitable they may be to Canada. When any of these questions come up there is practically no one in Washington, with the business experience and first hand knowledge of Canadian conditions, necessary to state the case effectively for Canada. The result is that Canadian industry suffers severely.

If the proposed embargo on grain shipments from this country were to go into effect it would be a very serious matter for the farmers. It is desirable that as much of our grain as possible should pass through Canadian ports, but the undeniable fact is that transportation facilities of one kind or another are quite unable to handle the traffic offered within the time that the farmers desire to market. This explains why so much Canadian grain goes out through the United States. In the nine months ending December, 1920, when wheat entered the United States duty free, the exports alone were nearly 30,000,000 bushels, while it is quite possible that the total amount that went out via the American route that year was much more than double that. This year, with a duty of 30 cents per bushel barring the way, the quantity exported has been cut away down; so it is plain that to place an embargo on grain passing through in bond woudl greatly retard deliveries.

#### Retaliation

It may be said that the placing of an embargo is a thing that works both ways, that if the Americans resort to it Canada should retaliate. But this would be nothing more than the mere cutting off of one's nose to spite one's face. A tremendous volume of American grain has gone through the port of Montreal this year. This has been a boon to the railways, for it has given them much traffic during a slack season. They have not made much money out of it, but as it has kept them employed, it has been a good thing for the country. So to interfere with this kind of business would be a great mistake. The fact is that necessity compels both countries at certain seasons of the year to use the route on the other side of the line as the case may be.

The authority which the new American tariff law places in the President to raise or lower the tariff, subject to limitations, is another strong reason why Canada needs representation at Washington. Never before in the history of the Republic has the Chief Executive been given such power in tariff matters. For this reason the United States, being our best customer, it is all the more necessary that Canada should have some one at court in Washington.

The railway blocade in the United States, aside from the effect of the coal miners' strike, is due to the inability of the roads to command sufficient capital to buy the necessary rolling stock to take care of the traffic increase. As a result, not only is there a shortage of thousands of cars, but terminals have also become inadequate to handle the new traffic. In the United States the situation is simply this, traffic is increasing faster than the means for handling it.

## WHEAT TARIFF AND FARMERS' PROFITS

### Difference in Views on Effect of Restricting Imports of Canadian Wheat Into United States

(Special to The Monetary Times)

New York, November 8:—Rollin E. Smith, grain supervisor under the Administration of the Futures Trading Act. of the Department of Agriculture, and William Peter Hamilton, editor of the Wall Street Journal engage in a debate having as its topic the effect of the American tariff on wheat on the profits of the American farmer, in the current issue of Barron's Weekly. Mr. Smith contends that the tariff has benefitted the American graingrower. He claims that the price paid for the exportable wheat surplus does not fix the price the American graingrower receives for his wheat. Harvests in the southwestern states are two months in advance of the Canadian crop. Heavy sales of this southwestern wheat for export are made as early as May; thus, according to Mr. Smith, the first movement of American wheat and flour to the export market finds the European markets bare of hard spring and winter wheat. It follows from this that a large part of the American crop is sold before the Canadian crop reaches the market.

Mr. Smith also contends that but for the tariff wall there would be a marked tendency for Canadian wheat to flow heavily in western and middle western markets during the open season. This tendency would continue in only a lesser extent after the close of navigation.

"Nor is the importation of millions of bushels of wheat the only story," continues Mr. Smith. The sentimental effect in the futures market of the Chicago Board of Trade of the importation of large quantities of Canadian wheat would be decidedly bearish. It would give speculators an additional reason for hammering the market. For every million of Canadian wheat sold to American mills, speculators would sell 50,000,000 bushels in the pit.

"To remove the duty on Canadian wheat would be in effect to automatically increase the wheat crop of the United States fifty to one hundred million bushels every year. Minneapolis and other northwestern mills would, as soon as Canadian wheat was available, stop buying hard wheat in Kansas and Nebraska. Also they would reduce their prices on spring wheat playing the Canadian farmers against the farmers of Minnesota, Montana, and North Dakota."

#### Canadian Imports

Mr. Hamilton, in replying to this statement of Mr. Smith's, claims that Canadian wheat is not a competitor and never has been a competitor with American wheat for the American market. He points out that the Canadian wheat imported into the United States is not only small in volume relatively speaking but is imported for a special purpose; it is imported to be mixed with American softer wheats to bring it up to the standard demanded by the American market from the American millers.

As Mr. Hamilton shows quite clearly the average price of wheat in December, 1920 before the tariff on wheat went into effect was 148.6 cents a bushel and in October this year was 90.4 cents, it is reasonable to suspect that the tariff has not helped the American farmer much.

The tariff is forcing Canada according to Mr. Hamilton to store up immense quantities of grain at the head of navigation. These stores will be released in the Spring when navigation re-opens and will come into direct competition with early American grain.

"It would seem," says Mr. Hamilton, "that the American farmer would benefit by the repeal of the tariff on wheat."

---

## BURNS' AGENT SUES PRINCIPAL

Louis Pratt, of Knowlton, Que., has entered suit in the Quebec Superior Court against P. Burns and Co., Ltd., of Calgary and Montreal, for $500,000. This sum is asked in compensation for loss of credit, prestige in business and alleged defamation, said to have been caused over a deal involving the exploitation of Fraser River mining interests in England and on the Continent.

Pratt, who takes action personally against P. Burns and J. Burns of Calgary and A. Muir of Montreal, alleges that he was in British Columbia in the year 1911, when he was approached by P. Burns, who persuaded him to take over the representation of mining interests along the Fraser River and act as agent in England and in continental Europe.

In 1914 Pratt was named officially as business agent and his contract was renewed until the end of the year 1919. During this time, Pratt says, he transacted business to the abount of $35,500,000. The following year he asked for more generous financial treatment and was assured that his demands would be granted, and he continued to act in his official capacity for the company.

In 1920, he claims, he did business in London amounting to $8,500,000 and in France and Belgium aggregating 14,971,606 francs. In 1921 he finished his contract.

Now, he alleges, the company has since defamed his business reputation in England, France and Canada and has caused him to be looked upon with suspicion by his former bankers. He has lost his credit with financial houses and the opportunity to be given the agency in Europe of the United Grain Growers of Winnipeg and the Quebec Liquor Commission. He asks the above sum as damages for the harm suffered.

---

## BANK OFFERS REWARD

The Standard Bank of Canada has offered a reward of $2,000 for information leading to the recovery of the securities stolen from their Stouffville, Ont., branch, or a proportionate amount for the recovery of any of the securities.

## MOLSONS BANK PROFITS LOWER.

### Reduction of $70,294 from Previous Year—Total Assets Also Decreased.

Profits of the Molsons Bank for the year ended September 30, 1922, were $682,104, a reduction of $70,294 from 1921 and of $140,614 from 1920. The showing as to profits, considered before the usual deductions for government taxes, pension fund and other allowances, is equivalent to 17.05 per cent. on the outstanding capital stock of the company, as compared with 18.80 in 1921; 20.5 in 1920; approximately the same figure in 1919; 17.8 per cent. in 1918, and 15.4 per cent. in 1917. After all deductions there remained a balance at the credit of profit and loss account of $266,318, as compared with $187,355 in 1921, and $518,092 in 1920. Last year's increase in contribution to the officers' pension fund is maintained, this item standing at $38,141, and McGill University is again the recipient of $10,000. Government taxes are higher than last year by $20,000, this item being shown at $75,000.

The profit and loss accounts of the past three years are given in the following table:

| | 1922 | 1921 | 1920 |
|---|---|---|---|
| Net profits ... | $682,104 | $ 752,389 | $ 822,718 |
| Prev. bal. .... | 187,355 | 518,092 | 275,435 |
| Total ..... | $869,459 | $1,270,482 | $1,098,153 |
| Less— | | | |
| Dividends ... | $480,000 | $480,000 | $480,000 |
| Govt. tax .... | 75,000 | 55,000 | 70,000 |
| Pension F. | 38,141 | 38,126 | 25,061 |
| Charity F. .. | .... | ..... | 5,000 |
| Subscription | 10,000 | 10,000 | ..... |
| To reserve . | ..... | 500,000 | ..... |
| Total deduc. | $603,141 | $1,083,126 | $580,061 |
| P. & L. bal. | $266,318 | $ 187,355 | $518,092 |

### The Balance Sheet.

Total resources are down by slightly more than $10,000,000 to $71,456,719. More than half of this change is accounted for by a contraction in current loans from 47 millions to 41 millions. Call loans, at $5,292,900 are less by about $1,000,000; government securities at $5,177,808, are less by about 1½ millions; Dominion notes, at $4,649,965 are less by about 1½ millions, and cheques on other banks stand at $2,653,122, a reduction of nearly one million.

Among the liabilities the most important change is a reduction of over five millions in the balance due the Dominion government, this item now standing at $2,118,272, as compared with $7,312,613. Notice deposits are less by nearly three millions at $44,618,422, while elsewhere there is little change of note.

The balance sheet figures of the past two years compare as follows:

**Assets.**

| | 1922 | 1921 |
|---|---|---|
| Curr. coin ........ | $ 592,134 | $ 621,443 |
| Dominion notes ... | 4,649,965 | 6,196,051 |
| Cen. gold res. ...... | 500,000 | 1,500,000 |
| Dep. with govt. .... | 193,000 | 205,000 |
| Notes other banks .. | 524,104 | 391,734 |
| Cheques do. ....... | 2,653,122 | 3,508,433 |
| Due by bks. Cur. .... | 7,559 | 12,054 |

| Total .......... | $71,456,719 | $81,911,569 |

## MONTREAL AND QUEBEC BANKS

The outstanding feature of the September statement of the Montreal City and District Savings Bank and La Caisse D'Economic de Quebec is the substantial increase in deposits over the preceding month, the former being up by half a million and the latter by two hundred thousand dollars.

Another feature of the reports is the half million increase in cash holdings in the Montreal City bank, although the same item in Las Caisse D'Economic is lower by sixty thousand dollars. Loans on other securities in the La Caisse D'Economic are up by approximately two hundred thousand.

These substantial improvements in the banks' positions can be traced to the crop movement. The following is a statement for the months of August and September:—

**Montreal City and District**

| | Sept. 1922 | Aug. 1922 |
|---|---|---|
| Dom. Govt. dem. dep. .. | $ 93,341 | $ 93,341 |
| Other deposits ...... | 46,091,352 | 45,543,652 |
| Total liabilities ...... | 46,626,138 | 46,009,178 |
| Govt. and other sec. .. | 14,427,121 | 14,430,731 |
| Cash .. .. .. .. .. .... | 7,313,147 | 6,816,973 |
| Can. Mun. sec. ........ | 17,075,451 | 17,115,198 |
| Loans on bank stock .. | 686,582 | 708,662 |
| Loans on other sec. ... | 7,052,376 | 7,105,597 |
| Total assets .. .. .... | 49,526,385 | 49,190,819 |

**Caisse D'Economic de Quebec**

| | Sept. 1922 | Aug. 1922 |
|---|---|---|
| Deposits .. .. .. .. | $11,007,751 | $10,894,343 |
| Total liabilities .. .. | 11,666,158 | 11,521,889 |
| Govt. and other sec... | 2,436,727 | 2,436,727 |
| Cash .. .. .. .. .. .. | 1,290,611 | 1,350,825 |
| Can. Mun. sec. .. ... | 3,909,595 | 3,913,020 |
| Loans on bank stock.. | 320,498 | 319,538 |
| Loans on other sec... | 3,911,248 | 3,746,829 |
| Total assets .. .. .. | 13,674,701 | 13,530,432 |

## LISTING LANDS FOR SETTLEMENT

Several hundred thousands of acres of vacant land have already been listed for sale under the Western Canada Colonization scheme, according to Howard Everett, general manager of the company. This does not take into consideration any large tracts or blocks of land promised by resident land owners.

As soon as the listing of lands has proceeded to an extent which will justify the expense of establishing other departments necessary in the efficient operation of the association, agencies will be organized, and the necessary arrangements made for handling the business.

During the winter months, states Mr. Everett, the company will confine its activities mainly to the listing of lands and the organization of a sales force for the early spring. Pamphlets are now being prepared setting forth the Western Canada Colonization company's 32-year land settlement plan, and it is expected these will be ready for distribution at an early date.

## CASHING MONEY ORDERS.

Crooks have been raising money orders on such a scale as to necessitate a general warning by the Federal Postal Department.

"The public are warned that money orders should not be cashed for unidentified strangers, particularly orders made payable at other places," the department advises. In a majority of cases the frauds have been perpetrated through the crooks purchasing money orders for small sums, such as 25 cents, afterwards raising the amounts and obtaining payment through business firms cashing the orders.

## MINING COMMITTEE

Hon. Harry Mills, Minister of Mines for the Province of Ontario, on October 12 announced that the following is the committee selected by him to report on the iron mining possibilities of Ontario:

Prof. H. A. Guess and Prof. Haultain of University of Toronto; Mr. Morrow, General Manager of the Hamilton Steel Company; George Cowie, Manager of the Soo Steel Works; Lloyd Harris of Brantford, to represent the commercial interests, and Mr. Hall of Montreal, as expert on tariffs and transportation. This committee will report to the Government at the next session of the Legislature, probably early in the new year.

Meanwhile a test of 43,000 tons of briquetted ore from the Moose Mountain mine will be made at the Hamilton Steel Works.

## DECIDES TRUST WAS PARTNERSHIP

### Organization Had Status of Partnership Under Both English and New York Law

In the case of Reid v. Howard, Justice Logie, in a written judgment, said that Howard was the inventor of improved processes for extracting hydro-carbons from gasoline and kerosene and a corporation was created under the laws of South Dakota, known as "The American Motorists Refining Company" to exploit these improvements. In April 1920, Howard sold his process patent to this corporation for $625,000. In 1921 the promoters organized in the state of New York under the common law "trust" under the name of "The American Motorists Refining Company Niagara Falls N. Y.", to take the place of the Dakota corporation. The declaration of trust was executed by the plantiff, Reid, Helch and Smith, by the defendant Howard, and by one Vaughan.

In January, 1921, by a resolution of the board of trustees of the trust, the contract between Howard and the Dakota corporation was assumed. It was alleged that Howard was entitled under that resolution, to be paid a large sum of money by the trust. The trust in July 1921 was registered as a partnership in Welland Ontario. On the 12th May 1921 Reid and Howard as trustees of the company or partnership bought certain land in Ontario and the deed was made to the plaintiff Welch and to Howard as trustees for the American Motorists Refining Co., of Niagara Falls N. Y.

### Conveyed Interest

In December 1921 Howard resigned as trustee. After his resignation, the trust tendered for execution a conveyance of Howard's interest in the land in Ontario to new trustees but Howard refused to execute it, because the land was held by him and Welch for the shareholders (2) because the deed did not specify on what trust the land was held (3) because Howard wished to hold the land as security for his debt.

His Lordship decided that none of these reasons was valid. By article three of the declaration of trust, to which Toward was a party, it was agreed that the trustees "shall hold legal title to all property, and the right shall he free from control or management of the certificate holders." Howard could not repudiate his own contract contained in the declaration and he must convey to the new trustees appointed thereunder.

### Status of Partnership

Assuming that the land was acquired for business purposes, the trust as such did not hold the land and the trustees were not obnoxious to section 2 of the Extra Provincial Corporations Act, nor required by section 4 to take out a license, nor contrary to section 12 which forbids an extra provincial corporation to acquire land until it has received a license.

Having both by English law and that of the State of New York, the status of a partnership so far as the liability of its members was concerned, such a trust is not a corporation within the meaning of sec. 2(a) of the Extra Provincial Corporations Act.

Judgment was given for the plaintiff and the counter-claim was dismissed.

## CONFERENCE ON RESOURCES.

A conference between the Dominion government and the premiers of the three western provinces with regard to the return of natural resources will take place in Ottawa on November 13, it was officially announced on October 28. The announcement was made following exchange of a number of telegrams between the western premiers and the prime minister, Rt.-Hon. Mackenzie King. No question has been raised as yet as to representation of the eastern provinces in the conference.

## MUTUAL FIRE INSURANCE.

In future mutual fire insurance companies operating in the three prairie provinces will have to set aside larger sums for reserve than they are now required to do, provided that the three provincial governments enact the model draft bill prepared by the Manitoba, Saskatchewan and Alberta fire insurance superintendents of and representatives of the mutual companies, at a conference held recently. The bill after final draft, will be submitted to the three provincial governments for enactment.

The Monetary Times

Trade Review and Insurance Chronicle

OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1369 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

## THE QUEBEC SESSION

The Quebec Legislature is now in session but has not as yet received any proposals of outstanding financial interest. The Montreal commission is making application for certain changes in its constitution. Montreal has received an undue share of the legislature's attention in recent years and a more careful consideration of the measures before they are enacted would be more in accord with the reputation of the province for caution in legislation. Like Ontario, Quebec is considering the control of prices of fuel and of food. This is a matter which it is difficult for a province to handle in view of the fact that the power to deal with trade and commerce rests exclusively with the Dominion Parliament. A government is not justified in interfering unless a combine is found to exist and a combine can be discovered only by an investigation into the working of trade and commerce. Quebec can be depended upon to go cautiously in this respect.

The government is accused of conducting an "alcoholic regime," but as the Montreal "Star" says, it "can afford to laugh at carping critics with six millions in its treasury to spend." Quebec is conducting an enormous business in liquor, regulating the sale and at the same time discouraging the business by establishing a large margin of profit. Ontario, however, is deriving an immense revenue from the race tracks while at the same time the government is avowedly hostile to them. Ontario's prohibition law, moreover, with its wholesale system of large fines, operates as a tax on the liquor business which, though illegal, is still large.

## A PROPOSED NEW PROVINCE

There is a movement on foot in northern Ontario for the creation of a separate province. The Port Arthur Board of Trade at its annual meeting on November 1 resolved to request the city council to take a vote of the citizens on this question and to request the co-operation of other towns and cities in the district.

The province of Ontario has spent large sums in developing the northern section. Assuming, however ,that it would not stand in the way if the citizens of the north were determined, the latter may well take note of the difficulties which other provinces have had to face in their early years.

Northern Ontario as a separate province would have a large area and a small population. This was the condition of British Columbia in its earlier years with the added difficulty that though it abounded in natural resources much of it was not accessible. The cost of building roads was enormous and it was a long time before sufficient wealth was produced to carry the burden. There were few well established industries which could afford to pay for the development of the rest of the Province.

Though northern Ontario is now quite a producer of minerals, it is a fair parallel to Brish Columbia. For the present northern Ontario will make more progress as a part of the wealthy and prosperous province of Ontario than it would as a separate province .

## MINING THE FORESTS

Ellwood Wilson, chief forester for the Laurentide Company, addressed a meeting of the Rotary Club in Montreal recently and is reported by a daily newspaper as having "exploded the ancient Canadian fetish that the forests of the Dominion were illimitable and inexhaustible." This theory has been exploded many times already, but perhaps many times are required to impress a new view on the public mind. So long as the forests were regarded as inexhaustible, lumbering was merely a matter of mining, taking the most accessible parts first.

Forests can, however, be replacéd, and at the present time in Canada it is important that such areas as are best suited for forests should be so administered that they will produce successive crops. Mining, on the other hand is the gradual using up of capital assets which it is impossible to replace. Forestry, like agriculture, is an affair of cultivation and harvesting, but here the period of growth is so long that a certain amount of state supervision is necessary.

## THE PILLARS OF THE STATE

Hon. Arthur Meighen, leader of the Conservative party in the federal house, is worried over the fact that mankind is multiplying from beneath, and contracting at the top. In a speech in Ottawa on October 31 he stated that while the superstructure of civilization was now becoming heavier and vaster, the pillars that supported it were becoming narrower.

Surely there is nothing new in the first mentioned condition, at least. We have all heard of old families of England contracting to a single "Scion of the old stock," and the great fortunes of the United States frequently go begging for lack of heirs. Who ever heard of a French-Canadian habitant, a Scotch pioneer of Ontario or a European peasant in the west having no one to inherit his humble domain. The "upper" classes—the wealthy and the educated—do not reproduce themselves, and it is perhaps fortunate that they do not, or the paths to wealth and to learning would be more difficult.

When Mr. Meighen refers to the pillars of the state as becoming more narrow he may have in mind the party which he represents. Very few or its persuasion are now found in the legislatures of this country. A glance at the list of members of any of our western legislatures, more notably Manitoba, will on the other hand show an astonishing proportion of foreigners. This is desirable, for our legislatures should be representative of our population, not merely of the "upper" classes. Mr. Meighen need have no worries about the future of our civilization, though he may not approve of the line of progress taken. Who is there among the "upper" classes on this continent today who did not spring from an immigrant who could see his opportunity only in the new land, whether he came on the Mayflower or a less distinguished ship. And just as the "lower" classes of yesterday provided the "upper" classes of today, so will education and wealth be recruited tomorrow.

## AUTUMN FINANCING

The fall months are now recognized as the best time for floating large security issues in Canada. In autumn, 1917, a Victory loan resulted in subscriptions totalling $260,000,000. In autumn 1918 there was another Victory loan to which subscriptions totalled $695,000,000, and in the autumn of 1919 a third loan with subscriptions of $678,000,000. In the fall of 1920 there was a redistribution of those Victory bonds which had not already been placed with permanent investors. Autumn, 1921, brought a shortage of high grade bonds, with prices advancing.

Wood, Gundy and Company make the following comment on this point:—

"The cause of these heavy investment periods is clear—the accumulation of harvest funds. This year there will also be available for investment the large accounts of principal to be paid to holders of Victory Bonds maturing December 1st. These funds were obtained in the United States last spring, and therefore represent entirely 'new money' for investment in Canada. Also the usual half-yearly Victory Bond interest amounting to $50,000,000, will be available on November 1st and December 1st.

"In view of these unusually large amounts of investment funds, the question is naturally asked, 'Where will the money go?' The answer is that existing issues—and the few new issues that are appearing—must absorb these funds. Insofar as supply and demand are concerned, the indications are that the experience of last year will be repeated."

While grain prices are not what they used to be, the total receipts from this year's harvest will be heavy. Capital is still afraid of speculative ventures and looks rather to underlying securities. Business is not as yet sufficiently prosperous to encourage new prospects. The probability is, therefore, that there will be a strong bond market with advancing prices.

## THE USE OF THE TELEPHONE

We are hearing every day about the high cost of freight as affecting the price of products. This is but one phase of the country's difficulties in connection with the distribution of goods. The cause is found in the fact that we have a small population spread over a wide area, like any new country, but emphasized in Canada because the most habitable parts are spread along the southern boundary. There is a bigger market in the city of New York alone than in the whole of Canada.

The high cost of distribution in Canada is not due alone to the freight charges. It also costs more to sell goods, for customers must be reached in some more personal way than through the mails. Mail order business has become a big factor in this country, because of these very conditions, but the fact that it is still only a small proportion of the total shows its limitations. Business can as a general rule be secured more cheaply by mail, but the personal element is often more effective.

In recent years a network of telephones has been spread throughout the rural districts of Canada. Every business man can now be reached in this way, and salesmen have this alternative as well as travelling. It is to emphasize these possibilities that campaigns are being conducted by the telephone companies of Canada and the United States. The New York Telephone Company in a recent advertisement gives a typical example of what one salesman did in one day of calling on customers by "Long distance":—

Distance covered, 2,800 miles.
Customers reached, 40.
Orders secured, 23.
Time of average call, 2¼ minutes.
Cost of average call, 70 cents.
Per cent. of expense to sales, 3½.

The cost of the average call for a district say within a radius of 200 miles of a city in Canada would be about the same. As the distance increases the cost of the telephone call, of course, increases, but so also would travelling expenses. There are some things which cannot be accomplished by telephone, such as the securing of new customers, but in other ways it could be more fully utilized than at present.

### THE ROLE OF THE PROPHET

Presidents and directors of Canadian companies might well take heed of the example set by Charles P. Johnston, chairman of the British Canadian and General Investment Company, at its annual meeting held in London, Eng., on October 9th.

Mr. Johnston said:—"In view of all that has happened, I altogether decline to assume the role of a prophet." After making appropriations to reserve steadily for several years, so that dividends might be equalized, the company was this year obliged to pass the dividend on the ordinary stock entirely. This was evidently the cause of the chairman's disappointment. Mr. Johnston had never indulged in rash predictions, but he had "never contemplated such a contingency arising".

Canadian companies under like circumstances too often deal out promises in place of dividends. The result is that shareholders are for the time being kept quiet but sooner or later dissatisfaction breaks out, often resulting in a change in management. There is not the same confidence between management and shareholders here that there is in the old country. Their methods could be profitably copied in this respect.

It is reported in New York that a 25 per cent. retaliatory duty against Canadian Lumber is contemplated. A duty which will injure the United States more than it will Canada need not be feared by Canadian interests. The United States is only too glad to obtain our raw materials.

One of the first points which the National Railways Board will have to settle is that of headquarters. This may be its first chance to show whether it is a political or a business board. If Montreal seems to be the best location, no hesitation should be shown in moving headquarters there.

### TWO CLASSES OF PEOPLE

William T. Benallack, of Chicago, brought greetings to the annual meeting of the Quebec Pond of the Blue Goose, held in Montreal recently. There are, he said, two classes of people in the United States—those who have a still, and those who still have a little.

## *Personal*

E. C. H. DURHAM, joint general manager of the London Assurance Corporation, who has been visiting Canada and the United States, sailed for home on the 21st of October.

C. F. HURHAHN, president of the following companies: Fire Reassurance Co. of New York; Rossia Insurance Co. of America, and the American Fire Insurance Co. of New York, visited Canada recently.

T. D. RICHARDSON, New York, a member of the firm of A. & J. H. Stoddard, New York Underwriters Agency, spent a few days in Montreal recently.

JOHN SWANSON, general manager of the London Guarantee and Accident paid a visit to Canada recently.

W. T. PERRY who since 1918 has been manager for Canada of the Ocean Accident and Guarantee Corporation has been promoted to the position of assistant manager at the head office of the corporation, London, England.

SIR JOHN AIRD, general manager of the Canadian Bank of Commerce, has been selected as Canadian vice-president of the American Bankers' Association. ain't that nice!

## *Obituary*

FRANK H. HEWITT a commissioner of immigration for the Canadian Government, with headquarters at Kansas City, died suddenly at Waco, Texas, on October 25th. Mr. Hewitt's home was at Winnipeg.

H. C. RUSSELL died in Vancouver on October 24th. The late Mr. Russell was born in Alexandria, Scotland, 60 years ago. He received his early business training in Glasgow. Mr. Russell was associated with Evans, Coleman and Evans in Vancouver and was manager of the British Columbia Shipping Company.

E. M. SIPPERELL, for many years general agent for the Maritime Provinces of the Mutual Life Assurance Co., died at his home in St. John, N.B., on October 25th.

MATHEW deS. WEDD widely known in banking, died in Toronto on October 30th. The late Mr. Wedd was formerly associated with the Dominion Bank.

FRANKLIN P. BRADY, Toronto, adviser to the executive, Canadian National Railway, died at his Winnipeg residence on October 21st. Mr. Brady was born at Haverhill, New Hampshire, 69 years ago, and was educated at Newbury, Vt. He came to Canada in 1880, entering the service of the Canadian Pacific. In 1907 he became a member of the Board of Management and General Superintendent of the Intercolonial Railway with headquarters at Moncton. In 1915 he went to Winnipeg as General Manager for Western lines of the Canadian National Railways. Three years later he was appointed General Manager of the Eastern lines of that railway, and subsequently was General Manager of the Canadian National Railway lines east of L'Brien Que., with office at Montreal.

### ACCIDENT AND SICKNESS CONDITIONS.

#### Legislation Planned for British Columbia Follows Draft Approved by Conference

(Special to The Monetary Times.)

Vancouver, Nov. 2.—An Act to provide uniform statutory conditions for accident and sickness policies will be introduced at the present session of the British Columbia legislature. The act will be based upon a draft approved by the Superintendents of Insurance of the provinces of Canada at their recent conference. At the request of the insurance department of the provincial government, the Insurance Federation of British Columbia is co-operating with the department in a mutual endeavor to make the various clauses thoroughly practical and satisfactory to all parties.

The definition of "accident insurance" as given in various acts in force throughout Canada differs materially in the different provinces. This is one of the points which it is hoped to clear up before the proposed B.C. Act comes before the house.

### HOLDS POLICY NOT CANCELLED.

#### British Traders Must Pay On Policy After Giving Notice of Cancellation.

In an action at Toronto before Justice Lennox between McCoy and the British Traders Insurance Company, Limited, the plaintiff's claim was to recover $2,400 for loss of the stock in trade and office furniture, trade fixtures, etc. of a general store and trading post, under a policy of fire insurance, subject to statutory conditions, issued by the defendants to the plaintiff on the 10th May 1921. The property was totally destroyed by fire on the 20th June 1921. The company had immediate notice or knowledge of the fire and loss. Proofs of loss were not delivered to the defendants in writing until the 8th September 1921.

On or about the 1st June 1921, the company's subagent wrote to McCoy advising him that the company had cancelled his policy "from this date as they consider the bush hazard too great." In the letter McCoy was asked to call upon the writer and receive a return of the unearned premium. Subsequently, a part of the unearned premium was returned—the balance was not tendered until after the fire. McCoy used the first cheque and was about to use the other, believing that the Company had power to terminate the insurance as they purported to do.

Statutory condition 11 (Ontario Insurance Act sec. 194) was a term of the contract and controlled the company in the exercise of their right to cancel. Having regard to that condition, the learned Judge was of opinion that the policy was not cancelled by the notice.

Cancellation by agreement was not arguable. An agreement was never thought of—an offer or proposal or acceptance was never dreamed of. The company simply said. "We have cancelled your policy from this date. The suggestion of a change of position was equally untenable. The company never changed their position as a matter of fact. They took an unauthorized position and stuck to it without reference to anything McCoy might say or do.

Judgment was given for McCoy for $2,400 with interest from the 8th November, 1921, and the costs of the action.

### AUGUST BANK STATEMENT

Through a typographical error in the August bank statement published in these columns on September 29, some figures of the Royal and Dominion Banks were reversed. The following is a correction for the four columns which were wrong:—

| August 31 | Royal Bk. | Dom. Bk. |
|---|---|---|
| Balance due to Dominion Government after deducting advances for credits, pay lists, etc. ... | $10,871,293 | $ 3,315,500 |
| Balance due to provincial governments | 1,384,230 | 364,631 |
| Deposits by the public, payable on demand in Canada.. | 74,139,443 | 24,252,182 |
| Deposits by the public, payable after notice, or on a fixed day in Canada | 172,633,887 | 62,768,041 |

63 Good Investments
Listed in This Month's Guide

No matter how small or how large the amount you have to invest, you will find among the sixty-three securities listed in this "Guide" the precise investment you need to meet your requirements as to safety, interest, maturity and marketability.

There is also a very good selection of Bonds in Odd Amounts from $100 upwards.

# Forms of Security For Bank Loans

By ROBERT P. WEBBER

One of the most important phases of banking practice is the determination of the kind of security acceptable as a basis for loans. It is important because the kind of security accepted affects the stability of the banks and indirectly the stability of the whole credit structure of the country. Banking practice and government regulation should tend to draw the line as fine as possible between acceptable and unacceptable security, on one hand at a point where stability will not be undermined and on the other where no adequate security will be refused and in that way, hamper production and progress by a lack of credit. As the bank profits by lending its credit there is a tendency for it to stretch a point as to what form of security it shall accept as a basis for loans. Government legislation on the subject is for the purpose of curtailing the bank's power as to the form of security it shall accept as legal security for loaning credit. There are two qualities that good security should possess; one is that the security should represent a greater cash value than the loan and the other is that it should be easily and quickly liquidated. Several forms of security accepted in Banking practice will be reviewed in this article, the present legislation on security as amended by the revision of the Bank Act in 1913 will be examined, and an attempt made to suggest some questions that will face Parliament in the next Revision in 1923.

The three forms of collateral commonly employed as security for commercial loans are (1) Stocks and bonds; (2) Merchandise; (3) Real estate. Stocks and bonds are the everyday form of security employed. Merchandise is not considered so good because of the fluctuations in value that may take place. Real estate is not good security for commercial loans because its cash value can not always be quickly realized. Banks are refused the privilege of accepting real estate as a first security but they may accept it as an additional security. This provision provides a loophole for the evasion of the spirit of the law. The banks are able to make loans on the understanding that real estate will be accepted as an additional security a few days later. It is a general practice for Bills receivable to be accepted as collateral security, also certain accounts receivable although the latter is not considered a good form of security because of the necessary clerical work and investigation involved. Loans based on ware-house receipts are extensively used. This is recognized as one of the safest forms of security and will doubtless advance in importance because of the decline in recent years of the amount of the commercial paper presented at the bank to be discounted. Bills of lading and life assurance policies are often accepted as a basis for a loan.

### Provisions of Our Law.

The most important section of our present Bank Act that defines what security shall be accepted as a basis for loans is the well-known section 88 that received so much consideration at the hands of the legislators in 1913. The first part of the section has the same provisions as had the Act that preceded it, namely that loans might be granted to any wholesale purchaser, shipper or dealer in products of agriculture, of the mine, the forest, the quarry, the lakes or rivers, or any live stock or dead stock dealer on the security of the products that he dealt in. These provisions were excellent so far as they went. By making its loans on this form of security the banks were assured of adequate security and the country profited by the material aid rendered to trade and commerce; the producer, however, suffered. While business profited by being able to command bank credit the producer of agricultural products was often in financial difficulties during autumn seeding although he might have a quantity of threshed grain in his possession which he could not get to market. To meet this difficulty a clause was included in the last revision of the act in 1913 that permitted the banks to lend money to the farmer on the security of his threshed grain. This went far but the farmers of both the west and east are asking if it went far enough as judged from the standpoint of its working results. The contention is that the banks are far more ready to help forward commercial enterprises than they are to forward agriculture.

Section 84 of the present bank act states that the Banks may loan money on standing timber, or the right or license held by persons to cut and remove timber, and money may be loaned to a receiver or a liquidator under the "winding up Act" the security to be fixed by a court of competent jurisdiction. Under section 85 money may be loaned to ship builders, the ships completed or under construction to become the property of the bank in default of the payment of the loan. Section 85 permits the bank to acquire and hold any bill of lading or ware house receipt as security for a loan, the importance of this form of security having been pointed out in the preceding paragraph. The bank has the same right to sell security attained by the default of payment of a loan that an individual has, but this right of sale may be waived if the bank so desires. Regarding real estate the bank may own any lands necessary to it in pursuit of its regular business and it may obtain mortgages or other additional security for debts contracted in the pursuit of its regular business, and may purchase any lands under execution, insolvency, or order of decree of the court as belonging to any debtor of the bank (a) by a mortgage or other encumbrance having priority or other encumbrance held by the Bank, (b) under the power of sale given to it for the purpose. Any real estate so acquired must be sold within seven years unless the time is extended to twelve years by special permission of the Treasury Board. Any real estate not sold within twelve years may be forfeited by the government.

### Section 88 Amended

Section 88 of the Act was amended to meet the need of the farmer and was primarily intended to apply to the western farmer who is in greater need of financial assistance in the fall than the eastern farmer because of the distance to the railroad and because greater dependence is put upon threshed grain. It was evidently the intention of those who framed the act to benefit the producer but in the light of ten years experience neither the agriculturists of the east or west are satisfied with the facilities provided by the Act for them to obtain money.

In Ontario the supposed inadequacy of the banks to meet the need of the farmers is shown by the organizing of a system of rural credits by the provincial Legislature, and in the west by organizations that are being formed to get much wider concessions at the next revision than at present exist. It is desirable that the western farmer should have the facilities provided so that he can market his grain at his convenience or at the time it will bring him the greatest profit. There is a more or less unvarying demand for wheat during the whole twelve months of the year and it is an economic advantage to have the grain stored in the farmer's barn instead of the whole western crop being stored in the elevators or choking the transportation facilities while being put on the market during a few weeks in the fall.

The difficulty is that a clause in the Act making grain legal security does not necessarily give the farmer financial assistance. There are still difficulties from the banker's viewpoint. Grain can very easily be moved from the farmer's granary either by the farmer himself or by a thief and the bank might find that the security on which the loan had been made had dissolved. Even if the grain were locked in a burglar proof barn and the banker had the key there would still be the question of the quality of the grain on which the loan was made. In the east the revised section has little effect on the farmer one way or another. If he is known to the banker he can get a small loan on his good name taking his movable assets as security; this he could obtain prior to the last revision of the Act, but it is only on rare occasions that money is lent on a lien on his grain. The farmers of the east and the west are dissatisfied with—what they consider the unfair way in which the banks discriminate against them in favor of the manufacturing and commercial interests and are preparing now for a fight for greater changes at the next revision. It is doubtful if any changes can be made in commercial banking legislation that will meet their specific needs. Loans to farmers are not considered good banking and no amount of legislation will make them so. A suggestion on the subject that might be worth considering, would be the separation of the savings deposits from the current deposits, make them two separate branches of banking and encourage the banks to make loans to agriculturists from the savings deposits, accepting the farmers land or other assets not easily liquidated as security.

## NOT REQUIRED TO RE-ENDORSE NOTE

In the case of Jackson Machines Limited v. Michaluck recently decided by the Saskatchewan Court of Appeal, the defendant Michaluck had made a promissory note in favor of the company which endorsed it to the Bank of Commerce as collateral security for the company's indebtedness. Michaluck defaulted and the Bank of Commerce sent the note to the Union Bank to have its solicitors sue in the company's name but without endorsing the note back to the Jackson Company.

The Court held that it had power to give effect to the rights of the parties without requiring the endorsation of the note by the Bank of Commerce. The Court referred in the judgment to a similar case in which it was said: "If the bill was discounted by the Bank of Ottawa it was merely forwarded to the Bank of Commerce, as their agents, to collect; this failing, it would be returned in due course to the Bank of Ottawa. Upon their giving it back to Whitla it is to be assumed that their claim on it was satisfied. If it was not discounted by the bank, but merely left for collection, it would come back as of course to the hands of Whitla as lawful owner. Quacunque via it seems settled on the authorities that when the bill came hack to Whitla he was remitted to his original rights against the acceptor."

## CONTROL OF WIFE'S SAVINGS.

The right of a husband to control the savings of his wife, when they are married under community of property, was maintained by the Quebec Court of Appeal in a judgment delivered on October 25.

The point was raised by A. Bonin, who had taken action against the Montreal City and District Savings Bank in which he asked to be authorized to control his wife's account, amounting to $6,084.30. The Superior Court had dismissed his action.

The Court of Appeal in a lengthy finding reversed this judgment and upheld Bonin in his claim. The bank did not intervene, the wife only contesting the claim.

Bonin held that as head of the matrimonial community he had the right to administer all therein contained. The wife submitted that under the Bank Act, the latter was held to accept and deliver to her any deposits she might have made, regardless of her civil right to do so. In maintaining the appeal, the court concluded that the husband, where community of property exists, was the head of the partnership and had full and absolute control of all the assets thereof.

## ATTEMPT BANK ROBBERY

A gang of nine robbers made an unsuccessful attempt to loot the branch of the Royal Bank at Pipestone, in southwestern Manitoba, at 3 o'clock on the morning of October 25. It is reported that information had been received that a robbery was planned and that a posse of armed citizens and constables was waiting for the bandits when they attempted to break into the bank premises through the back door. Shots were exchanged and the robbers fled, making good their escape, presumably in motor cars Previously they had cut all wires leading into the town.

# When You Remit Money

For remitting money anywhere, Bank Drafts and Money Orders are without equal for safety, economy and convenience.

If you wish to send money abroad, a draft from this Bank will prove to be the best medium. For remitting sums up to fifty dollars in Canada, Bank Money Orders are the most convenient.

Ask at this Bank for any further details

### CONTROL OF LONDON FINANCE

Ontario's legislation with regard to joint stock companies is far from perfect and affords inadequate protection to investors, remarked Justice Middleton in dismissing an action entered by the London Finance Corporation against the Banking Service Corporation. The plaintiff company seemed to be a child of the defendant company. Two barristers and three stenographers were put in as provincial directors of the plaintiff company on its incorporation, and entered on certain contracts with the defendant company.

Says Justice Middleton: "The puppet directors have performed their functions, and the provisions of the law prohibiting directors from voting on contracts in which they are personally interested and requiring statements to be made in the prospectus of all directors interested and property intended to be acquired on contracts to be made having been successfully evaded, the real actors emerged from the shades.

"The proceedings to oust these directors are declared void, and the defendants are held entitled to vote on the common stock held by them which gives them absolute control of the plaintiff company until the impossible task has been performed of selling an enormous amount of stock."

### LOAN TRANSFER BOOKS.

On account of the interest payments due on the first day of December, 1922, the transfer books of the 1917 Victory Loan and the 1915-25 war loan will be closed from October 31 to November 30, inclusive, according to an announcement from the Department of Finance. Bonds which are received at the Department for transfer after Oct. 31 will not be transferred until after the opening of the transfer books on December 1, it is said.

### NEW DISCOUNT COMPANY

The Federal Discount Corporation of Canada, Limited, has been organized with a capital of $2,000,000. The company will deal in commercial paper, automobile paper, trade acceptances, second mortgages, land contracts, etc.

The following is the personnel of the board:—E. H. Jewett, Hon. Manning Doherty, Frank F. Tillotson, F. H. Sheppard, Sir Wm. Mackenzie, Geo. M. Seymour and W. H. Thorburn.

Thorburn, Sweetman & Co. are making a public offering of the corporation's stock.

### INTERPRETATION OF A WILL

By his will a testator directed that his executors should sell his farm and divide the proceeds between his sons as directed; after the date of his will the testator himself sold the farm part of the purchase price being secured by a mortgage.

The Ontario Supreme Court held that the sale merely anticipated the conversion which the will directed and was in no way a revocation of the will, but only made the proceeds more ready for distribution in accordance with its terms.

### EXCHANGE ON RAILWAY RATES

It was announced on October 31 by the Board of Railway Commissioners for Canada that the rate of exchange in connection with shipments of freight between points in Canada and the United States, from November 1 to 14, inclusive, would be one-eighth of one per cent. No surcharge will be collected on international freight or passenger business.

### COBALT ORE SHIPMENTS.

The following are the shipments of ore from Cobalt station for the week ended October 27th:—Mining Corp., of Canada, 367,188; Nipissing Mine, 340,870; total, 708,058.

The following are the shipments of ore from Cobalt Station for the week ended November 3rd:—Mining Corp. of Canada, 489,100; Dominion Reduction Co., 87,000; total, 476,100. The total since January 1st is 16,585,440 pounds or 8,292.7 tons.

## *Bank Branch Notes*

Herman Hadley, manager of the Royal Bank at Margaree Harbor, N.S., which branch is closed for the winter, is supplying in the bank at Inverness, N.S., until the arrival of the new manager, Mr. McArthur, from Prince Edward Island.

The branches of the Bank of Hamilton at Drayton, Ont., and Ethel, Ont. (sub branch to Atwood, Ont.) have been closed.

The Molsons Bank has opened its new branch in the St. Denis Block, at London street and Wellington avenue, Windsor.

James Hanna has been appointed manager of the branch of the Bank of Montreal at Allenford, Ont., succeeding L. Fothergill who has been transferred to London, Ont.

The Bank of Montreal has acquired the 70 feet south of the building formerly occupied by the Merchants Bank, at the corner of Pender street, Vancouver, and now used by the Bank of Montreal since the two institutions were merged. The Imperial Bank has purchased the Bank of Montreal building at the corner of Dunsmuir and Granville streets, Vancouver.

### WINDING-UP PROCEEDING

At an extraordinary general meeting of the members of the Pacific Mainland Mortgage and Investment Company Limited the following special resolution was duly passed and confirmed: That the company be wound up voluntarily and that Sidney Wilson, Vancouver be appointed liquidator.

### T. AND N. O. RAILWAY.

Chairman Lee, of the Temiskaming and Northern Ontario Railway Commission, on October 26 presented a cheque for $350,000 to the Ontario government, which represents the net earnings of the railway up to the end of the fiscal year, October 31. "The cheque would have been about $500,000 if it had not been for the fire," stated Mr. Lee. "The condition of the road was never better and the equipment is most modern obtainable."

Extension north of Cochrane is proceeding. He expects that steel will be laid as far as the second crossing of the Abitibi by the end of December, while the entire 70 miles is under active construction.

### RECEIVER FOR BRYANT ASSETS.

The Registrar of Bankruptcy at Montreal has granted a petition presented by John T. Thorne, of Toronto, and appointed an interim receiver to receive the property of Norris P. Bryant, stock broker. The Crown Trust Company was named interim receiver. Mr. Bryant stated in conversation that a contestation had been filed by him.

A writ was issued on October 14th by Mr. Thorne, trustee of the property of Bryant Isard and Co., authorized assignees, claiming $121,050 from Norris P. Bryant, of Montreal, under an alleged agreement, and Thorne also asked for judgment that Bryant was a partner in the firm of Bryant, Isard and Co., and liable for the debts of said partnership which amount to $504,000.

### ALBERTA MORTGAGES

To consider mortgage legislation and enforcement, a committee of members of the Legislature, officials of the United Farmers of Alberta and the Alberta Mortgage Loans Association may be appointed. Attorney-General Brownlee at a recent meeting of mortgage men intimated that the Government was considering the advisability of appointing such a committee.

The restriction of the personal covenant and simplification of proceedings in necessary cases of legal action are requested by the mortgage association.

### TORONTO LIFE UNDERWRITERS

F. H. Kirkpatrick, of Toronto University, was the speaker at a meeting of the Toronto Life Underwriters' Association on October 27, his subject being methods of approach. The points he emphasized were pleasing appearance, a good vocabulary, and manner of speech.

President Wm. May, Jr., intimated that this address was a new departure in the work of the Association, and one which may be developed.

### LOAN AND TRUST DEPOSITS

Below is given a statement of Ontario loan and trust corporations' deposits and securities as at September 30, compared with June 30:—

| | June 30 | Sept. 30 |
|---|---|---|
| Total Deposits | $35,964,689 | $34,696,574 |
| Cash in hand or in Bank of Canada | 3,551,493 | 3,369,985 |
| Dominion or Provincial Bonds or Guarantee | 8,844,592 | 7,997,426 |
| Ontario Municipal Debenture | 4,222,259 | 4,070,245 |
| Demand Loans on similar Securities | 602,130 | 480,059 |
| Total Cash and Securities and Loans | 17,220,474 | 15,917,705 |
| Percentage of the total of Cash Securities and Loans to Deposits | 47.88 | 45.88 |

### TRUST COMPANIES' INVESTMENTS

The following is a statement of guaranteed investments of Ontario trust companies, and securities allocated therefor as at September 30, compared with June 30:—

| | June 30 | Sept. 30 |
|---|---|---|
| Trust Deposits | $ 7,812,215 | $ 7,547,891 |
| Specific Guaranteed Investments | 17,188,233 | 17,307,283 |
| General Guaranteed Investments | 8,995,390 | 9,495,852 |
| Total Funds | 33,995,838 | 34,351,026 |
| Cash | 852,263 | 897,574 |
| Dominion of Canada Provinces of Canada Bonds and Securities Guaranteed by those Governments | 2,065,497 | 2,204,753 |
| United Kingdom Bonds or Securities guaranteed by that Government | 216,166 | 235,367 |
| Canadian Municipals, Public School Debentures or Securities guaranteed by Ontario Municipalities | 2,813,652 | 2,873,129 |
| Western Canada School Districts and Rural Telephone Debentures | 1,803,792 | 1,784,494 |
| First Mortgages on Real Estate | 22,730,253 | 23,138,335 |
| Demand Loans on Trustee Securities | 1,325,807 | 1,225,388 |
| Securities not authorized as Trustee Investments | 2,197,294 | 2,001,656 |
| Total Investments | 34,004,727 | 34,360,700 |

### ACTUAL AND EXPECTED MORTALITY

The "Spectator," New York, published in a recent issue a table showing the percentage of actual to expected mortality, 1907-1921, for a list of life insurance companies. The list included three Canadian companies, the figures for which are reproduced herewith:

(Copyright by the Spectator Company, New York. Reprinted by permission of the Publishers).

**Percentage of Actual to Expected Mortality**

| | Canada Life | North American | Sun Life |
|---|---|---|---|
| 1907 | 65.44 | 65.06 | 92.95 |
| 1908 | 67.61 | 42.46 | 79.36 |
| 1909 | 59.46 | 46.04 | 67.79 |
| 1910 | 57.27 | 61.35 | 71.81 |
| 1911 | 57.78 | 73.56 | 76.53 |
| 1912 | 60.25 | 62.08 | 77.34 |
| 1913 | 55.16 | 40.62 | 69.45 |

## IMMENSE AMOUNT OF GRAIN BEING MOVED

### Vancouver Elevators Full and Are Waiting for Ships—Grain Being Moved by Rail.

Canada's crop movement is assuming such large proportions that there appears to be a danger of a congestion at the various outlets, according to recent reports received.

Grain has during recent weeks flowed into Vancouver at such a rate that the elevator on October 25 was reported to be full, holding 950,000 bushels of grain. The C. P. R. was at the time giving no permits to let cars through to Vancouver that were loaded later than the previous week. According to reports from officials in the freight department of the grain transporters, 532 cars were in the C. P. R. yards on October 24 and October 25 saw the number pass the 600 mark.

### Cars Being Held.

J. Bennett, superintendent of the elevator, stated that no more cars could be taken in until a few ships arrived to relieve the elevator of the pressure. The new cleaning machines are expected to be ready in a few weeks. According to advices from Calgary there is a surplus storage space for approximately one and a half million bushels, which will aid the Vancouver elevator in relieving the congestion. The grain now coming into Calgary is being cleaned there, as the two machines working day and night at Vancouver are unable to get through all the grain which is flowing in.

F. H. Clendenning of the C. P. R. stated that he was certain that next week would see a better situation in the yards. Until all the grain at present in Vancouver was discharged no permits would be issued and the railroad would thus be able to control the flow and in time check any symptoms of congestion.

### Congestion.

At high tide in the movement of grain east with railways, elevators and docks congested from the prairies to tidewater, nearly one million bushels is already tied up in the Lachine canal as a result of the damage caused to No. 1 lock, which was hit by a lake boat.

Railway officials of Port Arthur on October 25 said there is an immense volume of grain being shipped east by rail. With all outlets to the seaboard choked all along the water route, an impetus has been given to all rail movements from Port Arthur and Fort William.

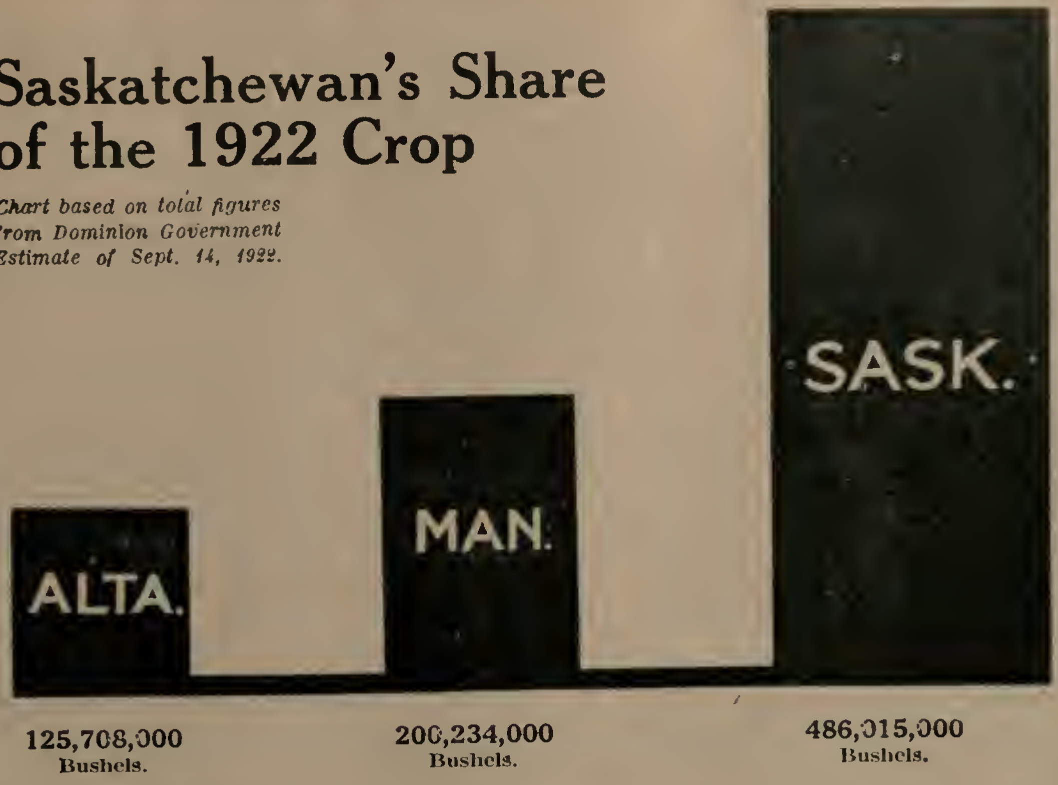
Large trains, some of them containing fifty cars, are leaving the head of the lakes hourly and many men are being employed in moving the steady grain stream. The traffic into Port Arthur and Fort William is enormous. Over the crossing at West Fort William, where the three railways converge, an average of 1600 cars a day have been gliding.

## CONTRACTS AWARDED

E. E. Blackwood, general agent for the Northern Pacific Railway Company in Victoria, has been advised that his company has lately awarded contracts for the immediate construction of the following freight cars: 1,000 refrigerator cars; 1,000 50-foot, 100,000 lbs. capacity, automobile cars; 50 steel gondolas; 70 passenger refrigerator cars and 250 40-foot stock cars.

Saskatchewan's Share of the 1922 Crop

*Chart based on total figures from Dominion Government Estimate of Sept. 14, 1922.*



Get in on the upward swing of trade in Saskatchewan

Saskatchewan has just harvested the largest crop in its history, bigger even than the bumper crop of 1915. Saskatchewan's crop of wheat and oats is far larger than the similar crops of Manitoba and Alberta combined.

Coming on top of marked recovery of industry generally this extraordinary yield makes the outlook in the central prairie province unusually promising. Confidence in the future is high.

Regina is the only city west of Winnipeg which has enjoyed a building boom this summer. This fact alone —especially when it is remarked that most of this building consisted of dwellings—is an indication of the prosperity and confidence in the immediate future which characterizes southern and central Saskatchewan.

Get in on the upward swing of trade in this territory. Babson says Saskatchewan's business prospects in the next several months are the best in Canada. Let the Leader-Post help you increase your sales this fall and winter in our responsive field.

## SECURE FUEL INDEPENDENCE

### Dominion Government May Establish Huge Plant To Convert Coal Into Coke.

With the view of helping to ensure the fuel independence of Canada, the Dominion Government is considering the establishment of a huge plant at Sydney, N. S., for the treatment of bituminous coal and its reduction into coke as a substitute for anthracite. Experts of the Mines Department have been asked to report on the project.

The recurrent coal strikes in the United States and the advice that ten years hence, American anthracite for export may not be available in any large quantities, suggest measures for the development of domestic sources of supply. Coke was urged as a substitute for anthracite by experts before a fuel committee of the House of Commons two years ago. One argument in its favor is that it can be transported much more economically than coal. The supply from the proposed Sydney station would be designed especially for central Canada. A similar station may be established in the West if necessary, but it is calculated that British Columbia coal or Alberta coal, either in its natural form or as coke, will not come east of Winnipeg.

The department is having an investigation of the lignite briquetting process at Bienfait, Sask., to determine its practicability. About a million dollars has been spent on plant and experiments, the difficulty being in the briquetting more than the burning qualities of the fuel.

## COMPANIES PAY DOUBLE TAX

### Effect of Ruling in Case of Vancouver Insurance Companies—Not Intention of Government

(Special to The Monetary Times)

Vancouver, Nov. 1.—Dominion Fire Commissioner, J. Grove Smith, of Ottawa, has been investigating conditions along the Vancouver waterfront and states that a fire boat for this port is a vital necessity. As a result of the disastrous fire at the False Creek Lumber Co. plant recently, attention has again been focused upon this need. The matter was fully discussed at a meeting of prominent civic organizations held a few days ago, at which the following bodies were represented: Harbor Commission, B. C. Fire Underwriters, Board of Trade, City Council, Fire Marshals, etc. Two factors militate against the successful operation of a fire boat in the False Creek area, one being the congestion of log booms opposite most of the sawmills and the other the impossibility of reaching most of the plants with a boat at low tide.

### Vancouver Tax

Insurance companies doing business in Vancouver may have to pay the special tax of $100 each, imposed upon them by the city under a bylaw passed several months ago. The supreme court has dismissed an appeal of The California Insurance Co. and the Pacific Coast Fire Insurance Co. who were ordered to pay under a test case brought in the police court. Legal advice is being secured as to whether the case will be taken to a higher court. Company representatives here state that the Provincial Government collects approximately $100,000 yearly in taxes from insurance companies doing business in B. C. and that it was not the intention of the government, when imposing this provincial tax, to permit any municipality to levy additional taxes, but apparently a "joker" was slipped into the Vancouver City Incorporation Act, giving the city powers which were not intended by the government. The companies are much concerned on account of the far-reaching effect which might result if the precedent is established that municipalities may tax insurance companies.

Reduced rates on mercantile risks in the business sections of Vancouver are rapidly being published by the B. C. Fire Underwriters' Association. The reductions are applicable to all policies written on or since January 1st, 1922. The decision to make the rates retro-active was the result of a recommendation of the Vancouver Fire Insurance Agents' Association in order to compensate policy-holders for the lapse of time since reduced rates were promised. The delay was caused by the enormous amount of work necessary in re-inspecting and rating the business sections of Vancouver. Every available surveyor of the Board has been actively engaged in this special work for some time. The actual average percentage of reduction has not been worked out but on the whole a substantial saving to Vancouver property owners will result, although some risks may get increased rates where the hazard is actually increased since last inspection.

Vancouver fire insurance agents have had their work greatly multiplied by the necessity for putting through thousands of policy endorsements and paying return premium checks to their policyholders.

Another step has been taken by insurance agents of British Columbia in their effort to get the provincial government to pass an agents' licensing and qualification act. A strong deputation representative of all insurance organizations in the province waited upon the attorney general and minister of finance at Victoria recently to urge the passage of the proposed act at the present session of the legislature. Some objection had been voiced by government officials on the ground that the proposed act might be considered as authorizing the formation of another "close corporation" but the agents pointed out at the meeting that the standard of qualifications necessary before an agent could secure his license would be set by the superintendent of insurance, who is a government official. British Columbia is said to be the only province where there is no such act on the statutes. Elsewhere in Canada it is said that agents' licensing acts have done a great deal to improve the status of the business and secure better insurance protection to policy holders by reason of eliminating incompetent agents.

## INSURANCE COMPANIES RECOVER

The Continental Fire Insurance Company of New York and the Fidelity Phœnix Fire Insurance Company succeeded recently in an action against the city of Sherbrooke to recover taxes which had been paid by mistake. These two companies issue a joint fire insurance policy under the name of Fidelity (Fire) Underwriters of New York. The city of Sherbrooke believing that Fidelity (Fire) Underwriters of New York was the name of a company instead of a policy sent a tax bill addressed to it at Montreal, which bill was received by the Continental Fire Insurance Company and paid by it for two years running, the payment being shared by the Fidelity Phenix Fire Insurance Company. When the mistake was discovered the two companies claimed the amount of the tax back from the city of Sherbrooke alleging that each company had paid the tax imposed upon it individually and that in addition they had paid jointly the tax for the Fidelity (Fire) Underwriters of New York which was only the name of a policy and not an insurance company. The city denied the allegations of the companies and pleaded that the Fidelity (Fire) Underwriters of New York was an insurance company and that the money had been properly paid. The case was tried before Judge Globensky who gave judgment with costs for the insurance company.

## PACIFIC COAST INSURANCE COMPANY

The Pacific Coast Fire Insurance Co. results for the first ten months show a substantial increase of premiums written, said J. W. Greer, managing director of the company to The Monetary Times, with a net loss ratio of 40 per cent. The company continues to extend its organization in the four western provinces, although Ontario and Quebec are showing an increase over last year.

The company has recently established a branch office in Regina, with a view of giving better and more prompt service to the smaller agencies in the province of Saskatchewan. C. D. Forbes has charge of the Regina office and also the organizing throughout the province.

Mr. Greer states they were not interested in the recent northern Ontario conflagration, the company having retired from this district some time ago.

## GUARANTEE OF CONTRACTS

Mention was made in these columns recently of the decision of the city of Montreal not to accept guarantee bonds as security for the performance of contracts. The Builders' Exchange, however, is again to approach the executive committee of the city with a proposition that in the case of contracts to the city of $25,000 and over that the city accept in lieu of a certified cheque for the full amount of the 10% of the tender, 50% of the amount in a certified cheque and the remaining 50% in a bond to be furnishtd by a reputable guarantee company approved by the city authorities.

## CLAIM SMOKE DAMAGE

Crystal Limited, gents furnishing firm of Edmonton, Alta., has commenced action in the Supreme court against seven insurance companies, alleging non-payment of the amount of the policies for which they were insured, with respect to damage said to have been suffered from smoke when the premises of the Williams' Shoe store, located next door to the plaintiffs' establishment, was the scene of a fire on July 25, of this year.

Judgment for the sum of $7,269 to be distributed among each of the defendant companies is asked by the plaintiff company. The policies held by the plaintiffs range from amounts of $1,725 to $3,000, according to the claim, and were effective for a period of one year.

The seven defendant companies are: The Canada National Fire Insurance company, with headquarters at Winnipeg, Manitoba; The Home Insurance Company of New York, U.S.A.; The Quebec Fire Assurance Company, of Quebec, Canada; The American Equitable Assurance Company of New York, U.S.A.; The Century Insurance Company Limited of Edinburgh, Scotland; The American Central Insurance Company of St. Louis, Mo., U.S.A.; and The Firemens' Fund Insurance Company of San Francisco, Calif., U.S.A.

## RAW MATERIALS BURNED

### Right of Owner to Insurance—Proceeds Were Assigned by Trustee to Creditor

In a recent action on two fire insurance policies the Ontario Supreme Court has held that a party who holds goods to be manufactured may insure the goods and assign the policy to the owner of the goods—that the owner has an insurable interest and must be reimbursed on a loss occurring.

The action was brought against Merchants' Fire Insurance Co. by one Cole. Cole had made a contract with "F. E. Wray in Trust" to manufacture overalls—F. E. Wray had originally been in business for himself but having made an assignment for the benefit of creditors, the assignee sold the assets to one Pringle, who was a large creditor of Wray's, and who arranged to have the business carried on for him by Wray as manager under the name "F. E. Wray in Trust." Cole supplied the raw material to the firm which manufactured overalls for his company. Shortly after, the premises of the firm were destroyed by fire including a considerable quantity of the goods supplied by Cole. Wray at this time was carrying $6,000 of insurance, $2,000 in the defendant fire Company, the policy being issued to "F. E. Wray in Trust" on "Machines and machinery, etc., on stock in trade of every description, manufactured and unmanufactured and in process thereof manufactured or dealt in by the assured, their own, held in trust or on consignment, or sold but not delivered, or removed, etc."

On the day after the fire Wray assigned to Cole the policies in the defendant fire company without Pringle's consent. Pringle claimed $645 of the insurance, Cole claimed it all—consequently the company interpleaded.

### Insurance Company's Plea

The defence of the company mainly relied on the sixth statutory condition, viz.: "6. The company is not liable for the losses following, that is to say: (a) for the loss of property owned by any other person than the assured unless the interest of the assured is stated in or upon the policy . ."

Chief Justice Meredith, in his written judgment, says: "So that the only real question as to liability upon the policy, in respect of the goods owned by the plaintiff Cole but in which, especially in their manufactured state, the insured has very substantial rights and interests, is whether 'the interest of the assured is stated in or on the policy.' "

"It may be said that held 'in trust' means held in trust by Wray for the real owner of the business carried on in the name of F.E. Wray in Trust; but even if that be so, why may it not mean, and more plainly mean, in trust for the plaintiff Cole? A bailee is commonly and not improperly, called a trustee for the person whose goods he has in bailment.

### Upholds Claim for Proceeds

"I find no difficulty in giving effect to the insurance which the parties intended to effect; nor in the plaintiff Cole maintaining this action. He has an assignment of the policy; but it is said that Wray had no power to effect it; but why not? He had power to effect the insurance and did effect it, for the plaintiff Cole's benefit. Not only was there power to assign it but, if it were necessary, an assignment of it should be enforced in this action in so far as it was made for the plaintiff Cole."

Justice Riddell further says: "It is contended that the goods of Cole were not 'held in trust' by 'F. E. Wray,' i.e., Pringle. I cannot agree in this contention. The word 'Trust' has no technical meaning. 'Goods held in trust' is a well-known expression in insurance matters and means 'Goods held by the insured for which he is responsible to others'—and insurance in this form has always been considered to insure first, the bailee insuring to the extent of his liens or advances, etc. (if any), and second, the owner of the goods. See California Insurance Co. Union Compress Co. (S.C. U.S.) which carries the proposition farther and makes such a policy ensure to the benefit not only of the actual owner of the goods but also of all who have insurable interest in them, because they are to that extent owners."

## CALGARY FINANCIAL FIRM

Capt. Alf. H. Allen and J. J. Mason, of Calgary, have formed a partnership and commenced business in the Grain Exchange building, handling insurance in all its branches, mortgages and investments.. Capt. Allen was formerly with the Canada Life.

**Warsaw, Ont.** Nov. 8th. Warsaw rink.

**Welland, Ont.** Nov. 3rd. Buildings on the farm occupied by Charles Bomback, Humberstone township. Cause, overheated stove pipe. Loss $3,000.

# Additional Information Concerning Fires

**Berwick, N.S.**—Oct. 2nd. General store belonging to N. W. Keddy & Sons was destroyed by fire. The fire was caused by incendiarism. The loss is estimated at $17,000 with insurance of $4,500 in the Mutual, Halifax and Law Union & Rock Insurance companies.

**New Liskeard, Ont.**—Nov. 1st. The Timiskaming Telephone Company was hit hard by the recent fires, and its estimated loss is $60,000, of which there was insurance of only $3,500, three-quarters of the telephones there being destroyed.

## LIFE INSURANCE ADVERTISERS

At the annual meeting of the Life Insurance Advertisers Association held in Toronto recently the following officers were elected for the ensuing year:

President—C. E. Elvins, Imperial Life Assurance Company; Vice-presidents—F. T. Stanford, Canada Life Assurance and B. W. N. Grigg, Mutual Life Assurance Company; Directors—C. R. Dent, Confederation Life Association and J. P. Lyons, Manufacturers Life Insurance Company; Secretary—F. G. Ivory, Canada Life Assurance Company.

At this meeting it was decided to purchase the picture entitled "What Might Happen" prepared by the Filmcraft Company in conjunction with the Institutional Advertising Committee. Araangements are being made to have this picture displayed in various moving picture houses throughout Canada.

## TEN MONTHS' FIRE LOSSES

### Total is Already Considerably Higher Than for the Whole of 1921

Fire losses in Canada in October are estimated by the Monetary Times at $5,627,950, compared with $3,127,000 in September and with $2,199,700 in October last year. This includes the northern Ontario fire loss, estimated at $3,500,000 by insurance men closely in touch with the situation there. This estimate is considerably below the estimate of between seven and eight millions made just after the fire by Premier Drury, but an exact figure is hard to fix at least until all reports are completed.

The October loss is made up as follows:—

| | |
|---|---|
| Large fires reported | $4,974,000 |
| Small fires reported | 153,950 |
| Estimate of unreported fires | 500,000 |
| Total | $5,627,950 |

This makes a total of $34,436,055, for the first ten months of 1922, or about $3,500,000 more than for the whole of 1921.

### Comparison by Months

The Monetary Times' record for the past two years shows the following monthly losses:—

| Month | 1921 | 1922 |
|---|---|---|
| January | $2,237,900 | $3,597,500 |
| February | 2,735,500 | 4,062,400 |
| March | 2,112,200 | 4,331,750 |
| April | 2,510,700 | 2,532,100 |
| May | 3,811,350 | 2,956,450 |
| June | 2,303,400 | 2,162,550 |
| July | 2,880,250 | 3,652,000 |
| August | 3,014,860 | 1,926,355 |
| September | 2,410,300 | 3,127,000 |
| October | 2,199,700 | 5,627,950 |
| November | 1,818,750 | |
| December | 2,897,200 | |
| Totals | $30,932,110 | $34,436,055 |

### List of Large Fires

The following are the October fires with a loss of $10,000 and over:—

## SAWMILL CLOSED DOWN.

The Hull sawmill, owned by the Gatineau Co. Ltd., and which was formerly known as Gilmour and Hughson's, closed down for its sawing season, on October 24. Between two hundred and fifty and three hundred men are affected by the closing of the mill.

The mill began to operate about the middle of May and has been in steady operation since. The closing down of the mill is about two weks later than it closed last year. No records of the season's cut are yet available.

## MILL TO BE SOLD

The Royal Trust Company is asking for tenders up to November 3, 1922 for the purchase of the property of the Great Eastern Paper Co. The property includes approximately 1,400 acres of freehold land in Quebec, together with water powers, saw mill, pulp mill, machinery, equipment, stores, supplies and provisions.

# NEW STEEL PLANT BEING COMPLETED

## Canadian Steel Corporation Expect to Commence Operations Shortly

That Canada offers splendid opportunities for all kinds of industries, and more particularly for iron and steel manufacturers, is shown by the fact that, what will probably be the largest steel plant in Canada, the Canadian Steel Corporation at Ojibway, Ont., has assumed tangible form. Preliminary work in this connection has been going on for some time, and now that conditions throughout the business world are becoming brighter, it is announced that the plant will be pushed to completion within a short time.

### Erecting Piers

The company is at present erecting slips for accommodating iron ore, coal and limestone vessels, and at the present time the vessel slip has been completed to a length of 2,400 feet from the river bank. The slip is 202 feet wide and has been dredged to a depth of 23 feet, making it capable of accommodating six of the heaviest loaded lake vessels simultaneously.

### Products

The plans of the company call for a steel plant laid out along the lines of the Gary works of the United States Steel Corporation, and it is probable that the company will manufacture the following products: steel rails, structural shapes, plates, bars, wire products, and possibly sheets, tin plate, and tubes. The plans also call for a battery of blast furnaces, two of which have already been completed, and which have an output of 600 tons each per day. A field fence and warehouse building, 162 x 364 has already been erected, and this will be occupied by the Canadian Steel and Wire Co., a subsidiary of the United States Steel Corporation, now having its plant at Hamilton, Ont. The new building just completed will enable the Canadian Steel and Wire Co. to double its present capacity. The Canadian Bridge Co. of Walkerville, Ont., another subsidiary, will also later move to Objibway. At the present time, out of the auxiliary buildings to be erected, the general machine shop has already been completed. Other auxiliary buildings for serving the steel works will include boiler, carpenter, blacksmith and patternmaking shops and a foundry.

### Directors

The members of the Canadian Steel Corporation are all men who have had experience in this line of manufacturing, and include Elbert H. Gary, president, chairman of the United States Steel Corp.; Ward B. Perley, vice-president, and W. J. Filbert, secretary. The chief engineer is W. H. Baltzell, formerly of the engineering department of the American Steel and Wire Co.

# Montreal vs. Toronto

By H. E. M. KENSIT, M.E.I.C., M.A.I.E,E,

The question of the comparative progress of our two largest cities, Montreal and Toronto, is always of interest, and the present moment when the final figures of the Dominion Census of population for 1921 have just become available gives an opportunity to survey that progress for the past 50 years.

The tabulation and diagram given below illustrate this comparison. A first glance at the diagram gives the impression of a neck and neck race but closer inspection shows that in a long race Toronto is steadily gaining.

In 1871 Montreal led in population by nearly 50%—in 1921 she only leads by 15.6%. If we take the total increase in 50 years and divide by the number of years we find that the average figure is 8.74% for Montreal and 15.7% for Toronto.

The increase in population in the last decade is 31.6% for Montreal and 38.6% for Toronto.

### Population Dominion Census Figures

| | Montreal | | Toronto | |
|---|---|---|---|---|
| | Population | Increase per Decade | Population | Increase per Decade |
| 1871 | 115,000 | | 59,000 | |
| 1881 | 155,238 | 35.0% | 96,196 | 63.0% |
| 1891 | 219,616 | 41.5 | 181,215 | 88.4 |
| 1901 | 267,730 | 21.9 | 208,040 | 14.8 |
| 1911 | 470,480 | 75.8 | 376,538 | 81.0 |
| 1921 | 618,506 (1) | 31.6 | 521,893 (1) | 38.6 |
| Population per sq. mile | 12,311 | | 20,158 | |
| Increase in 50 years from 1871 to 1921 | 437% | | 784% | |
| Average increase per annum over 50 years | 8.74% | | 15.7% | |

Montreal greater than Toronto in 1871 by 48.7%
Montreal greater than Toronto in 1921 by 15.6%

### Manufactures

In manufacturing industries also, Toronto shows distinctly the more rapid progress over a long period. The 1919 figures of the Bureau of Statistics are the latest available.

(1) Final figures, Census of 1921.

### Capital Invested

| | Montreal | Toronto | Montreal greater or less by |
|---|---|---|---|
| 1891 | $ 51,321,183 | $ 31,725,313 | 38.2%+ |
| 1901 | 57,148,661 | 52,114,042 | 8.8%+ |
| 1911 | 132,475,802 | 145,799,281 | 10.1%— |
| 1919 | 409,908,183 | 412,449,242 | 0.6%— |

### Value of Product

| | | | |
|---|---|---|---|
| 1891 | $ 67,654,060 | $ 44,963,922 | 18.7%+ |
| 1901 | 71,099,750 | 58,415,498 | 17.8%+ |
| 1911 | 166,296,972 | 154,306,948 | 7.2%+ |
| 1919 | 581,543,595 | 511,648,448 | 12.0%+ |

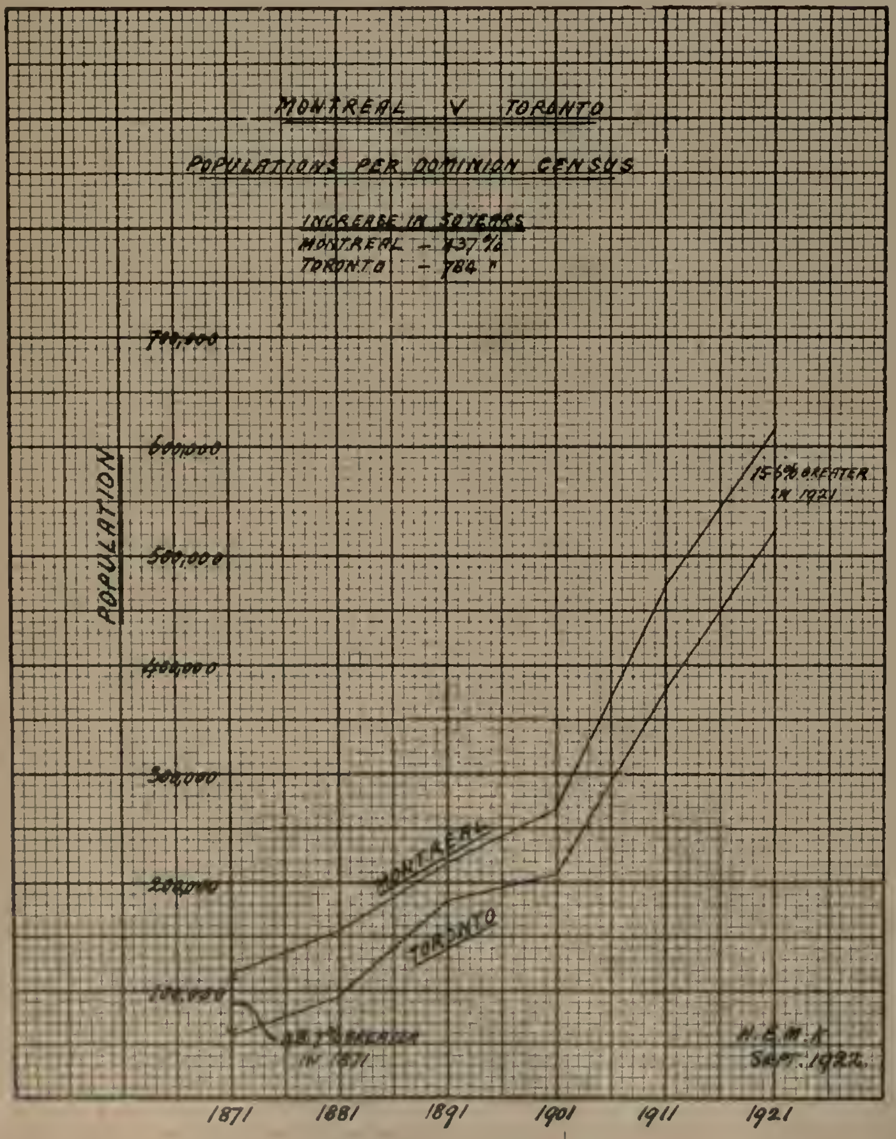
In the 28 years shown Montreal has increased the capital invested by 700%, Toronto by 1,200%; in the same period Montreal increased the value of product by 760%, Toronto by 1,045%. Whereas in 1891 Montreal had over 38% more capital invested in manufactures than Toronto, by 1919 (the latest figures) the position was reversed and Toronto took the lead.

### Bank Clearings

The respective Clearing House figures may also be given as an indication of the progress of trade and from these it will be seen that Toronto is gaining even more rapidly in this respect than in population.

| | Montreal | Toronto | Montreal leading by |
|---|---|---|---|
| 1891 | $ 514,607,000 | $ 145,897,939 | 71.6% |
| 1900 | 730,933,000 | 513,696,401 | 29.8% |
| 1910 | 2,088,588,000 | 1,595,954,254 | 24.2% |
| 1920 | 7,109,189,038 | 5,410,204,802 | 23.9% |
| 1921 | 5,709,258,173 | 5,101,893,766 | 10.6% |
| | | | Toronto by |
| Week ending Sept. 28 | 88,200,700 | 90,762,327 | 2.9% |

It will be seen that in 1891 Montreal led by over 70%, in 1921 the lead had been reduced to 10% and in the week ending September 28th, 1922, the position was reversed and Toronto led by 2.9%.



## NEW OIL COMPANY.

The Canadian Oil and Refining Company, Ltd., Lethbridge, has secured a provincial charter with authorized capital of $2,500,000. The Company advises The Monetary Times that at present finances are conducted through a closed syndicate, although later on it is proposed to list the stock on the New York curb, some parties from New York being already interested in it.

It is planned to build a refinery in Lethbridge. A large acreage is controlled and a drilling outfit was moved to the first location a few days ago. Another well is contemplated for winter operation and possibly another if weather continues good.

## FNIANCIAL REORGANIZATION.

In connection with the announcement from Ottawa recently of the incorporation of the ten million corporation under the name of the Canadian Industrial Alcohol Co. Ltd., with head offices in Montreal, it is stated by the officials of the company that this is merely a financial reorganization of this company, which has been operating for some years with a capitalization of five million dollars.

There will be no changes in the directorate of the company, and the expansion in capitalization is the result of growing business.

## AGAIN EXPORTING IRON TO U.S.

For the first time in several years shipments of pig iron are being made to several points in the United States. The steamship Santuree was loading 1,800 tons of pig iron at the British Empire Steel Corporation piers on October 18 for Philadelphia and 400 tons of wire rods for New York. The rods will be reshipped by rail to Vancouver.

## APPLE CROP.

The apple crop in the Okanagan B.C. district will amount to 2,215,000 boxes, according to a survey by government officials. The total fruit output of the district is expected to reach 4,000 carloads.

### PULP OUTPUT

The Mattagami Pulp and Paper Company's plant at Smooth Rock Falls, Ont., is now making an average production of 120 tons per day.

### CONTRACTS AWARDED

President Schoen of the Peninsular Sugar Co., Petrolea, Ont., reports good progress being made on the company's site. Grading for the spur line of railway has been finished and the ties are laid ready for the steel. A Grand Trunk engineer has asked for 30 men to lay the rails, which operation will take about ten days. The road will then be ready for ballasting.

The contract for 75 tons of structural steel for the sugar warehouse has been let to the Sarnia Bridge Company, to be delivered within four weeks, and the contract for steel sash and steel doors went to the Trussed Concrete Steel Company, of Windsor.

### HARRIS OIL CORPORATION

A Dominion charter with authorized capital of $2,000,000 has been secured by the Harris Oil Corporation, headed by Lloyd Harris, of Brantford, Ont. Mr. Harris informs The Monetary Times that the company plans to produce oil in Louisiana, and that the capital stock will be absorbed privately.

### WANTS TRADE WITH CANADA

Sir Percy Fitzpatrick, for some years M.P. for Pretoria in the Union of South Africa, and a fruit grower, but now in Montreal, in discussing the question of trade between Canada and South Africa said:

"The people of South Africa are very anxious to trade with Canada and I am convinced that such intertrade would be beneficial to both countries. We need any amount of Canadian products and our fruit, which is grown in the season when there is little grown in California, should be welcome to you."

### WILL GET ORE PLANT

According to a letter from Hon. W. L. Mackenzie King to W. E. Payne, secretary of the Vancouver Board of Trade, an ore dressing plant for the treatment of complex ores, of which there are vast quantities in British Columbia, will be established in the province.

Such a plant would cost, it is estimated, in the neighborhood of $100,000, and would in all probability be erected in or near Vancouver. When the Board of Trade was agitating for the construction of such a plant, Point Grey was suggested for the location, preferably near the university. The plant would extract the various values from complex ores, most of which are lost in the ordinary concentrating plants now in the province.

### SECURITY SALESMEN

On page 29 of this issue there will be found the advertisement of P. M. Brand & Co. which ought to be of interest to men who have had experience in the sale of high grade securities. Further information regarding this opportunity will be gladly funished by Mr. James J. Salmond of "The Monetary Times."

# *Municipal Finance*

**Quebec, Que.**—City Treasurer P. N. Verge announced on October 24 that the final date for the payment of taxes without interest has been changed from October 30 to November 15.

**Sault Ste. Marie, Ont.**—According to the revised assessment figures for 1923 it is shown that the total assessment is now $16,583,977, an increase of $519,152 over the previous year. This increase is due to a jump of $1,222,765 in building assessment. Land and income assessments, however, have decreased.

The population of the city has declined 243 during the year.

**Montreal, Que.**—Over five million dollars has been voted by the city council during the present year for permanent pavements, sidewalks and sewer construction and the whole of this amount will be paid for by the fronting proprietors over a period of years. Of this total $3,224,924 was voted for permanent paving, $1,112,677 for sidewalks and $750,000 for sewers. The expenses for the general administration of the city were $4,108,744.

**Winnipeg, Man.**—In a statement submitted to the finance committee on October 20 it was shown that the Winnipeg Hydro-Electric Power system had a surplus of $4,116 during September, as compared with a deficit of $518 for the same month last year.

**Saanich, B.C.**—According to figures compiled by the treasurer eighty-four per cent., of the 1922 taxes were paid by October 10. This is a slight improvement over last year's collections.

**Winnipeg, Man.**—A statement of the city's expenditures for the period ended September 30 shows a reduction from the same period last year, when total expenditures amounted to $4,229,444, as compared with $3,908,140 for this year.

**Montreal, Que.**—Due to sharp paring of municipal expenditures, the Executive Committee announced on October 25, there will not be any special assessment to carry the administration over to the end of the year.

Under the charter the city is empowered to impose a levy of 15 cents per $100 on real property. This was not done and despite the fact that several large and unexpected expenditures became necessary during the course of the year, coupled with diminished revenue, internal economies permitted the balancing of the budget. The outstanding departmental economies are credited the Director of Public Works, whose schedule was considerably supplemented during the year yet whose economies were corresponding.

One of the heaviest burdens which has to be met is the charge for the Metropolitan Commission, which is $200,000. The lack of a May budget and of any revenue from the taxation of utilities complicated the situation and closest estimates showed that the end of the year would bring a deficit of $87,000, regardless of economies.

## SUES LONDON LOAN

The London Loan and Savings Company, of Canada, is suing Sir Henry Mill Pellatt, of Toronto, for $22,317, under alleged agreements, and Sir Henry Pellatt counterclaims for $100,000, and "damages caused to me by the improper realization of the assets of the Imperial Loan and Investment Company, of Canada, and also for all losses incurred by the Imperial Loan and Investment Company, of Canada, through investments and speculation in Russian roubles which were entered into through the assistance of the plaintiff in his action, and which has been lost by the Imperial Loan and Investment Company , of Canada." Sir Henry also asks for an accounting.

## ACTION ON PROVINCIAL LOAN

The judicial committee of the Privy Council on October 23 dismissed the appeal in Clarkson vs. Davies, which was heard on July 27.

The appeal was by G. T. Clarkson, accountant, Toronto, from adverse decisions by the Canadian courts in his action as liquidator against certain directors of the Provincial Loan Company for the recovery of $30,000 and interest claimed to have been paid to them in connection with the sale of the company's assets.

The Provincial Loan Company was taken over by the Dominion Permanent Loan Company, which went into liquidation.

## ONTARIO RE-PURCHASES BONDS

The Ontario government has purchased from the estate of the late Sir John Eaton, $1,500,000 of bonds which were free from succession duties. A year ago last March there were still outstanding some $17,000,000 of these bonds which had been issued by the previous government. They were issued in that form so as to coax the investing public to buy.

For two years the provincial treasurer has been seeking this form of Ontario bonds and he has gathered in a number of blocks, but the Eaton holdings are the largest.

## MAY APPEAL ON LIQUOR CASE

That the British Columbia Government will consider the matter of appeal against the judgment of the Supreme Court of Canada confirming the Dominion's right to collect customs duties on liquor imported into Canada by provincial liquor boards, was stated on October 10 by Attorney-General Manson. J. W. Falconer, commissioner of the Liquor Control Board, explained that the duties on imported liquors which the province will have to continue to pay run up to sixty percent. of their cost.

On Scotch and other whiskeys and imported liquors, such as brandy and rum from England, the import duty is $10 a gallon for proof strength. On rum 35 per cent. overproof the duty is $13.50 a gallon. Commissioner Falconer pointed out that these duties were a big factor in the retail selling price of liquor in the province, as at $10 a gallon it means $2.50 out of every quart bottle of whiskey goes to the Dominion Government in duties.

## RAILWAYS' AGREEMENT WITH MANITOBA

The agreement under which railways operating in Manitoba paid the Provincial Treasury Department $310,000 annually having expired, negotiations will be commenced shortly to arrange a new agreement. It is understood the railways will ask for a reduction. Under the agreement entered into in 1917, the Canadian Pacific Railway paid $225,000 and the Canadian National $85,000 annually.

## ALBERTA TELEPHONES

The Alberta telephone department is now completing its 1922 programme of construction work in different parts of the province. About three thousand miles of line, consisting mostly of rural telephone lines, will have been strung when the contracts have been finished, and several new exchanges, including Calgary and Lethbridge cities and one or two points in the Peace River district have been built.

## ONTARIO TAX ON WAGERS

When the Ontario Government levied a 5 per cent tax on winning racing wagers, at the last session, it was estimated that $2,500,000 would be obtained. The actual receipts have been $2,212,220. Last year $56,000,000 was the total of wagers; this year it was only $44,244,402.

The 1922 race track financial record at the various tracks is as follows:

| | Amount Wagered | Tax Collected |
|---|---|---|
| Spring meet | $4,365,802 | $218,290 |
| Fall Meet | 3,611,661 | 180,583 |
| Thorncliffe: | | |
| Spring Meet | 3,418,310 | 170,915 |
| Fall Meet | 2,257,806 | 112,890 |
| Hamilton Jockey Club: | | |
| Spring Meet | 2,831,824 | 141,591 |
| Fall Meet | 2,873,999 | 143,699 |
| Niagara Racing Association: | | |
| Spring Meet | 2,572,753 | 128,637 |
| Fall Meet | 2,780,780 | 139,039 |
| Dufferin Park: | | |
| Spring Meet | 2,637,310 | 131,865 |
| Fall Meet | 1,962,104 | 98,105 |
| Devonshire Park: | | |
| Spring Meet | 2,356,319 | 112,815 |

## OFFER FARM LOAN BONDS

Saskatchewan farm loan debentures are brought to the attention of the people of Saskatchewan in a campaign started in October. Premier Dunning states that the Farm Loan Board has in the brief period during which it has been in operation, loaned close to nine million dollars to farmers of the province Applications have been received for many times this amount which cannot be met until more funds have been made available through the sale of farm loan debentures.

All the municipal secretary-treasurers of the province are accredited agents for the sale of Saskatchewan farm loan debentures, and applications for debentures will also be received at any Saskatchewan branch of the Union, Royal, Commerce or Imperial Banks, or upon application direct to the provincial treasurer.

## DUTIES ON LIQUOR

The province of Quebec, though not a party in the British Columbia appeal to prevent the federal government from collecting custom duties on liquors imported in that province, which failed, has followed with interest the recent development. Since the point was raised by the British Columbia government, the Quebec government has paid under protest over $5,000,000.

In the event of a judgment favoring British Columbia, this sum would have been returned to the provincial treasurer, thus bringing the liquor commission surplus to over $9,000,000. This amount was collected by the federal government for the first year of operation of the Quebec liquor commission ending on April 30, 1922, when imports were not as considerable as they had been since the old stocks of liquor bought from authorized vendors have been exhausted.

## LOANS IN BURNED AREA

Loans granted by the Ontario Agricultural Development Board under the recent new farm loan legislation are affected by the disastrous fires in the Temiskaming district. Altogether loans aggregating about $80,000 for removal of encumbrances, purchase of land or erection of buildings have been granted in the Temiskaming district and about half this amount has actually been paid over. Newspaper reports indicate that the great majority are in the fire zone. While the security for the loan is mainly in the land, care is exercised by the board to see that all buildings covered by a mortgage are properly insured and, as a matter of fact, the insurance usually approximates nearly the amount of the loan.

A. G. Farrow, chairman of the Agricultural Development Board, went north recently to ascertain the situation and render any assistance possible. In the first place, the board expects to be able to render very useful assistance in looking after the insurance settlements and in getting the borrowers started in their rebuilding operations. Furthermore, it is probable that there will be a considerable demand on the board for further loans to assist in rebuilding necessary farm buildings.

## CROP MONEY IN DEMAND

A. R. Johnston, estates manager of the Western Trust Company, returned to Regina recently after a tour of Western Saskatchewan. He reports that some creditors are pressing the farmers to meet their debts. He said:

"Some implement companies have men in every other town, covering territories not exceeding 60 square miles. The municipalities are after the farmer for their taxes. In several districts the municipalities have stepped in and seized whole crops for taxes, and many farmers have been left with not enough to buy sustenance for the winter. They are not giving the other creditors a chance. In one township near Bigford, only one quarter section is not under seizure by the municipality."

"The general attitude of the farmers seems to be that of expectation of higher wheat prices. They are selling to cover more pressing obligations," declared Mr. Johnston.

### TO MAKE SODA PULP.

At a meeting of the directors of the Howard Smith Paper Mills, Ltd., on October 23, it was announced that the company will proceed shortly to erect a plant for the manufacture of bleached soda pulp. So far the requirements of this product in Canada have been met by importation.

The new plant, which will form an addition to the already large and important unit of the company located at Cornwall, will have a capacity around 15,000 tons per annum.

The soda pulp will be used for mixing with sulphite pulp to go into the manufacture of certain grades of paper, the varieties produced by the company having grown to a marked extent in the past couple of years.

The principal ingredient in soda pulp is poplar wood, of which there is a great abundance in Canada. The company already has an up-to-date plant for the manufacture of bleach at Cornwall, Ont., so that, with the addition of the new plant, it will be more self-contained than ever, producing the largest proportion of raw materials of any Canadian paper manufactory for the production of its various grades of paper. The three plants of the company are located at Beauharnois, Cornwall and Crabtree.

### RECORD PRODUCTION.

During the week commencing October 9, the steel plant at Sydney, N.S., set a new record for steel production when 1,101 tons of steel ingots were turned out by the ten open hearth furnaces, in one day. At the British Empire Steel Company's headquarters it was announced that this is the best ten furnaces output for one day in the whole twenty-two year history of the company.

### ACQUIRES THAMES VALLEY KNITTING MILLS.

Announcement was made on October 25, that a new company with a capitalization of $500,000, composed of Hamilton men, had acquired the Thames Valley Knitting Mills at Ingersoll, Ont.

The name of the new company is the Apex Knitting Company and when the mill is running at full capacity it is expected employment will be given to 150 or 200 hands. W. H. Wardrope, is president, and John Elay, vice-president of the new company; S. T. McPhie, A. F. Dowie and S. C. Arrell are directors of the company.

The mill property is extensive and it is the intention to supplement the present equipment. It is expected that the plant will be operated on a scale that will mean much to Ingersoll's industrial situation.

### WILL STAY IN CANADA.

It was stated by Captain Hugh C. Poynter, president of the Baldwin Canadian Steel Corporation, that the mere fact that the Ashbridge Bay plant has been closed down for a long time does not indicate that they are going to move out of Canada. Rumor has insisted that the property will pass over to the Bethlehem Steel Corporation, and while Mr. Poynter declined to discuss the suggested transfer of interests, he insisted that they will remain in this country.

# Government and Municipal Bonds

Although there was a slight betterment in prices on the bond market during the past week, this advance was scarcely reflected in the condition of the market as it stands at the present time. The general trend of the market throughout the entire week has been one of comparative quietness, with a small burst of activity here and there, but nothing of importance occurred to break the reactionary movement.

With the exception of the five million Ontario treasury notes, and the three million Ontario Hydro-Electric Power bonds, bond sales during the week were not exceedingly heavy. The trend of prices was slightly better, although they are still several points below those prevailing a few months ago, and even those prevailing last month.

### Tenders Invited.

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Ten. close |
|---|---|---|
| Hampstead, Que. ...... | $185,000 | Nov. 14 |
| Sydney, N.S. .... .... | 142,000 | Nov. 18 |
| Bagotville, Que. .. .... | 75,000 | Nov. 14 |
| New Toronto, Ont. .. .. | 67,500 | Nov. 17 |
| Pembroke, Ont. (R.C. Schools) ...... .... | 60,000 | Nov. 15 |
| Oakville, Ont. .... .... | 58,400 | Nov. 10 |
| Kenora, Ont. ..... .... | 41,217 | Nov. 13 |
| Prescott, Ont. ...... ... | 30,000 | Nov. 20 |
| St. James, Man. .. ..... | 25,000 | Nov. 10 |
| Chateauguay, Que. ..... . | 20,000 | Nov. 14 |
| Weston, Ont. .... .... | 115,000 | Nov. 16 |
| Weston, Ont. .... .... | 30,000 | Nov. 16 |

**Weston, Ont.**—Tenders will be received up to November 16 for $115,000 6 per cent., bonds due in 30 equal annual instalments, and alternative bids for $30,000 6 per cent., bonds of the same issue due in 30 instalments of $1,000 each, with interest. See official advertisement elsewhere in this issue.

**New Toronto, Ont.**—Tenders will be received up to November 17, 1922 for the purchase of $67,500, 6 per cent., 20-instalment school debentures. W. E. Davison, town treasurer.

### Bond Sales.

**Vulcan, Alta.**—H. J. Birkett & Co., have purchased $5,000, 6 per cent., 10-instalment debentures.

**Lundi, S.D. Man.**—An issue of $11,059, 7 per cent., 17-instalment debentures has been sold to H. J. Birkett & Co.

**Ontario.**—A syndicate composed of A. Jarvis & Co., Wood, Gundy & Co., and Dominion Securities Corp., have purchased $5,000,000, 5½ per cent., six months' treasury notes. The issue was made to renew the $5,000,000 treasury notes sold during the Summer.

**Stettler, Alta.**—An issue of $5,000, 7 per cent., 15-instalment debentures has been purchased by H. J. Birkett & Co.

**Verdun, Que.**—McLeod, Young, Weir & Co., have purchased $175,000, 6 per cent., 20-year debentures at a price of 102.87, the money costing the city about 5.75 per cent.

**Ellice, S. D. Alta.**—H. J. Birkett & Co., have purchased $5,000, 7 per cent., 20-instalment debentures.

**Thurlow, Ont.**—An issue of $35,000, 5½ per cent., 32-instalment debentures has been sold to Municipal Bankers Corporation.

**Ontario.**—In connection with the consummation of the clean-up deal the Hydro-Electric Power Commission of Ontario has completed the sale of $3,000,000, 6 per cent., bonds due 1942 and dated 1920. to Dominion Securities Corporation. The sale was made some time ago, but was contingent on the clean-up deal.

**Wingham, Ont.**—C. H. Burgess & Co., have purchased $50,000, 6 per cent., 20-instalment debentures.

## BOND SALES SHOW INCREASE.

### October Total is Increased by Twenty Million Ontario Loan—Sales Are Higher Than Year.

New financing during the month of October shows a considerable increase over the previous month, and is also higher than for the same month last year. Total sales during October were $38,900,937, as compared with $12,710,757 during September and $25,730,664 for October last year.

The month's total was considerably strengthened by the Ontario loan for twenty million, and also by a further loan by the same province for five million, the latter issue being six months treasury notes.

Borrowing by the municipalities shows an increase of approximately two and a half million over the previous month, and an increase of four million over October, 1921. Ontario municipalities were the heaviest borrowers, with Quebec municipalities coming a close second.

Corporation financing was also heavier than September, there being $850,000 sold in September, as compared with $5,400,000 during October. Last year's total was $7,500,000.

The following is a comparison of bond sales during September and October.

| | Oct. 1922 | Sept. 1922 |
|---|---|---|
| Provincial ........ | $25,000,000 | $5,638,000 |
| Municipal ....... | 8,500,937 | 6,007,757 |
| Railways ........ | ........ | 225,000 |
| Corporation ...... | 5,400,000 | 850,000 |
| .. | | |
| Total ........... | $38,900,937 | $12,710,757 |

## COLONIZATION ASSOCIATION

The Canada Colonization Association has been granted letters patent under the Companies Act, it is announced. The incorporators are Sir John Willison, M. A. Brown, W. W. Evans, F. D. L. Smith, and A. E. McKenzie. The association is to have a capital stock or 100 shares of no nominal or par value, provided that the said company shall commence its business with a capital of $500. The head office of the company is to be at Winnipeg. The purposes of the association are in part, to assist in bringing about the settlement of vacant lands of Canada; to give advice and directions to settlers entering or now located in Canada; to, in a measure, direct interprovincial colonization and to assist in carrying on activities of national development.

## INCREASING STAFFS

Brantford, Ont., factories are gradually increasing their staffs in order to meet the increasing manufacturing activities in the city. The Massey-Harris Company is now employing about 600 men, and are gradually taking on additional men who were formerly on their staff. Other manufacturing concerns are also taking on additional men.

## RIORDON CO. WILL RESUME WOOD OPERATIONS.

Announcement was made on October 29, that the Riordon Company is resuming operations immediately in the Gatineau district and within a week the company expects to employ upwards of two thousand men in the bush, in lumbering operations.

The re-opening of operations in the Gatineau by the Riordon Company will make a sensible reduction in the ranks of the unemployed this winter, and will relieve much of the unemployment which has prevailed among the farmers during the past two winters, who for the most part have had to remain idle after winter had set in.

## FLOUR PRICES INCREASE.

On October 30, the Ogilvie Flour Mills, Ltd., the Western Canada Flour Mills, Ltd., and the Lake of the Wood Milling Company, announced an increase of 30 cents per barrel in the price of flour. The new price brings the price of flour to $6.90 per barrel in carload lots. The retailers state that this increase will not affect retail prices, which are around $1.10 for 24-pound bag.

The old price of $6.60 per barrel was the lowest flour had been since the beginning of the war. The rise is attributed to the recent increase in the price of wheat. The price of flour had been dropping all Summer.

Careful Investors Are Buying Now!

New issues of Government and Municipal bonds in Canada up to October 31st last amounted to only 37% of the new issues that appeared during the corresponding period last year. Notwithstanding this, proceeds from this year's wheat crop are estimated to be about 30% greater than last year; the usual Victory bond interest of about $50,000,000 will be paid; and lastly, a large amount of new money will be paid to holders of Victory bonds maturing on December 1st next. This latter is new money to Canada, because it was obtained in the United States last spring by the Dominion Government.

As no substantial new issues are in sight, careful investors are taking the opportunity of purchasing existing bonds now, thereby assuring themselves of the attractive interest rates now prevailing.

# *Stock Markets*

The past week on the security markets was marked by a decided upward movement as compared with previous weeks. This movement was mostly general throughout the entire week, although a weaker tone prevailed during some of the days.

In spite of the improved tone of the market a moderate easiness was prevalent throughout the weeks' trading, and, while some stocks showed an advance and some a downward revision in prices, the net result was a gain from fractional to several points in the majority of the leading securities. The trend of the Canadian markets was practically in line with that of Wall Street, where foreign and political troubles have been upsetting the bull market which has been running for some time. With the passing of the political troubles across the line stock brokers are anticipating a renewal of the bull market within a very short time.

### Weeks' Features.

There were two leading features in the weeks' trading, these being Consolidated Smelters and Mackay common, both of which gave a very good account of themselves. The activity and strengthening of these securities is mainly due to the expectation that, within a short time, some action will be taken by the companies regarding dividends. While the Consolidated Smelters has not paid any dividends since the first quarter in 1920, there is a prevailing opinion that with conditions in the metal market showing a decided improvement the company will shortly be in a position to resume the payment of dividends on the 10 per cent. basis.

In connection with the Mackay Companies the payment of dividends has always been on a conservative basis, namely 4 per cent., on the preferred and 6 per cent., on the common. This rate may appear to be rather small to some observers but the board of directors have always taken a conservative stand on the payment of dividends, with the result that the Mackay Company and its subsidiaries have been able to build a substantial cash reserve out of the large profits made during the past years. It is understood that the cash reserves of each company have been built up to the satisfaction of the directors and it is generally anticipated on the Street that the company will either increase the dividend to a 7 per cent. basis or probably declare a substantial bonus before the next dividend becomes due.

### Dominion Glass Strong.

Further strengthening in Dominion Glass securities seems to point to an impending increase in the dividend probably to 7 per cent. The present rate of 6 per cent. has been for two years, the increase from 4 per cent. having been made on November 18, 1920. The return of better conditions coupled with the strong position of the company lead the Street to believe that the company will now be safe in increasing the distribution to the shareholders. In 1920, when the dividend was last increased the earnings were at the indicated rate of 9.55 per cent. on the 42,500 common shares.

### Stock Offering

An offering of 8 per cent., preferred stock of the Pure Gasoline Co., of Toronto, is being made at par, $50, per share by the Allied Finance Co., of Toronto. The company was incorporated to sell oil direct from the refinery to the consumer, and to own and operate a chain of service stations and distributing trucks all over Canada. At the present time the company has stations in operation at Halifax, Toronto, London and Woodstock.

## TO INCREASE CAPITAL

A special meeting of the shareholders of Dominion Iron and Steel Company, Limited has been called for November 15 to consider, and if approved, to authorize an increase of the capital stock of the company. It is a subsidiary of Dominion Steel Corporation which in turn is now controlled through stock holdings by British Empire Steel Corporation.

The present authorized and issued capital stock amounts to $30,000,000, of which $25,000,000 is common and $5,000,000 7 per cent., preferred. Outstanding bonds amount to approximately $13,000,000.

## SECURITY PRICES HIGHER

The following table, compiled by H. Michell, Professor of Political Economy in McMaster University, Toronto, shows the average market prices, ruling at the middle of October, of 20 bonds and 41 stocks, arranged according to the usual investment classifications and fields of industry. In the second and third columns of the table are shown the percentage increase or decrease during the period Sept. 15-Oct. 15 over the previous month of 1922, and the same with regard to the same period of 1921. By this method both short and long time fluctuations can be noted.

## VANCOUVER FINANCIAL CORPORATION

The Vancouver Financial Corporation Limited on November 1st moved their offices to those occupied by Edwards & Ames, 619-624 Pacific Building, Vancouver. Geoffrey L. Edwards and D. P. Ames have been appointed joint managers and have taken charge of the company's business. The secretary, E. J. Enthoven, while continuing his share interest in the company, will shortly retire.

R. Kerr Houlgate, for the last five years manager of the Company, will continue on the offices at present occupied by the Vancouver Financial Corporation in the Yorkshire Building. Mr. Houlgate is retaining his private business, his liquidations and general estate business.

## MILLING COMPANY LIQUIDATION

It is announced by H. T. Jamieson, C.A., authorized trustee and receiver of Canadian Cereal & Flour Mills Company, Limited (bankrupt), that out of the proceeds of the liquidation he is arranging to make a second payment to the Montreal Trust Company of an amount sufficient for a further distribution of 30% on account of principal (making 60% paid to date) and interest outstanding, being for the three months ended 30th September, 1922.

Mr. Jamieson also announces that further payments on account of principal and interest will be made from time to time as the liquidation of properties proceeds. He hopes to be able to discharge the bond indebtedness in full.

## HANDBOOK ON MINING

A handbook dealing with the minerals and mining industries of the Dominion has just been published by the Canadian National Railways. This sixty-three page manual, which has been compiled by C. Price-Green, commissioner of the road's industrial and resources bureau, deals in a concise and non-technical manner with the Dominion's wealth of precious commercial and prosaic minerals. Physical features of the country and of the various mining areas are briefly outlined. A feature of the pamphlet is the information which it gives respecting the many applications and new uses of the economic minerals in the industries and arts. References are also provided to the various relevant publications of the provincial and federal departments of mines.

## BONDS CALLED FOR REDEMPTION.

The outstanding bonds of the series of 15-year 6 per cent., gold bonds, issued in 1911 by the William Davies Company, Limited, have been called for redemption on January 1, 1923. Notices have been mailed to all registered bondholders and public notice will be given in due course. The redemption price is 105 and accrued interest. The reason for the calling of these bonds is the completion of arrangements for a new $2,500,000 issue of 6 per cent., bonds which will be offered to the public immediately.

# *Unlisted Securities*

The report on the unlisted market issued by A. J. Pattison, Jr., & Co. states that while for the most part trading was of very small volume, all indications at the close point to a resumption of the activity which prevailed in the first two weeks of October. Speculative buying was at an exceedingly low ebb, while purchases for investment show material increase. Both listed and unlisted bank stocks appear to be coming into their own, and, in some cases spectacular advances have been recorded, though there is still plenty of room left for higher levels to be reached before this type of security will be selling in line with the rest of the market.

Industrial bonds were in some demand, though buyers were reluctant to absorb offerings at present levels. In many cases, prices have now reached a point where profit-taking is to be expected, and the market must absorb these offerings before the upward movement can be continued. A fair example of this occurred in Nova Scotia Steel Debentures, which have been on the upward swing for many months, finally reaching 91 bid. After touching the ninety mark, offerings came into the market in volume too great to be absorbed, and the bid slid off to 88. Durant Motors were decidedly weak, being offered down to 10½, with the best bid at 9½. Trust & Guarantee was stronger at 69-72¾, with offerings, between these figures being quickly absorbed. Spanish River 8's eased 1½ points to 103 bid. Whalen Debentures were somewhat active at 64-67. The Oil issues all shared in a general advance, Imperial moving to 119-122 at the close. The recent activity in Cockshutt Plows Preferred has subsided, and the quotation eased to 48-49½. Western Grocers Preferred continues in demand the bid improving 1 point to 59½. A fair amount of activity forced Loew's London Preferred up 2 points to 5½ bid, while the common fluctuated between 2 and 3.

## CAPITAL DECREASED

Authority has been granted to Grace & Co., Ltd., to decrease the capital stock from $500,000 to $100,000, such decrease being effected by the cancellation of 4,100 shares of the paid up capital of the company off the par value of $100 each.

## IRON OUTPUT DECLINES.

### Pig Iron and Steel Production Declines During September—One More Furnace in Operation.

The production of pig iron in September declined 7.92 per cent. from the output of the previous month, respective tonnages being 27,123 long tons in August as compared with 24,974 tons in the month under review. The production was also less than that of September last year by 40.8 per cent. A comparison of the cumulative production during the first nine months of 1922 with that of the corresponding period last year shows a decrease from 457,157 tons to 275,989 tons or 39.6 per cent.

### More Furnaces.

One furnace was blown in at Hamilton and another at Sydney while one of the furnaces at Sault Ste. Marie was banked. At the end of the month, then, the active furnaces numbered two at Sydney, one at Hamilton and one at Sault Ste. Marie, a net gain of one furnace over the previous month.

Another was the slight increase in the several grades of iron produced for sale. The production of basic pig iron increased from 6,577 tons in August to 7,991 tons or 21.5 per cent. The September production intended for this purpose was higher than in September of last year by 58.14 per cent. The foundry pig iron produced for sale increased from 6,296 tons in August to 6,895 tons in September. The output of malleable iron for sale also rose from 281 tons in August to 1,096 tons in the month under review.

The production of ferro-alloys dropped slightly from 1,864 tons in August to 1,834 tons in the following month. The cumulative production during the first nine months of 1922 was 15,178 tons as compared with 18,698 tons during the corresponding period of the previous year.

### Steel Output.

The production of steel in September declined by 23,373 long tons from the output of 59,160 tons in August to 35,787 tons in the month under review. The cumulative output during the first nine months of 1921 was 477,588 tons as compared with a production of 334,835 tons in the corresponding period of the present year. The closing of the steel plant at Sault Ste. Marie accounted in large measure for the decrease in production during September.

The output of basic open hearth ingots for further use declined from 56,997 tons in August to 33,815 tons in September, a decrease of 23,182 tons or 40.7 per cent. A small quantity of electric steel ingots for further use amounting to 124 tons was reported for September while none was made for direct sale.

### Ingots Declined

The total production of ingots was less than the output of the corresponding month of last year by 20,540 tons or 37.7 per cent. The production in the first nine months of 1922 was 319,943 tons while that of the corresponding period of the previous year was 459,960 tons representing a decrease of 30.4 per cent. The production of steel castings also suffered a decline. The total output in August was 2,204 tons which decreased to 1,848 tons in the month under review. The decline amounted to 356 tons or 16.15 per cent. An opposing tendency developed in connection with basic open hearth castings of which the production increased from 208 tons to 837 tons. On the other hand the output of Bessemer and electric graded declined considerably.

## PULP SHIPMENTS.

According to a report from Digby, N.S., it is expected that during the next year there will be shipped from the port 14,000 tons of pulp, the product of the Sissiboo Pulp Company.

# Northern Ontario Fire Relief Work

**A Message to Mayors, Reeves, Municipal Officers, Associations and to the Public Generally.**

The need for money and supplies is still urgent. Winter weather is now upon the Northern Ontario fire-swept regions.

## IMPORTANT!

Will all those who wish to send clothing and other supplies please first write the undersigned Committee for information as to what is now most needed, and for directions as to where and when to ship?

This will avoid over-amounts of certain kinds of supplies. It will save food, fruit, etc., from the danger of freezing in transit. It will help very much in the work of distribution.

Keeping the Committee advised of all help that can be given will be in the real interests of the fire sufferers, and tend to make your gift fully effective.

**Northern Ontario Fire Relief Committee**

**Royal Bank Building, Toronto**

The highest or any tender not necessarily accepted.

J. H. TAYLOR,
Town Clerk, Weston, Ont.
November 9, 1922.
78

## EMPIRE EXHIBITION OBJECT EXPLAINED

### Meeting of C.M.A. and Montreal Board of Trade Held on October 25

Speaking before the members of the Canadian Manufacturers' Association, the Montreal Board of Trade and the Chambre de Commerce on October 26, Major A. E. Belcher, outlined the objects and aims of the British Empire Exhibition which will open in London in April, 1924.

Trade with the Empire, he declared, was essential. Every part of the Empire will be represented from the Crown colony of Hong Kong to the West Indies, South Africa, India, Australia and Canada. Buyers will assemble there from all parts of the world and just see what the various countries exhibiting produce.

One of the results of the Exhibition, according to the speaker, who dealt with many outstanding problems of the Empire, at the present time would be to help the migration, production and markets of the countries of the Empire. The three problems can only be solved simultaneously, he said, and he was hopeful that the exhibition would evolve a scheme of great value to Great Britain and the Dominions.

## RECLAMATION SCHEME

With a view to securing first-hand information regarding the proposed reclamation scheme, G. T. Steeves, chairman of the Columbia River Reclamation Company, paid a visit to Golden, B. C., on October 27, from London, Eng., and in company with J. A. Buckham, M. P. P., and J. L. McKay, made an inspection of the situation.

It is estimated that approximately 43,000 acres of rich agricultural land along the banks of the Columbia River, stretching from Golden some eighty-five miles south, could be reclaimed at a cost of about $3,000,000.

## VALUE OF FISH PRODUCTS DECREASE

### Lowest Register Since 1914 and Annual Production Much Less

The total value of the product of Canadian fisheries during 1921 was $34,931,933 as compared with $49,241,339 for 1920, and $56,508,479 in 1919, according to a report made by the Department of Trade and Commerce. The totals stated represented the value of the product as marketed whether fresh domestically prepared or factory made.

The fishing industry was carried on during 1921 under the most trying conditions, the report sets forth. The marketing of fish and fish products was found to be difficult, and prices fell to a figure which made it unprofitable for fishermen, in some districts of the Atlantic coast especially, to carry on. Production was thus much less than it otherwise would have been, resulting in the total value registering lowest since 1914, and $14,000,000 less than for 1920, and $25,000,000 less than the peak value reached in 1918.

"This big decrease is a very serious one," the report states, "but there are already abundant signs of improved marketing conditions for the product of the 1922 season."

# DIVIDEND NOTICES

## BANK OF MONTREAL

NOTICE is hereby given that a DIVIDEND of THREE per cent. upon the paid up Capital Stock of this Institution, has been declared for the current quarter. A BONUS of TWO per cent. has also been declared for the year ending 31st October, 1922, both payable on and after FRIDAY, the FIRST DAY OF DECEMBER next, to Shareholders of record of 31st October, 1922.

## ALCOHOL COMPANY.

Incorporation of a ten million dollar corporation, under the name of Canadian Industrial Alcohol Company, Limited, with head offices in Montreal has been announced.

Provisional directors mentioned in the corporation are:—Arthur Ramsay Holden, Henry John Hague, Hon. William James Shaughnessy, and Chilton G. Howard, all King's Counsel; R. C. Holden Jr., and P. P. Hutchison, advocates; H. W. Shearer, manager, Clarence Arnold and Bruce Forbes, stenographers, all of Montreal.

# Corporation Finance

**Standard Chemical Co.**—In the eleventh annual report for the year ended March 31, 1922, it is shown that the company had a deficit of $624,088. A working profit of $20,861 was shown, but after providing for decline in inventories, reserves for depreciation, interest on debentures, bank interest, etc., the surplus was wiped out and the above deficit shown.

Profits from operations which stood at $20,861, compared with $340,327 a year ago. Deductions this year were $783,229, as compared with $507,295. The loss for the past year of $762,368, compares with $166,967. Current assets are given at $1,411,659, against $1,942,065. Current liabilities of $681,185, compare with $606,223. Inventories are given as $1,121,622, as against $1,616,814. Total assets are $6,733,670, whereas a year ago they were $6,880,485.

The output during the twelve months was in accordance with the requirements of the charcoal demand, and 59,278 cords of wood, which is 44 per cent. of the company's capacity, were carbonized. The value of the year's sales amounted to $2,238,128. These figures compare with 86,956 cords and $3,720,000 sales for the preceding twelve months.

Prices have again declined during the year, according to President David Gilmour, who sttaed that the exchange situation in Europe had enabled alcohlic and acetic products to come into the market at extremely low prices, while in the United States the large stocks of wood products held a year ago were almost as great today. Measures have been taken, he points out, to meet the conditions likely to prevail for the next year by writing down the value of inventories of cordwood, finished and partly finished products, coal and stores, bringing them to a level which it is expected they will realize under present market outlook. The total reduction applied to these inventory values amounts to $521,322.

It is not considered advisable that the adverse circumstances of the past year should interrupt additions to depreciation reserve, the president points out, and states that this amount has been increased by $191,854. Bank loans interest and discounts amounted to $25,627 and interest on debentures to $44,426.

**Dome Mines Co.**—A substantial improvement in profits is shown in the financial statement for the six months ending September 30, 1922. For the period ending Sept. 30 they totalled $970,297, after heavy depreciation and reserve allowances had been made. This compares with $1,244,922 for the entire previous year, thus showing an increase of 55 per cent.

Notwithstanding the repayment of $1 a share on capital, and the increased dividend at the rate of $2 per annum, the company has been able to accumulate a surplus of $711,814, as against $245,000 as of March 31 last. Call loans are down $75,000, standing at $550,000, and bonds held are up over $2,500,000, with a cost price of $1,609,530 and a par value of $1,694,080. Cash in hand stands at $378,362, as against $141,585, and reserves for plant depreciation and mine exhaustion are up by over $250,000, standing at close to $3,000,000, which is better than 70 per cent. of the paid-up capital.

**Goodyear Tire & Rubber Co.**—Despite a declining market and a growing keenness in competition, the company was able to show a substantial improvement in earnings for the year ended September 30, 1922. The position of the company has been materially strengthened, reserves built up, outstanding obligations reduced well in advance of their maturity, and profits and earnings have also shown a substantial improvement. Profits for the year amounted to $1,062,023, as compared with $200,128 for the previous year. The cash balance now stands at $1,236,535 and exceeds all outstanding liabilities by approximately $300,000.

The balance sheet of July, 1921, showed commitments for fabric and rubber to the extent of $5,117,000. Full delivery has since been taken of these materials and payment made in full. The reserve set up against these commitments was more than ample and the credit balance of $276,530 is left. The statement of September, 1921, showed a liability of $1,189,920 of three-year renewable 8 per cent. notes. Since that date $785,373 have been paid on account of these notes, leaving a balance of $404,546. In explaining this decrease in liabilities C. H. Carlisle, general manager, says: "This large decrease in our liabilities has been rendered possible by the year's profit from operating, the reduction of $613,348 in our inventories, and of $1,728,070 in outstanding accounts receivable. Our foreign business is now on a basis whereby we receive settlement for shipments within 60 days, which is the main reason we have been able to reduce our accounts receivable to the extent indicated."

After providing for all manufacturing, selling and administrative expenses, a reserve of $406,875 for plant depreciation has been set up. The decline in tire prices during the year was quite marked, being about 30 per cent. in all, and taking effect as follows: November 22, 1921, 16½ per cent.; February 1, 1922, 8½ per cent., and June 15, 1922, 9½ per cent.

In reference to the present year's business, the general manager states that there are many things to consider. Competition will be exceedingly keen, both in domestic and foreign trade. Business has felt and will continue for some time to feel, the baneful effects of the railroad and coal strikes. European conditions, too, are still unsettled. Nevertheless, there are contributary features of the situation, Mr. Carlisle adds, which assure the company of receiving its full share of whatever business is offering on a most favorable basis.

The company's real estate and equipment is valued at $7,396,934. Inventories have been reduced from $2,985,137 at September 30, 1921, to $2,385,844 at the end of the last fiscal year. Accounts receivable are down from $3,245,982 to $1,437,946. Cash on hand amounts to $1,236,535, compared with $870,275. A slight increase in capital outstanding is noted. Current liabilities have declined from $1,701,836 to $529,786. Depreciation reserve now stands at $1,288,398, as against $811,522, and surplus account at $1,362,912, compared with $300,888.

Announcement was made at the annual meeting on October 30 that the regular quarterly dividend at the rate of 1¾ per cent., on preferred and 1½ per cent., on prior preference stock will be resumed, together with all back dividends on the latter issues. No dividend has been paid to date on the 6 per cent., prior preference stock, which was issued at varying dates in 1921 and 1922. The distribution on the respective securities will be made on or before January 10 to shareholders of record December 31 next.

**Riordon Co. Ltd.**—Notice is being given by the trustee, G. W. Scott, to creditors that a meeting has been called for November 16 to consider a proposal for an extension of credit for another year until November 19, 1923. The year's extension previously granted is about to expire.

Accompanying the announcement is a profit and loss statement for the year ended September 30, showing that total sales of the company amounted to $5,790,107, of which the cost of sales amounted to $5,603,656, less a difference between the book value of the wood used and the estimated cost of replacement, amounting to $1,022,820. This brought the total cost down to $4,580,836, leaving a profit of $1,209,271, and with the addition of other income, amounting to $161,794, gross income of $1,371,065.

Administration, selling and other expenses amounted to $272,245, leaving profit before interest and depreciation of $1,098,820. Interest on loans, mortgages and bonds amounted to $1,194,811, making a loss of $95,991. To this is added $44,500 written off for depreciation in November, 1921, and $222,215 credited to idle and starting up expense.

The loss for three months, October 31, 1921, was $1,008,097, and in addition items for timber limits and inventories written off and adjustment of the value of wood consumed brought the total to $3,444,492. The surplus at July 31, 1921, was $106,840; special reserve for contingencies, $2,902,617, and adjustment of taxes, $24,787, which reduced the above total by $3,034,245 to $410,247, which added to the past year's deficit of $362,707 makes the total deficit $772,954.

An extended balance sheet is also furnished the creditors, making a comparison of the position of the company as of September 30, 1922, and July 31, 1921. Within that period it is shown that total liabilities have been reduced from $80,070,020 to $76,447,262. Various items show decreases totalling $6,150,965, but there were increases in others totalling $2,628,207, leaving a net decrease of $3,622,758.

Current and working assets as of September 30, were $449,314, against $9,371,183 as of July 31, 1921. The chief change was in inventories which were down $5,052,289. Current liabilities as of September 30 were $2,761,001, compared with $5,279,888 as of July 31, 1921. The difference is entirely accounted for by a reduction of secured bank loans amounting to $2,785,664.

Suspended and deferred liabilities amount to $8,791,026 as of September 30 last, against $7,942,536 as of July 31, 1921. The chief item in the increase is $960,607 for bond interest overdue and accrued. Deferred assets total $187,040, against $264,560 for the preceding period.

**Ames-Holden Tire Co.**—At the shareholders' meeting on October 30 called for the purpose of approving the plan of reorganization announced some time ago, the affairs of the company were given a thorough airing, and the board of directors were severely criticised.

Protracted discussion made the meeting a long-drawn out one, and it was only after the scattering of shareholders present had been assured that the present board of directors would not function in the new company that the resolution calling for the ratifying of the plan was approved.

None of the old directors were present, and their absence was commented on in strong terms by shareholders who expressed a desire to question the affairs of the company.

**Eastern Theatres, Ltd.**—The annual report for the year ended August 26, 1922, shows that net earnings, before providing for Dominion income tax, amounted to $96,919, as compared with $141,415 for the previous year. After deducting $4,883 for income tax and $48,417 for depreciation, net profits stood at $43,619. This compares with $60,278 for last year. With the balance forward from 1921 of $24,795, the company had available for distribution the sum of $68,414. From this amount dividends of $45,000 were paid and $2,576 balance of organization expenses written off, leaving surplus account at $30,837, as against $24,795.

The balance sheet shows a reduction in current liabilities from $278,563 to $228,856, and quick assets are down from $32,269 to $26,522. This leaves the excess of current liabilities over quick assets at $202,334, as against $246,401 a year ago. Mortgages show a slight decrease from $158,458 to $156,458.

Following is a comparison of the balance sheet of 1921 with that of 1922:—

| | | |
|---|---|---|
| Total assets ......... | $1,724,695 | $1,769,136 |
| Quick assets ........ | 26,522 | 32,269 |
| Current liabilities .... | 228,856 | 278,562 |
| Cash ............... | 24,099 | 29,276 |
| Accounts receivable ... | 2,423 | 2,992 |
| Land, buildings and equipment ......... | 806,781 | 654,624 |

**Canada Steamship Lines, Ltd.**—Operating revenue for the nine months ended September 30, 1922, amounted to $8,426,000, and net earnings for the same period were $1,363,000, as against total interest charges for the period of $540,000.

**Hudson Bay Mines, Ltd.**—The financial statement for the year ending August 31, 1922, shows a total revenue of $12,163 and a total expenditure of $19,739, leaving an adverse balance of $7,575. There is also to be charged against loss and gain account $2,904 as depreciation on plant and buildings and $14,000 for the amount of Kirkland Hudson Bay stock issued with the bonds. The balance carried forward into the current year was $72,111.

The balance sheet shows current assets of $28,887 as against current liabilities of $6,599. The company holds the following properties and securities, exclusive of the Cobalt property: Claims in Gowganda, $84,140; claims in Kirkland Lake, $9,045; stock in Dome Lake Mining Co., $318,733; stock in Consolidated West Dome Lake Mines, $34,740; stock in Kirkland Hudson Bay Gold Mines, $21,790; stock in Mines Water Supply Co., $2,943.

The Cobalt property was closed down during most of the year. No new development work or exploration was undertaken.

**BUILDING YOUR BUSINESS**

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district.

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

# Canadian Bankers' Association Meeting

### Main Features of Bank Act Cannot Be Improved Upon, Says Sir Frederick Williams-Taylor, President—Recovery of Canadian Exchange One of Notable Features of the Year—Statistics of Circulation and Gold Holdings Presented

Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, presided at the annual meeting of the Canadian Bankers' Association held in Montreal on November 9, and was re-elected president of the Association for the coming year. Others present were.—H. A. Richardson, Bank of Nova Scotia; Sir John Aird, Canadian Bank of Commerce; C. A. Bogert, Dominion Bank; J. P. Bell, Bank of Hamilton; Beaudry Leman, Banque d'Hochelaga; J. Cooper Mason, Home Bank; A. E. Phipps, Imperial Bank of Canada; E. C. Pratt, Molsons Bank; C. E. Neill, Royal Bank of Canada; H. Des Rivieres, La Banque Nationale; C. H. Easson, Standard Bank of Canada; A. H. Walker, Sterling Bank; J. R. Lamb, Bank of Toronto; George Wilson, Union Bank of Canada.

### President's Address

In his address Sir Frederick said in part: "In preparing the annual report which I shall now present to you, I have borne in mind the fact that in the course of the next month or two several Banks will have their annual meetings and present as usual to their shareholders a review of the course of financial events during the past year, with their considered opinions upon the important commercial, industrial and economic questions which affect our national welfare. It would be superfluous for me in this address to cover the same ground. I shall omit also any reference here to the future course of events.

"I may, in passing, just touch upon one point which has lately excited much attention, namely, the return of the Canadian dollar to par value with the dollar of the United States. This has been the subject of general and legitimate satisfaction to the people of this country but we should remember that it is not entirely the outcome of natural causes. It has been effected, largely through the influx of special moneys in regular instalments which may presently cease, and by means of substantial borrowings in the United States.

"It will be a legitimate source of pride within this country, and it will naturally enhance our credit abroad, when the Dominion Government feels that it is safe to announce the return of Canada to a gold basis and specie payments. It is questionable, however, whether or not the time has yet arrived, or our gold reserves are at a point when this can be done without misgiving as to the country's ability under all circumstances, to maintain that position, and it is, no doubt, the part of prudence to refrain from taking such a step until it can be done with absolute confidence.

### The Bank Act

"As regards the approaching decennial revision of the Bank Act, the bankers of Canada are probably more keenly alive than anyone else to the fact that no legislation can be perfect, but they remain firm in the belief that, in this regard, the Canadian banking system will bear favorable comparison with any banking system in the world, both on the score of providing safeguards for the public, and as being well adapted to the needs of the country.

"The Act has served this country in good times and bad at least as well as any other system in any other country has served the community in which it operates. As it stands it is the outcome of many decennial revisions to meet the growth of the country and its changing requirements.

"The first Dominion Bank Act was passed in 1868. It was revised in 1871, and there have been four subsequent revisions at intervals of about ten years. It is safe to say that no part of our legislation is in greater degree the work of a succession of the most eminent statesmen and the soundest financiers Canada has produced in the last fifty years. Reflecting, therefore, as it does, the collective judgment and experience of a long line of men of ability and reputation, its provisions should not be lightly criticized or set aside, and I am in a position to say as president of the Canadian Bankers' Association, that the bankers of Canada are unanimously in agreement that the main features of the Act cannot be improved upon.

### The Personal Element

"On all occasions our bankers will welcome any adaptation that in the opinion of the Honorable the Minister of Finance will be in the best interests of the Dominion, remaining firm, however, in the belief that the real safeguard in the operation of our banking machinery must be the ability and the integrity of the men who are responsible for its operation.

"Our local note circulation has gone down 37.3 million dollars in the year, Great Britain's 116 million dollars, United States 647 million dollars. Probably the trade contraction in the year was more marked in the United States than in Canada."

In his presidential address Sir Frederick Williams-Taylor included the following statistics concerning gold holdings, note circulation and public deposits in banks, giving comparisons.

Last year the members were given some figures with regard to gold holdings in Canada, Great Britain and the United States since the first year of the war. The speaker added the figures for the 31st of August, 1922, so that the tabulation may be complete and the record continued.

| | CANADA<br>Banks including C. G. Reserves Million $. | Minister Million $. | Total Million $. |
|---|---|---|---|
| Dates | | | |
| Dec. 31, 1914 | ....67.0 | 89.3 | 156.3 |
| Dec. 31, 1918 | ....87.8 | 115.9 | 203.7 |
| Aug. 31 1920 | ....91.45 | 95.2 | 186.6 |
| Aug. 31, 1921 | ....88.25 | 85.1 | 173.3 |
| Aug. 31, 1922 | ....84.8 | 89.4 | 174.2 |

| | GT. BRITAIN<br>Bank of England Million $. | U.S.<br>Total Gold Million $. |
|---|---|---|
| Dec. 31, 1914 ....... | 338.2 | 1,816 |
| Dec. 31, 1918 ....... | 389.3 | 3,080 |
| Aug. 31, 1920 ....... | 598.6 | 2,688 |
| Aug. 31, 1921 ....... | 624.8 | 3,377 |
| Aug. 31, 1922 ....... | 610.9 | 3,800 |

"Notes in circulation for the same relative dates are as follows. In giving the circulation in Canada the circulation of the banks, plus the circulation of Dominion notes, less Dominion notes in Central Gold Reserves, is given:

| Dates | CANADA<br>Net Notes In Circu'n Million $. | GT. BRIT'N<br>Gov. & Bk. Notes Million $. | U.S.<br>Reserves & other Pap. Cur. Million $. |
|---|---|---|---|
| Dec. 31, 1914 | 263.2 | 363.0 | 2,717.6 |
| Dec. 31, 1918 | 429.5 | 1,914.7 | 4,784.8 |
| Aug. 31, 1920 | 427.8 | 2,249.8 | 5,036.0 |
| Aug. 31, 1921 | 381.1 | 2,172.1 | 4,361.0 |
| Aug. 31, 1922 | 343.8 | 2,056.1 | 3,714.0 |

"Our total note circulation has gone down 37.3 million dollars in the year; Great Britain 116 million dollars; United States 647 million dollars. Probably the trade contraction in the year was more marked in the United States than in Canada.

"Another tabulation may be brought up to date for comparative purposes, namely, the bank notes in circulation and the deposits in the banks:—

| | Notes in Circula'n Million $. | Deposits by the Public Payable on Demand in Canada Million $. |
|---|---|---|
| 1920— | | |
| March 31 ..... | 225 | 657 |
| June 30 ...... | 227 | 659 |
| Sept. 30 ....... | 231 | 677 |
| Dec. 31 ....... | 228 | 657 |
| 1921— | | |
| March 31 ...... | 206 | 560 |
| June 30 ...... | 195 | 562 |
| Sept. 30 ...... | 186 | 534 |
| Dec. 31 ....... | 184 | 540 |
| 1922— | | |
| March 31 ..... | 162 | 484 |
| June 30 ....... | 166 | 505 |
| Sept. 30 ....... | 176 | 490 |

| | Deposits by the Public payable after a fixed date in Canada Million $. | Total Deposits by the Public Million $. |
|---|---|---|
| 1920— | | |
| March 31 ... | 1,197 | 1,855 |
| June 30 .... | 1,243 | 1,903 |
| Sept. 30 .... | 1,270 | 1,947 |
| Dec. 31 ..... | 1,293 | 1,950 |
| 1921— | | |
| March 31 .. | 1,319 | 1,880 |
| June 30 ..... | 1,308 | 1,870 |
| Sept. 30 .... | 1,263 | 1,798 |
| Dec. 31 ..... | 1,240 | 1,781 |
| 1922— | | |
| March 31 ... | 1,230 | 1,714 |
| June 30 ..... | 1,181 | 1,687 |
| Sept. 30 .... | 1,158 | 1,648 |

"This shows a decrease in deposits in Canada in the two years between September 30, 1920, high water mark, and the like date in 1922 of almost $300,000,000—to be exact, $298,000,000. As might be expected more than one-half of this decrease was in demand deposits, which showed a reduction of $187,000,000. Bank note circulation in the same period came down $54,000,000.

"The great volume of imports in 1920 has been steadily diminishing both in quantity and price since that date, while exports have relatively increased.

"The trade balances (expressed in millions of dollars) for the three years are as folows:—

| | For the Twelve Months Ended<br>Sept. 1920 | Sept. 1921 | Sept. 1922 |
|---|---|---|---|
| Imports .... | 1,325.7 | 905.9 | 722.9 |
| Exports .... | 1,245.7 | 991.4 | 806.4 |
| | *80.0 | †85.5 | 83.5 |

*Adverse balance. †Favorable balance.

"In the favorable trade record of these past two years we have the element which is so large a factor in bringing the Canadian dollar back to parity."

## GRAND TRUNK SHAREHOLDERS

The chairman of the shareholders' committee of the Grand Trunk Railway announces the calling of a meeting of the committee at the earliest possible date to consider their position after which they will communicate with the shareholders.

## SELL MORTGAGE DEBENTURES

An issue of $400,000 of six per cent. debentures made in Holland by the Holland-Canada Mortgage company has been oversubscribed, according to advices received by J. G. Coster, general manager for Canada. The debentures were issued from the head office of the company in The Hague, Holland and found a ready market with investors in that country. The proceeds of this debenture sale are for investment in Western Canada and Mr. Coster reports that there is a large demand for mortgage money in the west. The company has adopted the policy of confining its investment to Manitoba and Saskatchewan and will make no investments in Alberta.

Mortgages on city property are taken in preference to farm land mortgages and Mr. Coster anticipates with the opening of the building season of 1923 there will be ample opportunity for this class of investment.

## BRITISH CANADIAN TRUST, LTD.

Profits of the British Canadian Trust, Ltd., for the year to 31st August, 1922, after paying interest and expenses on borrowed money, expenses of investment and management, and income tax, including £6,076 brought forward, was £16,562. Directors recommended final dividend on ordinary shares at 8 per cent. per annum, less tax (making 7 per cent.); carrying forward £6,171, subject to corporation tax and directors' and auditors' fees. Revenue from investments shows an increase of £767, but profit on exchange is only £491, as against £3,149 last year. There is an increase in interest on debentures of £712, but this is almost offset by a reduction in taxes of £656. The out-turn of the wheat crop of 1921 was disappointing in several districts where the company operates both in Canada and the United States, and in consequence arrears of interest are greater than usual, but the Canadian wheat crop for 1922 is reported to be the largest for many years, so that these arrears are likely to be reduced soon. Meantime £2,000 has been set aside from contingent fund against the arrears. Several changes were made in investments, and from profits realized £3,000 has been added to reserve fund, increasing it to £25,000. A valuation of investments shows very substantial appreciation over the amount at which they stand in the balance sheet.

The annual meeting was held in London, Eng., on October 27. The Royal Trust Company are the agents for Canada.

## WHOLESALE PRICES

The index number of wholesale prices, constructed by Professor H. Michell, of McMaster University, Toronto, stood at 166.2 for the month of October, thus registering an advance of 2.0 per cent. over the previous figure of 162.9 for the month of September. This figure compares with 168.2 for October, 1921; 238.4 for October, 1920, and 119.9 for October, 1914.

The index for 20 foodstuffs stood at 175.9 for October, thus registering an advance of 2.6 per cent. over the previous figure of 171.3 for September. This compares with 185.3 for October, 1921; 270.9 for September, 1920, and 136.4 for September, 1914. Lard, cheese, sugar, oatmeal, potatoes, eggs and currants advanced, while flour and canned tomatoes fell.

The index for 20 manufacturers' goods stood at 156.5, thus registering an advance of 1.2 per cent. over the previous figure of 154.6 for September. This compares with 151.1 for October, 1921; 206.0 for September, 1920, and 103,4 for September, 1914. Cotton, steel billets, tin and zinc advanced, while galvanized sheets, silver, cement and pine receded.

The movement this month shows a small advance, owing to the rally in foodstuffs after the seasonal declines. Manufacturers' goods were much weaker, and but for a sharp advance in raw cotton would have shown a small decline. It is as yet too early to say definitely whether we may expect renewed weakness, but it is highly possible that after the steady advance in manufacturers' goods since May of this year we may see fairly extensive recessions.

## *Business Conditions*

There has been no important new development in Canadian trade conditions during the past week, according to despatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal citiies, but retail distribution continues fairly active, reports from travelling salesmen are favorable, and wholesalers are receiving a satisfactory volume of orders in moderate amounts for seasonable staples. The outlook in the leading industrial lines is encouraging, labor is quite well employed, and merchants anticipate a brisk demand for all classes of commodities for some time to come. Collections are somewhat irregular.

Montreal reports a gradual improvement in general business, with orders from country buyers more numerous and with a growing disposition observable in certain quarters to anticipate requirements. Collections are fairly prompt.

With good crops generally and labor well employed there is a fairly steady business at Quebec in most lines, but merchants would welcome the advent of colder weather, which they believe is necessary to stimulate demand for seasonable commodities. Collections are still slow.

Business at Halifax and in the surrounding territory continues to be conducted conservatively, and collections are somewhat difficult, but, while demands are confined closely to current requirements, basic conditions are thought to be improving, as the crops have turned out well and more labor is finding employment.

Although the weather has not been favorable for the best results, general business conditions at Toronto are satisfactory and both wholesalers and retailers report prospects encouraging. The larger industrial plants are extending their operations, and, with labor fairly well employed, there is a steady demand for almost all kinds of seasonable commodities. Collections are better.

There has been no material change in the general business situation in the Far West and Northwest, but reports received from Winnipeg, Saskatoon, Regina, Calgary and other centres indicate that the trend toward improvement in retail lines is maintained, and that, while wholesale orders individually are not ,as a rule, large, they are being placed with more freedom and in numerous instances extend further into the future. Collections still occasion some complaint.

## COBALT ORE SHIPMENTS

The only shipments of ore from Cobalt Station for the week ended November 10th was Mining Corp. of Canada. 491,700. The total since January 1st is 17,077,140 pounds, or 8,538.5 tons.

## *Bank Clearings*

The following are the bank clearings for the week ended November 9, compared with the corresponding week of 1921:—

**Eastern Bank Clearings**

| | Week ending Nov. 9 | Increase over '21. |
|---|---|---|
| Montreal | $105,969,971 | x$756,841 |
| Toronto | 91,811,288 | 1,768,967 |
| Ottawa | 10,816,497 | x769,656 |
| Quebec | 6,966,205 | 775,795 |
| Hamilton | 5,723,526 | 526,066 |
| Windsor | 2,968,827 | 564,424 |
| Halifax | 2,855,892 | x430,535 |
| London | 2,705,847 | x246,191 |
| St. John | 2,647,045 | x23,688 |
| Brantford | 1,091,477 | x161,826 |
| Kitchener | 1,047,972 | x402,447 |
| Sherbrooke | 941,981 | x134,126 |
| Kingston | 829,570 | 76,958 |
| Peterboro' | 806,763 | 9,379 |
| Total | $237,182,861 | $796,279 |
| Moncton | 1,112,272 | ........ |

**Western Bank Clearings**

| | | |
|---|---|---|
| Winnipeg | $ 80,968,389 | $13,501,745 |
| Vancouver | 12,535,260 | x 954,290 |
| Calgary | 5,770,428 | x 653,841 |
| Regina | 5,215,091 | x 384,622 |
| Edmonton | 4,552,467 | x 745,266 |
| Saskatoon | 2,188,417 | x 195,699 |
| Victoria | 1,931,900 | x 225,699 |
| Moose Jaw | 1,911,318 | 106,132 |
| Ft. William | 988,298 | 92,388 |
| Brandon | 947,154 | 105,086 |
| Lethbridge | 871,209 | 217,782 |
| Medicine Hat | 471,747 | 29,105 |
| New West | 463,124 | x99,147 |
| Total | $118,814,802 | $10,793,674 |
| Eastern total | 237,182,861 | 796,279 |
| Grand total | $355,814,802 | $11,589,953 |
| Prince Albert | 406,951 | .......... |

x— Decrease.

## *Railroad Earnings*

The following are the approximate gross earnings of Canada's transcontinental railways for the first period in November:—

| | 1922 | 1921 |
|---|---|---|
| **Canadian Pacific Railway** | | |
| November 7th | $5,346,000 | $4,843,000 |
| **Canadian National Railway** | | |
| November 7th | $3,101,373 | $2,995,791 |
| **Grand Trunk Railway** | | |
| November 7th | $2,454,425 | $2,273,914 |

## *Exchange Quotations*

Closing rates in Toronto, Wednesday, compared with the preceding week, were as follows:

| | Nov. 8 | Nov. 15 |
|---|---|---|
| London | 446.00 | 445.875 |
| France | 6.32 | 6.62 |
| British W.I. | .92⅞ | .92⅞ |
| Jamaica | 4.47¾ | 4.47⅝ |
| Belgium | 5.71½ | 6.15½ |
| Denmark | 20.13 | 20.22 |
| Germany | .01¼ | .01¼ |
| Greece | 1.50 | 1.50 |
| Holland | 39.03½ | 39.21½ |
| Italy | 4.12½ | 4.52 |
| New York | 1/16d | 3/32d |

## GOLD SHIPPED TO MONTREAL

Announcement was made on November 8 that the New York Trust Company had shipped $100,000 in specie to Montreal. The movement is part of one which has been in progress since the Canadian Exchange crossed par and which has amounted to approximately $18,000,000 during the past two months.

## VISIT MINING CAMPS

Members of the Standard Stock Exchange, Toronto, and business associates visited the Porcupine and Kirkland Lake camps in Northern Ontario on November 4 and 5. Particular attention is being given to the gold industry, which is at present prosperous. There is some danger of a shortage of power, it is reported.

# Small Reduction In National Expenditure

### Though Revenue Continues High, Net Debt is Higher Than a Year Ago—No Important Change in Policy Expected to Follow Appointment of New Progressive Leader—Hon. T. A. Crerar Will Be Missed from House of Commons

(Special to The Monetary Times)

Ottawa, Nov. 15:—The October statement of the Department of Finance was very satisfactory from the standpoint of revenue, for when the marked decline in the revenue of other countries is taken into account, it is surprising that, instead of a decrease, the total revenue for the seven months ending October was actually $769,000 greater than for the same period last year.

A rather discouraging feature, however, is that the total expenditure on capital and current account, was only $4,000,000 less than during the same months in 1921. After all, this is the feature of the national finances that should count most, for there is little satisfaction in knowing that the taxpayers are able to meet whatever demands may be made upon them. The question is, how is business to make sufficient profits under such heavy taxation?

The announcement that the net debt had been decreased by $14,271,000 during the month is likely to occasion false hopes. True this happened, but it must be taken into account that in November about $34,000,000 has to be paid in the form of bond interest, while another $16,000,000 has to be paid in December, which will somewhat alter the situation. The chief fact to be born in mind respecting the net debt is that it has been increased by $40,000,000 during the year.

#### Temporary Loans

It is worth while noting that temporary loans were about $20,000,000 less at the end of October than they were a year ago, though they still stand at $95,435,000. The value of Dominion notes out was also about $40,000,000 less than at October 31st last year. The deposits in the Government and Post Office savings banks were $3,267,000 less than a year ago. No doubt four per cent. interest paid by the Ontario savings branches is, to some extent, responsible for the drop in savings in Dominion institutions.

Another rather surprising feature of the revenue is the extent to which money from the business profits tax continues to come in, the receipts on this account to date having been $11,152,000, or only $2,250,000 below what they were for the same period last year. The application of fine tooth methods to this and the income tax is producing good results. Altogether, from a revenue standpoint, this will be a much better year than many last year had thought probable; at the same time it is much heavier taxation than the country can conveniently stand. What is more, there are no signs of a let-up.

#### The Progressive Leader

The retirement of Mr. Crerar, who as leader of the Progressives, is being succeeded by Robert Forke, is unlikely to produce much change in the general policy of that group. It was generally understood that Mr. Crerar was awaiting an opportunity to drop out, and it was the likelihood of this that gave rise to much of the talk about fusion with the Liberals. Mr. Forke, will not be leader in quite the same sense that Mr. Crerar was, or that Mckenzie King or Mr. Meighen are. He takes that position by virtue of the fact that he is chairman of the parliamentary committee that is supposed to direct the House operations.

Mr. Forke, who came to Canada from Scotland in his youth, represents the conservative element in the Progressive group. Careful and cautious, he is not disposed to endorse doubtful proposals, and when he takes a course on any matter he usually sees it through. He has not liked the land taxation plank in the platform of the Canadian Council of Agriculture, and during his election campaign made this quite plain. Traditionally, he is a Liberal, and much more of an individualist than the majority of the members of the Alberta delegation.

It is expected that the Progressives during the session, will give the Government about the same measure of support that they did last session. There will, of course, be the usual protest over the tariff, but sufficient will probably vote with the Government on the Budget to assure a majority. The Wheat Board will again be to the fore in the demands of the western men, so that those who may have considered this a dead issue may as well revise their opinions. One of the new and strong arguments advanced will be the spread between wheat prices on this and the other side of the boundary line.

In dealing with matters of an essentially business nature the House will miss Mr. Crerar very much, for he had a well-trained, big business outlook and a readiness of speech that the latter rarely has. Through his retirement the National Railways will lose a strong supporter, for while the Progressives will maintain their position on this question just as stubbornly as ever, there is no one among their number who can speak with the authority that Mr. Crerar could.

#### Position of Railways.

As was expected, the reduction in rates, without a corresponding decrease in wages, had a marked effect on the revenues of the railways during August. The Canadian National, which in August, 1921, had a net operating credit of $17,000, during August of this year had an operating deficit of $829,847. The bringing back of the Crow's Nest Pass rate on grain, of course, had its effect, but not as much as is generally thought, the grain movement during August of this year not having been as large as that during the same month in 1921. The reduction in the rates on basic commodities seems to have as much effect as anything. The Canadian Pacific offset its fall in gross earnings by a decrease of $1,154,000 in operating expenses, but the Canadian National reported an increase of $7,000 in this department. The net result of the Canadian National's operations during the last two months is that $1,140,000 of the $7,230,000 saved through a reduction in the deficit on the first half-year's operations as compared with that for the same period in 1921, has been lost.

The result of the United States elections is considered a hopeful sign, in so far as tariff matters are concerned. There is little or no likelihood of the tariff being radically changed as long as the present government is in office; but it is thought that the worst has been done and that the saner elements in the Republican party will have more influence in legislation, so that when a change does come it will be in the direction of appreciably freer trade with the United States. In the meantime the growth of exports to the Republic shows that the two countries will trade no matter what the obstacles may be.

---

## BOND ISSUES ARE HELD UP

### New York Market Not Now Favorable to Flotation of New Canadian Issues.

(Special to The Monetary Times)

New York, November 15.—The apparently unsatisfactory character of the bids received by the Catholic Board of School Commissioners of Montreal for their proposed $2,000,000 five per cent loan from houses on this side of the line is regarded here as being a clear indication of the change which has come over the average bond buyer's attitude to foreign bonds during the past two or three weeks. Foreign bonds, even Canadian bonds, are much more difficult to sell today than they were even a month ago. While foreign bonds generally have of course been affected by the uncertainty of the outlook in Europe and the weakness of francs, the Canadians have been influenced more by conditions in the domestic bond market than have the run of foreigns. Caution seems to be the watchword these days in the bond market. Buyers seem to be holding off until the trend during the immediate future becomes more apparent than it is now. The result is that many proposed bond issues are being held up by the investment bankers, until the market shows a stronger trend, as the outcome of a return to greater optimism on the part of the bond buyer. A number of Canadian issues are said to be among those being held up; the soundness of the advice which counselled such action on the part of the Canadian municipalities and provices interested is apparently proven by the recent experience of the Montral School Board.

#### A Co- operative Bank

Inspired by the success of the co-operative labor bank formed in Cleveland in 1920, the Central Trades and Labor Council has decided to form a $1,000,000 national bank in this city modelled along the lines of the Cleveland institution. It is understood here that the new bank will be under the general direction of W. F. McCaleb, the vice-president of the Cleveland bank. As the success of the Cleveland bank is attributed largely to the ability with which Mr. McCaleb, has handled its affairs, the local labor unions behind the new bank feel that it will be a success from the start. Mr. McCaleb is an experienced banker, having been, prior to becoming a member of the executive of the Cleveland cooperative bank, vice-chairman of the federal Reserve Bank of Dallas, Texas.

#### Division of Profits

It is believed that the policy of the Cleveland bank which has attracted most attention in the banking world, the policy which divides all its profits above ten per cent with its depositors and shareholders, will be made an integral part of the policy of the local bank. The Cleveland bank began with a capital of $1,100.000 and in two years had total assets of $14,000,000; it is hoped that the labor bank will, thanks to the same policy, be equally successful.

While in itself the new bank would not be of any great importance, for in a city of banks, it will be only one of many, the decision of the local labor Council to form it is important because it means that New York will shortly be added to the eight or nine other American cities that have banks of this kind. The decision will likely influence the backers of fourteen or fifteen other labor banks that are still in embryo.

## BABSON ON BUSINESS.

Roger W. Babson, of Wellesley Hills, Mass., addressed a meeting of the Empire Club, in Toronto, on November 1, dealing with some of the features of the present economic situation, which lent support to his prediction that business would continue to expand, and stocks and bonds to appreciate in value for some time to come. He declared that he did not regard the present reactionary tendencies of the stock market as indicating any inherent weakness in the economic structure of this country and the United States, but attributed it solely to a weakened technical position arising out of an overbought condition of the market, which is but temporary. As for the bond market, the withdrawal of the United States Government as a buying force and heavy offerings by lending institutions had a temporary depressing effect. This was a situation which would be adjusted. In so far as the general situation was concerned, of the six leading influential factors tending to determine the trend of business, five were favorable and one unfavorable. Fundaentals were sound. The crop, monetary, commodity and employment situations had materially improved, but the last, and one on which Mr. Babson stated that he hestitated to speak because he was of the impression that "my own country is largely guilty for the chaotic condition in Europe," the disorganized state of European finances and of European markets was distinctly unfavorable. During the coming year, he said, money, the stock markets and commodity prices would be firm, all factors making for expansion. If the precedent established in former periods similar to the present, and following the great wars in history, could be accepted as a guide, the present upward trend in prices, he said, would be eventually followed by a further and more extensive reaction in the reverse direction. gradual, of course, and extended over a period of years.

Mr. Babson was firmly convinced that the bull movement on the stock market had not by any means run its course, and he predicted a steady appreciation in price over the succeeding months.

---

## St. BONIFACE TREASURER

In cases involving approximately $12,000 Jos. C. Dussault, former Treasurer of St. Boniface, Man., was arrested on Nov. 8 by Provincial Police on new information charging embezzlement. The alleged embezzlement is said to cover a period extending over six years, and the money is alleged to have been paid to Dussault in taxes, for which he failed to make an accounting. He was out on bail in connection with another theft charge. The former treasurer was recently acquitted on a charge of arson, following a fire in the St. Boniface City Hall.

## VICTORIA HAD GOOD SEASON

### Tourist Trade Increases—Legislature at Present in Session—Victoria Revises Accounting System

(Staff Special)

Victoria, Nov. 10.—A great deal more building activity has taken place in Victoria this season, according to the Victoria and Island Publicity Bureau, than in 1921. This is a healthy sign and makes for optimism and good business. Among the principal structures may be mentioned Woolworth's large office and store block, The Bank of Toronto, two new business blocks on Douglas street in the vicinity of the Hudson's Bay Stores, Royal Dairy, Arcade Block . The latter will house the Chamber of Commerce, and include a large assembly hall capable of accommodating over five hundred; Fletcher's music store, Bank of Nova Scotia (in building), Bank of Montreal (new branch), extensive additions to the Bank of Commerce. Dwellings include several fine new apartment houses, and some especially handsome homes.

#### Tourist Traffic

The past year has been a banner one in the tourist trade, no fewer than 60,000 having visited Victoria during the months of June, July and August. The Victoria and Island Publicity Bureau alone had over 12,000, and this is only about 20% of the total.

One reason for the augmentation of tourist travel was the establishment during this summer of a new ferry service to Victoria from Anacortes, Washington. The ferry carried over 4,000 cars in three months, and so great has been the success that it has been decided to put on a larger and faster boat on this run next year.

The Canadian Pacific Railway are also putting on a new ferry between Victoria and the Mainland. The boat, a very large and palatial vessel, capable of carrying 50 cars and several hundred passengers, will be built in Victoria or Vancouver.

Another feature which has been established this summer in connection with the tourists is an auto-camp at Curtis Point, about a mile and a half from the city, for the convenience of visiting tourists. This camp is an up-to-date one in every way and has been greatly appreciated this summer. It is to be much enlarged next year, to accommodate the increased travel.

The Canadian National Railway has begun its twice daily service to Sooke. This will open a magnificent agricultural district to easy access and efficient transportation, and will prove a great boon to settlers in that district.

The fine timber areas at Cowichan Lake will be tapped in the immediate future by the new spur of the Canadian National Railway which will be completed to that point almost at once.

New industries established include the Beach Eakin Jam factory and the Western Abrasive Paper Comapny.

A business which promises to rival the whaling industry in the future has been announced as planned on the West Coast not far from Victoria for the fishing of basking sharks, the idea being to use the product for various industries, and for fertilizer. An industry utilizing the mud sharks off the East Coast has already been in operation for some time.

#### Legislature in Session

The legislature of British Columbia opened its fall session last week and a number of very important matters will come before it for consideration. The problem of how to deal with the Pacific Great Eastern Railway is not an easy one to solve in the face of reports from prominent engineers and railway men advising the abandonment of the enterprise. However, the opinion seems to be general among the members of the British Columbia legislature that the system should be continued and extended through to Fort George. It is, undoubtedly, rather a drastic step to scrap a system in which so many millions of dollars have already been invested if there is any possibility, by developing it, of making it a paying proposition.

The city of Victoria is making a change in its accounting system and the city auditors, Ismay, Boyston & Co., have been authorized to put in a more up-to-date system. In this connection Mr. Ismay and Assistant City Comptroller Muirhead visited the city of Edmonton recently where they gathered many valuable pointers and, while they will not necessarily put in the system in vogue in Edmonton in full, considerable change is to be made in the present system.

## COMPANY WON ON APPEAL

### British Traders Insurance Company Given Judgment By Ontario Courts

Last week the case of McCoy vs. British Traders Insurance Company was reported in these columns as having been won by the plaintiffs in the Ontario Courts. An appeal was entered by the Company, however, and the First Appellate Division of the Ontario Court of Appeal gave judgment in its favor, with costs The four judges were unanimous, and Chief Justice Meredith summed up the case as follows:—

"This is an appeal by the defendant from the judgment, dated 13th March, 1022, which was directed to be entered by Justice Lennox, after the trial, without a jury, at Toronto, on 24th and 25th January, 1922. The action is brought upon a policy of fire insurance dated 10th May 1921, insuring the respondent against loss by fire and the only question to be determined is as to whether or not the policy was cancelled before the fire occurred.

#### Policy-holder Notified

"The insurance was effected through a local agent of the appellant company, O'Donnell, and without having received any instructions from the head office of its Canadian branch, he on the 1st June, 1921, wrote to the respondent as follows:—

"'The British Traders Fire Insurance Company has cancelled your policy . . . from this date as they consider the bush hazard too great. Kindly call when you are next in town and I will be pleased to return you the unearned premium. I regret very much Mac that this was cancelled and will try and place you elsewhere.'

"According to the testimony of the respondent O'Donnell had told him that the policy would be cancelled before he received the letter of the 1st June.

"The respondent had paid the premiums in cash to the extent of $80.89, and the balance by giving his note for $135.13, payable in three months from 10th May, 1921.

"On the 7th of June, 1921, the respondent received a cheque for $60.17 in which is stated that it was 'unearned premium return policy 309,193, British Traders, cancelled.'

"This cheque was presented and paid and the respondent has retained the money.

"When the cheque was handed to the respondent he was told by O'Donnell that he would be paid the balance (i.e., of the rebate) later; that he was not sure of the amount.

#### Was Policy Cancelled?

"The fire occurred on the 20th June, and on the 4th July following O'Donnell gave the respondent a cheque for $14.20 in which it is stated that it is 'balance rebate insurance premium.' The respondent took the cheque to his bank intending to deposit it there and while at the bank the manager suggested that 'perhaps they couldn't cancel this insurance policy' whereupon he kept the cheque and 'decided to find out whether it was legal or not.'

"The respondent's note was also given up to him when he received the cheque for $60.17, and the resepondent has retained the money received and the note and has not even offered to return them.

"It is reasonably clear upon the respondent's own testimony that he acquiesced in the cancellation of the policy and until his interview with the bank manager had no intention of claiming under it.

"I have no doubt that it is competent for an insured to waive the giving of the notice required by condition 11 of the statutory conditions and upon the evidence there is no escape from the conclusion that the respondent waived it.

#### Previous Decision Reversed

"It may be that the respondent was ignorant of the requirement of the statute as to the notice and it is argued on his behalf that he accepted the money which he received and the return of his note in ignorance of it and that he is therefore not bound by what he did. Whatever force there might have been in this contention if he had repudiated what he had done before the fire occurred, I am clearly of opinion that the right if it existed came to an end when the fire occurred.

"It would be manifestly unjust to the appellant if it were otherwise. If the repudiation had come promptly the appellant might have given the statutory notice and in that way put an end to the contract of insurance. At best the respondent's case is that he acted under a mistake as to his legal rights. Fraud is out of the question.

"I have not overlooked the argument that O'Donnell in giving the notice of cancellation acted without the authority of the appellant. The answer to it is that the appellant ratified the action that had been taken.

"I would allow the appeal and dismiss the action, both with costs."

## MOLSONS BANK ANNUAL MEETING

### Provinces Not Doing Banking on a Fair Competitive Basis, says President.

F. W. Molson, president of the Molsons Bank, at its annual meeting on Nov. 7th, expressed himself as confident regarding underlying conditions. He said:—

"As you are, of course, aware, trade in many lines during the greater part of of the twelve months ending with the close of the bank's year, on 30th September, has not been good. The lessened activity in general business is seen in the decrease in a year of about $132,000,000 in the loans of the chartered banks, which are now about $1,311,000,000 and a decrease of $152,000,000 in the deposits in the banks, which now total about $1,648,000,000.

"In our own case, there has been a decrease in our deposits of nearly $4,000,000, and a decrease in the loans of nearly $7,250,000.

"The depression in trade is reflected in our profits, which are slightly less than those of last year. The cost of doing business has continued to increase; for our year just closed we have had to provide $20,000 more than we did last year for Dominion Government taxes.

#### Provincial Banks.

"You have, no doubt, observed that some of the provinces have entered the banking field, where, we believe, there is no need for their presence, as the chartered banks are meeting the requirements of the public and supplying an efficient service at their numerous branches throughout Canada. The competition can hardly be considered to be fair when it is remembered that the banks are heavily taxed by all the provinces. We are inclined to think, when the considerable cost of conducting the busiess is taken into account, that the provinces could borrow the money at a lower price in the open market than they are paying for the deposits. The circulation of the banks is about now $177,000,000, which is a shrinkage of 5 per cent., in a year.

"Conditions in the lumber trade have much improved, and stocks throughout the country are somewhat low. The American demand is steadily increasing, but there has been no revival in the European market for our lumber. In the Province of Quebec, the cut this year will be larger than it was last year, and wages have accordingly increased. It is to be hoped that strong efforts will be made to prevent forest fires, by which Canada has suffered so much this year."

## GREATER ACREAGE PLOWED

Fall plowing in Central Saskatchewan is twenty-five per cent., greater this season than last, according to the Canadian Government crop correspondent for that part of the Province. A general increase in crop acreage is indicated.

## INSURED SECURES JUDGMENT

An important insurance judgment was delivered in the Quebec Superior Court on November 4. In June, 1919, Victor Marchand, in backing his auto at Ste. Genevieve, ran over and seriously injured his son, Harto Marchand. The father was insured with the Fidelity and Casuality Company of New York against loss through accidents, provided that the insured must show that he has sustained loss. A family council was convened, and Alphonse Marchand, the injured boy's uncle, was appointed special tutor to take action to recover from the father $5,000 damages arising from accident to the boy. The case was tried before a jury, and the father condemned to pay a sum of $5,000 and costs of $550.45.

Victor Marchand, the father, claimed that the insurance company was bound to indemnify him, and the company refused to do so. Action was thereupon taken, and judgment was found against the company.

# The Monetary Times

Trade Review and Insurance Chronicle

OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

## A COMPILATION OR A STATEMENT?

Both the general manager and the president of the defunct Merchants' Bank have now been acquitted on their respective charges in connection with the October, 1921, return. In acquitting the general manager, D. C. Macarow, some weeks ago, Judge Decarie said, referring to the reports sent in by the branches: "It has been established that the October return is a faithful and true return of these reports." In acquitting the president, Sir Montagu Allan this week he used exactly the same words, Moreover, he added in the former case, referring to current loans:—"It is established that these debts and current accounts are correctly entered at their face value in the books. The debt exists in fact for the amounts stated, and appears as such in the bank's books. The contention is that there are amongst them bad and doubtful debts. Then the question arises, is the monthly report supposed to make deductions of appropriations?" He found the answer to be in the negative, no estimate of the actual values being required.

Here is Judge Decarie's final remark in dealing with the question, Is the report false? "Therefore all the evidence which has been given as to the valuation of these debts or current accounts, having been taken from reports on the books, has no application to form the basis of a report on the falsity or truthfullness of said books."

The report was therefore made in strict accordance with the law, which requires that it be made "according to the books of the bank" (The Bank Act, 1913, sec. 112).

At the meeting of the shareholders of the Merchants' Bank in Montreal on February 8th Sir Montagu Allan referred as follows to the report made by H. B. Mackenzie following an investigation into the bank's affairs:—

"He recommended that, in addition to the appropriations already made by the Board of Directors, over $8,000,000 should be appropriated for manifest or probable losses, depreciation of assets and other similar items, in order to carry on the business of the bank on a sound basis. Practically the whole amount had to be met out of the reserve of the bank, reducing it in consequence from $9,450,000 to $1,500,000. The total amount of appropriations required for the Montreal branch is $8,400,000, for which there had been some appropriations made prior to April 30, 1921."

Here, on the other hand, is the record of the overdue debts of the Merchants' Bank during its last year of business, as reported to the government:—

| 1921 | Overdue Debts |
|---|---|
| March 31 | $ 773,165 |
| April 30 | 340,046 |
| May 31 | 863,449 |
| June 30 | 865,146 |
| July 30 | 1,548,192 |
| August 31 | 731,074 |
| September 30 | 844,060 |
| October 31 | 1,189,952 |
| November 30 | 2,700,465 |
| December 31 | 2,707,312 |
| 1922— | |
| January 31 | 2,707,312 |
| February 28 | 2,868,413 |

It is evident, therefore, that while the returns were according to the books of the bank, the latter took the accounts in question at their face, not their actual, value. It may be that an auditor or a government inspector to do so. would be impracticable. It would be difficult for the bank itself to estimate the value of a doubtful account, and much more difficult for an auditor or a government inspector to do so. Reasonable provision is made in the present bank law for annual appropriations on account of such debts. Since, however, a loophole in the law has been found, the point may well be taken up at the next session of parliament.

## THE FARMERS AS A GROUP

There is no room in Canada for group government, but there is room for group parties. There is in fact little danger of domination by a single group, for none of them constitute a majority of our population. Even among the farmers themselves accession to power in Ontario has brought a division in the ranks. Premier Drury has embarked on a "broadening out policy while the United Farmers of Ontario are inclined to retain the group characteristic. The following resolution was passed at a recent meeting of their executive:—

"That whereas the last Dominion general election several representatives were elected in support of the platform advocated by the Canadian Council of Agriculture;

"And whereas these members acted as a group independent of other parties during the last session, in accordance with the intention of their electors;

"And whereas it is reported that at the approaching conference of Farmer members to be held in November, the question of closer cooperation, or, if possible, fusion with either of the old parties is to be discussed with the idea of immediate action, we would reiterate the spirit of the annual convention of 1919 expressed in these words;

"'Whereas the representative character of the great work that is to be done in the province (or in the Dominion) renders it imperative that the members elect should not declare upon or elaborate matters of future policy without due care, investigation and deliberation';

"And would urge our representatives to take no action that would lead to change the policy without first consulting their electors; and we further express our opinion as an Executive that the interests of agriculture will be served best by the Farmer group maintaining its identity."

Some years ago the return to power of a farmer administration would have been regarded in some quarters as disastrous. Ontario has lived and prospered under such an administration, however. The attitude of the United Farmers of Ontario is a wise one.

## THE COST OF ROADS

Judging by representations made by motor organizations and others using roads extensively this branch of public work is not receiving sufficient attention. No better refutation of this view could be mentioned than some facts gleaned from a report just made by the Ontario Highways Department. Approximately $10,000,000 was spent by the province on road building during the past season, though only 300 miles were built. Of this $10,000,000 the Province's share by virtue of the Dominion and Provincial legislation under which it operates is $4,000,000, or 40 per cent., the Dominion Government also being obligated to pay 40 per cent. and the municipalities benefitting from the construction being obligated to pay the remaining 20 per cent. It is stated at the Ontario Department, however, that the Province's share will actually be more than its legal burden. in view of the Dominion Government's expected defalcation upon the score of its obligation. The Dominion Treasury, it is stated, has only the sum of $5,800,000 to devote towards all its good road purposes, so that Ontario will consequently be unable to collect the full share which is due her from this fund.

The Highways' Department summarizes its year's work as follows: Bituminous concrete pavement constructed, 44.9 miles; concrete pavement constructed, 43.25 miles; bituminous macadam constructed, 11.25 miles; waterbound macadam constructed, 107.4 miles; macadam macadam base course constructed, 138 miles; grading finished, 487 miles; concrete culverts erected, 1,300; bridges built, 23; railway crossing subways constructed, 2.

We have had in Canada eras of canal construction, railway construction, and, so far as public works are concerned, the past few years appear to begin an era of road construction. In each of the previous cases the movement was carried too far for existing requirements, and changing economic conditions rendered some of the works of little or no value. Spread through the older provinces there are canals on which there is in some cases no traffic and in other cases insufficient traffic to justify their existence. The construction of railways was partly responsible for this loss of traffic.

In the same way the railways are losing traffic through the opening up of highways. It is impossible to foresee what future requirements may be, but a lesson might well be taken from the two previous cases.

## GERMAN DEVELOPMENT

Anyone who is not by this time too tired of hearing about Europe and its "rehabilitation" to read about current developments cannot fail to see that the "war to end war" did not by any means do so. Whether by habit or by present conditions France is not free from its alleged German menace. Whether Germany regards France as a menace is not apparent, but it is at least well known that the rest of the allies at the time of the peace settlement prevented France from securing the revenge she had so long desired.

An Associated Press Cable reports Louis Loucheur, former minister of liberated regions, as having told the Chamber of Deputies on November 7 that it would be better for France to forego payment of indemnities from Germany than to be endangered by a new attack from a resuscitated country.

It cannot be expected, however, that a country with the resources and industry of Germany will remain inactive in the industrial field. What the political effect of economic recovery will be cannot be foretold, but if the machinery of the League of Nations cannot prevent war, there is little hope for a change, as international enmity seems to be just as strong as evei.

## INTEREST ON BANK DEPOSITS

There has recently been an instructive discussion in the columns of the Montreal "Gazette" on the question of bank interest. It started with a criticism of the banks for paying only 3 per cent. interest on savings accounts. One of the contributors signed, "J. E. B." makes the following statement on the point brought up:—

"The following figures which are taken from the last returns of the chartered banks in Canada, deserve to be thought over:

| | |
|---|---|
| Total deposits payable after notice or on a fixed date ............ | $1,158,462,380 |
| To pay 1 per cent. additional interest on this would take ........ | 11,584,623 |
| But as the banks pay interest only on the minimum balance (monthly) we will put it at .... | 10,000,000 |
| The total paid-up capital of our chartered banks is ...................... | 125,004,717 |

"By this we see that to pay 1 per cent. additional interest represents about 8 per cent of the paid up capital. The average dividend paid by our banks is 10.76 per cent. Take off the eight per cent. and there will be left 2.76 per cent. available for dividends to shareholders. This is figured on the par, but most of the bank shares have been bought or issued mucn above par.

"We have figured the per cent. of interest available to shareholders on capital only, but we ought not to forget the reserve fund amounting to $130,225,995 is made up of undivided profits left there by the shareholders for the security of the depositors. If these profits (available for dividends) are figured on both capital and reserve, as they ought to be, we arrive at 1.30 or thereabout.

"I do not think there are many people ready to invest their money on a 1.30 per cent. basis, particularly if in doing so they incur a double liability as bank shareholders do.

"If we look further into the statement we see that the banks in order to maintain the sound position the public expect and have a right to expect of them, are obliged to keep an immediately realizable reserve made up of: Gold, current coin, Dominion notes, deposit for security of circulation, deposits in central reserves, etc. That they always have in hand notes of other banks, cheques, etc. That they have in deposits with other banks in Canada and elsewhere a sum total of $556,717,667; that they have in Government, municipal and railway bonds, in call and short loans in Canada and elsewhere securities on which they receive a very low rate of interest, especially on the first named $601,030,164; total $1,157,747,831.

"It is interesting to compare this amount with the total of time deposits, which, as already said, is $1,158,462,380."

There is no evidenve to show that the margin of banking profits is too large. The return on the money invested in bank stocks in Canada is not large, considering the number that have failed, the premiums usually paid as part of the purchase price, the foregoing of dividends in the earlier years for the purpose of accumulating a reserve, and the double liability feature. Nor would anything be gained by passing the additional interest charges along to the borrowers, for they would then be reflected in the cost of production and trade.

# *Personal*

GORDON C. EDWARDS, of Ottawa, was elected a director of the Canadian Bank of Commerce at a meeting of the board on November 10th. Mr. Edwards is president of W. C. Edwards & Company and of the Edwards Lumber & Pulp, Limited. He was born at Thurso, Que., in 1866, and has been actively associated since boyhood with the operations of the late Senator Edwards, of W. C. Edwards & Company, Limited, formerly a director of this bank. Mr. Edwards is prominent in the business life of Ottawa and is a past president of the Canadian Club of that city.

W. P. FESS, Winnipeg, was inaugurated as Most Loyal Grand Gander at the annual meeting of the Ancient and Honorable Order of the Blue Goose, a fraternal order of insurance men, in Chicago last month. Mr. Fess is a member of the firm of Fess and Smith, Ltd., Winnipeg.

A. L. FULLERTON, manager of the London, Eng. Office of the Dominion Securities Corporation, is a visitor in Toronto at present.

ALEXANDER DICK, general sales agent of the Dominion Coal Company, has been appointed general manager of Coal Sales of British Empire Steel Corporation, with headquarters at Montreal.

E. P. MERRILL, former general manager of British Empire Steel Company at Sydney, N.S. has been transfered to Montreal as head of the sales department of the corporation.

GALEN N. STONE, Boston, who was prominently associated with the financing of Nova Scotia Steel and Coal Company prior to the inclusion of that enterprise in the British Empire Steel combination, will retire on January 1, from the well-known financial house of Hayden, Stone and Co., New York and Boston.

JOHN R. MINHINNICK, for 15 years manager of the Grand Opera House in London, Ont. has been appointed Director of Theatres for Trans-Canada Threatres ,Limited.

J. A. MINGAY, formerly assistant manager for Canada of the Ocean Accident and Guarantee Company, has been appointed manager for Canada, succeeding W. T. Perry, who goes to head office in London.

JOHN F. TAYLOR, who has been secretary-treasurer of the E. B. Eddy Company, Ottawa, for a number of years, has been appointed general sales manager of the E. B. Eddy Company.

# *Obituary*

ALEXANDER F. CHAMBERLAIN, died at his home in Ottawa on November 4th. The late Mr. Chamberlain was born in Pembroke, 44 years ago, and went to Ottawa at the age of 9. He commenced his business career as a clerk in the Bank of Ottawa, from which he transferred to the Ottawa Trust and Deposit Company, now the Toronto General Trust Corporation. He left this corporation to become secretary and confidential adviser to Fraser and Company, lumber merchants, which position he held at the time of his death, together with a part ownership in the Fraser Bryson Lumber Company.

THOMAS DEWITT CUYLER of Philadelphia, and Chairman of the Board of Railway Executives of the United States and Director of the Pennsylvania Railroad Company, died recently. The late Mr. Cuyler was also associated with The Guarantee Company of North America as a Director on its Philadelphia Advisory Board and the Home Office Board in Montreal, for the past forty years.

ROBERT MCCANN, an agent for the Great West Life Assurance Company, died in Calgary on November 9th.

HORATIO N. WALLACE, died in Melrosa, Fla., on November 13th. The late Mr. Wallace was born in County Roscommon, Ireland, 70 years ago. Mr. Wallace was well-known in Canadian banking circles and was formerly manager of the Canadian Bank of Commerce at Halifax, N.S.

## CREDITORS' VIEWS IN MANITOBA

### Do Not Want One Class to Get Payment to Exclusion of Others

Representatives of the organizations loaning money to farmers in Manitoba met the provincial cabinet on November 1 to discuss conditions as they exist at the present time. The following statement was issued following the conference:

"The meeting unanimously came to the conclusion that the machinery already established by the government was sufficient to take care of all complaints that might be received but in order to strengthen the hands of the government and to give expert assistance and advice in the handling of any knotty problem a committee of business men was formed representing the various creditor interests. During the course of the discussion which took place it was prominently brought out that whereas Manitoba had the largest crop in its history it was too early in the season for the money to have found its way into the channels leading to the various interests represented.

### Various Creditors

"The point was stressed that any hardship that might arise would be due to the fact that one creditor might collect his accounts by pressure, leaving other creditors unprovided for. It was generally admitted that in cases where there was not sufficient money to go round due regard should be had for the claims of all creditors and the situation of the debtor carefully scrutinized. All were in agreement that Manitoba as a province had been blessed with a marvellous crop and that conditions were fundamentally sound but that action in many cases by individuals actuated in some measure by impatience or fear had produced conditions of unnecessary distress.

"While the meeting recognized that there were individual cases of distress, it was felt that the number in comparison with the whole was not of alarming proportions. The department established recently by the government is open to receive complaints of unnecessary pressure but it was very emphatically stated that all complaints would be thoroughly investigated in order to avoid any advantage being taken of present conditions to evade payment by persons in a position to liquidate their liabilities.

"From the many expressions of co-operation passed at the meeting, it was felt that any alarm as to any serious state of affairs arising might be dismissed."

## The Woodcutter

Crude methods were employed in the early life of Canada to prepare lumber. The tree which formerly surrendered to the flat axe one plank now yields numerous planks of regulated thickness. Years ago it was difficult to obtain diversified and safe investments just as it was difficult to obtain lumber.

More than thirty years' experience qualifies Æmilius Jarvis & Co., Limited, to offer you a diversity of investments combined with safety of principal. The Investment Guide presents investments which our experience shows as possessing safety of principal and regularity of income.

Upon request, we shall be glad to place your name on our list to receive the Investment Guide monthly.

## BONDING MUNICIPAL TREASURERS

### Too Many Defaults in Past Year, Says Hon. R. G. Reid at Municipal Convention

The 14th annual convention of the Alberta Association of Municipal Districts was held in Calgary November 1st—3rd. Resolutions were passed asking that rural schools be maintained by a government grant, by a levy on all rateable lands in the municipal district, and by a levy on all rateable lands within each organized school district, and protesting against the government extending the time for redeeming land sold under the Tax Recovery Act.

A resolution asking the Alberta Government to repeal the present liquor act and to substitute a system of government control on the lines adopted by British Columbia was defeated.

### Bonding Treasurers

Hon. R. G. Reid, minister of municipal affairs in the province, dealt with some of the provisions of the Municipal Act, especially those referring to officials. He said:—

"During the past three years we find that there have been 14 defaulters among rural municipal secretaries and I think you will agree with me that is about 14 too many, and if we could do anything to legislate to lower that number, I take it it is our duty to do so.

"In connection with the secretary-treasurers, we of course know they are bonded; a few years ago the custom was for each district to bond its secretary individually. At that time it cost for bonding 50 cents per $100; subsequent to that time the department bonded all secretaries of the province, and we were successful in getting the rate lowered to 30c. Last year by making some slight alteration in the arrangements, and going after the bond companies as strongly as we could, we succeeded in getting the rate down to 25c.

"Naturally, the bonding companies are not in business for fun, and we can take it for granted that on a 25c. rate, if the defaults that have occurred continue, they will more than swallow the premiums paid, and then we will be immediately faced with a demand for an advance on the rate we are paying. I do not think it is fair and right that good municipalities of this province should be called to pay for those secretaries going into default.

### A New Method

"I am not saying that the solution we have arrived at is absolute, but I think it will work to much better advantage than what we are now doing at the present time. A few years ago a change was made, when the department discontinued the practice of auditing the books of secretaries, and each district was required to bond its own auditor and to have the work carried out under its own direction, and then to be checked again by the municipal inspectors. Now in making this arrangement it was considered wise at that time that the arrangement should be subject to the approval of the department or the minister of municipal affairs.

"I think this worked out admirably and we have the proof of it today in the files of the department. We see where the auditors have become better and better as years have gone along, and acting on that analogy, I think it would be good business if the appointment of secretaries were made subject to the approval of the minister.

"Do not misunderstand me in this. There is nothing autocratic about it. The suggestion is to protect the councils—and the ratepayers against something which they cannot protect themselves against. If such a system were adopted, I think it would be only a year or two before the defaulters were reduced to such an extent that I would be able to go to the bonding companies, when the time comes, and then ask them to consider some policy for bonding at approximately 15c. It can be done, and it will be done if we can reduce the defaulters."

J. A. Grant, of Stockland, and H. W. Bright, of Bright, were elected directors of the organization for the ensuing year.

### Hail Insurance

The work of the Hail Insurance Board of Alberta was outlined by A. H. Tovell, the secretary-treasurer of that organization at the closing session on November 3. The losses last year, he said, had been exceptionally light. The actual amount of business had amounted to one and a half million acres, compared with two million acres in 1920 and 1921. The decrease was no doubt accounted for by the crop situation this year, and partly due to the drop in prices, also to the rates of ten per cent., which it had been necessary to set in 1921. Further an organized attempt at misrepresentation had had its effect, but notwithstanding all these things, they had written more than 60 per cent. of all the hail insurance placed in the province. There had, he said, been 1,300 claims this year, compared with 5,000 in 1921. Claims paid had amounted to $300,000; last year they were $2,147,000.

They would remember that in 1921 a rate of 10 per cent. had been announced and it had been necessary to use $274,000 out of the reserve fund. The rate this year would be five per cent., the lowest rate set in the province ever since figures had been available. This included the cost of administration and the return of the $274,000 to the reserve fund. They were, therefore, in excellent shape for taking care of all business offering next year.

During the past four years the Board had carried a risk of $72,000,000 and the average rate charged was 6¾%. That rate compared to that of the line companies, had affected a saving in premiums to farmers in the province of more than $1,500,000, in addition to which they had built up a reserve fund of more than $500,000.

## *Bank Branch Notes*

The Bank of Hochelaga has purchased the bank building on Wellington street, Sherbrooke, Que., formerly occupied by the Merchant's Bank.

The branch of the Dominion Bank at Edmonton Stockyards will be closed on November 15th, and the business transferred to Edmonton, Alberta, office.

The largest bank building deal in Vancouver's history was announced on October 24. The main office building of the Bank of Montreal, corner Dunsmuir and Granville streets, has been sold to the Imperial Bank. Only a block away the Bank of Montreal came into possession of the branch of the Merchants Bank some months ago, and there the Bank of Montreal will erect a new main office.

The present Merchants' branch may be moved to another site. The changes announced involve expenditures of more than $1,250,000.

The Bank of Hamilton have closed their branches at Carmangay, Alta., and Enchant, Alta.

The Sterling Bank announces the following:- R. R. Gilbert, formerly manager of the Royal Bank of Canada, Camrose Alta.,has joined the Sterling Bank staff, and is at present attached to the Credit Department; G. M. McKenzie, has been appointed manager of Dungannon branch: W. E. C. Jones, formerly manager at Tamworth branch has been appointed manager of Palmerston office; W. W. Love, formerly manager at Palmerston, is being transferred to Head Office: V. R. McCallum has been appointed manager at Tamworth; S. C. McCrackin, who has been relieving managers during the summer holiday season, is now temporarily attached to Head Office; A. E. Hawke, formerly Accountant at Orangeville, and more recently Relieving Manager at Monkton, has been transferred to Weilandport branch as Acting Manager.

During the month of October, the following seven branches of Canadian banks were opened:—Eldersay, Sask. Commerce; Edmunston, N. B., Nationale; Holland Centre, Ont. Montreal; Lake Baker, N.B., Nationale; Quebec, Que., Grande Allec, Nationale; Toronto, Ont., Paper & Danforth, Royal; Wimmiamsford, Ont., Montreal.

The following twenty branches were closed:—Bengough, Sask. Commerce; Bloomfield, Ont., Montreal; Carmangary, Alta., Hamilton; Chateauguay Basin, Que., Montreal; Drayton, Ont. Hamilton; Eganville, Ont. Nova Scotia; Enchant, Alta. Hamilton; Ethel, Ont. Hamilton; Fauguiex, Ont. Hochelaga; Laurentides, Que. Montreal; Lisle, Ont., Montreal; Longueuil, Que. Royal; Margaree Harbor, N.S. Royal; Monteith, Ont. Imperial; Montreal, Que., Place d'Armes, Royal; Moscow, Ont. Montreal; Porquis Jct., Ont. Imperial; Ramore, Ont. Hochelaga; Rocklyn, Ont. Montreal; St. Florence, Que. Provinciale.

The branches opened were distributed among the banks as follows:—Nationale, 3; Montreal, 2; Commerce, 1 and Royal 1.

## MANITOBA FARM LOANS

A statement of the Manitoba Farm Loans Association as at August 21 shows assets of $8,191,369,* made up principally of:—

| | |
|---|---|
| Mortgage loans | $7,829,227 |
| Investments | 331,432 |
| Real estate | 11,869 |
| Office furniture | 7,531 |
| Deferred charges | 7,977 |
| The liabilities are:— | |
| Debentures | $7,528,639 |
| Deposit certificates | 13,412 |
| Bank overdraft | 17,625 |
| Accounts payable | 20,159 |
| Capital stock | 484,830 |
| Profit and loss | 126,702 |
| Total | $8,191,369 |

The association has also issued to the provincial treasurer a non-interest bearing bond for $100,000 as collateral security for depositors in accordance with the requirements set forth in the certificates of deposit.

On November 30, 1921, there was a profit and loss balance of $96,148, to which was added $40,553, profit for the nine months, and the $10,000 organization grant from the provincial government was repaid, leaving $126,702.

## COLONIAL INVESTMENT AND LOAN

The Colonial Investment and Loan Company, Toronto, has called a special meeting of shareholders for November 21 to consider a byy-law to redeem one half of the permanent preference stock, of which $124,094 shares, par value $10 each, are now outstanding.

At the end of 1919 the company had 245,501 shares of this stock outstanding, but about half was redeemed late in 1920, following authorization by a shareholders' meeting on September 14.

## MONTHLY BANK CLEARINGS

The following are the Bank Clearings for the month of October compared with the same month last year:—

| | October, 1922, | October, 1921 | Changes |
|---|---|---|---|
| Montreal | $419,599,296 | $441,519,625 | —$21,920,329 |
| Toronto | 421,223,752 | 459,625,955 | — 38,402,203 |
| Winnipeg | 331,145,795 | 309,092,170 | + 22,053,625 |
| Vancouver | 58,779,257 | 58,591,205 | + 188,052 |

| Prince Albert | 1,828,165 | 1,573,076 | + 255,089 |
| Total | $1,496,910,782 | $1,516,376,304 | —$19,465,522 |

## SWINDLED EXPRESS COMPANY

Ottawa police are on the lookout for a citizen who gave his name as Lyall Lewis and a Calgary address. It is alleged that he swindled a local express company out of $1,000 by presenting a certified cheque on a Calgary bank for that amount. Inquiries in the western city, it is said, disclose the fact that the bank had no information regarding the man nor did they carry an account in his name.

## MATACHEWAN RAND MINE

At a meeting of the Matachewan Rand Mines which was called in Montreal before operations were resumed a number of prominent men were added to the directorate as follows: Senator J. A. MacDonald; Senator G. D. Robertson, formerly Minister of Labor of the Federal Government; Col. D. R. Street, director of the Capital Trust Company; M. C. Clark, vice-president of the Nova Scotia Trust Company; R. W. Elliott, Halifax, president of the Sterling Securities Corporation; J. A. C. Cameron, Master in Chambers, Osgoode Hall, Toronto; Lieut.-Col J. A. Cooper, of Smith, Denne and Moore; and C. F. Navin, director and secretary of the Detroit Baseball Club. The Matachewan Land controls promising properties in Fort Matachewan area.

# Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

# Sir Montagu Allan Acquitted and Praised

## "The President Cannot Be Charged With Negligence in Not Doing What Was Impossible for Him to Do," Says Judge Decarie in His Judgment—Allan Was Charged With Having Made a "Return That Contained a False Statement"

Praise as well as acquittal was accorded to Sir Montagu Allan, former president of the defunct Merchants Bank, by Judge Decarie on November13, in his judgment following the trial of Sir Montagu, charged with having signed a "return that contained a false statement." The charge was laid against Sir Montagu in connection with the October return of the Merchants Bank to the Minister of Finance, following the bank's absorption by the Bank of Montreal.

### Court's Decision

Judge Decarie's decision is as follows:—

"In the case of His Majesty the King against Sir H. Montagu Allan.

"The indictment in this case accuses Sir H. Montagu Allan of having, on or about the nineteenth of November, 1921, being then President of the Merchants Bank of Canada, a chartered bank, negligently prepared, signed, approved or concurred in a return respecting the affairs of the bank, to wit, the return for October 1921 to the Minister of Finance and Receiver General respecting the liabilities and assets of the said bank, which said return contained false or deceptive statements.

"The official position of the accused, as President of the Merchants Bank of Canada at the date of the report when it is addressed to the Minister of Finance for Canada, the signature of the Chief Accountant, Mr. H. Gillespie Muir, and the President, the accused, are all proved.

### Points at Issue.

"The points at issue are the following:—

"1. Is the report false?

"2. Has it been established that the accused has negligently signed, approved and concurred in the said report?

"On the first point the evidence shows that the report was made from the books by Mr. Gillespie Muir, Chief Accountant?

"It has been established that local managers, about three hundred and fifty in number make a monthly report on the same form as Schedule D, and these are certified by each of these managers, according to the formula in this schedule.

"These reports and returns are sent to and received by the Department of the Chief Accountant of the bank. He himself looks through all the reports, sees if they are correct, and when this is done, and when the return is found correct, signs it. It is presented then for signature of the president and of the general manager.

### The October Return

"It has been established that the October return is a faithful and true return of these reports.

"The chief accusation coming from the examination of Mr. Edwards is that debts, or current accounts are correctly entered at their face above their real value.

"It is established that these debts and current accounts are correctly entered at their face value in the books. The debt exists, in fact, for the amount stated, and appears as such in the bank's books.

The contention is that there are amongst them bad and doubtful debts. Then the question arises, Is the monthly report supposed to make deductions or appropriations?

"The obligations for the bank to give a return to the Minister of Finance is found In Article 112 of the Act respecting banks and banking, assented to 6th June, 1913. This article reads:

"'112, monthly returns shall be made by the bank to the Minister in the form set forth in Schedule D of this Act.'

"Paragraph 4 reads: 'The monthly return shall be signed by the chief accountant, or by the acting chief accountant, and by the president, or a vice-president or director then acting as president, and by the general manager, or other principal officer of the bank next in authority in the management of the affairs of the bank at the time at which the declaration is signed.'

"It is imperative, in my opinion, that Schedule D must be strictly complied with. Section 21 of Schedule D declares that overdue debts shall be reported. There is no mention in this item of any valuation for the different characters of these debts. So that, by reporting the overdue debts as they appeared in the books of the bank, the strict obligation is fulfilled. Therefore, the monthly report must copy the books and must mention all debts as at par, subject only to such appropriations should have been entered in the books.

### Intention of The Law.

"Is it the intention of the law that the monthly report should be made so? If the law had required more classification of these debts it would have repeated what is required in Article 54. This article orders the directors to submit a clear and full statement of the affairs of the bank exhibiting on one part the liabilities of the bank, and on the other, the assets and resources thereof. It goes further in section 2, and states what the statement shall contain, but without restricting the generality of the requirements of the preceding sub-section on the different items on which the statement is to be made. For instance, in regard to overdue debts, they have to set forth debts and estimated loss provided for. It goes still further in section 8. The report must state any or further particulars than those called for by the details of said sub-section 2, which, in the opinion of the directors are necessary to a full and clear statement of the affairs of the bank.

"Section 4 calls for a profit and loss account. It is clearly evident that the statement must relate not only what is in the books proper, but even what in the opinion of the directors is necessary to show a clear statement of the affairs of the bank.

### Was There Deception?

"So I may conclude that in the monthly return it is not necessary to report all valuations of the debts, and that reporting on the strict appearance of the overdue debts in the books is within the requirements of the Act. Therefore all the evidence which has been given as to the valuation of these debts or current accounts having been taken from reports on the books, has no application to form the basis of a report on the falsity or truthfulness of said books.

"Now, coming to the second point, "Has it been made wilfully false or deceptive?"

"In order to prove the negligence the evidence should have shown that the accused was in possession of facts which should have been stated, and which by his action or wilful omission were not stated.

"These faces may have reference to classification or appropriation in the report. As above stated this classification was made by three hundred and fifty odd managers and their accountants.

"It was verified, tabulated and checked by the chief accountant, and passed over by auditors representing shareholders.

"There is no evidence that the president knew of anything that was not properly classified, and it is not proved that he had done anything to change this classification.

"It is proved that it is not the practice nor the duty of the president of a bank to attend to the details of classification under the different items.

"It is understood he would not have time, in view of the conditions, to do it properly, and that is the case in the present affair.

"Now, for appropriations. As I have already stated, the monthly statement does not call for such appropriation, but, even so, what are the facts about this question? What is the conduct of the accused?

"Early in September the accused started an investigation of the affairs of the bank. Not satisfied with that he retained the services of an expert of reputation in banking affairs, Mr. H. B. McKenzie.

"The result of their investigations was not exactly the same. Even the report of Mr. Edwards, made from the same basis, does not concur with theirs.

"It took these gentlemen considerable time to arrive at their conclusion Mr. Mackenzie delivered his report to the acused on the 14th November.

"The monthly report had to be made from the books as they stood on the 31st October, so it would have been necessary to make new entries in these books to reach that conclusion.

"It was clearly proved that this was an impossibility, in order to allow the chief accountant to make his monthly report, and have it signed by the president and general manager.

"The president cannot be charged with negligence in not doing what was impossible for him to do.

"In this occasion the accused used the greatest possible diligence with the greatest prudence.

"He was facing very heavy responsibilities towards the bank, its directors ,shareholders and depositors.

"His conduct in these grave days was that of an honest man, of an honorable man. As soon as he could, at great sacrifice to himself, he saved his bank from what he feared to be a great disaster.

"Therefore, negligence has not been proved, and I find the accused not guilty."

---

## RAILWAY OFFICIAL TRANSFERS

Official announcement was made on October 31 by W. R. MacInnes, vice-president of the Canadian Pacific Railway, that George Stephen, who has held the office of freight traffic manager of the Canadain National Railway, has been engaged by the Canadian Pacific as assistant freight traffic manager of western lines, with headquarters at Winnipeg.

Mr. Stephen first served the Canadian Pacific in 1889 in the foreign freight department. In 1899 he was appointed chief clerk in the general freight office of the Canadian Pacific Railway at Winnipeg. He resigned from the office in 1901 to accept a similar post with the Canadian Northern Railway. With the taking over of that railway in 1918 into the Canadian National System. Mr. Stephen was appointed freight traffic manager of the entire system, with headquarters at Toronto.

The official announcement from C. P. R. headquarters said the appointment would become effective on November 15, along with the following additional changes in the freight traffic department:—

W. B. Lanigan, freight traffic manager of the company's rail lines, assumes the duties of general freight manager, all lines, rail and ocean.

E. N. Todd, general foreign freight agent, becomes freight traffic manager, all lines.

W. M. Kirkpatrick, assistant freight traffic manager, becomes general foreign freight agent, Atlantic and Pacific Ocean Lines.

---

## NATIONAL CITY BOOKLET

The National City Company, of New York, has issued an illustrated booklet entitled "Bonds and Bankers," outlining the bond and investment business which the company carries on. The firm has fifty offices in Canada and the United States, and in Geneva, London and Tokio; its New York office comprises 100,000 square feet, and employs 1,700 persons, and the company maintains 11,000 miles of private wires. Its Canadian advisory board is composed of Lord Shaughnessy, chairman; Sir John Aird, Edson L. Pease, Sir Lomer Gouin, Sir Augustus Nanton, W. N. Tilley, K.C., Lieut.-Col. Herbert Molson, and Wilmot L. Matthews.

---

## POWER ASSETS TRANSFERRED

The "clean-up" deal, whereby Toronto acquires the Mackenzie interests power and radial was finally cleaned up on November 1, the consideration being $32,734,000. All the documents, receipts, securities and cheques in connection with the deal were exchanged between the Ontario Hydro-Electric Power Commission, and the Toronto Railway Company, thus completing the transaction under which the Hydro Commission obtains the assets of the Electrical Development Company, the Toronto Power Company, the Toronto and Niagara Power Company and Toronto Electric Light Company, the Toronto and New York Radial Railway Company, and the Aurora and Schomberg Railway Company.

The directors of all these companies resigned and a new board was appointed on the nomination of the Hydro-Electric Commission under the terms of the agreement to administer each of these companies. The new board consists of the following:—

Sir Adam Beck, chairman of the Ontario Hydro-Electric Power Commission, president; Col. D. Carmichael, vice-president; W. W. Pope, secretary; F. A. Gaby, chief engineer of the Hydro-Electric Commission, a director; and J. W. Gilmour, treasurer.

### SEVENTY-FOURTH ANNUAL REPORT OF THE

# CONSUMERS GAS COMPANY OF TORONTO

**YEAR ENDED 30TH OF SEPTEMBER, 1922**

The Directors submit herewith, their Report and the Financial Statements for the fiscal year ended September 30th, 1922.

There has been an increase of 4,586 in the number of consumers. The operations for the year have resulted as follows:

| | |
|---|---|
| Gross Earnings | $6,813,939.82 |
| Operating Expenses | 5,335,665.65 |
| Net Earnings | 1,478,274.17 |
| Interest, Dividends and Plant and Buildings Renewal Fund | 1,217,055.80 |
| Leaving a Surplus of | 261,218.37 |

In accordance with the provisions of the Company's Act of Incorporation, $140,906.09 of this surplus has been restored to the Reserve Fund.

The balance $120,312.28 has been carried to the Special Surplus Account.

The coal miners' strike in the United States, caused the Directors much anxiety in the securing of an adequate supply of gas coal. It is satisfactory to be able to report that, notwithstanding the long duration of the strike, the Company was able to maintain a full supply of gas throughout the entire period.

This was not accomplished, however, without adding greatly to the Company's operating expenses, due in part to the necessity of purchasing and transporting a large quantity of English gas coal, and to the fact that American gas coal could not be purchased except at greatly enhanced prices, and with uncertain deliveries.

As a result of the general shortage of coal, and the difficulties experienced by citizens in obtaining sufficient coal for the heating of their houses, the demand for gas during the month of September exceeded that for any month during the Company's history. The average daily output of gas for that month was 15,527,000 cubic feet, as compared with the highest previous average daily record, in January, 1920, of 15,162,000 cubic feet.

On September 25th last the Company recorded its maximum daily output of gas, which amounted to 18,662,000 cubic feet, being an increase of 1,258,000 cubic feet over the previous maximum day.

The demand for gas has continued to tax the Company's manufacturing capacity to its limit, and while the revenue from the sale of gas shows a decrease compared with last year, of $418,452.44, this amount really represents the saving to the consumers generally from the application of the schedules of rates for gas which were made effective on February 15th and June 15th.

The present schedule which was made effective on June 15th, reads as follows:

| | | | | | |
|---|---|---|---|---|---|
| First | 10,000 c.f. | per month | 9c. | net per | 100 c.f |
| Next | 90,000 c.f. | " " | 8½c. | " " | 100 c.f. |
| Over | 100,000 c.f. | " " | 8c. | " " | 100 c.f. |

Service Charge—50 cents per meter per month.

As compared with the flat rate of $1.25 per thousand cubic feet (the rate charged for gas prior to February 15th), the above schedule represents an annual saving to the consumers of nearly $1,000,000.00.

During the year slight reductions were made in freight rates. On July 1st, the freight rate on coal on the United States railoads was reduced 27 cents per net ton, and on August 1st, the same rate was reduced 15 cents per net ton on the Canadian lines.

These reductions, together with the saving of the exchange on remittances to the United States, have contributed materially in enabling the Company to make the very substantial reductions in the rates charged for gas.

The efficient condition of the plant has been well maintained throughout the year. Necessary repairs and renewals have amounted to $649,162.30.

In accordance with the By-Law passed by the shareholders at the last annual meeting, application was made for Supplementary Letters Patent, which were granted on the 9th December, 1921, increasing the Authorized Capital Stock of the Company from $6,000,000.00 to the sum of $12,000,000.00.

The following statement for the past, as compared with the preceding year shows:—

| | Meters | Gas Sales |
|---|---|---|
| Year ended Sept. 30, 1922 | 132,141 | $5,408,829.61 |
| Year ended Sept. 30, 1921 | 127,555 | $5,827,282.05 |
| Increase | 4,586 | |
| Decrease | | $ 418,452.44 |

All of which is respectfully submitted.

A. W. AUSTIN,
President.

## STATEMENT OF INCOME AND PROFIT AND LOSS

### For the Year Ended September 30th, 1922

| | | |
|---|---|---|
| GROSS EARNINGS: | | |
| Gas Sales | $5,408,829.61 | |
| Residuals Produced | 1,029,856.51 | |
| Merchandise Sold | 349,782.42 | |
| Miscellaneous Revenue | 25,471.28 | |
| | | $6,813,939.82 |
| Production, Distribution and Administration Expenses and Taxes | | 5,335,665.65 |
| Net Earnings | | $1,478,274.17 |
| Interest | $ 51,516.40 | |
| Dividends | 600,000.00 | |
| Plant and Buildings Renewal Fund | 565,539.40 | |
| | | 1,217,055.80 |
| | | $ 261,218.37 |
| Carried to Reserve Fund | $ 140,906.09 | |
| Carried to Special Surplus Account | 120,312.28 | |
| | | $ 261,218.37 |

A. W. AUSTIN, L.S. ARTHUR HEWITT,
President. General Manager.

We have audited the accounts and vouchers of the Consumers' Gas Company of Toronto, for the year ending September 30th, 1922. Our requirements as Auditors have been complied with and in our opinion the above Balance Sheet sets forth a correct statement of the Company's affairs as shown by its books.

(Signed) W. E. SAMPSON,
EDMOND GUNN, F. C. A.
Auditors.

Toronto, 19th October, 1922.

The following gentlemen were elected Directors for the ensuing year: A. W. Austin, Esq.; A. H. Campbell, Esq.; Wellington Frances, Esq., K. C.; L. Goldman, Esq; F. LeM. Grasett, Esq., M. D.; H. Langlois, Esq.; Lieut.-Col. John F. Michie, William Mulock, Esq., K.C., F. G. Osler, Esq.

At a meeting held subsequently Mr. A. W.Austin and Mr. Wellington Francis, K. C., were unanimously re-elected President and Vice-President respectively. 85

### NEW PULP MILL

Work on the big pulp mill of the Wigwam Pulp and Paper Company at Elk River, near Elkom, B. C., is being carried to completion in the shortest possible time. At the present time about 50 men are employed and a programme which will call for the employment of at least 600 by the first part of November is already under way.

That the project will be a much larger one than was first announced, is the opinion of those closely in touch with the situation. Recent changes in the plans for the proposed construction of the dam which will be utilized to generate power call for this structure to be considerably strengthened and raised from 150 feet to 180 feet in height. The alterations will cost in the neighborhood of $500,000, and will bring the cost of the completed plant to about $4,000,000.

Already one billion and a half feet of pulp timber has been cruised in the immediate vicinity of the new mill, and as the promoters of the enterprise only asked for 500,000,000 feet, which they estimated would fill their requirements for 30 years, they are making plans to enlarge their activities.

# "Non-Medical" Life Insurance - Without Medical Examination

BY RANDOLPH S. MORTLEY

In a review of the new business written during the first half of this year by all the Life Companies in Canada in The Monetary Times of September 8th, 1922, reference was made to the recent introduction in Canada of "non-medical" or insurance without medical examination. It is well-known that this departure in life under-writing was embarked upon by certain companies in Great Britain a few years previous to the opening of the last century, and that owing largely to the elaborate and cumbersome reports latterly required it was temporarily suspended; the business had been hedged about by some restrictions which resulted in many publicly-made protests, and but little progress was reported during something more than a decade. In 1900 however marked modifications in the application forms were made by some of the companies who resumed the writing of "non-medical" policies, with more success, though comparatively little information of the results is available here.

The Northwestern Life, of Winnipeg, gets credit for being the pioneer of this system of insurance in Canada. We find that three or four Canadian companies also introduced it in January, 1921; and their success last year was so encouraging, it is said, that during the first half of 1922, the great majority of Canadian companies adopted it. Some of the larger, older companies, however, are not yet writing it; they report that they have not experienced any considerable demand for it, to warrant them entering the list of competitors for this class of insurance. On the other hand, one of the old-established companies who began this business last year with $1,000 as the limited amount per policy, has increased that amount to $2,000, without extra premium or additional restrictions, to all applicants between ages 18 and 45. So far as can be ascertained, however, the policies issued by the other companies writing "non-medical" business in Canada range in amounts of from $1,000 to $1,500, for ages 15 to 45.

### Obstacles to Success Hard to Overcome

Some companies report their experience as satisfactory, while others will not state that they have received much if any more desirable business than they would have secured under the old system. Their agents who at first would be expected to be among the first to profit from the "non-medical" system, at best seem indifferent,—in some instances preferring medical examination and wishing that their districts could be exempted from the new order of things. The doctors as a class are not expected to favor the new system, and might even use their influence in opposition to it. Some of the best prospects, too,—desirable risks, express a preference for personal examinations; availing themselves of the benefits of free medical investigation they naturally think that if they succeed in passing the company doctors, nothing can subsequently disqualify them for insurance. Then there is the rather numerous class of prospects who postponed taking life insurance in early life and, although the age limit for these policies is usually 45, are more or less doubtful of their now being able to qualify in health; these prospects are not all in favor of insurance without medical examination. They are not sure they can answer the labyrinth of questions so as to have their applications accepted and all doubt removed of their realizing their insurances at maturity.

### Services of Medical Men Still Needed

It is claimed that it offers special advantages to all who are first-class risks, since the applicants are not subjected to the delay and inconvenience often experienced in arranging for a medical examination, especially in smaller towns and villages, principally in the sparcely settled parts of the country. The main reasons for Canadian companies having adopted the system of insurance without medical examination is "not that they are dispensing entirely with the services of medical men, but that owing to the latter being too busy attending their patients, and postponing examinations, or that in country sections they are located too widely apart and cannot be secured promptly,—insurance salesmen have too often lost their grip upon prospects, who either postponed the contracts or changed their minds." Another reason assigned is that in some localities the doctors, like coal dealers and others, combined to raise their fees, even more than doubling them in places. Supposing that they meet with the most surprising success in the new venture, the companies freely admit that they will still need the services of the medical profession, and are now availing themselves of the same for all cases of $2,500 and upwards.

### No Reduction of Rates For This Insurance

There is still another strong reason, probably—the burning desire of most companies writing this form of insurance to accumulate larger volumes of new business and make a proud showing in their annual reports. But it must be conceded that the conservation of a small business is more to be desired than the speedy production of a large one. Without questioning their honesty and sincerity, the record of Agency forces in the matter of preventing lapses does not inspire unlimited confidence in their judicial ability as a class to determine accurately questions of policy. While the "non-medical" contract is the same as that issued with full medical examination, containing the same guarantees of cash profits, surrender and paid-up policy values, extended term insurance, premium loans, etc., and is incontestable after one year, we do not hear of any reduction of the rates charged for this kind of insurance, because of its lower cost to the companies. The total and permanent disability benefit is made a part of the contracts, except in the case of married women, if the assured becomes totally and permanently disabled. This class of insurance, while placing a very much heavier responsibility upon the salesmen than the older methods, creates a stronger feeling of uncertainty among company executives, and may probably remain in the experimental stage for quite a number of years, in partial competition with insurance of medically-examined lives. It must be remembered that it is endorsed by Canadian actuaries.

### Precedents in England Not Identical

In addition to the precedent derived from the successful sale of "non-medical" insurance in England, where it was introduced in 1890, and is naturally brought forward in support of the movement here, and the experience of Canadian and foreign companies for years in writing Industrial Life Insurance without medical examination, or appreciable adverse effect upon the mortality rates, is also urged. It should be remembered that the conditions in Great Britain are vastly different from those in Canada; instead of a small population scattered over a very large territory, as in Canada, they have in England an immense population crowded into a small territory with superior facilities at their command for obtaining quickly all necessary information concerning prospects for life insurance. In Industrial insurance requiring an entirely different class of salesmen, with talents peculiarly adapted to the widely different field, from those engaged in selling ordinary insurance there are few companies operating in Canada, and none engaged exclusively in this branch of the business. Again, the maximum limit at risk on any single life is only about $500, largely among children, so that the contingencies are not as great as with "non-medical" policies, while the conditions are understood to be different, in other respects. A well-known Canadian Company, writing Industrial policies for over 35 years, originally limited the amount of insurance to $200, and after six or seven years reduced it to $150, with the further limitation that if the weekly premium exceeded 15 cents a medical report would be required. No definite mortality table, built entirely upon non-examined lives for industrial insurance in Canada is yet available, so that the reliability of this precedent cannot be fully determined.

### Tentative Regulations.

Of course the Canadian Companies writing "non-medical" life insurance are only trying it out on a moderate basis, with the regulations governing its development in Canada more or less tentative. Principal among these may be mentioned, that all applicants within the age limits imposed must apply without being medically examined; they have no option in the matter. Each applicant must complete a questionnaire giving full details as to his or her occupation, residence, family history, personal history, height, weight, and present good health or otherwise, including full particulars of any chronic ailment or disease—consumption for instance. The Company reserves the right to require medical examination in all cases of doubt as to the risk being up to the standard. An inspector not in the employ of the Company will report on the habits, occupation, and physical appearance of the applicant, with little or no reference to the financial circumstances.

### Ideals Sought In "Non-Medical" Policies.

This system, new to Canada, is expected to popularize insurance with the public, especially among women, for whom the medical examination has always been an objectionable feature,—especially if they could be accepted on the same terms as men without limitations, as they are in England. It is expected to help Agents to write a profitable business in out-of-the-way districts and bring within protection of Life Insurance numerous homes that have hitherto been neglected, and spread more widely the total amount at risk. But while old experienced salesmen will concede that the reports of medical examiners and directors, who are not infallible, are not always reliable, however, scientifically accurate they may be, over against this must be placed the millions of dollars saved to every Company having a history by the rejection of many thousands of dangerous risks by their Medical departments.

### Weakening Effect Upon Agencies and Companies

From the standpoint of the Agencies as well as that of the life Companies strong objections, may be, and are raised to writing insurance without close medical examination. It is objectionable because it is destructive in its tendency to the upbuilding of strong permanent Agencies, which are the aim of all good Superintendents. The system at work favors following the line of least resistance, and in time will decrease the selling power of the field representatives; hence it can scarcely fail to reduce the volume of insurance written for the companies on good insurable risks. Suppose the prospect is being solicited for additional insurance; he probably needs and could carry at least $5,000 to $10,000 more, but he objects, and wants to postpone it. Nothing is easier or more tempting to the salesman than to suggest the smaller amount of "non-medical" insurance, and get it put over in this way. Every time the salesman resorts to this scheme his moral fibre is weakened instead of strengthened, and he will be a clever Agency-Manager who can restrict the privilege of selling "non-medical" policies to picked men of his staff. By opening the door to the way down the line of least resistance he weakens the fibre of his sales force, instead of developing the constructive policy which produces the best results. Again, if the companies make their sales-force wholly responsible for the proper selection of their risks, and depend upon their ability and integrity to protect the companies' interests, and their policy-holders' interest, are they not taking too great chances? Fieldmen usually work on commission, and being interested financially in all the risks, should they be delegated the power not only of judging the answers to the questions, which are as numerous and searching as the doctor asks, but practically the control and responsibility in accepting the risks? Is it any wonder that men in the field, having discovered a fly in the ointment, are complaining of the much longer time it takes to get these application forms filled out than for the other kind of policies? In the opinion of some Managers the tendency of such a system is to weaken the salesman and his prospects, as well as his company.

Life Inurance men must bear witness to the fact that in the smaller, rural communities there is perhaps no member who wields a greater influence than the local family physician.

---

## SARNIA LIFE AGENTS

With an initial membership of 28, the Sarnia Life Underwriters' Association was organized on November 2. H. A. Link, district manager of the Sun Life Assurance Company was elected president and the other officers chosen were: Vice-president, C. R. Hoskins, superintendent of the London Life; secretary treasurer, C. R. Lavoie, district agent of the Metropolitan Life; executive, H. F. Youngblut, Great West Life; H. McKenzie, Prudential Life; J. A. Clement, Imperial Life.

# Recent Fires

Fire losses in Canada during the week ended November 15, are estimated by The Monetary Times at $547,500, compared with $231,100 the previous week. The details are as follows:—

**Amherst, N.S.** Nov. 4th. Fages building on Havelock street near Victoria.

**Auburn, N.S.** Nov. 7th. Warehouse owned by George E. Roberts of Halifax. Loss $10,000.

**Aurora, Ont.** Nov. 12th. Barns on the farm of Wm. Botham, of concession two, Whitechurch. Loss is partly covered by insurance.

**Bury, Que.** Nov. 6th. Feed store and building owned by William Macaulay.

**Calgary, Alta.** Nov. 4th. Home of Mrs. L. Brenner, 4029 Fourteenth street southwest. Loss $1,400.

Nov. 8th. Garage owned by W. H. Ross at 2419 Fourteenth street west. Loss $500.

**Chatham, Ont.** Nov. 12th. Factory belonging to Dawe and Peterson.

**Cornwall, Ont.** Nov. 10th. Barn in the rear of the Yates block, and adjoining building. Loss $3,000.

**Ernfold, Sask.** Nov. 6th. House on the farm of James Taylor. Cause, overheated chimney. There was some insurance.

**Foam Lake, Sask.** Nov. 9th. Barn of Helgi Helgason. Loss $11,000 with no insurance.

**Ganges, B.C.** Nov. 6th. Home of Mr. Casperson on Ganges Hill.

**Grand Valley, Ont,** Nov. 12th. Graham Bros.' store on Main street.

**Gravelbourg, Sask.** Nov. 8th. Deaust's garage. Loss $25,000.

**Viceroy, Sask.** Nov. 9th. Union Bank branch. Loss $8,000.

## CHANGE IN BENEFICIARY

### Held to Be Legal By Quebec Court, When Policyholder Reserved Right to Do So

Decision of an unusual case on life insurance law in Quebec province was given recently by Judge Duplessis at Three Rivers. The law regarding the rights of beneficiaries of life insurance policies largely finds its source in Article 1029 of the Civil Code, the last sentence of which says in effect, that a stipulation for another cannot be revoked if the other has signified his assent to it. This rule was early applied to life insurance benefits and was interpreted to mean that if an applicant for insurance or a person insured, named a person as beneficiary and the beneficiary accepted the benefit, the insured cannot afterwards change the beneficiary without the latter's consent. This rule being found unsatisfactory, some companies adopted the practice, if the applicant desired, of inserting a clause in the application and policy by which the right to change the beneficiary without his consent was reserved to the policy-holder.

Until the present case the question of the validity of this clause had not come before the Quebec courts.

### Metropolitan Group Policy

In January, 1919, the Metropolitan Life Insurance Company gave a policy of $2,000 to every agent who had been in its employ for a year and upwards. The company's agent at Yamachiche, Moise Carbonneau, in June of that year, applied for this group policy, making J. E. Meunier, whom he styled his son-in-law, as beneficiary, but reserving to himself, in express terms, the right to change the beneficiary.

Meunier joined in signing the application, thereby accepting it, and in due course the policy for $2,000 was issued, wherein Meunier was named beneficiary, but bearing on its face that the insured reserved the right to change the beneficiary. The policy was held by Meunier and remained in his possession until Carbonneau obtained it, and in proper form changed the appointment of the beneficiary, naming his wife in place of Meunier. During this time and afterwards the Meunier and Carbonneau families lived together. Some few months later Carbonneau died and his widow and Meunier both laid claim for $2,000, the amount of the policy.

### Paid New Beneficiary

The Metropolitan paid the widow, and although Meunier and his family were still living with Madame Carbonneau, Meunier brought suit for a second $2,000. He claimed that the Metropolitan had illegally paid the widow and had not been discharged, and that the insurance having been accepted, the benefit could not be revoked, and Carbonneau had no legal right to change the beneficiary without Meunier's written consent.

It was also claimed by Meunier that he was a beneficiary for value, and so could not be dispossessed of his rights without his consent.

After holding the case under advisement, Justice Duplessis has decided that as the clause reserving the right to change the beneficiary in the application and policy was a legal one, the parties contracting having assented to the clause, the insured could change the beneficiary notwithstanding the beneficiary's acceptance without his consent; and as the right so reserved had been properly exercised, Meunier's claim should be dismissed with costs.

## JUDGMENT AGAINST FIRE COMPANIES.

F. M. Loutzenheiser, Moose Jaw district farmer, who sued several insurance companies at the recent sessions of the Court of King's Bench for insurance following destruction of his barn and outhouses by fire, has been awarded $16,096 in a judgment handed down, by Justice Embury. The jury fixed the value of the destroyed buildings at $18,924 and chattels at $8,845. A detailed statement of the award against the various companies follows:

Canadian Fire Insurance Co., $1,337; Liverpool, London and Globe Insurance Co., $800; British Colonial Fire Insurance Co., $2,422; Glen Falls Insurance Co., $2,539; Atlas Assurance Co., Ltd., $2,999; Nova Scotia Underwriting Agency, $2,999; Rochester Underwriting Agency, $2,999.

Considerable interest attached to the case as a number of similar cases were down for hearing, and the Loutzenheiser trial was taken as a consolidated hearing.

## DIVISION OF POLICY PROCEEDS

### Assignment Cannot Affect Interest of "Beneficiary for Value," Says Court.

Certain moneys were paid into Court, being the proceeds of a policy upon the life of William Ogilvie, issued on the 6th of November 1891.

By the policy the money was made payable to "his wife." By an instrument in writing (under seal) dated 29th May 1918, not attached to the policy, the assured directed payment to his daughter Jean as his beneficiary and assigned the policy to her, "inasmuch as my daughter Jean Ogilvie has paid the premiums for some years past." By instrument of the 27th September 1919, also under seal, the assured revoked the direction to pay to his wife and made the insurance payable to his daughter Annie McLeod—thus ignoring the document of 1918 in favor of Jean. By his will dated the 28th November 1919 the assured, identifying the policy fully, gave it to Annie. The insured died on the 2nd September 1921 and this will was admitted to probate. If the assignment to Jean did not constitute her an assignee for value the right of Annie was undoubted.

Section 171 (7) of the Ontario Insurance Act provides; "A beneficiary shall be deemed to be a beneficiary for value only "when he is expressly stated to be so in the contract or in an endorsement theron signed by the assured."

### Beneficiary For Value.

It was argued that this was for the protection of the insurance company only. The learned Judge did not so understand the statute. Subsection 3 provides that the assured may at his will change the beneficiary "but not so as to alter or divert the benefit of any "person who is a beneficiary for value" and subsec. 7 must be read in connection with this. The statute was changed after a decision in 1901 so as to make it imperative that the fact that the beneficiary was designated "for value" should appear on the face of the policy or by endorsement theron before the right to claim as assignee for value could be asserted

Subsection 8 enables the policy to be transferred in any other manner allowed by law. This would protect an assignment made under sec. 181 (2) i.e. in this case an assignment by the assured and his wife who was then the sole beneficiary. Her concurrence after her interest had ceased seemed futile.

Effect should however, be given to the document executed in favor of the daughter so as to treat it as giving her a lien for the premiums advanced and interest theron.

The money should be paid out (1) to satisfy the claim of Jean for premiums paid and interest; (2) the balance to Annie.

## COMPELLED TO PAY PREMIUM

An important judgment, one which establishes a precedent in the province of Ontario, was rendered by Judge Mulligan in division court at Ottawa on Sept. 22, when he sustained the action brought by the Imperial Life Assurance Company against Louis Leblanc, local hardware merchant, for payment of a premium of $35 on an insurance policy. Some time ago Leblanc made application to the company for an insurance policy to the value of $1,000. He made the application in writing and the policy was duly delivered to him, and a part payment was made. After keeping the policy for two weeks, Leblanc decided he would rather insure with another company and sent back the policy to the plaintiffs, refusing to pay the balance of the premium. He based his refusal on the grounds that it had been represented to him by an officer of the company, that his signing the application for the policy did not bind him to take it, unless he chose so to do.

In the argument before Judge Mulligan, the defence failed to show that there had been any misrepresentation of facts in connection with the policy. The court held that as the company could have been held liable for the payment of the $1,000 named in the policy had Leblanc died while it was in his possession, that a contract had been entered into which was binding also on the defendant.

Judgment for the amount claimed, with costs, was given in favor of the assurance company.

## LUMBER ARRIVES AT MONTREAL

Carrying one and a quarter million feet of lumber, the first shipment of an order of five million feet for the Harbor Commissioners of Montreal, the Canadian Pacific steamship Monteagle arrived in Montreal on November 1 from Vancouver via the Panama canal.

The lumber will be used by the commissioners for the extensions to Alexandra, King Edward and Jacques Cartier piers, work on which is now in progress, and which when completed will add three hundred feet to their present length of one thousand feet each. The additions were made necessary by the larger types of vessels visiting the port.

### ASBESTOS IN B.C.

Development work is now under way on asbestos claims in British Columbia, on Mt. Sprout. These claims are located at an elevation of 4,200 feet above sea level and about 2,800 feet above the nearest railway. The location of the claims necessitating the expenditure of a considerable amount of capital to bring them to a profitable producing stage, is the only obstacle to their rapid development.

## *New Industries*

The ratepayers of Thorold, Ont., have passed a by-law granting the Caniaga Alkali & Reduction Co., a ten year fixed assessment of $40,000. This new company has taken over the plant operated by the Coniagas Reduction Co.

Compton, Que., has had a new industry established for the manufacture of sash and door frames, hardwood flooring and other wood products.

The town of Dundas, Ont., has secured a new industry. The company will tan leather preparatory to its manufacture into gloves.

A new company known as the Community Clothiers has located their factory at Hull. In the spring the company intends to erect a larger plant, at a cost of $100,000, to provide employment for more than 100 people.

A new company known as the Hidden Creek Lumber Co., has been organized at Lethbridge, Alta. The company has a capitalization of $400,000, and has 4,000 acres of timber limits on the Great Northern railway branch south of Nelson, B. C., carrying standing timber to the amount of 16,000,000 feet. A modern mill will be built in the spring.

With a capital stock of $400,000, the Great West Packing Co., has been incorporated at Winnipeg. The company will take over the present business of the City Packers Co., of St. Boniface.

The council of Tillsonburg, Ont., will submit a by-law authorizing the agreement with the Wilke Products Co., in connection with establishing a factory in the town. Fifty men will be employed by the company at the end of the first year. The company manufactures pistons, rings, and auto accessories.

A new industry has been secured for Ottawa which will engage in the manufacture of furniture and other wooden finished articles. The company will employ 40 men the year round.

The city of Hamilton has secured a branch factory of the Beechnut Packing Co. of Canajoharie, N.Y.

The James Horn Knitting Co., has located their plant at Lindsay, Ont., where they will engage in the manufacture of silk worsted, cashmere and mercerized cotton hosiery.

Lorne Tractors Limited, have already located their plant at Tillsonburg, Ont., and will shortly engage in the manufacture of their products.

By a vote of 201 to 9, Huntsville, Ont., ratepayers on October 30 endorsed a by-law granting the Muskoka Wood Company a ten years' fixed assessment on their new flooring plant and sawmill industries. The entire plant of the company was wiped out in June last by fire. Construction on the new plant has already commenced, and when completed will be away the largest flooring plant in Canada.

---

### YUKON'S GOLD OUTPUT

The Yukon's gold output this year may total a million and three-quarter ounces. Dredging continued along the creeks beyond the usual period because of the unusually mild autumn and the gold production will be increased correspondingly. Hydraulic mining operations were shut down a few days ago, but there is activity still throughout the gold creeks. The silver output from Mayo shipped to date is about 750,000 ounces.

# THE MOLSONS BANK

## Proceedings at the Sixty-seventh Annual General Meeting of the Shareholders of The Molsons Bank, held at their Banking House in Montreal, Tuesday, November 7th, 1922

After the President, Mr. F. W. Molson, had opened the meeting, he called upon the General Manager, Mr. Edward C. Pratt, to read the Annual Report:

### THE ANNUAL REPORT

The Directors have the pleasure to submit the Balance Sheet for the year ending 30 September, 1922, and to report that the net profit after making provision for bad and doubtful debts and for the rebate of discount on Current Loans is $682,104.20, which, with the amount brought forward from last year $187,355.57, in all $869,459.77, has been appropriated as follows:—

| | |
|---|---|
| Dividends | $480,000.00 |
| Contribution to Officers' Pension Fund | 38,141.69 |
| McGill University Subscription | 10,000.00 |
| To provide for Dominion Government Taxes | 75,000.00 |
| Leaving at credit of Profit and Loss account 30th September, 1922 | 266,318.08 |
| | $869,459.77 |

As usual all the branches of the Bank have been carefully inspected during the year, and we have pleasure in testifying to the zeal and efficiency of our staff.

During the year we opened a Branch at Fort Erie, Ont., and closed our branch at Lethbridge, Alta.

In January last Mr. William Molson Macpherson tendered his resignation as President owing to his contemplated absence during the Winter months. In view of Mr. Macpherson's long association with this Bank, extending over thirty years as a Director, during twenty-five years of which he was President, the Directors requested him to take the position of Honorary President of the Bank. The Board elected Mr. F. W. Molson President to succeed Mr. Macpherson.

Mr. S. H. Ewing, who has been a Director of the Bank for forty-three years, asked to be relieved of the position of Vice-President which he had held for twenty-seven years. Mr. Ewing, however, consented to remain upon the Board of Directors, so the Bank will still have the benefit of his long experience as a Director. The Board elected Mr. W. A. Black Vice-President to succeed Mr. Ewing.

The Auditors, Messrs. Lemuel Cushing and Charles A. Hodgson, whose report is appended to our Balance Sheet, offer themselves for re-election.

F. W. MOLSON, President.

### GENERAL STATEMENT
### Of the Affairs of THE MOLSONS BANK on the 30th September, 1922

#### LIABILITIES

| | | |
|---|---|---|
| Capital Stock paid in | $ 4,000,000.00 | |
| Reserve Fund | 5,000,000.00 | |
| Profit and Loss Account | 266,318.08 | |
| | | $ 9,266,318.08 |
| 168th Dividend for ¼ year at 12% per annum | 120,000.00 | |
| Dividends unpaid | 2,063.25 | |
| Notes of the Bank in Circulation | 5,181,651.00 | |
| Balance due to Dominion Government | 2,118,272.38 | |
| Deposits not bearing interest | 9,303,609.81 | |
| Deposits bearing interest, including interest accrued to date of statement | 44,618,422.01 | |
| Balances due to other Banks in Canada | 289,212.11 | |
| Balances due to Banks and Banking Correspondents in the United Kingdom and Foreign Countries | 200,348.30 | |
| Acceptances under Letters of Credit | 275,577.81 | |
| Liabilities not included in the foregoing | 81,245.23 | |
| | | 62,190,401.90 |
| | | $71,456,719.98 |

#### ASSETS

| | | | |
|---|---|---|---|
| Current Coin | $ 592,134.97 | | |
| Dominion Notes | 4,649,965.50 | | |
| | | $ 5,242,100.47 | |
| Deposit in Central Gold Reserves | | 500,000.00 | |

| Call and short (not exceeding thirty days) loans in Canada on Bonds, Debentures and Stock | | 5,292,900.12 | |
| | | | $26,173,690.68 |
| Other current Loans and Discounts in Canada (less rebate of interest) | | 41,267,980.86 | |
| Liabilities of Customers under Letters of Credit as per contra | | 275,577.81 | |
| Real Estate other than Bank premises | | 50,856.57 | |
| Overdue Debts, estimated loss provided for | | 230,135.35 | |
| Bank Premises, at not more than cost, less amounts written off | | 3,120,000.00 | |
| Mortgages on Real Estate sold by the Bank | | 26,335.50 | |
| Other Assets not included in the foregoing | | 312,143.21 | |
| | | | 45,283,029.30 |
| | | | $71,456,719.98 |

F. W. MOLSON,
President.

EDWARD C. PRATT,
General Manager.

### AUDITORS' REPORT TO THE SHAREHOLDERS

We have checked and verified the Cash, Investments, and Securities of The Molsons Bank at the Chief Office in Montreal on 30th September, 1922, and also at another time as required by the Bank Act, and we have at different times during the year checked and verified the Cash and Securities held at other Important Branches of the Bank.

We have compared the Certified Returns from all the Branches with the entries in the Books at tthe Chief Office of the Bank as at 30th September ,1922, and find that they agree therewith and all the transactions which have come under our notice have been, in our opinion, within the powers of the Bank.

We have obtained all the information and explanations we have required, and we certify that in our opinion the above Statement is so drawn up as to exhibit a true and correct view of the Bank's affairs at the close of business on 30th September, 1922, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

LEMUEL CUSHING,
CHAS. A. HODGSON,
Auditors.
Chartered Accountants.

Montreal, 23rd October, 1922.

### THE PRESIDENT'S ADDRESS

The President, Mr. F. W. Molson, then delivered his annual address as follows:—

Gentlemen,—You have seen by the official report of the Directors that early in the year Mr. William Molson Macpherson voluntarily retired from the Presidency of the Bank, owing to his contemplated absence during the coming Winter. In view of Mr. Macpherson's very long association with the Bank, over thirty years a Director, and twenty-five years as President, I feel sure that you will heartily approve of the action of the Directors in appointing him Honorary President.

Mr. S. H. Ewing, whose association with the Bank is also of very long duration, over forty-three years as a Director, asked to be relieved of the office of Vice-President. I am, however, glad to be able to say that he consented to remain a Director.

Mr. W. A. Black was elected Vice-President to succeed Mr. Ewing, and the Directors did me the honor of appointing me President.

The Sixty-seventh Annual Statement of the Bank is now in your hands.

As you are, of course, aware, trade in many lines during the greater part of the twelve months ending with the close of the Bank's year on 30th September, has not been good. The lessened activity in general business is seen in the decrease in a year of about $132,000,000 in the loans of the chartered banks, which are now about $1,311,000,000, and a decrease of $152,000,000 in the deposits in the banks, which now total about $1,648,000,000.

In our own case there has been a decrease in our deposits of nearly $4,000,000, and a decrease in the loans of nearly $7,250,000.

The commercial agencies report 2,324 failures for the nine months ending 30th September last, which is an increase of 47% over the same period last year, the total liabilities being over $40,000,000, which is 18% over the figures for the same period last year.

The depression in trade is reflected in our profits, which are slightly less than those of last year. The cost of doing business has continued to increase; for our year just closed we have had to provide $20,000 more than we did last year for Dominion Government taxes.

You have no doubt observed that some of the Provinces have entered the banking field where we believe there is no need for their presence, as the chartered banks are meeting the requirements of the public and supplying an efficient service at their numerous brnches throughout Canada. The competition can hardly be considered to be fair when it is remembered that the banks are heavily taxed by all the Provinces. We are inclined to think, when the considerable cost of conducting the business is taken into account, that the Provinces could borrow the money at a lower price in the open market than they are paying for the deposits.

During the year we have completed the erection of and improvements of several buildings at the branches, and you will observe an increase of $20,000 in the Premises Account; the balance of the cost was taken out of the year's profits. We are glad to be able to say that our various branches are all now well housed, and that we do not expect to be called upon to meet any considerable expenditure for some time to come. In this connection I would inform the shareholders that the item of $3,120,000 shown upon your Balance Sheet under "Bank Premises" is represented by 90 buildings throughout the country, including the one we are now in, and the fair market valuation of these is considerably in excess of the amount shown on our books. We have no subsidiary company formed to carry our bank premises, which is it almost needless to state, are all free of mortgage.

Your directors at the close of the Bank's year assured themselves that due provision had been made for all loans of a doubtful nature, and have seen to it that the Bank's securities were properly valued.

There has been a considerable falling off in Canada's foreign trade. The imports decreased in the year ending 30th September last by $173,000,000, and the exports decreased by $185,000,000. The exports, however, exceeded the imports by about $75,000,000. We have undoubtedly felt the effects of the Fordney Tariff.

The exports of grain from the port of Montreal to the end of October amounted to about 92,000,000 bushels, which is about the same as last year's figures.

Conditions in the lumber trade have much improved, and stocks throughout the country are somewhat low. It is to be hoped that strong efforts will be made to prevent forest fires, by which Canada has suffered so much this year.

With regard to the labour situation, there has been an uninterrupted improvement in the matter of employment since April last, each month registering an increase in the number of persons employed throughout Canada by the 6,148 firms making returns to the Department of Labour. The total increase during the last five months, available was approximately 100,000 men. The pay-roll for August, covering the companies mentioned, showed 768,652 workers employed, and according to the figures of the Department this is a maximum since December, 1920.

There has been a considerable improvement in building conditions in Canada.

The Dominion census figures are now complete. They show the total population of Canada in 1921 to have been nearly 9,000,000, an increase of nearly 22% in ten years.

In this brief review of happenings since we last met I have been obliged to mention many unfavourable features, but I have full confidence that underlying conditions are sound.

In so far as the grain crop of the country is concerned it is fairly safe to say that Canada has produced 400,000,000 bushels of wheat this season, and possibly a little more. Of this we actually need at home for bread and seed about 80,000,000 bushels, leaving available for export in the shape of wheat and flour, 320,000,000 bushels. While it may be that the price of No. 1 Northern wheat will not average as high as it did last year, having regard to the average price per bushel realized for the whole crop it would seem that the farmers, because of the superior grading of the wheat this year, might realize very nearly as much per bushel as they did last year.

The Hon. J. A. Robb, Minister of Trade and Commerce, is on his way to Australia where he hopes to negotiate a trade agreement with that country which will benefit Canada.

The Hon. W. S. Fielding, Minister of Finance, who is now in Europe, has been in negotiation with the French Government with respect to a new and possibly wider trade treaty between Canada and the French Republic.

We are glad to see by a statement of the Government's policy issued by the Hon. Charles Stewart, Minister of the Interior, that the Government is fully alive to the importance of attracting desirable people to Canada.

The revision of the Bank Act will be considered during the coming year. I need scarcely say that the banks will not object to any reasonable safeguard likely to prove effective, but the efficiency of the banks should not be impaired by unreasonable or unworkable restrictions. It must be remembered that banking, like every other business, depends for its success upon the care and integrity of those conducting it.

It is pleasant to see our Canadian dollar again at par with the United States dollar. The general financial condition in Europe has grown steadily worse and currencies there have depreciated to such an extent as to render international exchanges almost impossible.

The President then invited discussion, but nothing being said he moved the adoption of the Annual Report, which was seconded by the Vice-President, Mr. W. A. Black, and unanimously adopted.

It was moved by Mr. Arthur Browning, and seconded by Mr. Walter Molson, that the Secretary be instructed to cast one ballot for the re-election of the Directors, which was unanimously carried, and the following gentlemen were re-elected to the Board of Directors:

| | |
|---|---|
| Wm. M. Birks, | Wm. Molson Macpherson, |
| W. A. Black, | F. W. Molson, |
| S. H. Ewing, | J. M. McIntyre, |

John W. Ross

A vote of thanks of the shareholders to the President, Vice-President, Directors, General Manager and Officers of the Bank was then moved by Mr. Arthur Browning.

Mr. Browning congratulated Mr. F. W. Molson upon his election to the Presidency, and said that the shareholders had reason to feel that the Bank was a well managed institution and they trusted that it would continue to be conducted in the same conservative manner as in the past.

The President, Mr. F. W. Molson, in returning thanks for the Directors and himself, expressed his appreciation of the efforts of the staff and stated that he had the full support of the Vice-President, Mr. W. A. Black, and the other members of the Board in directing the affairs of the Bank.

The General Manager, Mr. Edward C. Pratt, on behalf of the staff, thanked the shareholders for their resolution.

At a subsequent meeting of the Directors, Mr. F. W. Molson was re-elected President, and Mr. W. A .Black, Vice-President, for the ensuing year.

## ENGINEERING WORKS ACTIVE

The machinery department of the Dominion Engineering Works is working at about 75 per cent. of capacity and the foundry is working at about 80 per cent of capacity. Among the company's present contracts are two 164-inch high speed newsprint machines, one book-paper machine, two wheels of 28,000 horse power each, eight electric steam boilers, with capacities varying from 50 kilowatt to 25,000 kilowatt, and four 54-inch irrigation pumps for the British Columbia Government. The high speed machines made for the Laurentide company are now running at 1,000 revolutions per minute.

# *Municipal Finance*

**Edmonton, Alta.**—With the exception of the radial branch, all of the city's utilities were in the profit-making class last September, according to a report given out by City Commissioner Yorath. The result was a net surplus for the month of $23,506, compared with $22,840 last year.

For the first nine months of the year, the utilities have a total surplus of $247,250, or nearly $100,000 more than the showing for the same period of 1921, when the profit was $148,629. At present indication it is possible that the departments will not do much better than reach the year's objective of $330,000.

**Belleville, Ont.**—The city council on October 31, voted down a resolution to submit to the electors at the next municipal election a by-law on the matter of having a city manager for the city.

**Hull, Que.**—If a bill calling for certain important amendments to the city charter, which is at present before the Quebec Provincial Legislature, is sanctioned, the corporation may enter into competition with both the Hull Electric and Ottawa Electric Light Companies in the city, in the sale of electrical energy. The corporation, with the recent installation of powerful dynamos at the waterworks station, now has a surplus of power, which it intends to utilize by selling it to citizens.

The city, in the bill, also asks that the present system of one alderman to each of the six wards in the city be changed to provide for two aldermanic representatives in each ward; that two additional wards be created by division of wards one and five, and that the two-year term for the mayor and aldermen be changed to the old system of yearly municipal elections.

It is intended also to impose a general tax on all banks and their branches doing business in the city, to place a special tax on all merchants selling cigarets, and to increase the general tax rate.

**Kemptville, Ont.**—The tax rate for 1922 has been fixed at forty-four mills, an increase of nine mills, over last year. There is an increase of three mills in the rate on the schools, one of three mills to provide for the cost of street lights and one of three-quarters of a mill through the expense of the measles epidemic.

**Montreal, Que.**—With $1,000,000 of civic water and business taxes now overdue and still to be paid, the assistant city treasurer has despatched 30,000 notices to delinquent water rate debtors and 10,000 to citizens owing the business assessment. If these bills do not produce the desired effect, bailiffs will be sent to the delinquents and will shut off the water, in the first instance, and seize the effects of those owing business tax. A total of $2,977,649 has so far been paid in for both these assessments.

**Victoria, B.C.**—According to an announcement on October 21, legislation permitting the city and the adjacent municipalities to amalgamate should they so desire will be prepared, and, if approved by the Greater Victoria Committee, submitted to the Provincial Legislature for ratification at its session this winter.

## IMMIGRATION

The following are the latest figures of immigration into Canada:

**1921-22.**

| | British. | From U.S. | Other Countries. | Total. |
|---|---|---|---|---|
| April ........ | 8,476 | 5,035 | 1,541 | 15,052 |
| May ......... | 7,083 | 3,710 | 3.350 | 14,145 |
| June ........ | 6,899 | 3,086 | 2,292 | 12,277 |
| July ......... | 3,772 | 2,388 | 2,294 | 8,454 |
| August ....... | 3,174 | 3,016 | 2,297 | 8,487 |
| September .... | 2,919 | 2,168 | 2,340 | 7,427 |
| Totals ..... | 32,323 | 19,403 | 14,114 | 65,840 |

**1922-23.**

| | British. | From U.S. | Other Countries. | Total. |
|---|---|---|---|---|
| April ........ | 2,048 | 3,268 | 1,282 | 6,587 |
| May ......... | 5,972 | 2,866 | 2,361 | 11,199 |
| June ......... | 3,675 | 2.291 | 1,329 | 7,295 |
| July ......... | 4,305 | 2,024 | 1,428 | 7,757 |
| August ....... | 2,833 | 2,559 | 1,236 | 6,628 |
| September .... | 3,508 | 2,032 | 1,314 | 6,854 |
| Totals ..... | 22,341 | 15,040 | 8,950 | 46,331 |

## FORD FINANCES MIXED.

### Chartered Accountant Tells Council Affairs Are in Muddled State.

Reporting to the town council of Ford City, Ont., at their meeting on October 31, A. F. Falls, chartered accountant, stated that Ford City, since its incorporation in 1913, had been running its municipal affairs without even a ledger, and that it was practically impossible at the present time to determine the town's financial status. The auditor's report was prepared with a view to amalgamation with Walkerville.

The text of Mr. Fall's statement to the council was as follows:—"I find that the town of Ford City never had a real financial statement of its affairs. Having had experience in the auditing of books of municipalities since 1887. I regret to say that, from the data available, I cannot now tell where Ford City stands financially. I have probably had more experience in government audits than any man in Ontario, but it is going to take me considerable time to disentangle the maze of financial affairs here since the issuing of the first tax role in 1913.

"The financial condition of your town is undoubtedly a great surprise to you officials, but if you allow anyone to audit your books, you will continue to find the municipal affairs of this town always in a muddle.

### Liabilities Exceed Assets.

"I have known the financial affairs of this district when it was Sandwich East, and long before Ford was ever thought of, and I also know some of the deals that were put through in Sandwich East in those early years. From what I have found out already, your assets are $119,550; your current liabilities amount to $151,413.

"You have been running Ford City, and the council before you, all these years, without a ledger. Show me any private business that is doing over a half million dollar's worth of business every year, that tries to run its business without a ledger, and I can soon show a bankrupt as a result. The banks simply wouldn't let them do it.

The worst feature of your system of keeping books is that levies are put on the town to meet certain debentures, and the maturity of these debentures and year of levy are not the same. I can cite you one case in Ford's debenture history, from what I have discovered, where money levied for 1914 debentures was eaten up in 1913, at the time of the levy. To the end of 1921, there has been just $19,258, of that kind of money raised and it is gone. It will have to be made up by another general levy for the amount. The money should not have been raised a year before the debentures were raised. I had hoped that this would be the only instance of the kind that I would find, but discovered that your 1921 and 1922 tax levies were raised the same way.

"As a result of this system, I can now show you eight debenture coupons not due at the bank here until 1923, that have been charged up to Ford City by the bank this year.

### Other Municipalities.

"For your comfort I may tell you that yours is not the only municipality, in my experience, that has fallen into like ways in the past. Things became so lax in the keeping of Amherstburg's books at one time, that an Anderdon Township bond at one time was charged to Amherstburg. There was also an instance where the town's debenture bond was paid twice. Luckily, by a check-up system, the error was discovered later, but if there had been no check-up on the part of the bank, the town would certainly have lost these amounts.

"Ford City is getting bigger and bigger, and now is the time to see that proper books are kept for the town's business, and that proper checking takes place in every transaction. You are now paying over $20,000 annually for the local improvements taken over from Sandwich East at the time Ford City was incorporated. A number of debentures issued by Ford City in 1922 have been passed to the amount of $95,000. There is collectable on the tax roll to meet these debentures just $67,000, meaning that $28,000 will have to come out of the public taxes to meet the town's portion of these debentures.

### Needs Development.

"The sum of $5,000 a year has to be paid for Pillette road paving for ten years, $28,000 of this money having to come out of the general taxpayers just seven mills extra each year, and this system would soon scare out taxpayers, and strangle further development of your town.

"Ford City needs development. The quickest way to cut your own throat is to conduct things so that the great number of people here will not be able to pay the taxes, and will get out. I would like you councillors to know just how little money you have control of around this table.

"You have no local improvement ledger. You should have it. You don't know where you are financially. You should know your assets and liabilities. I will be pleased to answer any question that the mayor or councillors wish to ask in regard to your municipal affairs. Now is the time to ask and I will help you wherever possible to ascertain the true state of affairs."

### Will Open New Books.

Mr. Falls stated that he would have Walkerville's financial statement ready within a week, and that he had completed a statement for Ford. He declined to open a set of books for Ford City unless an audit is completed up to the end of the current year, giving as his reason that it was impossible to tell where Ford City stood at the present, and until yearly statements were available.

A resolution passed the council, that Mr. Falls be appointed to audit Ford City's accounts for 1922, and to open a set of books for the town for 1923 at a total cost of $1,200.

## ADVANCING BOND PRICES

"We are still on the upward curve of one of those great economic cycles in which business and finance revolve, and with the upward trend comes an advance in values which only corroborates our advice of the past few months," say Hanson Bros., in their market letter to their clients. "High grade bond investments are scarce, and with the growing scarcity the natural corrollary of advancing prices has occurred.

"We believe that this advance in prices is but a forerunner of a long period of advancing bond values. The gradual liquidation of the world's power of production, will continue to release large sums of new capital, which will seek investment, but quite apart from any problematic rise or fall of prices, we consistently maintain that the time to invest is when one has idle money."

## MACHINERY CONCERN IN TROUBLE

Justice Panneton, sitting in Bankruptcy Court in Montreal on October 30, gave judgment ordering that a petition which had been presented on behalf of Joseph Brochu, creditor, asking for the liquidation of La Machine Agricole, Limitee, should be heard in the district of Montmagny, and that in the meantime the Societe d'Administration Generale and the Sun Trust Company, Limited, as fiduciary trustees, shall retain possession of the property of La Machine Agricole, as heretofore held by these two companies jointly in trust.

At the demand of petitioner, J. Brochu, an interim receiver was recently appointed, namely, J. D. Duhamel, but when the latter went down to Montmagny to take possession of the properties he was refused admission to the company's premises.

## LOSS OVER $100,000.

Securities and cash totalling $103,000 were stolen when the Standard Bank of Canada at Stouffville was robbed on October 25. The cash amounted to a little over $12,000. The balance of $90,000 is in securities, most of which are registered and unnegotiable, unless the bonds are altered in some way.

Among the securities stolen is one bond of $10,000, which was held by Thomas Williamson. There were also two $5,000 bonds, one owned by Williamson and the other made out to Sarah A. Timbers. Also, there are 13 Dominion of Canada bearer bonds worth $50 each; 11, $100 bonds; Dominion of Canada fully registered bonds—seven at $100, five at $500, and 33, $1,000 bonds. Of coupon registered bonds there were four at $50, five at $100. Of sundry bonds there were: $1,000 bonds, City of Edmonton; Province of Alberta and Province of New Brunswick bonds; Corporation of Stouffville bonds nearly $5,000, and Bethesda and Stouffville Telephone Company, 62 debentures, totalling $6,000.

## PIANO INDUSTRY NEEDS PROTECTION

### Export Conditions in Trade Are Said to Be Impossible

Returning from a business trip throughout Canada A. P. Willis, president of Willis & Co. Ltd., of Montreal, stated that while he found every indication of coming prosperity for Canadian trade generally, he was more convinced than ever of the need of more efficient protection for the piano industry of Canada.

Practically every market in the world was closed to the Canadian piano manufacturer. Time was when Canada did a good export business in pianos to Great Britain, but now in the old country a duty of 33 1-3 per cent less 10 per cent preference, was charged against them and the 33 1-3 per cent duty being charged on the ocean freight charges as well as the manufacturing cost of the instrument, outweighed any benefit gained by the 10 per cent preference.

Australia had put up a duty of 45 per cent. and New Zealand had set a high tariff on pianos. Canadian trade with these places in pianos had become impossible. The United States had an impassable barrier against the Canadian, so the only market left open to Canadian pianos was the Canadian market, and its tariff walls were lowered and the market thrown open there was no room left for the Canadian manufacturer at all.

## COAL IMPORTS LOWER

Imports of coal into Canada during the first seven months of this year were 41 per cent. below the three-year average for the corresponding periods, according to a bulletin just issued by the Dominion Bureau of Statistics. Imports of coal during July amounted to 447,000 tons, which was 13 per cent. less than the preceding month.

The output of coal from Canadian mines during July was 858,000 tons, an increase of six per cent. over the production of the preceding month. However, this fell short 203,000 tons of the average production for the same month during the three preceding years.

The net result of movements of coal in July was that the amount made available for consumption in Canada was 1,062,000 tons, as compared with a three-year average of 2,974,000 tons. The total amount of coal cleared for foreign destinations from Canada during the month was 243,000 tons, as compared with 90,000 tons in the preceding month.

## NEW GRAIN ELEVATORS

Although Fort William and Port Arthur now lead the world in elevator capacity, with a storage of 60,000,000 bushels, the mammoth grain crop of 1922 has convinced elevator men that if they want to keep pace with the growth of the West they will have to build more elevators here. Application was made on October 30 by Parrish & Heimbecker to operate their new elevator, and this plant, at present consisting of six bins, will be increased next summer to 36 bins.

Test piles have also been driven in a site 400 yards north of Thunder Bay elevator, where an elevator will be built at once for James Stewart of the Saskatchewan Co-operative Elevator Co. and his associates, with a capacity of 2,000,000 bushels

# Government and Municipal Bonds

Further reactionary movements were in evidence on the Canadian bond market during the past week, partially due to the developments in the Near East and also to the trend of the New York bond market. Developments on the American bond market during the week were of unusual character, bond prices in all sections of the lists showing large declines in response to heavy liquidation on the part of large and small interest.

This downward trend on Wall Street was the principal cause for the continued weakness on this side of the border, even the Victory Loans, which are usually regarded as showing the true trend of the market, showing a noticeable decline. The trend of prices, on the whole, has been downward and from a survey of the market there appears to be little hope of a trend in the opposite direction for some time to come.

The only outstanding feature of the week was the cancellation of all bids on the two million Montreal Catholic School bonds for which tenders were called up to November 9. The list of bids gives a very accurate position of the trend of the market, both Canadian and American. It is understood that the commission will call for tenders on a 5½ per cent., basis within a short time.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders close |
|---|---|---|
| South Vancouver, B.C. .. | $1,650,000 | Nov. 23 |
| Windsor, Ont. ........ | 239,303 | Nov. 20 |
| Sydney, N.S. .......... | 142,000 | Nov. 18 |
| New Toronto, Ont. .... | 67,500 | Nov. 17 |
| Renfrew, Ont. ........ | 43,406 | Nov. 20 |
| Prescott, Ont. ........ | 30,000 | Nov. 20 |
| Barton Township, Ont. | 25,870 | Dec. 4 |
| Colborne, Ont. ........ | 40,000 | Nov. 27 |

**Colborne, Ont.**—Tenders will be received up to November 27, 1922, for the purchase of $40,000, 5½ per cent., 20 equal annual instalment high school debentures. H. S. Keyes, treasurer.

**South Vancouver, B.C.**—Tenders will be received up to 4 p.m. November 23, 1922 for the purchase of the following debentures: $700,000, 6 per cent., 20-annual instalment debentures, and $950,000, 6 per cent., 20-annual instalment debentures. Wm. T. Riley, municipal clerk, South Vancouver. See official advertisement in this issue.

**Windsor, Ont.**—Tenders will be received up to 12 o'clock noon November 20, 1922 for the purchase of the following debentures: $63,709, 5½ per cent., 15-instalment road debentures; $33,500, 5½ per cent., 10-instalment fire and police debentures and $142,193, 5½ per cent., 20-instalment waterworks debentures. The bonds are payable semi-annually at Windsor only. Jas. R. Thompson, city treasurer.

**Renfrew, Ont.**—Tenders are invited up to 8 p.m. November 20, 1922 for the purchase of $43,406, 5½ per cent., 10-annual instalment collegiate debentures. A. Miller, town clerk.

**Barton Township, Ont.**—Tenders will be received up to noon December 4, 1922 for the purchase of approximately $10,000, 5½ per cent., 20-year, and $15,870, 5½ per cent., 10-year local improvement debentures. A. G. E. Bryant, township clerk, Room 1, Court House, Hamilton. See official advertisement in this issue.

### Coming Issues

**Deseronto, Ont.**—H. R. Bedford, town treasurer, informs "The Monetary Times" that all tenders for the $12,000, 6 per cent., 20-instalment debentures, which tenders were called up to October 25, have been rejected.

**Guelph, Ont.**—Two debenture by-laws will be submitted to the electors at the municipal elections, one for $55,000, 5½ per cent., 20-year debentures for a new fire hall, and the other for $25,000, 5½ per cent., 15-year debentures to erect a new grandstand at the Exhibition Park.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from October 14 to November 4, 1922:

School Districts: not exceeding 8 per cent.: Bounty, $2,860, 10-years annuity; Valparaiso, $6,500, 15-years; Heart Hill, $4,200, 15-years; Lynwood, $1,700, 10-years; Lemsford, $3,000, 10-years.

Rural Telephones: not exceeding 8 per cent., 15-years annuity: Highgate, $5,000; Fartown, $1,900; Ferland, $4,150; New Delorainne, $1,200.

Village of Cravan, $800, not exceeding 8 per cent., 5-instalments.

Assiniboine Valley Union Hospital District, $64,200, not exceeding 8 per cent., 20-years.

Saskatoon, $7,655, 6 per cent., 30-years for storm sewers.

**Montreal, Que.**—All bids for the $2,000,000, 5 per cent., 20-year Roman Catholic School Commission debentures were rejected on the grounds that acceptance of the highest bid would have entailed a loss of $140,000. Alternative bids were asked for bonds payable in Montreal and bonds payable in Montreal and New York. At the high bid of 94.127 in Canadian funds, for New York payment, the cost to the commission would have been approximately 5.49 per cent. The following is a list of tenders:

For bonds payable both in Montreal and New York: Brown Bros. & Co., Aldred & Co., Halsey, Stuart & Co., White, Weld & Co., R. C. Matthews & Co., Rene T. Leclerc, Inc., 94.127 Canadian funds; Blair & Co., Chase Securities Co., Aemilius Jarvis & Co., 93.145 N.Y. funds; Hanson Bros., R. A. Daly & Co., McLeod, Young, Weir & Co., W. A. Mackenzie & Co., 92.83 Canadian funds; Dominion Securities Corp., 92.687 N.Y. funds; Wood, Gundy & Co., 91.713 Canadian funds.

For bonds payable in Montreal only: Hanson Bros., A. E. Ames & Co., Rene T. Leclerc. Inc., 92.77; Dominion Securities Corp., 92.147; National City Co., Harris, Forbes & Co., Aemilius Jarvis & Co., Geo. Beausoleil & Co., 91.87; McLeod, Young, Weir & Co., R. A. Daly & Co., W. A. Mackenzie & Co., 91.67.

**Oakville, Ont.**—All tenders for the $58,400, 5½ per cent., 10, 20 and 30-annual instalment debentures, which were called up to 5 p.m. November 10, have been rejected by the council.

### Bond Sales

**Etobicoke Township, Ont.**—An issue of $45,000, 5½ per cent., 30-annual instalment debentures has been purchased by Canada Bond Corp., at a price of 97,684, the money costing the township approximately 5.72 per cent. Tenders were as follows: Canada Bond Corp., 97,684; Wood, Gundy & Co., 97.19; Dyment, Anderson & Co., 97.718; Kerr, Fleming & Co., 97.033; Macneill, Graham & Co. 97.03; R. C. Matthews & Co., 96.93; A. E. Ames & Co., 96.69; C. H. Burgess & Co., 96.43; McLeod, Young, Weir & Co., 96.21; Municipal Bankers Corp., 96.09, and Dominion Securities Corp., 95.67.

**Saskatchewan.**—The following is a list of debentures reported sold by the Local Government Board from October 14 to November 4, 1922:

School Districts: Grenfell, $6,500, 6½ per cent. 20-years to C. C. Cross & Co.; Look Out, $3,000, 7½ per cent., 15-years, to C. C. Cross & Co.; Heather, $4,000, 7¼ per cent., 15-years to various purchasers; Rosefarm, $1,200, 8 per cent., 10-years, to C. C. Cross & Co.; Breezy Brae, $800, 8 per cent., 8-years, to Canada Landed & National Investment Co.; Glen Murray, $3,700, 8 per cent., 15-years, to Canada Landed & National Investment Co.

Rural Telephones: 15-years: Melaval, $3,600, 7½ per cent., to C. C. Cross & Co.; Kerrobert Southern, $375, 7¾ per cent., to C. C. Cross & Co.; Quill Plains, 7 3/8 per cent., 10-years to C. C. Cross & Co.; Ferland, $4,150, 8 per cent., to T. Taylor, Regina; St. Victor, $3,300, 7¾ per cent., to C. C. Cross & Co.; Evans, $900, 8 per cent., 10-years to C. C. Cross & Co.; Broadview $400, 8 per cent., to C. C. Cross & Co..

Villages: 8 per cent., 10-years: Cutknife, $3,000, to C. C. Cross & Co.; Birdsay $1,150, to C. C. Cross & Co.

Town of Sintaluta, $8,000, 6½ per cent., 15-years, locally.

Regina $64,000, 5½ per cent., various maturities to A. E. Ames & Co.

**Sandwich, Ont.**—A. E. Ames & Co., have purchased $397,000, 6 per cent., 10, 15, 20 and 25-annual instalment debentures at a price of 98.59, the money costing the town approximately 6.18 per cent.

**Niagara Falls, Ont.**—R. C. Matthews & Co., were the successful bidder for the $100,000, 6 per cent., 20-year hydro-electric debentures, paying a price of 101.46, the money costing the city approximately 5.87 per cent. Tenders were as follows:—

| | |
|---|---|
| R. C. Matthews & Co. .......... | 101.46 |
| Gairdner, Clarke & Co. ........ | 101.11 |
| C. H. Burgess & Co. .......... | 100.66 |
| McLeod, Young, Weir & Co. .... | 100.594 |
| Wood, Gundy & Co. ....... .... | 100.17 |
| A. E. Ames & Co. .. .... .... | 99.09 |
| Canada Bond Corp. .. .... .... | 98.78 |

**Halton County, Ont.**—Nesbitt, Thomson & Co., have purchased $46,000, 5½ per cent., 20-annual instalment debentures at a price of 99.73, the money costing the county approximately 5.53 per cent. Tenders were as follows:—

| | |
|---|---|
| Nesbitt, Thomson & Co. .... .... | 99.73 |
| Canada Bond Corp. .... .... .... | 98.88 |
| R. C. Matthews & Co. .... .. .... | 98.70 |
| Gairdner, Clarke & Co. .... ..... .. | 98.62 |
| Wood, Gundy & Co. .... .... .... | 98.29 |
| A. E. Ames & Co. .... .... ...... | 97.57 |
| McLeod, Young, Weir & Co. .. .... | 97.55 |
| C. H. Burgess & Co. .. ...... .... | 97.54 |
| Dominion Securities Corp. .... .... | 97.06 |

**York Township, Ont.**—Gairdner, Clarke & Co., were the successful tenderers for the $100,000, 6 per cent., 30-instalment, and $4,200, 6 per cent., 10-instalment debentures, paying a price of 103.43, the money costing the township approximately 5.67 per cent. Tenders were as follows:—

Gairdner, Clarke & Co., 103.43; McLeod, Young, Weir & Co., 102.87; R. C. Matthews & Co., 102.85; Canada Bond Corp., 102.10; Dyment, Anderson & Co., 102.02; Wood, Gundy & Co., 101.857; Dominion Securities Corp., 101.716; Murray & Co., 101.698; A. E. Ames & Co., 101.69; C. H. Burgess & Co., 101.33.

For the $100,000 issue, A. Jarvis & Co. bid 102.16, and MacNeill, Graham & Co., 102.03, and for the smaller issue, Jarvis & Co., tendered 100.02.

**Vancouver, B.C.**—The Vancouver and Districts Joint Sewerage and Drainage Board has sold $300,000, 5 per cent., 40-year debentures to Pemberton & Sons at a price of 91.6189, the money costing the board approximately 5.52 per cent. Bids were asked for 5 per cent., bonds payable in Canada, or in United States; 5½ per cent., bonds payable in Canada or United States; 3-year, 5-per cent., bonds payable in Canada or United States; and 3-year, 5½ per cent., bonds payable in Canada or United States. Tenders were as follows:—

## DEBENTURES FOR SALE

### TOWNSHIP OF BARTON

### Debentures for Sale

Sealed Tenders marked "Tender for Debentures" will be received by the undersigned up to noon of the 4th day of December. 1922, for the purchase of approximately $10,000. Twenty year and $15,870. Ten year straight term local improvement bonds, all bearing interest at five and one-half per cent. (5½%) payable half yearly.

Tenders will be opened by the Council on the evening of the 4th December. The highest or any tender not necessarily accepted.

ALFRED G. E. BRYANT,
Township Clerk.
Room 1, Court House,
Hamilton, Ont. 8

### DISTRICT OF SOUTH VANCOUVER

### Debentures for Sale

Sealed tenders will be received by the undersigned at the Municipal Hall, South Vancouver, B.C., not later than four o'clock in the afternoon on Thursday, the 23rd day of November 1922, for the purchase of the following debentures of the municipality.

(A) $700,000, 6 per cent., serial debentures redeemable by 20 annual payments, first re-payment of principal five years from date of issue.

(B) $950,000, 6 per cent., serial debentures redeemable by 20 annual payments, first re-payment of principal three years from date of issue. All payable in Vancouver Toronto and New York with interest payable half-yearly.

Tenders are to be for Vancouver or Victoria payment and delivery at option of the municipality, for both or either issues. A certified cheque for $5,000 to accompany tender on each issue, being a total of $10,000 on a tender on both issues. The municipality reserves the right to reject any and all tenders, or to sell any portion of respective amounts.

Dated at South Vancouver, B.C., this 10th day of November, 1922.

WILLIAM T. RILEY,
Municipal Clerk.

# Stock Markets

After having shown a decided upward movement during the previous week, the past week on the Canadian security markets witnessed a return to such conditions as had been prevailing during the past month. The general trend of the security values was, on the whole, downward with occasional rallies which were instrumental in saving the stocks from large net losses.

Trading on both the Montreal and Toronto exchanges was carried along on conservative lines, but towards the latter part of the week there developed an expansion in the volume of business and there was a considerable broadening in the list. These important phases of the market were not unaccompanied, for, for the first time in many months the market showed signs of a real liquidation. The losses, however were not of any great proportion but were sufficient to attract considerable attention.

### Silverwoods, Ltd.

R. C. Matthews, and Co., of Toronto are offering $250,000, 7 per cent., first mortgage sinking fund bonds of Silverwood's Limited, of London, Ont. The bonds are being offered at a price of 100 to yield 7 per cent.

The bonds are dated September 1, 1922 and mature September 1, 1937, with principal and interest payable in London, Toronto or in New York at the Bank of Montreal. Interest is payable March 1 and September 1. Bonds are in denominations of $100, $500 and $1000 with privilege of registration as to principal only.

Upon completion of the present financing the capitalization of the company will be as follows: seven per cent. first mortgage sinking fund bonds, authorized $500,000, issued, $250,000; eight per cent., cumulative preferred stock, par value $100, authorized $500,000, issued $327,822; common stock, authorized $500,000, issued $301,200.

Silverwood's Limited own and operate in London an up-to-date storage produce and ice-cream business, with branches at Forest, Chatham, Aylmer, Alvinston and Thamesville. Total net assets are $1,043,625, or over four times the present bond issue, and net quick assets are $282,064. Net earnings for the past three and a half years available for bond interest, but before depreciation allowance have averaged $76,629 per annum.

Commencing March 1924 a sufficient fund will be provided each half year to pay off by maturity, two thirds of the total issue now outstanding and a like amount of any further bonds issued. The company may purchase bonds in the open market for this purpose at a price not exceeding 105.

### To Ratify By-laws

The annual meeting of the Davidson Comsolidated Gold Mines will be held in Toronto on Tuesday, November 21st, at three o'clock. One object of the meeting will be to consider the by-law providing for the distribution of 400,000 preferred and 1,000,000 ordinary shares of the capital stock of the Porcupine Davidson Gold Mines, owned by the company. The shareholders will also be asked to ratify the sale of 268,105 preferred and 638,411 ordinary shares of the Porcupine Davidson Gold Mines, owned by the company.

### English Electric Stock

The English Electric Company of Canada has notified shareholders that the company's first stock certificates are now available and ready for issues upon surrender of interim certificates to the Royal Trust Company at its Toronto or Montreal offices. Definite certificates of the same class and denomination will be issued in exchange.

### British Empire Steel

Although there has been no definite information to hand at the present time it is understood that the British Empire Steel Corporation has completed all arrangements for all the financing that the company may desire to do for some time. President Wolvin paid a visit to New York recently and it is stated that he completed arrangement for the floating a large bond issue within the next two or three weeks. This new additional capital may not be used for some time as the company has a substantial surplus on hand and in addition has effected the necessary arrangements to take care of any development that may occur in its general business. Conditions continue to show further improvement at Sydney. Arrangements are at present under way for the blowing in of a third blast furnace just as soon as the present rush of coal shipments is over and in some quarters it is thought that if new business continues to keep up at the present rate there will be the necessity of starting up a fourth furnace by the beginning of the new year. The progress in this particular department has been even greater than anyone would have thought at all likely during the summer months.

### Bond Issue

Geo. Beausoliel & Co., of Montreal are offering $500,000, 5 per cent., first mortgage gold bonds, due September 1, 1942 of the Montreal Service Corporation, at a price of $87, to yield over 6.10 per cent. The par value of the bonds is $100.

The bonds are in denominations of $500 and $1,000, with principal and interest payable March 1 and September 1 at the Bank of Montreal in Montreal or in New York.

The company has a power capacity of about 31,238 h.p., and its connected load exceeds 65,000 h.p. The company owns 250 miles of transmission lines, and over 20 miles of cables in the underground conduit system of Montreal. The power used by the Montreal Tramways Co., for the operation of its lines is supplied by the Montreal Public Service Corporation. The company also serves about 15,000 clients, amongst which are many important commercial and financial institutions in the city.

The net earnings for the last six months amounted to over three and one half times the amount required to meet, for the same period, the interest charges on all the outstanding bonds.

# Unlisted Securities

In their report on the unlisted market, A. J. Pattison Jr. & Co. say that last week trading was quiet and lacked any outstanding features. The more active issues showed a slight tendency to sell off, particularly the Oil Stocks—Imperial losing 2 points to 115-117, and International closing at 24-25. Durant Motors eased to 9-10, a loss of 1 point for the week, considerable stock changing hands at 9.50 and 9¾. The popularity of bank stocks, both listed and unlisted, continues to grow. The demand for Home & Sterling Bank is gradually moving these stocks higher in conjunction with the movement which has occurred in listed bank shares. Cockshutt Plow Preferred, which had a stiff rally following the issuing of the annual report, weakened decidedly during the week, being offered at 47 with no bid. It is exceedingly hard to understand the action of this stock, inasmuch as the rally occurred at a time when it might have been expected that the stock would have been inclined to ease, as the figures given in the report were not of a character to warrant any upward movement. Collingwood Shipbuilding Common showed some improvement at 54-60, and appears to be heading for higher figures. Considering that the bond issue has been retired and the common is the first charge on the assets of the company, much better figures may be reached. Canadian Westinghouse was bid up 5 points to 123 bid, with the closest offering at 12.50. This issue has, duing the last year, behaved better than any of the electrical shares. Western Grocers Preferred gained half a point to 60 bid, without changing hands. Whalen Debentures were somewhat active at 63½-65½, sales taking place during the week between these figures. Offerings of Famous Players were repeatedly asked for, but the quotation remains 54-57. Some demand occurred for Eastern Theatres Preferred, moving the quotation to 55 bid. The Common showed a tendency to ease at 6¾-7. Abitibi 6's, 1940, eased slightly to 93½-94¾, while Spanish River 8's remain unchanged at 103 bid.

## C. N. R. DEBENTURES

Notice is given that on December 1, 1922, the Canadian Northern Railway Company intends to redeem all the above Debentures now outstanding, and which in ordinary course would not mature till June 1st, 1923. The December 1 coupons will be paid on December 1 at the usual places in the usual way.

Debentures of the above issue, together with the June 1, 1923, coupon attached, should, in accordance with the terms of the Trust Deed securing them, be presented for payment at Lloyd's Bank, Limited, 72 Lombard Street, London, E.C., England. The Debentures should be received by the bank three days before December 1. Interest on the Debentures will cease as of December 1.

## TREND OF STOCK MARKET

Oswald and Drinkwater, members Montreal Stock Exchange, in their latest market letter say:—

"The stock markets have lately been experiencing one of those reactions which are regarded as inseparable from a notable forward and reconstructive movement in security values such as set in when it became inevitable some months ago that the period of post-war deflation had proceeded as far as circumstances in the business world warranted.

"Some apprehension has been expressed of late that the forward movement had run its course, no doubt due to the extent of the reaction, but eminent financial authorities assert that this is not the case and that it will be resumed and continue for some time longer.

"Canadian stocks had not shared in the upward movement to anything like the extent of American stocks so that the reaction has not been as severe in this country. Those issues which did enjoy anything like a notable rise, however, felt the influence of the New York reaction and are now on a more attractive basis and one from which a fresh start forward may be expected to take place in the near future.

"In such movements the more attractive dividend issues are the first to feel the upward movement and it takes some time for the non-dividend class to feel the impulse. The constructive movement here had not gone far enough to overtake some of this group with the result that they still remain on an attractive price level. Among the common stocks so situated are Southern Canada Power, Winnipeg Railway, Manitoba Power, Quebec Railway and Illinois Traction while in the preferred group there are such non-dividend issues as British Empire Steel second preferred, Canada Steamship Lines and Canadian Car and Foundry. The latter three all have arrears of dividends and their positions warrant hopes that they will be able to liquidate these and resume regular distributions in view of their improved outlook. Astute traders are quietly picking up these stocks realizing that their rise in value over a period in all probability will represent considerably more than the proceeds of dividends and the profits thus secured are not subject to taxation."

Toronto, Ontario,

such presentation and delivery to be made on or after the first day of December, 1922.

Payment to Shareholders of record and fully paidup at the close of business on the 15th day of November, 1922, (and whose shares are represented by Share Certificates) will be made on or after the 1st day of Decembr, 1922.

The books of the Company for the transfer of shares will be closed from the close of business on the 15th day of November, 1922, to the close of business on the 1st day of December, 1922.

By Order of The Board,
E. V. A. KENNEDY,
Secretary.
56 Church Street,
Toronto, Ontario.
November 9th, 1922. 82

## How Flour, Feed and Grain sales are increased *by Long Distance*

*Some quotations from recent reports:*

"I use Long Distance entirely in my business (Hay and Grain). Sales are made quicker and with less expense than by travelling. Since yesterday I sold 2 cars of grain."

"I sold 10,000 jute sacks on which my commission was $100.00 at an expense of $2.80 for L.D. calls."

"I sold 3 customers in........... between $10,000 and $11,000 at a cost of 45 cents for Long Distance—a little over the price of two cigars."

"We regularly make Long Distance sales to customers from carload lots before placing orders for same."

"We accept reverse Long Distance calls on orders from customers."

*We can tell you how to apply Long Distance to almost any business*

**Nova Scotia Tramways & Power Co.**—The following is a comparative statement of gross and net earnings for the month of September:

| | Month of Sept. 1922. | 1921 |
|---|---|---|
| Gross earnings | $105,973 | $87,967 |
| Operating expenses | 67,683 | 81,387 |
| Balance | $38,290 | 6.580 |
| Taxes | 8,848 | 10,215 |
| Net earnings | $29,442 | $x3,635 |
| Interest, etc. | 17,221 | 17,001 |
| Balance | $12,221 | $x20,636 |

x deficit

**Brazilian Traction, L. & P. Co.**—Both gross and net earnings during the month of September were the highest for any month during the present year. Gross earnings amounted to 17,572,000 milreis, as against 14,471,000 last year, and net earnings were 11,584,000, as compared with 8,634,000 for September, 1921. Aggregate gross earnings from January 1st totalled 143,910,000 milreis, as compared with 125,891,000 for last year, and aggregate net earnings for the same period amounted to 89,963,000 milreis, as against 67,770,000 for the same period last year.

**Dome Mines Co.**—At a meeting on November 6 the directors decided to recommend a change in capitalization by substituting shares of no par value for the present shares of $9 par and increasing the number of shares sufficiently to make an exchange of four shares of no par value for each one of the present shares.

On March 31 last stockholders received $1 a share as repayment of capital, reducing the par value of shares from $10 to $9. The company has outstanding 476,667 shares of stock, which was put on a 50-cents-quarterly basis at the June meeting.

The resignation from the board of Howard Poillon was accepted. Dwight B. Lee, president of the Motor Products Corporation of Detroit, was elected a director.

**Illinois Traction Co.**—Gross earnings for September were $1,877,092, compared to $1,220,508 a year previous, and net earnings were $529,519, compared to $513,381. Gross earnings for the nine months ended September were $16,390,635. compared to $16,195,370, and net earnings were $4,514,952 compared to $4,222,387.

**Algoma Central & Hudson Bay Ry. Co.**—The bondholders' committee of the Algoma Central and Hudson Bay Railway Company and Algoma Central Terminals, has issued a report reviewing the operations for the year to June 30th last. Receipts for the period were $1,722,949, against $2,918,892; expenses $1,818,352, against $2,660,466, making a net loss of $95,403, compared with net earnings for the previous year of $159,425. Amount brought in was $84,937, leaving net loss carried forward $10,466. As amount required to pay full interest on both railway and terminal bonds at 5 per cent. is $753,635; deficit for year amounts to $849,039.

Under scheme of arrangement of 1916 interest on these bonds was only payable out of joint net earnings of companies up to Aug. 1st, 1921, but after that date 1½ per cent. interest is payable upon terminal bonds in each half-year on May 1st and Nov. 1st, whether or not joint earnings are sufficient. Accordingly 1½ per cent. was paid to terminal bondholders on May 1st last, and 1½ per cent. on coupon No. 6 will be paid on Nov. 1st. The sum of $102,149 has been added to depreciation reserve for the year, making a total of $938,810, which has been charged to revenue since June 30th, 1914. The balance ($48,000) of equipment trust notes, $558,000, has now been paid off, and the whole of the railway rolling stock is now free from any encumbrance.

**Consumers Gas Co.**—Due to a cut in rates and the coal strike in the United States profits for the year ended September 30 last are slightly lower by $91,771 from the previous year.

After payment of interest charges, the usual dividends and an allowance for plant and buildings renewal fund, a surplus of $261,218 was left as compared with $352,989 a year ago. Of this amount $140,906 was carried to the reserve fund and $120,312 to special surplus account.

An increase of 4,586 in the number of consumers is reported for the year, and President A. W. Austin points out that while the coal miners' strike in the United States caused the directors much anxiety in the securing of an adequate supply of gas coal, they were able to maintain a full supply of gas notwithstanding the long duration of the strikes. This was not accomplished, however, without adding greatly to the company's operating expenses, due in part to the necessity of purchasing and transporting a large quantity of English gas coal.

As a result of the general shortage of coal and the difficulties experienced by citizens in obtaining sufficient for the heating of their houses, the demand for gas during the month of September exceeded that for any month during the company's history. On September 25 the company recorded its maximum daily output of gas, which amounted to 18,662,000 cubic feet. being an increase of 1,258,000 over the previous maximum day.

The demand for gas, Mr. Austin points out, has continued to tax the company's manufacturing capacity to its limit, and while the revenue from the sale of gas shows a decrease compared with the previous year of $418,452, this amount really represents the saving to the consumer generally from the application of rates for gas which were made effective on February 15 and June 15.

Slight reductions made in freight rates along with the saving of the exchange on remittances to the United States have contributed materially in enabling the company to make the reduction in the rates charged for gas. The efficient condition of the plant has been well maintained and necessary repairs and renewals have amounted to $649,162. The authorized capital stock of the company was increased during the year from $6,000,000 to $12,000,000.

There were 132,141 meters in use at the end of September last as compared with 127,555 at the end of the previous year, a gain of 4,586.

Assets are shown as $13,374,089. as compared with $12,996,822 in 1921, including real estate, plant and equipment, $11,703,966; other investments, $201,646; materials and supplies, $839,615; cash in bank and offices, $157,550; accounts receivable, $469,188, and accounts receivable, accrued, not due, $2,061.

**Maritime Telegraph & Telephone Co.**—Although gross earnings for the eight months ended August 31 are slightly lower than for the same period last year, operating expenses have shown a substantial decline thus increasing the net earnings. The following is a comparative statement of earnings for 1921 and 1922:—

| | 1922 | 1921 |
|---|---|---|
| Gross earnings | $978,275 | $988,437 |
| Op., maint. dep. & taxes | 747,391 | 780,676 |
| Net for interest | $230,884 | $207,761 |
| Bond interest | 106,666 | 106,666 |
| Balance | $124,218 | $101,095 |

**Famous Players Canadian Corp.**—At the annual meeting of the company on November 9 the annual report was approved and accepted by the shareholders. During the last fiscal year, a period of "unprecedented depression in the theatrical business," according to one of the officers, the company earned its preferred dividend by a substantial margin. Not only was this performance the subject of favorable comment, but announcement that earnings for the first nine weeks of the current fiscal year were substantially better than for the corresponding period last year created a decidedly optimistic atmosphere at the meeting. Business was largely of routine character, with short addresses by President J. P. Bickell and Managing Director N. L. Nathanson.

It was announced that negotiations which had been under way for some little time for the taking over of Shea's Hippodrome, Toronto, had been successfully completed, and the Famous Players Corporation had entered an operating agreement with the owners of the theatre, whereby they would take it over and operate it as of November 25 next. By this arrangement the corporation has secured the use of a house of seating capacity up to 3,000.

The regular quarterly dividend of 2 per cent. on first preferred was declared payable December 1 to shareholders of record November 15. This is the eleventh consecutive dividend on this security. One change in the directorate was announced, S. B. Kent, General Manager of Distribution of the Famous Players-Lasky Corporation of New York, being elected to succeed W. C. Pitfield of Montreal.

**Porto Rico Railways Co.**—The following is a comparative statement of gross and net earnings for the month of September and also for the nine months ended September 30:—

| | 1922 | Inc. |
|---|---|---|
| Gross | $109,557 | $9,385 |
| Net | 43,440 | 8,430 |
| For nine months— | | |
| Gross | 987,234 | *15,367 |
| Net | 394,543 | * 7,154 |

*—Decrease.

**Hollinger Consolidated Gold Mines, Ltd.**—Notices are being sent out by the company warning the shareholders to be upon their guard against swindling schemes which seem to be cropping up with increasing frequency, the success and high standing of this company in the eyes of the public making it a particularly effective name for swindlers to conjure with.

The company states that recently a shareholder in Chicago, who was one of the original shareholders and who never exchanged his old stock for new, was called on long-distance from New York by a man who said he was the New York transfer agent for Hollinger, and who asked the Chicago shareholder to endorse his certificate in blank and send it to him to be exchanged for the new stock. Fortunately the shareholder wrote to the company here before taking any other action.

A few days later a shareholder at Saratoga Springs received a long-distance telephone message from New York from a man who said that he was A. R. Brigham of the Hollinger, and who informed the shareholder that he was promoting a gold mining company on a Montana property, and that the proposal was backed by the Hollinger directors and that the Hollinger shareholders had the right to subscribe to a number of shares in the new company equal to their holdings in Hollinger, the price to be $1.50 per share.

**Winnipeg Electric Railway Co.**—While gross earnings for the month of August show a slight increase over the corresponding month of 1921, operating expenses show more than a proportionate advance, with the result that net divisible income after operating costs, taxes and fixed charges are met, is lower at $34,230, compared with $52,845 for August, 1921. Net divisible income for the first eight months of the year at $419,742 compares with $452,767 for the first eight months of 1921. Comparative returns are as follows:

| | Aug. 1922 | 1921 |
|---|---|---|
| Gross earnings | $409,752 | $406,301 |
| Oper. exp. and taxes | 321,052 | 294,675 |
| | $88,699 | $111,625 |
| Fixed charges | 54,469 | 58,780 |
| Net divisible inc. | $34,230 | $ 52,845 |
| Eight months' period— | | |
| Gross earnings | $3,573,962 | $3,667,657 |
| Op. exp. and taxes | 2,684,329 | 2,737,845 |
| | $889,632 | $929,812 |
| Fixed charges | 469,890 | 477,045 |
| Net divisible | $419,742 | $452,767 |

**Riordon Co.**—R. Montagu Davy, chairman of the creditors committee, has addressed a letter to those interested pointing out that creditors who do not vote in person or do not forward either a proxy or a voting letter, will be deemed to vote against the proposal of the company for another year's extension of credit from November 19, 1922, as contained in the report of the trustee, Gordon W. Scott, referred to in these columns recently.

Mr. Davy says: "In the interest of a clear cut decision in this matter your committee desires that you be present at this meeting if at all possible. If you cannot be present, but are in a position to make your decision as to the extension upon the basis of the documents sent by the trustee, please record your vote without delay, using the Voting Letter which is now in your hands. If you can do neither of these, be sure to appoint a proxy, using the general form provided by the trustee. If you have no one in view to act in this capacity, any member of your committee (except Mr. Sample and Mr. Fraser who will be away at the time of the meeting), will be glad to serve you."

### British Columbia Legislature, Now in Session, Considers Abandoning Huge Investment—Operations of Liquor Board Profitable to Province and Municipalities—Government's Attitude on Freight Rates Question

British Columbia legislature opened its 1922-23 session on October 30. The lieutenant governor in his opening address said in part:—

"During the period since your last session continued representations have been made to the Dominion Board of Railway Commissioners for the reduction of railway transportation rates, and for the entire removal of the discriminatory mountain scale which has been in force for many years in the province. I am glad to state that a considerable reduction in general rates has been obtained, and that the excess of mountain over prairie rates has been reduced by one-half. It is the intention of the Government to persevere in its efforts for the entire emoval of the excess mountain rates scale. To that end an appeal to His Excellency the Governor-General-in-Council is in course of preparation.

"It is a matter of regret that the application of the Government to secure the prohibition of the improtation of liquor into British Columbia, except by the Provincial Government, did not receive the approval of the Canadian Senate. It is the intention of the Government again to apply to the Dominion Parliament for the powers desired.

"It will be satisfactory for you to know that the opinion expressed by the Honorable the Minister of Finance in his March, 1921, Budget Speech, respecting the stabilizing of rates of exchange between Canada and the United States, has been more than justified, that the exchange is now at par, and that the market for our long-term refunding bonds has been very materially improved.

"Substantial progress has been made with the cruising and re-assessment of Crown-granted timber lands for the purpose of equalizing taxation .

"Reports upon the condition and prospects of the Pacific Great Eastern Railway will be placed before you.

"Satisfactory arrangements have been made for a complete consolidation and revision of the Statutes of British Columbia.

"Substantial and gratifying progress has been made with the work of reclamation of Sumas Prairie lands.

"The Government is taking steps to ascertain the value, for University purposes, of the lands mentioned in section 7, subsection (2), chapter 50 of the Statutes of 1920, and how said lands may best be dealt with to produce the maximum of value.

"The following Bills will be submitted for your approval:

"For the purpose of ratifying an agreement between the Dominion and the Province providing for a survey of the iron-ore resources of British Columbia;

"For the consolidation and revision of the Public Schools Act;

"For the consolidation of the Statutes relating to public printing;

"For the amendment of the Workmen's Compensation Act;

"For amending the Forest Act, providing additional safeguards against fire;

"And for further amendments tending to the better enforcement of the Government Liquor Act.

"Copies of balance sheets and statements of profit and loss under the operation of the Government Liquor Act will shortly be placed before you.

"The public accounts for the fiscal year 1921-22 will be brought down at an early date.

"The estimates of revenue and expenditure, prepared with due regard to economy and to the necessities of the Province, will be submitted for your approval."

The session will, it is expected, be a short one, and the government is understood to have all its legislation already prepared. Quite a bit of discussion regarding the Pacific Great Eastern Railway is anticipated.

#### The Liquor Board

The operations of the Liquor Control Board for the first year of its existence—from June 15. 1921, to March 31, 1922—were set before the Legislature on October 31 by Attorney-General Manson, who presented the first annual report. Accompanying the report was a balance sheet showing the financial operations of the Board for the six months ended September 30 last, when the profits of the Board were $1,075,000, with stock on hand valued at $2,108,217, a falling off from the previous six months' period, when stock on hand totalled $2,383,306. Profits in the past six months showed a falling off of about $158,000, which was accounted for, according to the statement, as follows: Increased cost of malt liquors to the extent of about $51,000; a reduction in prices of hard liquors to an amount of about $40,000; loss in revenue on warehouse licenses of about $15,000; increase in Dominion duties, etc., of about $24,000; loss on claims charged at face value, about $5,000, and other minor items.

In submitting his report, the Attorney-General pointed out that out of the profits shown there would be approximately $500,000 still to come to the municipalities. In addition, he stated, the municipalities would appear to be securing a substantial revenue through fines and escheated bail. In this connection the report shows that in the past six months there have been 1,642 prosecutions, netting a total of $54,460 in fines, and $45,900 in bail escheated. In the same period, fifty-two men were sent to jail compared with fifty-five in the preceding ten months. The cost of enforcement of the Liquor Act has been mounting, the report sets forth. In the past six months it totalled $60,413 as against $34,954 in the preceding six months.

By a perusal of the report it will be noted that the advances to the Board by the Provincial Treasury were decreased some $200,000 during the half-year ending March 31 last, and by the further sum of $600,000 during the period ending September 30, Mr. Manson stated. There was distributed to the municipalities on December 16, 1921, $200,000, and on July 21 last, $600,000. It is anticipated that there will be distributed to the municipalities very shortly the further sum of approximately $500,000.

In this connection it has been found that the provisions of the Act with regard to the distribution of moneys among hospitals by the municipalities has not worked out satisfactorily by reason of the fact that there are no hospitals in a good many of the municipalities.

#### Provinces' Finances

In the course of an acrimonious debate with the opposition leader, W. J. Bowser, on November 2, Premier Oliver defended the financial policy of the Government. He said:—

"When we look over the record of the Government in 1916 we find that one of the first things the bankers asked of us when we took power was what was going to be our fiscal policy. They told us we could not borrow to make up our deficits. In fact, in such a desperate position had the late Government left the Province that we were forced to impose a surtax—a double tax—to meet our financial demands."

The Premier quoted from a circular issued by the Bank of Commerce, one from which the Opposition leader had quoted, to show that the latter's derogatory remarks concerning the financial condition of the Province were not warranted. He pointed out that in 1916, the last year of the Conservative Government, there had been a total ordinary revenue of $6,291,694, and a total expenditure on ordinary accounts of $10,083,505, a deficit of nearly $4,000,000.

"Yet in the face of this desperate condition which he, as Premier, left this Province, he now chides us with going to the bank, hat in hand, to seek loans."

The improvement in the financial situation of the Province as demonstrated by the 1921 figures, was referred to by the Premier, who pointed out that in that year the ordinary revenue was $15,219,264, and the ordinary expenditure $15,236,931, or a deficit of but $17,000 compared with the $4,000,000 in 1916.

The Premier resented Mr. Bowser's sneers at the efforts of the Government to secure the removal of the discriminatory freight rates. He admitted that the political element had entered into the question at Ottawa because the Progressives there, being in a commanding position in the House, had been able to secure their demands. But, he claimed, that in the past year and a half the efforts of the Government to secure more equitable rates had resulted in a reduction of the basic rates of 7½ per cent., and as British Columbia has been paying 50 per cent. more in rates than the other provinces, that percentage was all the more important.

The member for Rossland also placed himself on record as heartily opposed to abandonment of the railway. "If the Government would put some of its time and energy into colonizing the country along the P.G.E. route that it has put into the Southern Okanagan scheme it would soon have the traffic necessary to make this line a flourishing asset to the Province," he said. "Abandoning an investment of $40,000,000 is a tall order."

#### Contradictary Reports.

Mr. Esling criticized the Sullivan, Dennis and Hinton reports, stating that they contradicted each other. Mr. Sullivan, for instance, urged raising the freight rates, while Mr. Hinton said they were now as high as the traffic would bear. Mr. Dennis, he said, deprecated the natural resources which previous reports of P.G.E. officials stated were adequate to develop enough traffic to allow the line to pay a profit. He stated that the Government had in its employ officials much more competent to discuss the natural resources of the Province than Mr. Dennis.

Among the criticisms which Mr. Esling levelled at the Government's handling of the P.G.E. were the following: That the line had cost $100,000 a mile, although the Kettle Valley line, built through an equally difficult country, had cost only $42,000 a mile; that the Government had bought supplies from the Northern Construction Company at double the market price; that the 30 per cent increase in the unit price to the Northern Construction Company, authorized by the railways department engineer, had cost the Province $600,000, even though the Northern Construction Company had made only $35,000 additional on its commission; that the Northern Construction Company was not a cost plus contract with a bonus clause, as there was no estimate cost on which a bonus could be based. That Mr. Sullivan had been given incomplete information by the Premier on which to base some of his findings as was evidenced by the context of his report; that the change in route at Quesnel directed by the Premier was not justified, according to the Sullivan report.

#### Pacific Great Eastern

Advocacy of the completion of the Pacific Great Eastern Railway to Fort George and also the link between Squamish and Whitecliff was made on Nov. 1, by George Hanes, Independent member for North Vancouver, who also declared that the time had arrived for a start to be made on the University of British Columbia at Point Grey. It was too late, thought Mr. Hanes, to think about another site for a university.

Mr. Hanes asked the Government what they intended to do with the Pacific Great Eastern Railway. He, for one, did not altogether agree with the reports of the engineers submitted this fall. The people of British Columbia in 1912 were almost unanimous in the building of the Government-owned road to the north country, and before any question of abandonment was now considered the same electorate should be asked their opinion. He was in favor of completing the stretch between the Cottonwood Canyon and Fort George, and also the link betweeen Squamish and Whitecliff, a distance of 27 miles, which would probably take up $100,000 a mile. In this way the P.G.E., instead of starting nowhere and ending nowhere, as reported in a speech by the Premier, would be properly tried out as a common carrier.

Mr. Hanes declared against abandoning the stretch between Squamish and Clinton, claiming that there was enough timber in the district to allow the railways to move a half-million feet of lumher a day for years, and that the addition of two additional logging trains would bring in handsome returns. Any other course would be unprofitable and not in the best interests of the Province, concluded Mr. Hanes.

"The Northern Construction Company has looted the treasury of British Columbia of hundreds of thousands of dollars through the lack of a business arrangement on the P.G.E. contract," charged W. K. Esling, member for Rossland. "I challenge the Government to investigate that through its new Minister of Railways. The Premier would not do so because he would not know where to begin, and the Northern Construction Company would not invite an investigation because it would not dare to do so," continued the speaker.

The Province is paying insurance on P. G. E. buildings, equipment, etc., at the rate of twenty-six and a quarter cents per $100, and the aggregate insurance, $3,681,646, is being carried with the Alliance Insurance Co., Ltd., according to information given by Hon. Dr. MacLean, Minister of Railways. No tenders were called for this insurance, the minister stated.

### Expenditure on Railway.

In the legislature on November 3rd, Premier Oliver stated that the whole amount of money paid out on the Pacific Great Eastern since it had come under their control was $18,902,136, including construction costs and $3,336,929 interest on debenture account and $2,862,378 other interest charges. There was a loss on operation of $1.-394,650.

H. G. Perry, member for Prince George, on November 9th, made a plea for the completion and operation of the road from Squamish to Prince George. The areas around Prince George were rich, he stated. More actual settlers had gone in forty or fifty miles south of the town this year than in any other part of the Province. Between Prince George and Quesnel, fifteen or twenty miles off the P.G.E., to date 30,795 acres had been pre-empted, and more than 153,000 crown granted. The total available acreage left to be taken up was 758,638 acres. Many millions of dollars in land sales had been taken out of the district in the past few years.

### Insurance Laws.

Two bills were introduced on November 8th, to make uniform the law respecting conditions in policies of accident and sickness insurance, and automobile insurance. A bill to amend the Fire Marshal Act of 1921 provides that insurance companies are to pay the taxes levied under the Act at the same time as they pay their income and property taxes, and the insured is to pay as at present required under the British Columbia Fire Insurance Act.

## *Railroad Earnings*

The following are the approximate gross earnings of Canada's transcontinental railways for the first two periods in November:—

Canadian Pacific Railway

| | 1922 | 1921 |
|---|---|---|
| November 7th | $5,346,000 | $4,843,000 |
| November 14th | 5,232,000 | 4,726,000 |

Canadian National Railway

| | 1922 | 1921 |
|---|---|---|
| November 7th | 3,101.373 | 2,995,791 |
| November 14th | 3,169,231 | 2,995,791 |

Grand Trunk Railway

| | 1922 | 1921 |
|---|---|---|
| November 7th | 2,454,425 | 2,273,914 |
| November 14th | 2,380,294 | 1,988,955 |

## *Bank Clearings*

The following are the bank clearings for the week ended November 16, compared with the corresponding week of 1921:—

Eastern Bank Clearings

| | Week ending Nov. 16 | Increase over 1921 |
|---|---|---|
| Montreal | $123,593,330 | *666,206 |
| Toronto | 103,798,184 | *18,695,675 |
| Ottawa | 8,511,643 | *755,784 |
| Quebec | 7,042,953 | 1,097,003 |
| Hamilton | 5,916,016 | *647,712 |
| Windsor | 3,810,704 | 3,107 |
| Halifax | 3,290,245 | *801,101 |
| London | 2,963,035 | *259,488 |
| St. John | 2,738,580 | *1,375,066 |
| Moncton | 1,180,216 | 80,012 |
| Kitchener | 1,180,017 | 22,302 |
| Brantford | 1,098,167 | 14,814 |
| Peterboro | 840,216 | 3,551 |
| Sherbrooke | 832,574 | *98,628 |
| Kingston | 649,583 | *72,516 |
| Total | $267,445,468 | *$22,151,387 |

Western Bank Clearings

| | Week ending Nov. 16 | Increase over 1921 |
|---|---|---|
| Winnipeg | $89,760,415 | $15,214,299 |
| Vancouver | 14,435,847 | 195,633 |
| Calgary | 6,528,280 | *345,461 |
| Regina | 5.641,747 | 744,174 |
| Saskatoon | 2,236,199 | *343,116 |
| Victoria | 1,939,608 | *497,591 |
| Moose Jaw | 1,797,176 | *92,530 |
| Fort William | 915,456 | *85,351 |
| Brandon | 822,316 | *114,349 |
| Lethbridge | 710,998 | *56,793 |
| Medicine Hat | 532,215 | 205,288 |
| New Westminster | 522,359 | *60,782 |
| Total | $125,843,116 | $14,763,421 |
| Eastern total | 267,445,468 | *22,151,387 |
| Grand total | $393,288,584 | *$7,387,966 |
| Prince Albert | 404,714 | |

*—Decrease.

### GOLD SHIPMENT

The New York Trust Company on November 13 shipped one million dollars in gold coin to Canada. This is the fourth shipment of the kind made by this company since the 14th of September. The movement of gold to Canada has assumed considerable importance lately because of the favorable position of the Canadian dollar in the New York money market. The dollar was quoted to-day at 1-8th of one per cent. premium.

## *Business Conditions*

Business conditions in the Dominion of Canada are much the same as they have been for several weeks past, according to dispatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal cities, but, while the weather has not been wholly favorable for the best results in seasonable lines in numerous districts, retail distribution is well up to the average for this period and wholesale orders covering a wide range of commodities are being received in steady volume at the leading jobbing centers. General sentiment remains optimistic, as progress continues in the chief industrial departments, and collections seem to be slightly better.

Montreal reports that, while retail trade needs the stimulus of settled cold weather, numerous replenishing orders are being received for seasonable staples by wholesalers, and merchants are predicting a heavy Spring trade as a result of the growing number of inquiries being made for future requirements. Collections are fairly prompt.

Business is rather quiet in both wholesale and retail lines at Quebec, owing largely to climatic conditions, but improvement is anticipated with the advent of more seasonable weather. Collections are still slow.

Wholesale orders for the principal commodities, while usually moderate in size, are very satisfactory in number at Toronto, and merchants are encouraged by the many inquiries being received for Spring requirements. Retail trade is fairly active, but dealers would welcome more wintry weather, as the mild Fall has tended to restrict the movement of seasonable lines. Collections are improving.

Business in the Far West and Northwest is slowly improving, but, while advices from Winnipeg, Saskatoon, Calgary, Regina, and other centers note a slightly better movement of seasonable merchandise at retail, and while wholesale orders for dry goods, clothing, footwear, furniture, drugs, groceries, hardware, and other staples are being placed with somewhat more freedom, future engagements are still being undertaken with a considerable degree of caution. Collections, though still slow, show signs of improvement.

## *Exchange Quotations*

Closing rates in Toronto, Wednesday, compared with the preceding week, were as follows:—

| | Nov. 15 | Nov. 22 |
|---|---|---|
| London | 445.875 | 450.00 |
| France | 6.62 | 7.28 |
| British W. I. | .92⅞ | .93¾ |
| Jamaica | 4.47⅝ | 4.51¾ |
| Belgium | 6.15½ | 6.78 |
| Denmark | 20.22 | 20.26 |
| Germany | .01¼ | .01 9/16 |
| Greece | 1.50 | 1.54 |
| Holland | 39.21½ | 39.42 |
| Italy | 4.52 | 4.67 |
| New York | 3/32d | 1/32d |

## *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended November 17, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Nov. 17 | Nov. 10 | Nov. 3 | Oct. 27 |
|---|---|---|---|---|
| Ontario | 24 | 14 | 26 | 19 |
| Quebec | 44 | 15 | 31 | 41 |
| Manitoba | 7 | 4 | 9 | 4 |
| Alberta | 6 | 4 | 3 | 5 |
| Saskatchewan | 8 | 4 | 2 | 2 |
| British Columbia | 1 | 7 | 6 | 5 |
| Nova Scotia | 1 | 2 | 4 | 2 |
| New Brunswick | 1 | 0 | 3 | 0 |
| Prince Edward Is. | 1 | 0 | 0 | 0 |
| Newfoundland | 1 | 0 | 0 | 1 |
| Total | 94 | 50 | 84 | 79 |
| 1921 | 47 | 42 | 66 | 63 |

# Immigration Policy Decided On

### Government Will Launch Publicity Campaign in Great Britain, United States and Other Countries—Natural Resources Conference Between Government and Prairie Provinces—Sir H. Thornton's Arrival Being Awaited With Interest

(Special to The Monetary Times)

Ottawa, Nov. 22.—The Government has at last decided to launch a vigorous immigration policy, and it begins to look as though something like pre-war activity in the Immigration Department may be expected. Some excellent ideas respecting immigration were recently submitted to the Government by the transportation interests, who know as much as any about how to get settlers. These included the placing the departmént under the direction of a separate minister, the launching of a big publicity campaign in the British Isles, the United States and other countries, with the doubling of present appropriations for such work and the removal of some of the restrictions.

It is improbable that all of these suggestions will be adopted, but the majority of them will be. Recently the Government has been made aware of the fact that not only has immigration dwindled, but a very large emigration is going on, so that it is quite probable that as many people are leaving the country as are coming in. This at first may seem doubtful, but while it is impossible to get exact figures on the subject, there is strong circumstantial evidence to the effect that the statement is correct.

#### Partial Exodus to U. S.

It is well known that there is always more or less of a leakage to the United States, even under the most favorable conditions. Better opportunities take quite a number of the native-born across the line, this being especially true of university graduates, investigation having disclosed that about 12 per cent. of the graduates of our colleges as well as universities have gone to the Republic. Climatic conditions also send many others across, this being true of a certain proportion of immigrants, who have been used to urban conditions.

But during the last year this immigration has been increased through the passing over of a large number of workmen, this being especially true of members of the building trades, who have been attracted by not only higher general wages, but by the prospect of very generous over-time. Hon. Charles Stewart said in Montreal recently that in spite of the greatest crop in the history of the West, farmers were leaving the prairie provinces this year for the United States.

For this movement across the line there are special reasons. For one thing, the United States has quite severely restricted immigration through the law which limits the number of arrivals of any nationality during a year to three per cent. of the number of such nationality in the United States in the year 1910. As can readily be understood, this has reduced the number of immigrants to about one-third the number that arrived during the years just preceding the war. A new development has also arisen over there in the form of a large emigration, so that on the whole it is improbable that the Republic has much of an excess of immigrants over emigrants.

#### No Immigration Restriction

There is, however, no restriction on immigration from Canada, and as the revival in business has created a strong new demand for labor, it is found that, to some extent, this is being met by arrivals from Canada. Obviously, this makes the drain on this country unusually severe. Nor is there likely to be any appreciable let-up for a while, for after all labor will go where it is best paid.

The realization of such conditions has added a great deal of weight to the representations that have been made to the Government for the adoption of a much more vigorous immigration policy. For the moment it is not so much a matter of getting new settlers in order to lighten taxation and make the National Railways pay; the getting of them in large numbers is necessary in order that the country may hold its own in population.

#### Natural Resources

The conference between the Government and the representatives of the prairie provinces over the transfer of the natural resources has not contributed much to settlement. Even before the Westerners arrived it was quite evident what the result would be. As a matter of fact there is a great deal of pretence about the matter. There was a time when both Saskatchewan and Alberta really desired the resources within their boundaries. Alberta desires them yet, for it is quite probable that she would get more from them than she now gets in the form of subsidy in lieu of them. But Alberta would like a little slice of something besides by way of compensation; not so very much, but just enough to show that she had waived entirely the matter of compensation for lands alienated. Moreover, the question of revenue is so urgent in Alberta just now that the present subsidy looks very good, if for no other reason than that it is so easily collected.

There was a time when Saskatchewan eagerly desired her natural resources, but that was before the best of them were alienated. Now that they are practically gone below the wooded areas, the old eagerness is not manifested, for it is quite evident that any revenue that the provincial government could collect for some time would not begin to equal that which it now receives from Ottawa.

#### Difference Over Date

That which is true of Saskatchewan is also true of Manitoba. That province may have a valuable hinterland, but to determine this will take some years. At the present time what the provincial government could collect therefrom would not nearly equal what it gets from the Federal authorities. In the meantime there is considerable spatting over the question of compensation for lands alienated, the alleged difference being as to the date from which the accounting should begin. But in reality this looks like a secondary feature of the question. Even were the western provinces and the Government able to come to an understanding, it would have to run the gauntlet of Parliament before it could be carried out, and one may be sure that the Maritime Provinces would demand substantial compensation. The visit of Premier Bracken and Attorney General Craig of Manitoba apparently was successful in the matter of the Lake of the Woods dispute.

The arrival of Sir Henry Thornton is being eagerly awaited all over the country, and the invitations for dinner are already pouring in, Montreal's being the first to be accepted. From present indications Sir Henry will have a surfeit of dinners. Offices are being fitted up for him here; but it is explained that this is merely a temporary arrangement.

---

## POST OFFICE SAVINGS BANK

The outstanding feature of the August statement of the Post Office Savings Bank was the decline of approximately one hundred and twenty-eight thousand dollars in withdrawals in comparison with the previous month. This year's total is considerably lower than last year when withdrawals totalled $786,545.

There was a slight decline of five thousand in deposits as compared with July. Total deposits during August are approximately eighty thousand lower than those of last year

The following is the statement for the month of August:—

| | |
|---|---|
| Balance in hands of Minister of Finance on 31st July, 1922 | $23,268,337 |
| Deposits in Post Office Savings Bank during the month | 207,349 |
| Deposits transferred from the Post Office Savings Bank of the United Kingdom to the Post Office Savings Bank of Canada | 10,298 |
| Interest allowed to depositors on accounts closed during month | 3,022 |
| | $23,489,007 |
| Withdrawals during the month | $ 467,790 |
| Balance at the credit of depositors' accounts on 31st August, 1922 | 23,021,217 |
| | $23,489,007 |

---

## EDMONTON'S FINANCES IMPROVED

### City Needs No Loan With Bank to Finance Current Expenditures

(Staff Special)

Edmonton, November 22:—Edmonton, so far as city finances are concerned, is progressing most satisfactorily. At present the city has no loan with the bank to finance current expenditures; in fact it has nearly four hundred thousand dollars to its credit, the greater part of which is out on call loan earning five per cent. Its capital account is in the same satisfactory condition. At present the city has about half a million dollars to its credit, half of which is temporarily invested earning 5½ per cent. interest and the other half is on call loan earning about the same rate of interest secured by the Victory bonds.

The civic utilities are making a most satisfactory showing. It is estimated that they will pay into current revenue this year about $350,000 as taxes after taking care of all fixed charges, including depreciation. For the first nine months of 1920 the utilities showed a loss of $122,000 but for the first nine months of this year they show a profit of $247,000 a turn over of $369,000 in spite of business conditions being more satisfactory in 1920.

The street railway, which showed a loss of over $200,000 in 1920 will this year about break even after paying all fixed charges on its debt and setting aside a liberal amount for depreciation. The loss for the first nine months of this year is only $6,450.

The collection of taxes this year for the first ten months amount to 72 per cent. of the current levy, which is an improvement of 31 per cent., compared with last year. In the whole of 1921 only 64 per cent. was collected. Cash revenue shows an improvement of nineteen per cent. for the same period. For the first ten months of this year 73 per cent. of all revenue has been collected, which is the same as for the whole of 1921.

#### Legislature Opening Changed

The opening of the legislature which was billed to take place on December 7, will not now be held until January 23, owing to the fact that Premier Greenfield will be engaged in the conference on natural resources at Ottawa for the last two weeks in November, and that the government is not quite ready with its program for the session. The Premier is anxious to go into the session fully prepared to proceed with legislation. The date of January 23 is ten days earlier than the date of opening last spring.

Hon. George Hoadley, Minister of Agriculture, who returned at the end of last week from the convention of Municipal Districts at Calgary, reiterated the statement made to the convention that there would be no legislation for seed grain relief during the coming session. "I emphasized to the convention, when questioned as to the policy of the government in this matter, that the government was merely administrator for the state, and that it was the state's money, the people's money that had been spent on seed grain relief, and that the government had decided against passing the credits of the people further in this matter. The Dominion government has reserved a million bushels of seed oats, and fifty thousand bushels of seed barley, but those who want this seed must be ready to purchase it for themselves.

#### Act to Be Re-Drafted.

Mr. Hoadley also told the convention that the domestic animals act would be re-drafted and put in such shape that all the clauses applying to municipalities would be put together in one portion of the act. He also explained that permission to hold round-ups in unorganized territories must be secured from the minister of Agriculture under conditions of the act, but that in organized municipalities, the councils had the right to conduct round-ups without any reference to the minister.

Hon. Alex. Ross, minister of public works, also a visitor to the convention, spoke in reference to the re-organization of the highways branch, saying that he believed now that the road work in the province was being organized on such a basis that the appointment of an independent highways commission would not be necessary. He repeated his opposition to the establishment of such a commission. The report of the executive committee of the convention on its dealings with Mr. Ross on the matter, was adopted by the convention as being satisfactory.

# Big Increase In Canada's Trade

### Thirty-Seven Million Increase in Total Trade Over September—Also Considerably Higher Than Last Year—Exports of Agricultural and Vegetable Products Are Up By Thirty Million From September

Canada's trade for the month of October shows a decided improvement over the previous month and also in comparison with October of last year. The total for October is thirty-seven million higher than for September and is also thirty million higher than for October, 1921.

The feature of the October report was the large increase in exports and more particularly in agricultural and vegetable products, which are up by thiry-two million from the previous month. This big increase is, of course, due to the movement of the crops to foreign countries. Total exports during the month of October are considerably higher than those of last year in spite of the lowering of the price of commodities. Exports for the seven months ending October are also higher than formerly being up by seventy-five million from the same period during 1921.

Imports during the month were slightly above those of September and are also above those of October last year. October's total was six million higher than September and seven million above October last year. Imports for the seven months' period were slightly lower than for the same period last year.

Details of the October statement with comparisons are given herewith:—

## IMPORTS ENTERED FOR HOME CONSUMPTION

## THE BRITISH COLUMBIA SESSION

The principal task before the British Columbia legislature at its present session, judging by reports thus far received, is the question of the Pacific Great Eastern Railway. Though started as a private enterprise, this road has for some years past been in the hands of the government. An immense sum has been invested in it, and present operations are not profitable. The province is in doubt whether to expend further sums on it or to abandon operation. The position is similar to that in the case of the Hudson Bay Railway, on which most of the construction work has been done, but here the absence of terminal connection at Port Nelson on Hudson Bay renders the road of no value.

In view of the present state of its finances extreme caution on the part of the province in regard to further expenditures is necessary. Between starting new enterprises and completing old ones, however, the choice is with the latter. If operations were abandoned the burden of debt charges on the investment already made would be a heavy one. If the province is determined to retain the road and it could be so completed as to return some surplus over and above operating expenses such work would be desirable. The point of view is one which would at least strike investors as reasonable.

British Columbia has continually before it some plans to advance its industries. A few years ago a department of industies was created to make loans to small enterprises. The results were not satisfactory. On items such as these the province may well exercise caution and economy.

Nor is any ultimate advantage to be gained by encouraging municipalities to assist industry. The Victoria "Colonist" makes this proposal:—

"Speaking locally one of the handicaps lying in the way of industrial development is the lack of any municipal policy for aiding industries. There is no doubt industries would be started here were there definite privileges given. The city has a very large quantity of reverted lands lying idle and producing no revenue. This fact alone opens up a prospect of municipal aid to industrial undertakings which should not be overlooked. No one suggests that industrial firms should be given privileges to establish here to go into competition with industries already putting out the same products, but enjoying no municipal aid. That would be unfair. The suggestion is that new industries should be induced to open up, under fostering conditions, such as the provision of free sites, possibly tax exemption for a number of years, and, perhaps, in some instances, the provision of light and power at nominal charges."

Ontario and Quebec have had enough experience with municipal assistance. In too many cases the cost of the industries has been greater than the benefits derived. British Columbia cities can ill afford to lose money in this way.

## THE UNITED STATES TARIFF

The United States Tariff Commission has recently issued a report on the Emergency Tariff Act of May 27, 1921. In this report the effects of the emergency duties on the trade in more than thirty commodities is discussed from the point of view of production, imports, exports, and comparative prices before and after the enactment of the law. The report says the general effects of the act on prices is difficult to determine because the United States and the world were in the midst of the greatest price decline that has occurred in many years. Agricultural prices, especially in the fall and winter of 1920-21, fell rapidly. In the summer and fall of 1921, after the passage of the Emergency Law, there was a recovery of agricultural prices, but that this was not due entirely to the tariff is indicated by the fact that the prices of both dutiable and free farm products shared in the rise.

Although few general conclusions in regard to the effects of the Emergency Law can be drawn, some definite results are traceable in the case of individual commodities, such as wheat, sugar and wool.

The duty on wheat, 35 cents per bushel, seems to have affected only the trade in Northern Spring Wheat produced in the upper Mississippi and Missouri valleys in competition with Canadian wheat of the same variety. This wheat usually constitutes about one-sixth of the American crop,—about 100,000,000 bushels out of a total crop of 600,000,000 to 800,000,000 bushels. large quantities of other varities of wheat are exported from the United States, therefore an import duty has little effect upon their prices. There usually is a deficiency of American hard spring wheat for blending purposes, however, and to the extent that the Emergency Law reduced somewhat the Canadian imports of this variety of wheat, the duties had some effect on American prices. After the enactment of the Emergency Law the price of hard spring wheat in Winnipeg and Minneapolis differed by almost the amount of duty. This difference, however, was brought about not by a rise in Minneapolis prices,—in fact American prices declined steadily after May, 1921—but rather to a more rapid decline in prices in Canada than in the United States. England did not purchase the normal portion of Canadian wheat in 1921-22 with the result that many Canadian producers were forced to market their crop in the States over the tariff wall. How much lower the American prices would have been had Canadian wheat been admitted free of duty is uncertain.

The effects of the duties on cattle beef and veal are reported as not certain. There is some indication that Chicago prices of cattle declined less rapidly than did the Toronto prices of practically the same grades after the enactment of the law.

The report indicates that the duties in the Emergency Law did not substantially raise the price of the enumerated articles but rather tended to prevent in the case of certain commodities so great a fall in prices as took place in competing countries for similar articles. Because of surplus stocks in the United States or foreign countries the duties often had peculiar effects on prices and it is admitted that few conclusions can safely be drawn as to the effects of a permanent tariff law from the brief operations of the Emergency Act.

## THE NEW YORK BOND MARKET.

Canadian provinces and municipalities which have borrowed heavily in New York during the past few years and now have large interest obligations payable there made a good gamble. New York exchange has gone down to par very rapidly, and they can now pay their interest without loss. This may not be a permanent condition, however. As pointed out by the president of the Canadian Bankers' Association recently, it is due in part to the heavy borrowings there. The Dominion government loan was only one large item. It is possible that further loans may not be in quite so large volume and that this influence will be lessened.

United States investment leaders are somewhat critical of the financial policies of the Dominion and provincial governments, and of our municipalities. They think our expenditures are a little too free. In this respect their criticism is sound. The delay in connection with the financing of the British Empire Steel Corporation is an indication that corporation issues, also are not accepted too readily.

On the whole, however, the Canadian dollar can hardly slip back to anything like the discount which has prevailed in the past few years.

As the Canadian dollar is among the first of the world's currencies to reach par as compared with the United States dollar, the causes of this improvement will be found worthy of examination. In the first place Canada, as a part of the British Empire, inherits the sound traditions of currency, banking and credit which have always controlled the policies of that very considerable portion of the world's surface and which have given to Great Britain and her dominions an enviable position in banking and commerce. The Canadian Banking system, affords a degree of concentration which renders a sound supervision of credit comparatively easy. Having long had a true bank-note currency, firmly anchored to the gold standard, and free from both Government paper and free silver heresies, Canadian finance was in a position which enabled the country successfully to withstand the terrible shock which suddenly rocked the world in the summer of 1914. In meeting this crisis just as few departures from the ordinary rules and practices of sound finance were made as the nature of the crisis would permit. The solid character, the energy, industry and thrift of the people were, after all the elements which upheld the skill and judgment of the bankers and financiers entrusted with the duties and responsibilities of managing the credits and finances of the country while the war lasted and during the hardly less trying period following the conclusion of the conflict.

These are some of the reasons which have brought the Canadian dollar back to par. But there are other factors.

## INTER-DEPENDENCE

The mutual dependence of the United States and Canada in the face of adverse tariffs was again shown in connection with a proposal made in the former country to prevent Canadian grain from going on American railroads and steamships. The Interstate Commerce Commission refused such a measure when it was proposed by the American Federation Farm Bureau. Though no official reasons were given it was indicated that if it embargoed Canadian grain, which is passing over American railroads in congesting volume, the Canadians could stop the publication of many Amerian newspapers by placing an embargo on newsprint paper or the raw materials for making that commodity. American publications are dependent to a very large extent upon Canada for paper and paper materials.

The Canadians also have control of important nickel deposits which American industries need in their business every day. They could be shut off as easily as the American officials could close the doors to Canadian grain seeking world markets through American ports over American railroads.

Canadians claim American realroads have in their possession box cars numbering thousands, which, if returned to the Canadian owners, would go far toward relieving the congestion that prevails on Canadian railroads as well as on American.

The commission thought an embargo was too dangerous a weapon for it to undertake to use as an aid to Americans desiring to get their grain to markets. Besides the members of the commission were not convinced the embargo would reduce the volume of traffic on American railroads enough to enable much more American grain to be sent to market than is being forwarded.

Unless they shut off traffic from Canada, it was pointed out, the Canadian roads against which such a grain embargo might be laid would still have the right to use the cars in their posession for hauling other traffic.

### FINANCIAL DIFFICULTIES RECOGNIZED

The decision of the Port Arthur City council not to call for a plebiscite on the question of promoting a new province is one to be commended. As was pointed out, the financial burden on the 80,000 citizens of the north would be extreme. Complaints are easy to make but the increased taxes which separation would unquestionably involve would be something far more to be complained of.

Northern Ontario has resources which are bound to develop it. In the future there may be good reasons for separation, as the geographical connection with the south is not close. One suggestion, that union with Manitoba should be urged, would bring little change, however. Southern Ontario's interest in the north is just as great as Manitoba's could be.

A Toronto printer who died recently, had an estate of $37,465 of which $26,500 was life insurance. Life insurance represents the difference between hardship and comfort for the dependents.

The Department of Labor has decided to publish in the "Labour Gazette" the information which has been given for the past two years in a special "Bulletin of the Employment Service." This will be a saving without loss and is is in such administrative economies that economy may well be exercised.

Records secured by The Monetary Times show that ten out of thirteen new estates coming under the administration of trust companies in September were under $50,000. The large estate may benefit by trust company service because of the volume of business handled, but the small estate requires the safe management which a trust company offers.

## *Personal*

C. B. MCNAUGHT has been elected to the Board of Directors of the Royal Bank of Canada. Mr. McNaught is also president of the City Dairy Company, Ltd. and of the Sterling Coal Co. Ltd.

## *Obituary*

L. J. ODILON BEAUCHEMIN, Montreal editor and publisher, died in Montreal on November 6th. The late Mr. Beauchemin was born in Montreal on March 12, 1852.

WILLIAM M. BYERS died in Gananoque on November 18th. The late Mr. Byers was largely interested in the Ontario Steel Products Company, Limited, the Gananoque Spring and Axle Company, the Ontario Wheel Company and other industrial as well as a number of financial interests.

LESLIE HAMILTON GAULT, president of the former firm of Gault Brothers Co., Ltd., died in England on November 14th. The late Mr. Gault was born in Montreal in 1865 and was educated at the Montreal High School. He entered the firm of Gault Brothers and Co. in 1871; became a partner in 1883, director in 1896 and president in 1903. He was a director of Gault's, Limited, Winnipeg; Gault Bros., Ltd., Vancouver; Crescent Manufacturing Co., Montreal; Van Allen Co., Ltd., Hamilton, and had connection in the cotton industry in Canada. Mr. Gault had been living in England for the past ten years.

ANDREW JUKES, 65, manager of the Imperial Bank of Canada in Vancouver, died in Vancouver on November 17th. The late Mr. Jukes was a native of St. Catharines, Ontario.

ARCHIBALD SIMPSON MITCHELL, ex-Collector of Customs for Halifax and member of the old firm of G. P. Mitchell and Sons, died in Halifax on November 15th. The late Mr. Mitchell was born in Halifax on July 22. 1848.

### WILL STUDY TAXATION

Recognizing that the question of taxation in its various forms constitutes one of the most important problems facing Canadian business men at the present time, the Canadian Manufacturers' Association has appointed a special committee to study the subject, and formulate a policy for the association. The committee will first consider the sales tax. Some changes in this tax have been suggested, and may possibly be taken up by Parliament at its next session. The special committee proposes to give careful consideration to these suggested changes so that it may be fully posted on their possible effect should they be introduced.

### INCREASING PROVINCIAL DEBT

#### Public Accounts of British Columbia Show Contraction in Current Liabilities, However.

Public accounts of British Columbia for the year ended March 31, 1922, were presented to the legislature on October 30. The capital assets and liabilities show an expansion from $48,483,354 at the end of March 1921 to $62,076,961 at the corresponding date this year. These increases of capital assets are made up as follows: the Capitalized Account with the Dominion Government as at the end of March 31st, 1922, giving the same date in the previous year in brackets, is as follows: $14,776,334 ($12,462,701), Investments for Sinking Fund Account $8,324,674 ($6,981,432), Dyking Districts $703,180 ($669,661), Indian Reserves Acquired $1,024,431 ($1,339,268). Railway Subsidy Lands Repurchased $1,509,114 and Fairview Works $29,447 are unchanged from the previous year. Building, Roads, Bridges and Other Properties total $25,586,602 ($23,545,331). The balance of excess of capital liabilities over capital assets stand at $7,752,754 as compared with the previous year of an excess of capital assets over capital liabilities of $1,736,693.

On the liability side, the notable changes are increases in the amount of stock and debentures outstanding which at March 31st, 1922 were $61,851,436, ($46,511,436). The mortgage on British Columbia House, London, England, stood at $225,525 ($235,225). The guaranteed obligations remain unchanged with the exception that the South Vancouver account shows an expansion of $854,066 ($704,370).

#### Current Assets and Liabilities.

The statement of current assets and current liabilities also shows an expansion an as at March 31st, 1922 is $17,504,591 ($14,239,913). This expansion is natural in view of the increased revenue and expenses and general increase of business being done for government account. Cash and Advances stand at $9,848,770 ($6,847,054). Accounts Receivable $5,120,551 ($4,371,901), Live-stock, Stores and Equipment $1,199,804 ($944,712). Special Funds show a decrease of $411,474 ($459,686) as also do the trust accounts which are entered on both sides of the ledger as per contra $923,990 ($1,607,557).

The current liabilities side shows a marked contraction.

Bank Overdraft for Current Accounts stands at $497,342 ($265,845). In the matter of temporary loans outstanding the contraction is marked, $1,703,000 ($7,524,600). Accounts Payable stand at $3,682,790 ($2,843,452), Revenue Received in Advance $1,777,416 ($148,496) and Special Funds $1,055,122 ($908,232). The marked difference is exhibited in the excess of current assets over current liabilities of $9,464,929 ($932,738). It will thus be seen that a large amount of the current liabilities have been funded and make their appearance in capital liabilities to the extent of approximately $8,500,000.

The statement of deferred assets and deferred liabiliities are chiefly concerned with the great incubus, the Pacific Great Eastern Railway, on the taxpayers of the Province. The totals stand at $25,445,519 ($21,259,705) and with the exception of $100,086 which stands at the credit of the Bank of Vancouver (in liquidation) are all for Pacific Great Eastern account. On the asset side of the Deferred statement interest on guaranteed bonds together with loans and interests outstanding total $25,345,433, ($21,159,618). On the liability side current revenue being interest on Pacific Great Eastern loans total $1,526,896 ($555,352) and miscellaneous receipts, being discount on Pacific Great Eastern loans, total $63,900. The excess of book values of deferred assets over deferred liabilities are $23,854,722 ($20,704,352). The total of all classes of assets and liabilities as at March 31st, 1922 stand at $105,027,071 ($83,973,972).

### ROYAL TRUST COMPANY

The twenty-third annual general meeting of the shareholders of the Royal Trust Company was held recently in Montreal. The president, Sir Vincent Meredith, reported a satisfactory year and continued growth in the business. The old board of directors was re-elected, and, at a subsequent meeting, Sir Vincent Meredith was re-elected president and Huntly R. Drummond vice-president.

## Your Choice—

**Bonds Yielding 5½% to 7½%**

We have excellent securities for sale at prices to yield from 5½% to 7½%. All of them may be highly recommended. The only difference is the nature of the security.

The smaller interest yields are on Dominion and Provincial Government Bonds. The higher yields are on Corporation and smaller Municipal Bonds. The choice lies with you; but our recommendation is just as strong for the Corporation Bonds, security and interest considered, as it is for the Government obligations.

Write for particulars of these offerings.

# Explanation of Grand Trunk Decision

## Questions of Law Only Considered, View Being Taken That Lords Did Not Have Right to Inquire into Merits of Award—All Material Facts Were in Documents, No Essential Evidence Being Excluded

The reasons for the dismissal by the Privy Council of the appeal of the Grand Trunk Railway shareholders against the award of the Grand Trunk arbitrators, as announced briefly on July 28 last, were given at length on November 10 by Lord Birkenhead, former Lord Chancellor, says a Canadian Press cable. The judgment on the date mentioned was delivered by Lord Cave, who is now the Lord Chancellor. He said at the time that the judicial committee of the Privy Council had decided to announce the judgment at once, and to give their reasons therefor at a later date.

The award against which the shareholders appealed to the law lords was that the preference and common stocks of the Grand Trunk Railway had no value. Sir Walter Cassels, chairman of the board of arbitrators, and Sir Thomas White, former Finance Minister of Canada, agreed to this award, but it was dissented from by the third arbitrator, Hon. W. H. Taft, former President of the United States. Mr. Taft valued the stocks in question at $48,000,000.

The principal question involved in the appeal was as to the correctness of the decision of the majority of the arbitrators, Sir Walter Cassels and Sir Thomas White, in excluding as inadmissable the evidence of the value of the physical assets of the appellants and their subsidiary companies, which was tendered by them.

### Physical Assets

"The first and principal question to be decided," Lord Birkenhead stated, "is whether the arbitrators, in excluding evidence concerning the company's physical assets, were wrong in the law. Considering this point it is important to bear in mind both the question which the arbitrators had to determine and the principle whereon they proceeded.

"The figure to be fixed by the arbitrators was, in the words of the agreement, 'the value, if any, to the holders thereof of preference and common stock,' that is, stock ranking after debenture and guaranteed bonds aggregating over $44,000,000 and after other obligations of the company. The valuation was necessarily to be made on the footing that the railway was taken over and would be carried on as a going concern, for a break up and sale was negatived by statute and would have been contrary to the rights of prior holders of securities.

### Evidence of Assets.

"The arbitrators arrived at a unanimous conconclusion that the value of the stock was to be ascertained on the basis of the net earning capacity, both actual and potential, which should then be capitalized. The basis of the valuation so adopted, which was certainly not unfavorable to the company and was accepted by all persons concerned, was not and could not be impeached in the present appeal. It must, therefore be taken as a governing principle upon which the arbitration was to proceed, and the question is whether, having regard to this principle, evidence as to the value of the physical assets was material and admissable.

"One time the claim appeared to be that evidence should be admitted of the selling value of the physical assets, that is, the price at which the tangible assets, land, buildings, etc. could be sold. Other times it was contended that the evidence to be admitted was evidence as to what is variously described as the reproduction or reconstruction or replacement value of those assets, by which is meant the cost at which they could have been reproduced at the moment of transfer, subject, apparently to allowance for depreciation.

" The contention that evidence as to the selling value should have been received is, in Their Lordships' opinion, contrary to the basis of valuation adopted by the arbitrators, and, indeed, to the whole meaning and effect of an agreement of transfer. The transfer was the transfer of a going concern, which the holders of preference and common stock had no power to sell, either piecemeal or as a whole. Such sale was forbidden by statutes under which the company was operating, and if an attempt had been made by the stockholders to bring it about, the holders of debentures and guaranteed stock would have been entitled to intervene and forbid it.

" The question whether a purchaser could be found seems not to have been considered, and there was no evidence, nor was it even contended that it would have been more advantageous to the stock holders to disintegrate the system or sell the assets piecemeal, even if lawful. No scheme was ever put forward for such a proposition, nor, apparently, had the directors even considered the proposal.

"The plain duty of the arbitrators, therefore, was to value the preference and common as stock in a continuing and profit-bearing concern. This being so, it is difficult to see how evidence of selling value could be material. If, indeed, it had been alleged that certain tangible parts of the assets could be sold at a price without producing an equivalent or greater reduction in the value of the undertaking as a whole, different considerations would have arisen, but the company's counsel, although repeatedly invited by the arbitrators to state whether they submitted such contention, declined to do so.

"It should be added that the ruling did not exclude evidence of the selling value of such assets as were not necessarily to be considered as being used by the railway as a going concern—for example, land grants and coal properties—and there is no doubt, also, evidence of cost and the physical condition of the rolling stock and other physical assets, and of their suitability for the purpose of the undertaking, was admissible evidence. In fact, it was freely admitted, but evidence of the selling value stood on a different footing, and their Lordships think it was rightly excluded. It should be added that this contention, although at times put forward, was never strongly pressed, and was indeed at times disclaimed by cousel for the company, possibly because valuation on the basis of the selling value could be disastrous for the stockholders, and also that the arbitrators were unanimous in rejecting the contention.

### Replacement Value

"It was upon the alternative form of this contention, namely, that evidence of the replacement value should be admitted, that the arbitrators differed in opinion, Mr. Taft holding that such evidence was admissible, the majority holding a different view. Mr. Taft opined that the evidence was admissible for two reasons: firstly, to enable the arbitrators to use the value as a circumstance, and, secondly, in judging the future and potential earnings capacity. He does not say how this was to be worked out.

"Assuming for example, that the arbitrators had found the line absolutely insolvent and unable to discharge its obligations or to keep open or avoid a receiver, how could replacement value add to or detract from the value of the stock? Assuming, on the other hand, a railway constructed at a cost small in comparison with the returns earned as a growing concern, could it be material to show what was the replacement cost as a matter affecting the value of the stock? Is there, indeed, any way wherein such evidence could or should modify or assist the estimate of value, once you have determined upon the principle adopted by the arbitrators?"

### Cost and Earnings

The judgment in the appeal then considers the relations sought to be established between replacement cost and future earnings by reference to the statute law of the United States, and continues:

"The answer put forward to this reasoning by the Canadian Government is that, firstly, even as regards that portion of the Grand Trunk Railway in the United States, evidence of replacement cost would be no index to the rates which will ultimately be fixed by the commission. Such evidence would be valueless unless supported by similar evidence as to the value of all other railways in the same group, and such evidence was not tendered, and was probably unobtainable. It is one thing to fix minimum rates; it is another to secure remunerative traffic at those rates, and to draw from these rates, in themselves conjectural, any inference as to prospective profits would be unsafe and illusory.

"Secondly, as regards the lines in Canada forming part of the Grand Trunk system, in the argument it was said they had even less value. The principle of the Inter-State Commerce Act had not been adopted in Canada, and there was no reason to assume that it will be adopted. The conjecture that the Canadian Railway Commissioners, will, in fixing the future rates, have regard to the replacement cost of the railway property, is not supported by any evidence.

### Estimate of Profits

"Upon the whole matter Their Lordships have come to the conclusion that any attempt to estimate the future profits by refernce to the selling value or the cost of replacement was doomed to failure, and accordingly that the arbitrators, to whom the agreement gave wide discretion in the admission of evidence, were justified in refusing to embark upon an inquiry which must have occupied many months, and the result which then would have been obtained would have had no legitimate bearing upon the question which they had to determine.

"The view here adopted involves no criticism of American cases cited by Mr. Taft, in which evidence of value had been accepted, for these decisions were given with reference to different subject matter and under a different system of law. The cases cited from British reports have no bearing on this case.

"The second legal objection raised by the appellant company was founded upon the circumstances that Mr. Cassels, in his reasons for the award, relied on the evidence given by Mr. E. J. Chamberlin before a royal commission and was not repeated or made evidence to this arbitration. This undoubtedly is a fact. But the material facts and figures so deposed to by Mr. Chamberlin are all to be found in the correspondence between Mr. Chamberlin and Sir Alfred Smithers in a letter to Mr. Howard Kelley, and in other documents which were duly made evidence to this arbitration.

### Reasons for Decision

"Sir Thomas White, who made no reference to Mr. Chamberlin's evidence, arrived upon this other material at the same conclusion as Chairman Cassels.

"In these circumstances Their Lordships have anxiously considered whether they should advise His Majesty to set aside the award on the ground of the chairman's action. They have arrived at the conclusion that they ought not to take such a course. It is plain that if no reference is made to Mr. Chamberlin's evidence the majority of the arbitrators would have arrived at the same conclusion upon the same materials. If the award were set aside and remitted to the arbitrators on the ground of the reference by the chairman to that evidence the only result would be to cause great expense and delay to all parties without any reasonable prospect that the arbitrators would arrive at a different determination.

"It is perhaps hardly necessary to add that Their Lordships have neither the right nor the duty to inquire into the merits of the award by the arbitrators. Under the statute confirming the agreement they have only jurisdiction to deal with the points of law raised, and to determine whether the arbitrators so erred in law that the award should be set aside.

"For the reasons above given, Their Lordships feel constrained to answer this question in the negative, and will advise His Majesty that the appeal fails and should be dismissed."

The appeal was heard by Lords Birkenhead, Cave, Shaw, Parmour and Carson. The hearing began on July 10, and the argument of counsel lasted nearly four days. The counsel in the case were Sir John Simons, K.C., W. A. Green, K.C., and A. W. Atwater, K.C., for the appellants; A. C. Clausen, K.C., E. L. Newcombe, K.C., Deputy Minister of Justice, Ottawa, and W. N. Tilley, K.C., Toronto, for the respondent, the Canadian Government, which has acquired the Grand Trunk Railway and its subsidiaries.

# Substantial Decline In Debt

## Dominion of Canada's Net Debt Lower By Fourteen Million During October—Gross Debt Also Lower—Revenue Increases and Expenditures Decline—Comparison with September and with October 1921

A substantial decline of over fourteen million dollars in the net debt of the Dominion of Canada is shown in the statement for the month of October. The gross debt during October is also lower by twelve million from the previous month, and is also lower than for the same month last year. On the other hand the net debt is forty million higher than for October of last year.

Revenue collected during the month shows a further increase of two million over September and is also higher by seven million over last year. Practically every item of the revenue accounts shows an increase over that of last year, with three exceptions, those being income tax, business profits tax, and other war tax revenue. Total revenue for the period ending October 31 is slightly above that of last year.

October expenditures are lower in comparison with the previous month and also for October of last year. The decline during October amounted to seven million, and in comparison with October, 1921, the decline was slightly over one million dollars. Expenditures for the period ending October 31 are lower by six million from those prevailing last year.

The October statement with comparisons is given herewith:—

## IMPERIAL BANK OF CANADA

### Six Months Profits Nearly Proportional to Those of Previous Year.

Although there was a certain amount of quietness in many lines of business throughout Canada during this year, the position maintained by the Imperial Bank of Canada during recent years does not appear to have been impaired.

At the annual meeting of the shareholders last May the bank's year was changed to end October 31st of each year instead of April 30th as formerly. The report presented, therefore, at the annual meeting on November 22 covers the six months period ending October 31.

Profits for the period after deducting charges of management, and after making provision for bad and doubtful debts, stand at $638,003, as compared with $1,265,838 for the previous twelve months. In view of the conditions prevailing during the year this showing can be considered very good. After payment of the usual dividends; bonuses; government circulation tax; contributions to guarantee and pension fund and a reserve of $250,000 for contingencies, the balance carried forward showed a slight reduction from the previous year, standing at $1,006,931 as compared with $1,175.178 for the twelve months ended April 30th.

### Seasonal Declines.

While total deposits have declined in common with other banks, this does not call for any special comment as the difference is largely due to the different season, and also to certain government and other accounts which were buoyant at the end of April having been drawn down as is customary at this time of year. Deposits not bearing interest are down approximately seven hundred thousand, and deposits bearing interest are lower by approximately seven million.

There is a slight revision in the bank's investments, decreased holdings of Dominion and provincial government securities having from $14,153,700 to $9,592,746. Loans to cities, towns and municipalities are also lower, being down from $7,000,827 to $5,495,299. On the other hand there has been an upward movement in call and short loans in Canada, these having advanced from $3,964,800, to $5,074.910.

### Ratio Slightly Lower

That the bank is holding its strong position may be gleaned from the ratio of liquid assets to public liabilities which now stands at 51 per cent., in comparison with approximately 53 per cent., for the previous report.

The following table is a comparison of a few of the more important items:

| | Year end. Apr. 30-22. | Six months ended Oct. 31-22. |
|---|---|---|
| Profits | $ 1,265,838 | $ 638,003 |
| Dividends | 840,000 | 420,000 |
| Bonus | 70,000 | 35,000 |
| Balance carried forward in general profit and loss account | 1,175,178 | 1,006,931 |
| Note circulation | 9,851,139 | 10,577,295 |
| Deposits | 98,432,702 | 91,106,971 |
| Liabilities to the public | 109,431,586 | 103,948,640 |
| Imperial, Dominion and Provincial government securities, etc. | 16,490,487 | 13,237,312 |
| Current loans | 72,961,750 | 65,521,429 |
| Total Assets | 125,336,764 | 119,700,571 |

## LIFE UNDERWRITERS' MEETING

At the regular meeting of the Life Underwriters' Association of Toronto on November 24, an interesting address on the "Permanency of Estates" was given by Daniel W. Lang, Trust officer of the Union Trust Company.

Mr. Webster dwelt on the fact that many estates dwindle to nothing, or at least, decrease in value in a very short time, and he stated that life insurance could be made a great factor in stabalizing an estate.

## MANITOBA SAVINGS OFFICE

An unfortunate error occurred in an advertisement of the Province of Manitoba Savings Office, which appeared in the November 10th issue of the "Monetary Times." Under the liability heading two sets of figures are transposed making it appear that the surplus for the last nine months is $1,970.15 instead of $10,907.44. The correct advertisement appears elsewhere in this issue.

# BANK OF MONTREAL

## *Annual Statement*

### Statement of the result of the business of the Bank for the year ended 31st October, 1922

| | | | |
|---|---|---|---|
| Balance of Profit and Loss Account, 31st October, 1921 | | | $1,501,646.61 |

| | | | $713,569,566.68 |

*This amount includes $923,000.00 Bonds of the Merchants Realty Corporation held by the Bank that were not issued to the public.

Note:—Bonds of Merchants Realty Corporation to the extent of $2,837,000.00 secured on premises leased to the Bank, are in the hands of the public. These bonds do not appear in the above Statement as the Bank is not directly liable therefor.

VINCENT MEREDITH,
President.

FREDERICK WILLIAMS-TAYLOR,
General Manager.

To the Shareholders of the Bank of Montreal.

We have checked the Cash and verified the Securities of the Bank at the Chief Office on the 31st October, 1922, and also at another time as required by the Bank Act, and we have found them to be in accord with the books of the Bank. We have also checked the Cash and verified the Securities at several of the Principal Branches of the Bank at various times during the year. We have obtained all information and explanations required, and all transactions that have come under our notice have been, in our opinion, within the powers of the Bank. We have compared the above Balance Sheet with the books and Accounts at the Chief Office of the Bank, and with the certified Returns received from its Branches, and we certify that in our opinion it exhibits a true and correct view of the state of the Bank's affairs according to the best of our information, the explanations given to us, and as shown by the books of the Bank.

Montreal, 20th November, 1922.

J. MAXTONE GRAHAM, C.A.
JAMES HUTCHISON, C.A. } Auditors.
of the firm of Riddell, Stead, Graham & Hutchison.

THE
WORKSHOP
OF THE
WORLD

**Export Trade** made Britain the "Workshop of the World," the wealthiest of nations, and the paramount political power.

During the World War, Export Trade, changed the United States from a debtor nation to the richest country on earth.

The great opportunities for Export Trade are not in the past but in the future. People in all parts of the world are in need of Canadian products.

But successful Exporters must know how. In lieu of experience they must have expert training. The course outlined below will enable you to master the secrets of this most profitable branch of business in a few months under the instruction of expert Exporters. The following is a brief outline of the course.

1. Fundamental Concepts.
2. Home Organization.
3. Overseas Organization.
4. Types of Buyers.
5. Advertising.
6. Assistance.
7. Enquires and Samples. Quotations.
9. Catalogues and Price Lists.
10. Correspondence.
11. Credits and Terms of Payment.
12. Foreign Exchange.
13. Financing Foreign Trade.
14. Packing and Marketing.
15. Documents.
16. Shipping Routine.
17. Marine Insurance.
18. Patents and Trade Marks.
19. An Organization and Selling Trip Overseas.
20. The Story of an Order.

# Court and Contract Bonds

By Lt. Col. A. E. Kirkpatrick, Manager for Canada, United States Fidelity & Guaranty Co.

(An address before the Insurance Institute, Toronto, November 16)

To cover the field of Court and Contract Bonds in the short period of half an hour is really an impossibility; therefore I wish to confine myself and my remarks to the main principles covering the underwriting of these classes of the guarantee business, and not go too deeply into the technical difference which exist between the various classes of bond—the number of which, coming under this particular heading, would be large, indeed.

Speaking of Court Bonds first you will please note that Court Bonds do not include such bonds as those given by Administrators, Guardians or Committees of incompetent persons, for such bonds are termed Judicial Trust Bonds and by their very nature partake of the character of a Fidelity Bond.

Court Bonds include such bonds as Security for Costs, Appeals, Replevin, Attachment, To Release Attachment, Indemnity to Sheriff and Maritime Libel—to quote only a few of the bonds which most frequently come before Underwriters for their attention.

### Security For Costs.

A defendant may require his adversary, under certain conditions (as for example when the Plaintiff is a non-resident) to furnish security for the payment of all costs that may be adjudged against the plaintiff; and while a cash deposit with the clerk of the court is sometimes made in these cases, a corporate bond is the common and convenient way of caring for the situation. Usually a plaintiff who fails to file security consistent with the statutory requirements suffers a summary dismissal of the suit.

### Replevin Bond

When a person's property has been wrongfully taken or wrongfully withheld from him he may bring action of replevin against the wrongful possessor of it to recover the property. He is then permitted to take possession of the property, provided he gives a bond guaranteeing that he will proceed with the suit to try the title and return the property to the defendant if the latter be found to be entitled thereto and will otherwise respond to such judgment as the Court may render.

### Attachment Bond.

The conditions under which Attachment can be made vary in different jurisdictions and almost everywhere warrants of attachment are obtainable on numerous grounds. Amongst these grounds may be stated the non-residence of the defendant, his departure from the province with intent to defraud creditors, his removal or concealment of property with like intent, etc. In such cases plaintiffs are able, upon demonstrating by means of affidavits the existence of the facts essential in the given jurisdiction to the issuance of such warrants, to obtain them and procure action by the sheriff—namely the attachment of so much of the defendant's property as will satisfy the plaintiff's demand.

The rights of the absent defendant, however, are not forgotten by the law and plaintiffs are not permitted to summarily levy upon the defendant's property precisely as if they had already obtained judgment against such defendant, unless they first file a bond conditioned for the payment of all damages sustained by the defendants because of the attachment, in case the warrant is vacated or the defendants recover judgment.

These three bonds—Costs, Replevin and Attachment, need not necessarily be very hazardous if due underwiring precautions are taken. Usually the bonds are written on behalf of plaintiffs who are creditors and I should say that in the majority of cases the plaintiffs are substantial business houses whose indemnity may be accepted without the necessity of demanding collateral security; but one safe rule in underwriting of bonds of this nature is to assume—despite what the solicitors may say as regards the legal aspects of the action at law—that the plaintiff will lose his case and be compelled to pay his costs in cash, and to decide from the financial statement of the plaintiff whether he or they are abundantly able to satisfy these costs without delay. If any doubt exists on this score the bond had better be declined or full collateral security insisted upon.

### Appeal Bonds.

A litigant who loses his case when it is contested is allowed to try again—that is to appeal to some higher tribunal on his contention that some error has been made in the lower court. It would not be fair to the successful litigant to permit this unless he were secured in some way as to the judgment he has already obtained and which he is entitled to collect at once. Therefore the loser who appeals must give a bond to his successful adversary conditioned for the prompt prosecution of the appeal—and for the payment of the judgment with interest and costs if the case is lost again in the upper court.

It is apparent at once that Appeal Bonds are dangerous. You are bound to pay if your principal loses and to a certain extent he has lost before he begins. Applicants for such bonds continually try to make out that their's is an exceptional case and explain with much emphasis and sincerity that they are bound to win in the Appeal although they lost through an accident in the lower court, but the underwriter cannot agree with this contention. He must assume automatically that his principal will lose in the higher court just as he did in the lower. How can an underwriter be expected to pass on the legal merits of the action? He cannot pay any attention to that part of the question. Therefore all that the simple-minded, stupidly obstinate underwriter can see is that either the applicant or his company are going to pay this year, next year or some years later, and the underwriter who issues such bonds without gilt-edge collateral security is laying up for himself "treasures upon earth where moth and rust doth corrupt and thieves break in and steal."

### Release of Attachment.

Where the property of a defendant has been attached and the defendant desire to regain possession of his property, he will seek to do so if he disputes the claim underlying the attachment and even if he knows the claim to be valid, as he frequently does, he may still deem it to his advantage to get back his property even though he can do so only by securing his creditor in some other way. He can usually repossess himself of his property by giving a delivery bond conditioned for the production of the property in response to a judgment or by giving a bond for the discharge of the attachment, conditioned for the payment of any judgment that they have recovered against him in the pending action.

These bonds are hazardous instruments. They guarantee the payment of a sum of money if that is found to be due and from the nature of the circumstances the amount is commonly found to be due. For underwriting purposes we must assume that the amount is due. Therefore these are bonds which are only to be written upon full collateral security, for security is always in order when it is known in advance that the condition of the bond is almost certain to be fulfilled.

### Indemnity to Sheriff.

Indemnity to Sheriff Bonds may be classes among the non-hazardous Judicial Financial Guarantees as they are usually given in cases where the sheriff is required to serve a writ of execution, attachment, replevin, etc. If the sheriff seize the property as specified in the writ then there would be hardly any damage caused and any liability which might arise in the case would probably fall on the other bond which is often given in addition to the Indemnity to Sheriff Bond. Of course the Sheriff may sometime secure property which he reasonably believes to be the property he was directed to take but which afterwards proves to be someone else's property. In a situation of this kind under a bond of this character a claim might arise of a serious nature, and in underwriting the bond it must be understood that the sheriffs, under certain circumstances may leave themselves open to damage suits on the part of the persons against whom they proceed and Indemnity to Sheriff bonds vary vastly in hazard in accordance with the circumstances of the particular case and with the laws and practices of the jurisdiction.

Sometimes it is practicable for the surety company to obtain joint control of the seized property pending determination of the title but if that can't be obtained and if the principal is not known to be abundantly responsible, collateral security should be required.

### Maritime Libel.

There are a great number of different factors which may produce a cause of action either on the part of an individual or on the part of a corporation against the owners of a vessel and as the vessel itself is constantly moving from one jurisdiction to another, the laws of arrest are very wide. I have known a case of a large ship being arrested by a disgruntled sailor on a dispute over a paltry item of wages.

When a warrant of arrest is served on the master of a ship he dare not move his vessel from that port, as such action would place him in contempt of court. The more usual case, however, is where a collision occurs and each ship owner will libel the other promptly; then neither ship can leave the jurisdiction until a bond satisfactory to the court is put up that the owners will be responsible and pay for any damages awarded against them. Every day that a ship lies idle considerable loss will ensue in interest, coal consumed, wages and keep of employees and harbour dues.

It is therefore imperative that ship owners should at all times be prepared and be in accord with their bonding company with a view to having their ships promptly released in case of accident arising. Here again a great many questions enter into the underwriting of the bond. The financial standing of the owner is of vital importance. In the case of a collision, the validity of the insurance as covering the accident in question must be looked into and unless all the factors for safety are evident, such a bond cannot safely be written without full collateral security.

Never forget that Law's delay is proverbial. Contested actions drag along for months and frequently for years. It is often proved that by the time a successful litigant obtains justment, there may be nothing left with which to satisfy the judgment. Think of the strong corporations that have failed in the last few years! Call to mind the individuals who used to be called rich! try to realize that a certain percentage of rich corporations and well-to-do individuals of today will be totally eliminated as live factors within a year or two's time!—and in your underwriting make as few mistakes as possible. All underwriters make some mistakes and the successful underwriter is he who makes the fewest.

### Contract Bonds.

The Contract Bond is one of the most promising and withal one of the most dangerous kinds of underwriting in the surety business. I have asked a number of executives of large American Companies the question as to whether on the whole contract bond business has been profitable since its inception some twenty-five years ago. Generally speaking the answer is that the surviving companies have made some profit on it, but the cause of the large number of failures of surety companies throughout the United States during the last twenty-five years, has no doubt been largely due to excessive losses under Contract Bonds.

The rapid development of the business has shown conclusively the value of contract bonds to Governments, Municipalities, Corporations and individuals erecting buildings or making public improvements, and as the value of the security becomes more widely known, the number of contracts let without the security of a corporate bond will continue to rapidly decrease.

There are three parties to a contract bond—that is the owner or Obligee, the contractor or Principal and the Surety Company. the contractor enters into an agreement with the owner to do certain work for a certain price, according to certain plans and specifications. The owner agrees to make that contract with the contractor on the underwriting that a Surety Company will guarantee that practically no matter what may happen in the way of loss, still the owner will receive his building completed for the stipulated price.

Competition between contractors keeps the profits down to reasonable proportions—sometimes less than reasonable proportions and unexperienced contingencies frequently turn an expected profit into a considerable loss, and if the contractor is not financially capable of standing that loss, then the Surety has to make good under its bond.

It will be seen therefore that perfect confidence must exist between the contractor and the surety company and no surety underwriter can consider for a minute the application of any contractor who is not prepared to give the fullest possible information as to his financial worth and standing and experience in the class of work about to be attempted.

The underwriter and the public at large should understand thoroughly the difference which exists between suretyship and insurance. In the case of insurance, the underwriter, as a matter of fact, takes all the risk, while in the case of suretyship, pure and simple, the bonding company, theoretically speaking, should take no risk whatever.

When surety bonds are issued, the principal, presumed to be abundantly good for the amount of liability issued on his behalf, stands between the Bonding Company and loss, and what are called premiums upon surety bonds are really not premiums at all in the insurance sense but are only service fees. Somebody needs credit and Surety Company, if properly secured, provides this credit for a comparatively small service fee.

The successful underwriter of contract bonds is the man who, with a good understanding of human nature, can practically dissect a financial statement; has the will and means to verify the capability of the contractor, based on past performance, and can accurately foretell the contractor's ability to procure the necessary cash with which to finance his work, and who further can gauge the amount of work which the contractors' financial standing, taken in relation to his business ability and experience, would entitle him to be engaged in at any one time.

How each of these factors is weighed in connection with the whole is a matter for individual judgment. No one has yet evolved any set of rules which will govern even a small proportion of the cases; each case has got to be decided on its merits and the successful contract underwriter and the successful banker are very closely related each to the other.

### Indemnitors

In underwriting Contract Bonds there will be found what may be called "border-line cases"—that is where the principal is not altogether unworthy—where he is almost but not quite strong enough to bond. Good indemnity will sometimes make a "border-line case" a good risk but indemnity must be watched very carefully; many Indemnity Bonds have not held good in court.

Indemnity given by a material man supplying large quantities of material to the contractor should be good as such idemnitor has a real interest in the contract, but if the proposed indemnitor is a corporation, extreme care must be exercised to make sure that the indemnity is valid and a resolution passed by the board of directors, referring specifically to the given indemnity may be necessary.

Where the contractor is a small close corporation with small capital, but thought to be good for its obligations because of the high character and experience the men connected with it, it would be necessary for these men to execute indemnity agreements to the surety company in connection with any bond that their contracting company might require.

Surety Companies are sometimes asked to issue a bond upon a married woman's indemnity and the cases are rare in which an underwriter can safely accept and place any reliance on such security. Surely it would not be pleasant—even if it were legally practical—to enforce collection from such indemnitor in the event of a claim under the bond.

### Cancellation

In all the cases of bonds which we have discussed here it must be borne in mind that there are no cancellation privileges. Once the bond is written, signed and sealed, the surety is obligated to remain on until the end of the chapter, whether it be one or two years or more that is necessary to complete the contract—or in the case of Court Bonds, to complete the law suit. Therefore there are no renewal certificates issued as there are in the case of Fire Casualty Insurance business. All that is property for the Company to do at the anniversary dates is to issue a bill for the premium then due and to give a receipt when the premium is paid. It makes no difference to the obligee holding the bond whether or not he gets a so-called renewal receipt.

## COBALT ORE SHIPMENTS

The only shipment of ore from Cobalt Station for the week ended November 17th was Mining Corp. of Canada, 226,036. The total since January 1st is 17,303,176 pounds or 8,651.5 tons.

# Recent Fires

Fire losses in Canada during the week ended November 22, are estimated by the Monetary Times at $289,000, compared with $547,500 the previous week. The details are as follows:—

**Beauport, Que.** Nov. 17. Beauport asylum. Loss $15,000.

**Brantford, Ont.** Nov. 17. Outbuildings on the farm of Jas. Morwick, on the Jerseyville side road.

Nov. 18. Home of P. O. Vansickle of Trinity, near Ancaster village. Loss $15.000.

**Brockville, Ont.** Nov. 15th. Barn on the farm of Blake Mott. Loss $5,000.

**Brussels, Ont.** Nov. 19th. Grand Trunk Station.

**Campbellton, N.B.** Nov. 17th. Home of Mrs. Edward Blaikie, on Kempt Road. Cause, matches. I fatality.

**Castor, Alta.** Nov. 16th. Residence of Mr. Shipton. Cause, spark from chimney.

**Cayuga, Ont.** Nov. 15th. Garage belonging to Mrs. J. A. Murphy, north of the G.T.R. depot. Loss is covered by insurance.

**Clairmont, Alta.** Nov. 12th. Business block. Loss $35,000, mostly covered by insurance.

**Coaldale, Alta.** Nov. 12th. Residence of Mr. Bain. Loss, $2,500.

**Kronau, Sask.** Nov. 11th. Store of Fred Schneider. Loss $500.

**Lockeport, N. S.** Nov. 13th. Building occupied by Randolph Ringer and Claude Anderson. Cause, defective flue.

**London, Ont.** Nov. 17th. Beauty parlors of Miss E. Moxley, 169½ Dundas street, and adjoining buildings. Loss $30,000.

**Mimico, Ont.** Nov. 19th. Frame building formerly used as a piggery.

Nov. 19th. Home of J. Turbie, 2887 Notre Dame Street west, and adjoining dwellings.

**Nakusp, B.C.** Nov. 13th. Two business blocks on Bay street, owned by Mrs. J. E. Appleby and I. J. Edwards. Loss $7,000, partly covered by insurance.

**Ottawa, Ont.** Nov. 19th. Stables belonging to Eugene Fouhert, 42 Marier road, Eastview.

**Parkbeg, Sask.** Nov. 16th. Farm buildings belonging to S. W. Lambert, Thos. Rogers, Sigfrid and Louis Maher. Cause, prairie fire. Loss $35,000.

**Riviere a Pierre, Que.** Nov. 14th. Workshop of Jobin and Genois. Loss $25,000, covered by insurance.

**Rogersville, N.B.** Nov. 22nd. Woollen mill owned by the order of La Trappe. Loss $25,000.

**St. David's, Ont.** Nov. 20th. Barns on the farm occupied by Arthur Cook.

**St. John, N.B.** Nov. 19th. Store of Amdur's, Limited, in King Square. Loss $40,000.

**St. Joseph de Levis, Que.** Nov. 19th. Barn owned by Alzamar Letourneau. Loss $6,000, partly covered by insurance.

**Three Rivers, Que.** Nov. 15th. Premises occupied by Roch Rousseau. Loss $5,000.

**Toronto, Ont.** Nov. 20th. Building at 39 Edna Avenue, owned by Joseph Cote. Loss $1,500, covered by insurance.

Nov. 21st. Garage at the rear of 99 Bond Street, owned by Mrs. Brydges. Loss $1,500.

**Woodrow, Sask.** Nov. 15th. General store of S. F. Berman and the hardware store of S. C. Wright and Sons. Loss $40,000.

**Woodstock, N.B.** Nov. 17th. Residence of R. Perley Hartley, on Main street.

# Additional Information Concerning Fires

**Brockville, Ont.** Fire losses in the city of Brockville for the eleven months have been placed at $24,624, compared with $31,781 for the twelve months ending December 15th, 1921.

**Chartersville, N. B.** On October 26th, the residence and two barns belonging to Thos. Clark were destroyed by fire. The buildings caught fire from a neighboring barn and the loss was $4.000 with insurance of $2,000 in the North British and Mercantile Insurance Company.

## UPHOLDS CHANGE IN BENEFICIARY

### British Columbia Court Awards Insurance to Fiancee as Against Sister

(Special to The Monetary Times)

Vancouver, Nov. 17.—Deciding the insured under a life insurance policy could change the beneficiary, Judge Grant has awarded Mrs. M. A. Thompson $1,000 paid into court by the Dominion Life Assurance Co. The dispute was between Mrs. Thompson, fiancee, and Mrs. Chas. E. Kehoe, sister, respectively, of the late Austin Sheehan. Mr. Sheehan had first named Mrs. Kehoe as beneficiary hut five years later changed this to Mrs. Thompson.

The question as to whose duty it is to maintain a fire boat on Vancouver's harbour has reached the stage where a committee of the City Council is taking the matter up with the Board of Harbour Commissioners with a view to joint maintenance on account of the fact that the revenue from waterfront property is shared on a fifty-fifty basis by each of the two bodies. The question of constructiou cost has not yet been settled but progress is being made in the formation of a private company composed of waterfront property owners who propose to build the craft from the savings to be made in reduced fire insurance rates.

The British Columbia Pond of the Blue Goose staged an enjoyable entertainment in the form of a cabaret at the Citizens' Club on November 3, with an attendance of 125 people.

## SOUND POSITION OF BANK

### Profits of Bank of Montreal Total $4,756,668—Liquid Assets Equal to 64.09 Per Cent. of Liabilities

Coming at a time when Canada is reaping the benefit of a bumper crop the annual report of the Bank of Montreal for the year ended October 31 is of special interest, both to bankers here in Canada and also to bankers in other countries where somewhat unsettled conditions are prevailing.

Due to the absorption of the Merchants Bank by the Bank of Montreal a comparison of the profit and loss account is somewhat difficult, but in the case of the balance sheets the aggregation of the various items of both institutions as of October 31, 1921, compared with the showing made by the Bank of Montreal, at the end of October, 1922, affords a basis for a satisfactory comparison.

Profits for the year amounted to $4,756,668, as compared with $3,949,796 for the previous year, this being at the rate of 17.4 per cent. on paid-up capital and $806,872 in excess of the preceding year. Out of earnings a distribution of 14 per cent. was made to shareholders, $492,000 set apart for payment of Dominion Government taxation and $500,000 reserved for bank premises while the balance carried into the year at credit of profit and loss account, $1,050,000, was transferred to rest account, bringing the latter up to a parity with capital stock, $27.250,000.

In comparing the return of affairs as at October 31, regard must be had of the absorption of the Merchant's Bank by the Bank of Montreal in January last, a transaction which widened the ramifications and enlarged the operations of the latter. The obvious basis of comparison is found by aggregating the returns of the separate institutions for October 31, 1921, with the return of the Bank of Montreal at the same date this year, which covers the business of both. The more important items are these:—

| | Oct. 1921 | Oct. 1922 |
|---|---|---|
| Circulation | $45,619,000 | $41,552,000 |
| Demand deposits | 131,084,000 | 164,747,000 |
| Time deposits | 407,343,000 | 440,870,000 |
| Specie | 29,690,000 | 47,244,000 |
| Dominion notes | 69,098,000 | 77,293,000 |
| Call loans, Canada | 879,100 | 7.470,000 |
| Call loans, abroad | 100,530,000 | 127,221,000 |
| Discounts | 291,016,000 | 244,374,000 |
| Overdue debts | 1,771,000 | 1,038,000 |

After reviewing the position reported by the bank one cannot hut reflect the soundness of the country's banking position. Of perhaps greatest importance is that with its very ample assets the Bank of Montreal has been able to adequately meet the demands of industry and commerce and at the same time keep its liquid assets at a ratio of 64.09 per cent. of liabilities to the public.

## EXPERIENCES AN ACTIVE MONTH

The Manitoba Rolling Mills at Selkirk, Man., had an active month in September. The daily production of iron and steel for the last month was 45 tons of new steel and 25 tons of iron. The average record for the previous months of the year was about 1,200 tons of steel, for all of which the company finds a market in the western provinces. The record for 1920 was 17,000 tons of steel and iron, all made from scrap gathered in the western part of the country. The steel for the new paper mills at Kenora. Dryden and Fort Frances was all snpplied by this mill and worked into form by the Manitoba Bridge and Iron Works. Other customers are found in the railways, the building construction contractors and enginers, the carriage and implement makers. In all some 1,600 tons of reinforcing steel were provided by the Manitoba Rolling Mills Co. for the Great Falls hydro power plant now under construction for the Manitoba Power Company, which will when completed have a capacity for generating 168,000 horse-power.

# Wholesale Prices Again Decline

### October Index Number is Lower by .7 Points from Previous Month — Fuel Shows Decline of Twenty-three Points—Several Slight Increases—Comparison for Several Years Past

A further decline in the index number of commodities, as compiled by the Department of Labor, is recorded during the month of October in comparison with previous months. The decline during October was only slight being down by .7 points, thus making the index number stand at 219.8 as compared with 220.5 during the previous month.

The largest decline during October was that of fuel, which has declined by twenty-three points from September, although it is still considerably higher than that prevailing last year. Several other items show a slight decrease including grains and fodders; animals and meats; miscellaneous groceries; hides and leathers; house furnishings; drugs and chemicals; and miscellaneous column.

There were several increases during the month, although on the average the increases were only for several points. The increases are as follows: dairy products; other foods; textiles; metals and implements; and building materials.

Details of the October statement with comparisons are given herewith:—

INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES

For October 1922, Sept. 1922, Oct. 1921, 1920, 1919, 1918, 1917, 1916, 1915, 1914, 1913.

(Average prices 1890-1899 = 100)

## GRANITE INDUSTRY GROWS

According to information from the Greater Winnipeg Water District Commission, rapid development of Manitoba's granite producing industry is forecasted by demands for the products in eastern Canada this fall.

J. H. Brooke, managing director of the Brookville quarries on the G.W.W.D. railway line, returned to Winnipeg recently from eastern Canada and reported orders had been placed for delivery of 50 carloads of granite taken from the district. Both red and grey granite has been taken out during operation of the quarries within the last two years, and it is expected the industry will develop rapidly since a market has been found in the east, officials of the district said.

## GAULTS LIMITED REORGANIZATION

Announcement has just been made of a very important change in the business of Gaults, Limited, Winnipeg, one of the oldest, most widely known, and most successful dry goods houses in Canada. For some time past it has been known that the families of the founders of the house were anxious to withdraw from active participation in the business and that negotiations were under way leading to the transfer of the business to those members of the staff who have been largely instrumental in establishing the extensive connection and splendid name which Gaults, Limited, have enjoyed for many years past. These negotiations have now been completed and just recently former employees, some of who have been with the house since the doors were first opened for business will assume the management and ownership of the concern operating under the old firm's name.

The directors chosen for the new company are as follows:—Honorary-President Daniel Kennedy; president and managing-director Louis Kennedy; vice-president E. M. Kennedy; director and secretary-treasurer John D. Brown; director W. S. Campbell; director and credit manager Theodore E. Howland. The new directors are composed entirely of Western business men and every one of them have been in the service of the former company for twenty-two years or more with the exception of E. M. Kennedy and W. S. Campbell, the two latter having been prominent and well-known business men of Edmonton. Furthermore, the shareholders of the new company are all members of the staff who have held positions of trust in various departments for a number of years; the business of Gaults, Limited, was started in Montreal by the late A. F. Gault, sixty-six years ago. The head office of the new company will be in Winnipeg at the premises heretofore occupied and a complete remodelling of the building is now taking place.

## MOVE INTO NEW OFFICES

Messrs. Waghorn, Gwynn & Company, Limited, of Vancouver, have recently moved into new and larger premises at 517 Granville Street, that city. Curiously enough the original firm of Waghorn & Gwynn started business in 1905 in the same office building on Granville Street as that to which the office of the since incorporated company is now returning, only to larger and more commodious premises. In 1905 the firm occupied a small ground floor offiice of twenty feet frontage. The new office has a floor space of 45' x 130' while the original staff of four, now numbers twenty-seven. The company's business is carefully departmentalized under loans, insurance, bonds, stocks, grain, cotton, real estate and rental business, all of which are under the care of erperienced managers.

## NEW FINANCIAL FIRM

Eric A. Miller, formerly associated with W. J. Christies and Company, and latterly with Stevenson, Fielde & Crabb, has commenced business in Winnipeg on his own behalf under the firm name of Eric A. Miller & Company. He will conduct a general real estate, loan, rental and insurance business.

# *Municipal Finance*

**Hamilton, Ont.**—For the period ending October 31 the works department had spent $503,495 out of an appropriation of $601,132 for the year.

**Brockville, Ont.**—At a meeting of the council on November 8, a communication from the Public Utilities Commission advised that new rates had been struck for street lighting effective from November 1, 1922, as follows: One-light standards, $25; three-light standards,$35; five-light standards, $45; series street lamps, $19 per 100 watt lamps. A statement attached showed that the annual net operating deficit on street lighting amounted to $3,879.

**McLeod, Alta.**—Debenture holders have been invited to forward to the secretary-treasurer a full statement of the town's indebtedness to them on account of arrears of interest. Some months ago an agreement was entered between the town and its creditors by which the municipality was allowed to fund over a period of ten years its unpaid coupons and bank overdrafts, bonds to be issued to creditors equivalent to the sums in arrears on which interest was payable at 6 per cent. In consideration of this easement of the town's financial difficulties the corporation agreed to make every effort to provide sufficient funds not only to carry on the expense of administration, but to fully meet these interest charges. According to the notice now going out to debenture holders, refunding debentures are being prepared and the exchange will be speedily made.

**Ottawa, Ont.**—Difficulties with which the Ottawa Housing Commission has been contending for many months were brought to a head when City Clerk Lott received a communication from J. A. Ellis, Director of the Housing Branch of the Provincial Bureau of Municipal Affairs, calling the city to account for large arrears in payments to the province for money advanced for the Lindenlea Housing Scheme. In his communication, Mr. Ellis points out that Ottawa owes over $25,000 to the Ontario authorities and declares that the situation is not creditable to the capital.

**New Westminster, B.C.**—Total tax collections for the period ended October 31 were $485,016, which represents 87½ per cent. of the total levy. This amount compares with $418,283 for tax collections up to the end of December last year.

**Sombra Township, Ont.**—The tax rate for this year has been struck at 35 mills on the dollar, appropiated as follows: County rate, 9 mills; township rate, 6 mills; general school rate, 5½ mills; general drainage rate, 4½ mills; police village rate, 10 mills. The new rate is 3½ mills higher than for the previous year.

**York Township, Ont.**—As the result of disclosures some time ago that the funds of the treasurer's department were short several thousand dollars representing money paid in for taxes but not shown on the books, the council on November 2 passed a resolution calling upon Judge Denton of York to undertake a full inquiry.

J. H. Spence, K.C., solicitor for the township, who has been in consultation several weeks with Crown Attorney McRuer, of York county, stated that it had not been possible to determine as yet who was responsible for the shortages, as any one of a number of employees might be involved.

Judge Denton will be empowered to call witnesses and to probe the system in vogue in the treasury department within the past two years.

**Quebec, Que.**—For the period ending November 7 total tax collections amounted to $795,850.

**Brockville, Ont.**—The total assessment for 1922 now stands at $7,647,225 as compared with $7,221,130 for the previous year. The new assessment shows an increase of $35,575 in land assessment; an increase of $398,450 on improvements; an increase of $14,475 on business assessment and a decrease of $22,375 on income assessment. The population of the town has increased by three from the previous year.

**Shawinigan Falls, Que.**—By a majority of 80 votes the property owners voted to pay the mayor $600 per year and each alderman $250 a year. The by-law dates back to July 1, 1922.

**Stratford, Ont.**—The report of T. M. Ruston, city assessor, as prepared for the city council, shows that the population has increased by 633, or from 17,611 to 18,244.

The total assessment of the city made this year, on which the taxation for 1923 will be based, totals $15,040,700. The total assessment made in 1921 for 1922 taxation was $14,626,170, which gives an increase for 1923 assessment of $414,530. This increase is made up as follows: Land, $24,875; building, $389,655.

The division of the assessment for 1923 in detail is as follows: Public school supporters, $12,381,827; separate school supporters, $1,197,780; total taxable real property, $13,579,607; young men's income, Protestant, $103,210; separate, $15,635; total, $13,698,451.

The list of tax exempt properties is divided as follows: Churches, $414,050; charitable institutions, $30,000; educational, $619,350; other institutions, $68,600; Stratford corporation, $1,175,450; Dominion Government buildings, $215,800; County of Perth, $124,000. This makes a total of $6,648,250 of property exempt from taxation. Under the head of property exempt, except schools, the amount is $49,200, and the taxable total for all purposes is $13,649,252. This makes the total assessment, taxable and exempt, come to $16,346,702.

**Montreal, Que.**—According to a report submitted to the executive committee on November 17, by J. Pelletier, city comptroller, the city estimates a revenue of $24,641,421, with which to carry on its municipal administration during 1923.

The detail of the estimated receipts is as follows:—

| | | |
|---|---|---|
| **Current Year's Rolls (1922):** | | |
| Real Estate Tax | $16,678,156 | |
| Add in 1923: Special Tax re City Hall Special Loan By-Law 784 | 87,417 | 16,765,573 |
| Water Rates | | 2,334,276 |
| Business Tax | | 1,858,815 |
| | | $20,958,664 |
| **All Other Revenues:** | | |
| Receipts to October 31, 1922 | $2,715,435 | |
| Nov. and Dec. (1921) | 540,333 | |
| Montreal Tramways, 1923 | 500.000 | |
| | 3,755,768 | |
| Less Bachelors' Tax (to be abolished) | 73.011 | 3,682,757 |
| | | $24,641,421 |

The item of $87,417 under the heading of Special Tax re City Hall, represents the revenue from a sepcial tax imposed in virtue of Article 784 of the Charter which provides for a loan of $1,500,000 to rebuild the City Hall and furnish it. This tax will provide for interest and sinking fund.

From the estimated revenue $7,000,000 is to be allotted to the schools' administration.

**Hamilton, Ont.**—Business on the street railway showed a slight improvement during the quarter ending September 30, according to the statement of receipts which was forwarded to the city treasurer together with the city's percentage on November 14.

The city's share of the company's earnings amounts to $19,679 for the three months as compared with $18,027 for the same period during 1921. The five-cent fare was in force during 1922, however, while in 1921 the company was charging its old rate of 6 and 8 tickets for a

## CONSIDERABLE DECLINE IN PERMITS

### September Total is Six Millions Lower Than August But is Higher than September Last Year

Building permits issued during September showed a considerable decline as compared with August, although it was again somewhat higher than in the corresponding month of last year. The 56 cities making returns authorized building to the value of $10,573,163 during the month under review, while in August the total had stood at $16,970,125. There was, therefore, a decline of $6,396,962 or 37.7 per cent. On the other hand the volume of building contemplated was 6.6 per cent. higher than in September, 1921, when the value of the permits issued had aggregated $9,919,598.

Nova Scotia and Manitoba reported increases in the building permits issued during September as compared with August, that of $256,616 or practically 239 per cent. in the former province being the larger. Of the contractions recorded in the other provinces, that of $5,193,373 or 85.3 per cent. in British Columbia was the most pronounced.

In comparison with the returns for 1921, Ontario, Saskatchewan and Alberta registered less anticipated building activity. The reductions, however, were small, the largest occurring in Alberta, where the volume of building authorized declined by $47,321 or practically 12 per cent. The increases in the other provinces were on a somewhat larger scale, those of $450,901 or 13.5 per cent. in Manitoba and of $104.033 or 99 per cent. in New Brunswick being the most decided.

Of the four largest cities, Montreal and Winnipeg reported increases in the value of the building authorized as compared with both August, 1922, and September, 1921. In Toronto and Vancouver there were declines in the former and increases in the latter comparison.

Of the smaller centres, Halifax, Sydney, Moncton, Brantford, London, Ottawa, St. Boniface and Calgary reported increased activity as compared with the preceding month and also with September, 1921.

The following is a comparison of the value of building permits issued during September, 1922, August, 1922, and September, 1921:—

**Estimated Cost of Building Work as Indicated by Building Permits**

| City | 1922 August. | 1922 Sept. | 1922 Sept. |
|---|---|---|---|
| **P. E. Is.** | 3,800 | 4,000 | Nil |

## COAL OUTPUT LOWER.

### Summer Strike in Alberta Responsible For Decrease.

Alberta's coal output for this year is now estimated at slightly over 5,500,000 tons, a drop of nearly a half-million tons from last year's figures. For this decrease the summer's strike in the bulk of the Alberta mines is mainly responsible. To the end of August there had been mined 2,649,915 tons, with four good months still remaining in which to make up a normal output.

Practically all the mines are working now, it is reported by the provincial department of mines, and production is speeding up. The facilities for mining in the several fields are about on a pre-strike basis, though in some cases the operators carried out more or less extensive improvements in their plants during the period of idleness.

Shipments are being made to the prairie markets in fairly satisfactory volume now, and some coal is also going to the coast. The storage scheme at Prince Rupert is still in abeyance, however, it not having been found possible to get it in operation this year.

## TIMBER LIMITS SOLD

On November 1 the Ontario Government sold several timber limits which totalled 187 square miles in area. The lands, which comprise five separate berths, are situated principally in the Thunder Bay and adjacent North-West districts and for which the Province has received the sum of $78,600.

## NEW PULP MILL

Arrangements are being made by Howland and Waltz Co., Ltd., a Minneapolis concern interested in British Columbia timber development, to establish a pulp and paper mill in their big limits at Kaslo, B. C.,

The company now has a lumber mill there, and the pulp and paper mill will be in connection. The company controls a large body of standing timber, and there is plenty of water power available for hydro-electric power to run the new plant. The mill will be on two trunk railroads, and easy of access to market.

It is thought likely work will start next spring.

## WORKING FULL TIME

The British Empire Steel Corporation is again operating profitably and is affording practically full time employment to over 23,000 employes, according to R. M. Wolvin, president, who has returned to Montreal from a visit to the company's properties in Nova Scotia. Industrial differences have been settled and labor is more efficient, he said.

The No. 8 blast furnace at Sydney has been rebuilt since it was last operated and has recently been "blown in." This furnace shows increased output due to rebuilding. A larger output is also obtained from the No. 1 blast furnace. No. 1 open hearth furnace produced in October the largest output of any month since first commencing operations.

The company is loading the large cargo of steel products this season to reach the head of the lakes before the close of navigation. The unfilled orders on the company's books are much greater than at the corresponding date of last year.

# Government and Municipal Bonds

A slightly better tone was prevalent on the bond market during the past week, although the price trend was again somewhat irregular, but on the whole there was a noticeable improvement in the Victory Loan issues, which are the guiding star of the market. Whether this upward movement will continue during the next few months at least, is a matter of doubt, although the general opinion among the bond dealers is that by the turn of the next month, the bond market will resume its former activity.

The only feature of the otherwise dull week has been the almost constant rejection of bids by various municipalities who were not satisfied by the prices tendered. When one compares the prices prevailing several months ago it is not surprising that the tenders have been rejected. for in the majority of the issues the prices tendered for a 5½ per cent., bond have been several points below par, thus increasing the cost to the municipality, in comparison with former sales.

### New York Market

As is generally known the trend of the Canadian market is in conjunction with that of New York and therefore a review of the New York Market, in so far as they affect the market for Canadian Bonds, will be of interest.

Up to about the time the Turks in the Near East intruded themselves upon the comparative peace and quietness of the world, the bond market was showing great activity and Canadian bonds were commanding a better price there and a readier market than could be found in Canada. Rumors of war were quite sufficient for a few weeks to upset financial conditions sufficiently to make it inadvisable to sell bonds and since that time there has been very little betterment in the market.

A prominent Chicago banker who was recently in Winnipeg explained to some extent the cause of the tightness of the United States market. When Treasurer Mellon announced a half-billion dollar government issue the majority of underwriting houses believed conditions that had prevailed on former occasions would again prevail. This is that if the issue were for half a billion it would be heavily over-subscribed, with the result that an application for a block of stock would probably be rewarded by an allotment of about half the amount asked for. And to take care of this the large companies got into the habit of asking for about twice as much as they wanted. However. when all applications had been received for Treasurer Mellon's last loan they totalled up to $763,385,000 and the treasurer simply increased the size of the loan to take care of the applications, instead of cutting down the applications to fit the loan. Many large bond dealers therefore found themselves in the position of having to take a greater portion of this loan than they intended and to pay for it they have found it necessary to throw other securities on the market.

Until the security market has absorbed these offerings it is not expected that bond sales will be either very brisk or prices very good.

### Tenders Invited.

The following is a list of debentures offered for sale, particulars of which are given in tbis or previous issues:—

| Borrower | Amount | Tenders close |
|---|---|---|
| Longueuil, Que. ...... | $100,000 | Dec. 4 |
| Scarborough Twp. Ont. | 80,995 | Dec 11 |
| Stamford Twp, Ont. .. | 60,000 | Dec. 4 |
| Colborne, Ont. ...... | 40,000 | Nov. 27 |
| Barton Twp. Ont. .... | 25,870 | Dec. 4 |
| Innisfil Twp. Ont. .... | 18,000 | Nov. 25 |
| Ste. Flore E. Que. .... | 15,000 | Dec. 4 |

**Scarborough Township, Ont.**—Tenders are invited up to 11 a.m. December 11, 1922 for the purchase of $80,995, 6 and 6½ per cent., various maturity debentures. J. T. Stewart, treasurer, Birch Cliff, Ont. See official advertisement in this issue.

**Longueuil, Que.**—Tenders are invited up to 5 p.m. December 4, 1922 for the purchase of $100,000, 5½ per cent., bonds due serially from 1933 to 1959. Bonds are in denominations of $100, $500 and $1,000, and are payable at Toronto, Quebec, Montreal or Longueuil. J. R. Bournet, secretary-treasurer.

**Innisfil Township, Ont.**—Tenders will be received up to noon, November 25, for the purchase of $18,000, 5 per cent., 20-year debentures, guaranteed by the County of Simcoe. R. M. McConkey, township clerk, Stroud, Ont.

**Stamford Township, Ont.**—Tenders are invited up to noon December 4, 1922, for the purchase of $60,000, 5½ per cent., 20-instalment high school debentures. T. R. Stokes, township clerk, Niagara Falls. See official advertisement in tbis issue.

### Coming Issues.

**Etobicoke Tp., Ont.**—Ratepayers will vote on question of building a bridge across the Mimico Creek at Queen Street at next election. Cost, $40,000.

**Walkerville, Ont.**—All tenders, which were called up to November 17, for the $127,000, 5½ per cent., 30-instalment debeutures have been rejected. At the high bid of 95.398 the cost to the town would have been approximately 5.82 per cent. The following is a list of tenders: Wood, Gundy & Co., 95.398; Gairdner Clarke & Co., 95.07; C. H. Burgess & Co., 94.11; Aemilius Jarvis & Co., 94.10; A. E. Ames & Co., 93.539; Canada Bond Corp., 93.40; Macneill Graham & Co., 93.37; Dyment, Anderson & Co., 93.27; and Dominion Securities Corp., 93.27.

**Galt, Ont.**—At a meeting of the council on November 20, they gave the $360,000 school debenture by-law its final reading.

**Regina Sask.**—The by-law to authorize the raising of $150,000 for the construction of a collegiate institute building will not be submitted to the ratepayers at the elections next month. This is due to the fact that the Local Government Board would not consent to the project until such time as the plans are ready.

**Brantford, Ont.**—City council authorized the city engineer to prepare plans and specifications for proposed new Lorne bridge, to be constructed of reinforced concrete. A by-law in this connection calling for $124,000 in addition to the $211,000 already approved by the ratepayers will be submitted next January.

**Stamford Township, Ont.**—The council gave two readings and passed on to ratepayers for approval by-law to provide $40,000 for purchase of rock, rock crusher and road construction.

**Kenora, Ont.**—F. J. Hooper, town treasurer, informs "The Monetary Times that all tenders, which were called up to November 13 for the $30,000, 6½ per cent., 30-year school debentures, and $11,217, 6½ per cent., 31-years consolidated debt debentures, have all been rejected owing to the price tendered not being considered satisfactory.

**British Columbia.**—The following certificates have been issued by the Municipal Department upon the following dates:

August 31: City of Enderby, $23,000. 6 per cent., 15-year debentures for electric light system.

September 12: City of Cranbrook, $10,000, 6½ per cent., 20-year debentures for public parks.

October 2: City of Vernon, $37,000, 6 per cent., 15-year debentures for electric light extensions.

October 31: City of Victoria. $1,000,000, 5½ per cent., 20-year debentures under "Extension Securities By-law."

November 3: District of Coldstream, $3,000, 6 per cent., 10-year debentures for school purposes.

**Brantford, Ont.**—Board of education will request the city council to submit two by-laws to ratepayers at January elections, one providing $45,000 for erection of a four roomed school in West Brantford, and the other for $81,000 for an addition to the Collegiate Institute.

**Galt, Ont.**—A by-law providing for the raising of $140,000 to pay for extensions to the public utilities, and one for $10,000 to enlarge the agricultural hall, will be submitted to the ratepayers in January.

**London, Ont.**—On November 29, the ratepayers will be asked to vote on a by-law for the issuing of $300,000 debentures for the construction of a nurses home.

**Preston, Ont.**—The parks board has recommended to the town council that three by-laws totalling $15,000 be submitted to the ratepayers at the municipal elections.

**Galt, Ont.**—At the municipal elections on January 1 the ratepayers will vote on a by-law authorizing the issuing of $125,000 debentures for hydro-electric power purposes.

**Prescott, Ont.**—All tenders, which were called up to November 20 for the $30,000, 5½ per cent., 20-year school debentures, have been rejected. This is the third time in a little over a month that the town has rejected all tenders. At the high bid of 98.07 the cost to the town would have been approximately 5.66 per cent. Tenders were as follows: T. S. G. Peppler & Co., 98.07, Gairdner, Clarke & Co., 96.69; Canada Bond Corp., 96.60; Dyment, Anderson & Co., 96.38; C. H. Burgess & Co., 95.72; and Dominion Securities Corp., 95.02.

**Quebec, Que.**—At a meeting of the Public Bills Committee on November 14 the bill of the Quebec Catholic School Commission, providing for new borrowing powers, totalling $1,300,000 to be used for the construction of new schools, was passed without amendment.

**Hamilton, Ont.**—At a meeting of the property and license committee on November 16 it was decided to recommend to the board of control the passing of a by-law for the purpose of raising $390,000 by debentures for the erection of a new office building.

**Ford City, Ont.**—At a meeting of the council on November 14 a by-law authorizing the borrowing of $5,000 for fire and police signal systems was passed.

**Port Colborne, Ont.** — The Port Colborne Hydro-electric commission has requested the council to pass a by-law authorizing the raising of $14,000 for improvements to the local electric service.

**Caledon Township, Ont.**—All tenders for the the $57,000, 5½ per cent., 15 and 25-instalment debentures have been rejected and the council has decided to offer the bonds locally. The high bid of 97.59 was submitted by Harris, Forbes & Co., and represents a cost basis of approximately 5.80 per cent. The following is a list of tenders: Harris, Forbes & Co., 97.59; R. C. Matthews & Co., 97.44; A. E. Ames & Co., 97.43; Dyment, Anderson & Co., 97.318; C. H. Burgess & Co., 97.11; Wood, Gundy & Co., 96.79; W. L. McKinnon & Co., 96.587, and Dominion Securities Corp., 95.22.

### Bond Sales

**Weston, Ont.**—Dyment, Anderson & Co., have purchased $30,000, 6 per cent., 30-instalment debentures at a price of 101.13, the money costing the town approximately 5.90 per cent. Tenders were as follows: Dyment, Anderson & Co., 101.13; C. H. Burgess and Co., 101.03; McLeod, Young, Weir and Co., 100.29; Wood, Gundy and Co., 99.39; Canada Bond Corp., 98.27; and Gairdner, Clarke and Co., 97.97.

**Minnedosa, Man.**—Tubby, Smith & Co., have purchased an issue of $6,000, 6½ per cent., 10-year debentures, the funds to be used for extension of the fire fighting services of the town.

**Halton County, Ont.**—In connection with the sale of $46,000, 5½ per cent., 20-annual instalment debentures reported in these columns last week, the successful purchaser was Stewart, Scully Co., and not another financial firm as reported.

**Saanich, B.C.**—An issue of $40,000 cemetery board debentures has been sold locally.

**Windsor, Ont.**—McLeod, Young, Weir & Co., have purchased $239,403, 5½ per cent., various maturity debentures at a price of 96.60. Tenders were as follows: McLeod, Young, Weir & Co., 96.60; Wood, Gundy & Co., 95.85; Gairdner, Clarke & Co., 95.77; Macneill, Graham & Co., 95.57; C. H. Burgess & Co., 95.24; Dominion Securities Corp., 95.52; and A. E. Ames & Co., 95.439.

**St. Thomas, Ont.**—The City has disposed of $20,000, 5½ per cent., debentures locally.

**West Kildonan, Man.**—A. E. Ames & Co., have purchased $11,060, 6 per cent., various maturity debentures at a price of 97.37, the money costing the municipality approximately 6.42 per cent.

**Colchester S. Twp. Ont.**—Gairdner, Clarke & Co., have purchased $57,268, 6 per cent., 15-instalment debentures at a price of 100.33, the money costing the township approximately 5.95 per cent.

## GOVERNMENT ARRANGES FOR BOND PAYMENTS

### Holders of 1922 Victories May Cash in At Any Bank

Announcement was made on November 20 that holders of 1922 Victory bonds, due December 1, can have their bonds paid off in cash at any branch of any chartered bank in Canada. As the total amount of the bond issue maturing on December 1, is $178,000,000 and conversions totalled over $100,000,000, cash payments for bonds will be in the neighborhood of $78,000,000.

The statement from the Department of Finance follows:

"Under their terms, the principal of these bonds is payable only at the Department of Finance, Ottawa, and at the offices of the Assistant Receivers-General at Charlottetown, Halifax, St. John, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

#### Convenience

"But, in addition, and for the greater convenience of the public, the Minister of Finance has entered into special arrangements with the chartered banks for the payment of the bonds through their branches, without expense to holders.

"In order that holders may receive cash promptly at date of maturity, it will be necessary, when dealing through a bank, to deliver the bonds for examination and listing at least four days prior to December 1. Correspondingly, if bonds are presented to a bank on or after December 1, holders must be prepared to grant a few days for examination and verification before payment is effected. The banks have received full instructions as to the form of endorsement required from holders of registered bonds.

#### Must Surrender Bonds

"Officials of the Department state that it appears, from inquiries received, that some bondholders have the impression that the principal of the bonds will be sent out by cheque, automatically, as the interest is in the case of registered bonds. It is pointed out that payment of the principal can be effected only on surrender of the bonds themselves.

"Attention is also directed to the fact that the bonds cease to bear interest on the maturity date. If held thereafter, claims for further interest cannot be entertained."

---

Arrange Now
for Reinvestment

Many investors with Victory Bond interest or principal payable on December 1st are now arranging for reinvestment of their funds.

By doing this, they obtain a wide selection to choose from, as well as very satisfactory interest returns.

# Stock Markets

While there was considerable buoyancy on the Canadian security markets during the first part of the week under review, there developed a slightly weaker tone towards the latter part of the week and an area of dullness set in. From the course of events at the first of the week, the stock market, to all appearances was set for a renewal of its former activity, but from the market trend at the latter part of the week it would appear as though the market was waiting for some evidence of stability and constructive activity on Wall Street.

There were several interesting events during the week. These being two new large stock issues. The Bell Telephone Company announced a new stock issue of over six million to present shareholders in order to supply sufficient new capital for various extensions. When this new stock issue was announced there was a sharp decline in the price but towards the latter part of the week there was a slight recovery and it is anticipated that by the end of next week the stock will have reached its former position.

Another new stock issue during the week was that of Dominion Textile Company for two and a half million payable to shareholders of record November 21. The price of this security also declined with the announcement of the stock issue but there was a decided recovery at the latter part of the week.

There was considerable activity in the traction issues with Brazilian taking the lead, and Toronto Railway, Twin City, Canadian Pacific, etc., coming a close second. Paper issues showed a slightly better tone although there was not very much activity in this group. Several other groups were fairly active and, on the whole, the price trend was upward.

The question as to when the market will regain its former activity seems to be partially cleared up, for with the announcement that the Minister of Finance will pay in cash on December 1 all the outstanding 1922 Victory bonds, amounting to approximately seventy-eight million, there is no doubt that at least a portion of this money will find its way into the stock market, and a bull market is looked for.

### New Stock Offering

The board of directors of the Bell Telephone Company of Canada have decided to make a new issue of common stock to the amount of $6,408,000, which will enable them to offer the shareholders an opportunity to subscribe for shares at par in the proportion of one new for five old shares.

These will be sold to shareholders of record of November 30 and the subscription books close December 30; payments may be made in whole or in instalments.

At the annual meeting in February last the directors were authorized to issue $20,000,000 new capital stock when needed. During the summer a syndicate placed $5,000,000 on the market. The forthcoming issue will make a total of over $11,000,000 new capital issued this year, and will bring the total issued up to $38,448,000.

All stock not taken by subscriptions filed on or before the date on which the privilege to subscribe expires will be disposed of as the directors shall determine.

Payments may be made as follows: (a) Payment in full ($100 per share) on the second day of January, 1923. In such case the stock will rank for dividend 1st of January, 1923, and certificates will be delivered as soon thereafter as they can be prepared, or (b) payment in four instalments of $25 per share. In this case the stock will rank for dividend 1st of October, 1923, and certificates will be delivered as soon thereafter as they can be prepared.

### Dominion Textile Stock

Announcement is made that the board of directors of the Dominion Textile Company have decided to increase common capital stock from $5,000,000 to $7,500,000 by the issue of 25,000 shares at par, to shareholders of record November 21, one new share for two old.

Subscribers may pay in full on or before December 26, 1922, for the shares allotted to them, and shares so paid will rank for dividends from December 16, 1922. Subscribers who wish to pay by instalments may pay in full on any instalment date and receive interest on their payments at the rate of 6 per cent. per annum until the 15th March, 1923, after which date such shares will be entitled to regular dividends.

"Certificates of rights" will be sent to shareholders as soon as possible, with a form of subscription printed on the back thereof, which must be signed by the subscriber, duly witnessed, dated and deposited with the Royal Trust Company, Montreal, before noon, on the 26th day of December, 1922, on which date the right to subscribe will expire.

The directors have decided to call a special general meeting of the shareholders, to be held at the office of the company on December 6, for the purpose of considering, and, if deemed advisable passing a resolution extending the corporate powers of the company and authorizing the application for supplementary letters patent in confirmation thereof.

### Ratify By-Law

At the annual meeting on November 21 the shareholders of the Davidson Consolidated Gold Mines, Limited, ratified a by-law providing for the distribution of 400,000 preferred and 1,000,000 ordinary shares of the capital stock of Porcupine Davidson Gold Mines, Limited, owned by the former company, as well as one sanctioning the sale of 268,105 preferred and 638,411 ordinary shares of the same company.

### Mining Stock

An issue of 500,000 shares of Beaumont Gold Mines, Ltd., is being offered by L. G. Harris & Co., of Toronto, and First National Fiscal Corp., of New York at $1.50 per share, subject to allotment.

The Beaumont Mines was formerly the North Davidson Gold Mines, and the present capitalization is an authorized issue of 3,000,000 shares, par value $1, of which 1,600,000 have been issued.

The properties owned by the company consist of two 40 acres claims in the township of Tisdale, in the Porcupine mining district, and are about four miles from the Hollinger mines.

The stock is listed on the London Stock Exchange, and application will be made to list the stock on the New York Curb and also on the Standard Stock Exchange of Toronto.

### Bonds Called in

The Toronto Railway Co. has advised holders of the company's 4½ per cent. bonds, due August 31, 1921, that these bonds will be paid in full upon presentation and surrender to the company's bankers, together with accrued interest at 6 per cent. per annum from the last date upon which interest was paid to the date of payment. If not presented for payment on or before February 28 next, interest will cease.

# Unlisted Securities

In their report on the unlisted market, A. J. Pattison Jr. & Co. say that during the early part of the week, sentiment was decidedly bearish, in sympathy with trend of prices on the listed stocks. Declines were, however, very few, and while the buying power was exceedingly limited, it was of sufficient volume to take care of the offering. At the close prices showed every indication of stiffening, and the demand was the greatest of any time during the week. A temporary set-back was quite in order at this period, as the market has been moving up steadily for many weeks, and is now in a more healthy condition to continue the upward move than before the set-back. It is worthy of note that the Home and Sterling Bank more than held their own, recording slight advances, while other issues were weak. Durant motors widened in a market lacking interest. At the close the quotation was 9-10¼. Canadian Oil Common was offered in small lots at 55, with the best bid at 50. King Edward 7's eased slightly to 83-84¾. For some reason the insurance stocks seem to be sharing in the demand which has developed for bank shares and those of other financial institutions. Manufacturers Life is generally quoted at 46 bid, no stock offered—Sovereign Life 17½ bid and Continental Life 20 bid. Famous Players continues in demand at 55, with no offerings around this figure. Western Grocers, on small-lot transactions, widened to 57½-62, after selling around 61. In most cases, the oil stocks recorded losses for the week. Spanish River 8's gained half a point to 103½ bid, with no offerings obtainable up to the close. Whalen preferred was offered down two points to 22, without finding buyers. The Debentures remain unchanged at 63½-65½.

### SECURITY PRICES

The following table, compiled by Professor H. Michell, of McMaster University, Toronto, shows the average market prices ruling at the middle of November of 20 bonds and 43 stocks, arranged according to the usual investment classification and fields of industry. In the 2nd and 3rd columns of the table are shown the percentage increases or decreases on November 15 as compared with October 15 of this year, and with the same month of the previous year, 1921. By this method both short and long fluctuations can be noted. Since the last publication of this index the number of industrial stocks has been increased from 18 to 20, and two new stocks substituted for others that were unsatisfactory with regard to obtaining accurate quotations. The effect of these changes has been to raise the average of the industrial stock index considerably from the previous figure.

Average bond and stock prices:

| | Average Nov. 15, 22 | P.C. + or — as compared with Oct. 15, 22 | Nov. 15, 21. |
|---|---|---|---|
| **Bonds** | | | |
| 6 Victorys | 101.3 | —0.2 | +3.1 |
| 9 Industrials | 96.5 | +1.3 | +8.3 |
| 5 Public util. | 89.9 | +1.1 | +10.8 |
| **Stocks** | | | |
| 20 Industrials | 90.3 | —0.1 | +15.2 |
| 9 public util | 93.5 | —1.7 | +11.0 |
| 6 Pulp and pap. | 70.1 | —4.8 | +20.1 |
| 8 Banks | 185.2 | —0.4 | —1.1 |

### SEEK FINANCIAL POWERS

A charter for Alloway and Champion, Ltd., with the usual powers given to loan and financial companies, will be sought at the next session of the Saskatchewan legislature, according to notice given in Regina.

### EXCHANGE ON RAILWAY RATES

The Railway Commission has issued the following: In accordance with the judgment and order of the board, dated January 14, 1921, the rate of exchange in connection with shipments of freight between points in Canada and the United States from November 15 to November 30 inclusive, will be 3-32 of one per cent. There will be no surcharge assessed on international business, freight or passenger.

### SILVER EXPORTS

Canadian exports of silver bullion in October totalled 1,319,986 ounces, valued at $909,209; of silver contained in ore, concentrates, etc., 915,193 ounces, valued at $601,858.

# IMPERIAL BANK

## OF CANADA

## FORTY-EIGHTH ANNUAL MEETING OF SHAREHOLDERS

The Annual General Meeting of the Imperial Bank of Canada was held at the Head Office in Toronto on Wednesday, 22nd of November, 1922.

The Directors' Report and Statement of Affairs of the Bank for the six months ending 31st of October, 1922, were presented as follows:—

### THE REPORT

The Directors have pleasure in presenting to the Shareholders the Forty-Eighth Annual Report and Balance Sheet of the Affairs of the Bank as on the 31st October, 1922, together with Statement of Profit and Loss Account, showing the result of the operations for the six months ending on that date.

| | |
|---|---|
| The balance at credit of Profit and Loss Account, brought forward was | $1,175,178.24 |
| The net profits for the period, after deducting charges of management, Auditors' Fees and interest due depositors, and after making provision for bad and doubtful debts and for rebate on bills under discount, were | 638.003.09 |
| Making a total at credit of Profit and Loss Account of | $1,813,181.33 |
| This amount has been appropriated as follows: | |
| Dividends at the rate of 12% per annum | 420,000.00 |
| Bonus of one half of 1% | 35,000.00 |
| Contribution to Officer Pension and Guarantee Funds | 21,250.00 |
| Dominion Government Taxes paid and estimated | 80,000.00 |
| Reserved for Contingencies | 250,000.00 |
| Balance of Account carried forward | 1.006.931.33 |
| | $1,813,181.33 |

Since the date of the last Report a branch bank has been opened at Bay street, Toronto. The following branches and sub-branches have been closed: Monteith, Porquis Junction, Ross and Wellington streets, St. Thomas, and Virgil, all in the Province of Ontario; Benalto in the Province of Alberta; Poplar Point, in the Province of Manitoba.

In accordance with the By-law passed at the last Annual Meeting, the Bank's financial year has been changed to terminate as on 31st October. It has not therefore been practicable to inspect all the branches in the six months just ended, but the majority of the principal offices have already been inspected in the usual thorough manner, and the inspection of the remaining offices is being proceeded with.

The Auditors appointed by you have carried out their investigations as required by the Bank Act, and their Report and Certificate is attached to the Balance Sheet. They offer themselves for re-election.

The Directors have pleasure in again bearing testimony to the efficient and satisfactory manner in which the officers of the Bank have discharged their respective duties.

All of which is respectfully submitted.

PELEG HOWLAND, President.

AUDITORS REPORT TO SHAREHOLDERS

We have compared the above Balance Sheet with the books and accounts at the Chief Office of Imperial Bank of Canada and with the certified returns received from its Branches, and after checking the cash and verifying the securities at the Chief Office and certain of the principal Branches on 31st October, 1922, we certify that in our opinion such Balance Sheet exhibits a true and correct view of the Bank's affairs according to the best of our information, the explanations given to us and as shown by the books of the Bank.

In addition to the examinations mentioned, the cash and securities at the Chief Office and certain of the principal Branches were checked and verified by us during the term and found to be in accord with the books of the Bank.

All information and explanations required have been given to us and all transactions of the Bank which have come under our notice have in our opinion been within the powers of the Bank.

G. T. CLARKSON, F.C.A.
Toronto, 17th November, 1922. R. J. DILWORTH, F.C.A.
of Clarkson, Gordon & Dilworth.

The President, Mr. Peleg Howland, in his address, reviewed general trade conditions and touched upon various matters of import, and the General Manager, Mr. A. E. Phipps, enlarged upon various items and changes in the Balance Sheet. The Report was adopted unanimously.

Mr. G. T. Clarkson, F.C.A., of Toronto, and Mr. R. J. Dilworth, F.C.A., Toronto, were appointed Auditors for the ensuing year.

The Scrutineers appointed at the meeting reported the following Shareholders duly elected as Directors: Peleg Howland, Wm. Hamilton Merritt, M.D.; Sir James Aikins, K.C.; John Northway, Lieut.-Col. J. F. Michie, Sir James Woods, Frank A. Rolph, R. S. Waldie, George C. Heintzman, J. W. Hobbs.

At a subsequent meeting of the Directors, Mr. Peleg Howland was re-elected President and Dr. Wm. Hamilton Merritt, Vice-President of the Bank.

PELEG HOWLAND, President.
A. E. PHIPPS, General Manager.

## AGENCY WANTED

Leading Insurance Man can procure for a Progressive British Company the services of a reliable agent in Saskatchewan who has excellent connections and who has already transacted good volume of business for some years. Big volume of Hail guaranteed (also Fire income if desired.

Apply Box 461, Monetary Times, Toronto.

Advice That Was Good:

For many months we strongly recommended the purchase of Canadian National Ry. Debentures.

Time after time we advised the purchase of securities which we considered would appreciate in value.

Foremost amongst our recommendations during the past year was Toronto Suburban Railway 4½% debentures maturing 1961, secured by a First Mortgage on the Radial Line from Toronto to Guelph, OWNED and OPERATED by the Canadian Government.

The price of these debentures has advanced as follows:—

| | | | | |
|---|---|---|---|---|
| Dec. 1921 | Price | 62.25 | Yield | 7.50% |
| Jan. 1922 | " | 66.49 | " | 7.00% |
| | " | to 71.00 | " | 6.60% |
| Feb. 1922 | " | 74.54 | " | 6.25% |
| | " | to 76.81 | " | 6.05% |
| June 1922 | " | 77.49 | " | 6.00% |
| July 1922 | ' | 81.00 | " | 5.75% |

Those who acted upon our advice and purchased at the low price of 62.25 now have a profit of over 17 points, which is equal to 27% on their investment, in addition to the interest which they have received regularly.

These Fully Registered Debentures are now being offered at a Price of 83, to yield the investor approximately 5.65%, at which price they are still a Bargain and a Safe Investment.

For those, however, who desire to purchase a good Security that has possibilities of increasing in value similar to those of the Toronto Suburban Debentures a year ago,

**We Recommend Canadian National Railway 4% Fully Registered Perpetual Debentures**

originally issued by the Canadian Northern Ontario Railway, secured by a First Mortgage on this line from Toronto to Ottawa, now OWNED and OPERATED by the CANADIAN GOVERNMENT. This is a splendid opportunity for the re-investment of 1922 Victory Bond Funds.

Life and Accident Insurance Company
WATERLOO ONTARIO

# Corporation Finance

**Bell Telephone Co.**—The board of directors have decided to make a new issue of common stock to the amount of $6,408,000 which will enable them to offer the shareholders an opportunity to subscribe for shares at par in the proportion of one new for five old shares.

These will be sold to shareholders of record of November 30 and the subscription books close December 30. Payments may be made in whole or in instalments.

L. B. McFarlane, president, in a circular to the shareholders explains the need of raising this fresh money as follows:

"The continued and insistent demand for new telephone service throughout the territory in which we operate, calls for additional capital to provide necessary plant and equipment.

"Additions thus made to our property, as soon as operative, will bring in their quota of profitable revenue, and increase the value of the telephone to all users.

"Since the beginning of this year we have made a net gain of 25,766 subscribers' stations, the placing of which, together with the additional plant for needful switching capacity, will practically, exhaust the proceeds of the last issue of shares.

"Notwithstanding the extraordinary and ceaseless efforts of our organization to meet the unprecedented demand for telephones, we have approximately 25,000 deferred orders awaiting completion.

**Dominion Glass Co.**—The anual meeting has been called for December 20 at Montreal.

**Riordon Co.**—At a meeting of the unsecured creditors held in Montreal on November 16 they extended the time of payment to November 17, 1923. The motion was passed unanimously, and provides that the creditors' committee may, at its discretion and on thirty days' notice to the company, declare any debt due at any time within that period.

Mr. Davy, chairman of the creditor's committee, gave a detailed report of conditions in the several Riordon mills. He spoke, in part, as follows:—"At the end of your first meeting on May 25 last year, the company had on hand at its Kipawa plant 11,312 tons of pulp, at Hawkesbury 8,517 tons, and at Merriton 920 tons, a total of 20,749 tons. The market was in such a deplorable condition that operation of the mills could not be commenced until these stocks were disposed of.

"The Kipawa plant opened on October 23, 1921, and up to April of this year had produced 40,761 tons at a profit of $421,142. By October, 1921, the Kipawa stock had been disposed of. The market at that time presented a more hopeful appearance, and it was felt that the mills should be put in operation. It was found that $50,000 would be needed for this, and I. W. Killam advanced this sum, and has not yet been repaid.

"Coincidentally, a new company, known as the Riordon Sales Corporation was incorporated, and by arrangement with New York bankers advances were made on each shipment, which allowed continued operations. The Sales Corporation has functioned admirably, and it was through their efforts that the pulp at the Kipawa and Hawkesbury plants was disposed of, together with other material since manufactured. Surplus stocks were reduced from 83,268 tons to 171 tons by October 31.

"The Riordon Company had accumulated a large quantity of logs at high prices. There was no reserve fund which could take care of depreciation of inventories, and they were charged to book values at operation. If we assume an estimate replacement price of logs during the period under review, the operating profit would have been $1,043,510, instead of $421,142, which shows that the Kipawa could, under normal conditions, make money for the company."

**Ottawa Light, H. & P. Co.**—Gross earnings for the month of September were $149,190, compared to $160,235 a year previous, and net earnings were $48,716 compared to $46,201. Surplus was $32,695, compared to $30,721.

For the year to date gross earnings were $1,228,988, compared to $1,191,475 a year previous, net earnings were $373,582, compared to $339,571, and surplus was $231,710, compared to $200,295. There was earned on common stock 8.8 per cent. up from 7.6 per cent a year ago. Percentage of operating expenses to gross was reduced from 71.5 per cent to 69.6 per cent.

**Canadian Connecticut Cotton Mills, Ltd.**—The annual report for the year ended September 9 last shows net profits of $1,074,649. A profit and loss account is rendered for this year showing a surplus of $1,000,382. The net profit of $1,074,649 under this heading is largely accounted for by the acceptance of deliveries under high-priced contracts made during prior years, which deliveries were postponed from the year before. These contracts are now, however, practically completed. Current orders are at low prices, especially for the export trade. At the same time, it has been impossible to reduce costs in proportion. Under these circumstances directors have conserved assets and maintained a strong financial position.

In order to maintain a good cash position, dividends on the preferred stock, which are 12 per cent. in arrears, have been deferred. Business during the forthcoming year is expected to be at least fair, but unless there is a material improvement in prices, the present conservative policy will be adhered to.

Working capital compares as follows:

| | 1922 | 1921 |
|---|---|---|
| Current assets | $1,901,828 | $2,416,063 |
| Current liabilities | 309,928 | 1,630,618 |
| Working capital | $1,591,900 | $ 785,445 |

A profit and loss account is issued this year, showing a surplus of $1,000,382, compared to $526,632 earned in the years 1919 to 1921. A deficit of $40,201 is wiped out by this year's surplus. In this year's statement, bad accounts are listed at $157,091, taxes $115,059 and adjustments at $34,065. Income from sources other than operating is given at $25,080.

Current liabilities have decreased $1,380,690 in the year ended September 10, while current assets were reduced by only $514,234, according to the annual report. If reserves for taxes, which were included in current liabilities for 1921, are excluded from current liabilities for 1922, then the decrease under this heading is $1,510,486. This is the procedure followed in the company's report.

The ratio of current assets to current liabilities for 1922 was 6.1 to 1, compared to 3.7 to 1 last year and 1.3 to 1 in 1921.

**Ames-Holden-McCready, Ltd.**—Final arrangements for the release of the company from its guarantee of the Ames-Holden Tire Co., bonds and also for the release of the common stock holding in the tire company by the parent company, have been completed.

Another feature of the arrangements was the sending out of cheques amounting to over $250,000 to the creditors of Ames-Holden-McCready. This represents 40 cents on the dollar to creditors who preferred to take settlement upon that basis in cash, rather than have their claims paid in preferred stock of the reorganized company, as provided for under the reorganization plan.

It was announced that the final details in connection with the adjustment of the affairs of Ames-Holden-McCready, Ltd., had been completed, and that the new organization, which will be known as Ames-Holden-McCready, Ltd., will start operations with a clean sheet and with new cash capital to the extent of approximately $1,000,000.

Ames-Holden Felt Co., Ltd., producing felt footwear and all kinds of felt for industrial purposes, has been merged with the new company. Ames-Holden Tire Co., Ltd., will, however, remain as a separate organization, but will continue to manufacture, as before, the automobile tires and accessories which now form a most important and lucrative branch of Ames-Holden-McCready's business.

Officials of the Ames-Holden-McCready Company state that the volume of sales of the organization for the ten months ended Oct. 31 compare very favorably with those of the previous year, the increase in sales of its rubber products being approximately 50 per cent. Business booked for immediate and future delivery is also very satisfactory.

**Dominion Textile Co.**—The company is now issuing one share of capital stock at par for every two shares held. The authorized capital common stock of the company is $7,500,000 of which $5,000,000 is now outstanding, so that the present issue will use up the $2,500,000 unissued portion of the authorized capital.

Subscribers may pay in full on or before the 26th December, 1922, for the shares allotted to them, and shares so paid will rank for dividends from December 16th, 1922. Subscribers who wish to pay by instalments may pay in full on any instalment date, and receive interest on their payments at the rate of 8 per cent. per annum until the 15th March, 1923, after which date such shares will be entitled to regular dividends.

"Certificates of rights" will be sent to shareholders as soon as possible, with a form of subscription printed on the back thereof, which must be signed by the subscribed, duly witnessed, dated and deposited with the Royal Trust Company, Montreal, before noon on the 26th day of December, 1922, on which date the right to subscribe will expire.

The directors have decided to call a special general meeting of the shareholders, to be held at the office of the company, 10 Victoria Square, on Wednesday, the 6th day of December, 1922, at 12 o'clock noon, for the purpose of considering and, if deemed advisable, passing a resolution extending the corporate powers of the company and authorizing the application for supplementary letters patent in confirmation thereof.

**Consumers Gas Co.**—At the annual meeting of the shareholders held on November 13, the annual report was reviewed and adopted. The former board of directors was re-elected without change.

In the course of his address A. W. Austin, president, referred to the necessity for further plant extension in order to take care of the many new customers of the company, and the possibility of an increase in the capital stock of the company to provide for these extensions. He referred also to the statement made at the previous annual meeting, in which he predicted that the company might be able to restore to the reserve fund the balance of that sum which was drawn from it during the war period. This, he added, had been accomplished, and, besides on two separate occasions the price of gas had been reduced during the year. The president likewise outlined the steps taken to provide sufficient fuel supplies to meet the company's requirements during the coal strike in the United States. To this end some 28,000 tons of gas coal were imported from the north of England. "Not much further time should be lost," he concluded, "in preparing for works extension, as it may take two or three years to complete another unit. We have been taking on during recent years nearly 5,000 new customers a year, and it is a poor policy to overload any plant. In order to provide for further extensions, your directors will give the question of increasing capital stock early attention."

General Manager Hewitt touched on the difficulties experienced during the year, and presented an optimistic forecast for the current period. "At the present time," he said, "we are able to see a little ahead, and there is every reason to hope that during the financial year on which we have just entered, there will be a gradual betterment of conditions and less of anxiety for the directors. The outstanding feature of this year's statement is that it marks the turning point from a period of increasing costs to one of lowered costs to the consumer."

Referring to conditions experienced since the close of the last fiscal year, Mr. Hewitt points out that the record output of September mentioned in the report has been exceeded by that for October, the average daily output for October being 394,000 cubic feet greater than the average daily output for September.

**American Sales Book Co.**—The board have declared dividends which wipe out the final arrears on the preference stock and comprise the initial payment on the common. The dividend on preferred is for 1¾ per cent. and will be paid December 15 to shareholders of record November 20. The dividend on common stock is at the rate of 8 per cent. per annum and applies to the fiscal year, 1922. As the common has a par value of $20 the cash distribution therefore is $1.60 a share, and will be paid on January 15 next to holders of record December 15.

**BUILDING YOUR BUSINESS**

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district.

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

## Mistaken Kindness

A man's confidence in his wife is sometimes expressed by making her the sole executrix of his will.

It is an affectionate compliment to leave everything in her hands to do with as she pleases, but is it really a kindness to add to her bereavement a burden of care—and to make her future comfort and the raising of her children dependent upon her own inexperienced management?

Consider the comfort and independence that will be hers when that estate is prudently administered by

# Demand Deposits Show Large Increase

### Forty-one Million Increase in Demand Deposits During October—Current and Call Loans Abroad Show Substantial Increase — Gold Holdings Increase by Seventeen Million in One Month—Circulation Also Increases

| | Oct. 1922 | Sept. 1922 | Oct. 1921 | Yrs. Inc. or Dec. | Mths. Inc. or Dec. |
|---|---|---|---|---|---|
| Deposits on demand | $ 531,491,428 | $ 490,185,205 | $ 565,650,636 | — 6.04 | + 8.43 |
| Deposits after notice | 1,156,442,453 | 1,158,462,380 | 1,251,323,839 | — 7.58 | — .18 |
| Current loans in Canada | 1,122,840,459 | 1,114,678,735 | 1,243,748,818 | — 9.73 | + .73 |
| Current loans elsewhere | 153,088,583 | 145,609,779 | 156,518,933 | — 2.19 | + 5.16 |
| Loans to Mun. Canada | 73,860,695 | 77,280,415 | 81,839,306 | — 9.85 | — 4.42 |
| Call loans in Canada | 105,083,013 | 106,982,838 | 105,362,186 | — .26 | — 1.79 |
| Call loans elsewhere | 195,750,035 | 172,037,983 | 172,013,135 | +13.80 | +13.79 |
| Circulation | 178,623,690 | 176,918,869 | 193,546,363 | — 7.73 | + .97 |

Although the October Bank Statement reveals some unusual changes in some accounts, it still reflects the real business condition of the country. There were several features during the month, deposits on demand being up by 8.43 per cent. over the previous month, this being an increase of approximately 9.50 per cent., in two months.

Another feature of the statement is the 13.79 per cent., increase in call loans abroad over the previous month. This compares with a decrease of 2.73 per cent., during September. Although there has not been any intimation as to the cause of this large increase, the opinion has been expressed that, in all probability, some of the banks are dealing on the New York Exchange, which has had an attack of acute indigestion for the past few months. There are other reasons, but this one seems to be the most logical.

### Current Loans Increase

A further increase of .73 per cent. is shown in current loans in Canada, making an increase of 1.84 per cent. in two months. The major portion of this increase is, of course, due to the crop movement.

The trend of current loans abroad is still upwards, there being an increase of approximately eight million during October, or an increase of 5.50 per cent., during the past two months. The total during the month of October is the highest since last February, when current loans abroad amounted to slightly over $155,000,000. This year's total is only three million below that of last year. The following illustrates the course of the current and call loan accounts in Canada during the past thirteen months:

| Loans | Current in Canada | Current in Canada |
|---|---|---|
| 1921 | | |
| October | 1,243,748,818 | 105,362,186 |
| November | 1,210,101,634 | 104,392,115 |
| December | 1,174,053,434 | 113,071,089 |
| 1922 | | |
| January | 1,138,151,455 | 102,630,461 |
| February | 1,143,538,489 | 100,379,637 |
| March | 1,149,187,869 | 103,638,801 |
| April | 1,162,975,332 | 102,005,932 |
| May | 1,140,425,509 | 101,239,898 |
| June | 1,117,844,707 | 99,804,892 |
| July | 1,104,122,176 | 96,770,236 |
| August | 1,102,446,692 | 99,939,844 |
| September | 1,114,678,735 | 106,982,838 |
| October | 1,122,840,459 | 105,083,013 |

### Gold Holdings Up

With Canadian exchange once more reaching par and slightly over the movement of gold into Canada has assumed large proportions. Practically every week there is a shipment of several million in gold to Canada and in view of this it is not surprising to find that current gold and subsidiary coin in Canada has increased by seventeen million dollars in one month. The following table is a comparison of changes in holdings of coin and notes during the months of September and October:—

| | |
|---|---|
| Gold and sub-coin in Canada | +$16,966,728 |
| Gold and sub-coin elsewhere | + 1,588,152 |
| Total changes | +$18,554,880 |
| Dominion notes in Canada | +$1,341,358 |
| Dominion notes elsewhere | + 7,160 |
| Total changes | +$1,348,518 |

After having shown a slight decline during the month of September the ratio of liquid assets to total public liabilities during October has shown a slight increase of .45 per cent. over the previous month, the ratio now standing at 50. per cent.

The ratio of quick assets to public liabilities is again on the increase, the ratio now standing at 24.61 per cent., as compared with 23.32 per cent. during the month of September.

### Savings Deposits Lower

There was a further decrease in savings deposits, amounting to two million, during the month, and while this decrease does not appear to be very large, when the total savings deposits this year are compared with those of October last year, it will be seen that there has been a decline of approximately ninety-five million dollars. While there is no doubt that wages in several branches of industry have been reduced, thus affecting the deposits, this wage reduction has not been as large as ninety-five million, and therefore there must be other causes for the decline.

### Demand Deposits Again Increase

Deposits on demand are up by forty-one million dollars, but in view of the crop movement this does not call for any special comment. In comparison with last year's total demand deposits are lower by thirty-four million dollars. The following table is a record of deposits for the past thirteen months:—

| | Deposits on demand | Deposits after notice |
|---|---|---|
| 1921 | | |
| October | 565,650,636 | 1,251,323,839 |
| November | 555,901,712 | 1,252,227,394 |
| December | 540,942,522 | 1,240,807,268 |
| 1922 | | |
| January | 487,153,169 | 1,233,208,401 |
| February | 488,079,674 | 1,231,349,001 |
| March | 484,233,074 | 1,230,628,840 |
| April | 502,370,799 | 1,218,195,262 |
| May | 494,185,496 | 1,197,789,747 |
| June | 505,757,856 | 1,181,404,188 |
| July | 492,442,491 | 1,175,781,711 |
| August | 475,415,834 | 1,164,069,400 |
| September | 490,185,205 | 1,158,462,380 |
| October | 531,491,428 | 1,156,442,453 |

With the crop movement reaching large proportions during October it is only natural that the trend of note circulation should also be upward. During October there was a two million increase in circulation, this being the highest total so far this year. This year's total is, however, fifteen million lower than last year, but in view of the lower grain prices this decline is not surprising.

### Municipal Loans Lower

Advances to municipalities are lower by over four and a half million dollars, and are also lower by eight million from the same month last year. The four million decline during October can be expected at this time of the year as this is when tax payments begin to assume large proportions.

---

## OPPOSE LICENSING OF AGENTS

### British Columbia Bill Again Keenly Opposed—Government Will Inquire Into Workmen's Compensation Charges

(Special to The Monetary Times)

Vancouver, Nov. 21.—Opposition has developend in the provincial legislature to the proposed Insurance Agents' Licensing Act. H. G. Perry, member from Prince George, objected to it as he was under the mistaken impression that it required agents to pay separate licenses for each class of insurance they wrote. He further asked the attorney general to ascertain whether the provinces had not the power to compel insurance companies to pay equal commissions in all parts of the province. The attorney general stated in the house that the bill had been brought down at the request of an influential deputation of insurance agents representing the larger cities and all the lower inland and Vancouver Island. The matter will be debated further.

The Vancouver Harbor Board has declined to pay the operating costs of the proposed fire boat for Burrard Inlet. This blocks the efforts being made by the City Council to arrive at some agreement with the Board. The Board of Fire Underwriters has furnished the city with a written statement showing the percentage amount of fire insurance rate reductions which would be effected by the operation of the boat.

Premier John Oliver has asked the Legislature to appoint a special committee of the house to investigate charges made by Canon Hinchliffe about the Workmen's Compensation Board's administration of Mothers' Pensions.

The Vancouver Automobile Club has asked the Provincial Government to amend the Motor Vehicles Act which at present limits speed at road intersections to ten miles per hour. The Club asks that the words "driving to the common danger" be substituted.

The well known financial firm of Macaulay & Nicolls of Vancouver have taken into partnership Ronald M. Maitland and Bromwell C. Grant and the firm name changed to Macaulay, Nicolls & Maitland. Both the new partners have been for some years in the employ of the firm, which represents nearly a score of insurance companies.

### New Laws Proposed.

Three acts of interest to insurance men are being presented for passage at the present session of the Provincial Legislature; the Agents' Licensing and Qualification Act, an Act to standardize the statutory conditions of accident and sickness insurance and an Automobile Insurance Act. The first-named is reported to have the endorsation of practically all the insurance agents in British Columbia but owing to a proposed clause which would prevent the writing of life insurance in the larger cities by other than "full time" agents, some of the life companies have protested its passage until they have time to consider it fully. It is understood that the bill will be given its first reading and then submitted to eastern head offices. The debatable clause has been amended to protect "part time" agents whose contracts have been in existence for one year. The Act is being presented as a government measure.

The statutory conditions of the Accident and Sickness Policy are copied exactly from the recently adopted amendment to the Ontario Insurance Act. Suggestions regarding the wording of the preamble to this bill, made to the Insurance Superintendent at Victoria by the Casualty Committee of the Insurance Federation of B.C. have been adopted. The act will embrace any company, life or otherwise, which issues any accident or sickness insurance contract. The chief object of the act is to standardize policy conditions throughout Canada. Other provinces are falling into line in this respect.

## CONDITIONS IN SASKATOON AND DISTRICT

### City Public Utilities making Good Showing.—Farming Conditions Fair.—The Loaning Situation.

(Staff Special.)

Winnipeg, Nov. 27.—Farming conditions during the past season in the district surrounding Saskatoon have only been fair. On the Goose Lake line, West of Saskatoon, conditions were very poor, but in Northern Saskatchewan and districts east of Saskatoon, conditions were much better.

In discussing the outlook, W. B. Kemp of Hill & Kemp Ltd., Saskatoon, in regard to the farimng outlook and also the loaning situation said:

"I am pleased to say that conditions in Saskatoon, and the surrounding district, are, I believe, better than they were this time last year. Owing to the very excellent weather we have had this Fall, threshing has been completed, and the majority of grain was of excellent quality, most of the wheat grading No. 1, also a larger acreage than in former years, has been prepared for next years crop.

**New Building.**

"There has been a great number of houses built here this summer, the majority being of the bungalow type, consequently there is now a surplus of houses to rent, the latter being semi-modern or of the more inferior class, their tenants having moved into better houses which became available with the advent of the new dwellings. A few houses have changed hands but in most cases the cash payment was small and the terms liberal. There is little or no demand for vacant property although plenty is offered at very reasonable prices, but I do not think there will be any demand to speak of before next Spring. Business in the city generally has a slight tendency to improve.

"I am glad to say that the financial situation is somewhat improved recently. One or two of our loan companies with whom we are doing business, and who have not been loaning all summer, advise us that they are now prepared to let out money at 8% on improved residential city property and also on the better class of improved farms. This is a very excellent forecast as previous to this it was hard to get money at less than 8½ and 9%. I might also state that the demand for money is not as great as one would expect, considering the apparent depression of business during the last six months. I am under the impression that a number of individuals have money, which they have been afraid to invest or speculate with, but now that they find money is getting cheaper, are looking for investments.

"On the whole I look for a decided improvement in business and financial conditions in the near future."

## *Bank Clearings*

The following are the bank clearings for the week ended November 23, compared with the corresponding week of 1921:—

**Eastern Bank Clearings.** ...

| | Week ending Nov. 23. | Increase over '21. |
|---|---|---|
| Montreal ......... | 108,568,724 | x$12,179,874 |
| Toronto ......... | 99,338,412 | x17,763,524 |
| Ottawa .......... | 7,196,760 | x1,073,900 |
| Quebec ......... | 6,242,569 | 175,014 |
| Hamilton ........ | 5,687,208 | 64,508 |
| Windsor ........ | 3,379,967 | x453,210 |
| London .......... | 2,998,864 | x79,666 |
| Halifax ......... | 2,968,861 | x277,554 |
| St. John ......... | 2,852,100 | 186,072 |
| Moncton ........ | 1,192,666 | 99,551 |
| Kitchener ....... | 1,090,607 | 145,287 |
| Brantford ....... | 987,404 | x168,080 |
| Sherbrooke ...... | 838,476 | x4,222 |
| Peterboro' ....... | 767,226 | 22,803 |
| Kingston ........ | 702,674 | x80,477 |
| Total ......... | $244,812,518 | x$31,387,272 |

**Western Bank Clearings.**

| | Week ending Nov. 23. | Increase over '21. |
|---|---|---|
| Winnipeg ........ | $ 85,224,569 | $13,480,067 |
| Vancouver ....... | 13,569,807 | 81,247 |
| Calgary ......... | 6,063,355 | x431,912 |
| Regina .......... | 5,103,183 | 552,920 |
| Edmonton ....... | 4,619,727 | x1,346,217 |

| G'd total ..... | $369,104,604 | x$18,723,166 |
| Pr Albert ...... | 396,478 | .......... |

x—Decrease.

## *Business Conditions*

Dispatches to Dun's Review from branch offices of R. G. Dun & Co. in the principal cities state that, while recent high temperatures have tended to curtail the distribution of seasonable goods at retail in some parts of the Dominion of Canada, wholesale orders for the chief commodities continue to be placed in satisfactory volume. Sentiment generally is very optimistic, as the leading industrial plants are increasing their operations, thus giving steady employment to a large number of laborers, and, while buyers exercise considerable care in entering into future commitments the belief widely prevails that the advent of settled cold weather will be promptly followed by the active absorption of seasonable merchandise. Collections tend to improve.

Montreal reports that, while retail trade has been adversely affected by recent weather conditions, there has been no falling off in the volume of orders received by wholesalers. Buyers, although operating cautiously, are purchasing dry goods, clothing, footwear, jewelry, furnishings, hardware, groceries, and other staples with considerable freedom, and they are placing orders for future delivery with more confidence than for a long time past. Collections are fair.

Business in most lines both wholesale and retail, has been rather quiet at Quebec, mainly because of climatic conditions, but it is thought that substantial improvement will follow the appearance of real Winter weather. Collections continue slow.

Although the recent period of unusually mild weather has restricted the retail movement of seasonable merchandise at Toronto general conditions are considered favorable, as labor is well employed and wholesale orders for the principal commodities are being received in satisfactory volume. Collections are somewhat easier.

Advice from Winnipeg, Saskatoon, Calgary, Regina, and other cities in the Far West and, Northwest indicate that signs of improvement in business are becoming more numerous, and, though buying continues along conservative lines, retail distribution is more active in most districts, and wholesale orders are being placed with increasing confidence. Collections, however, show little improvement.

## LAPSE OF INSURANCE PLEDGED

The case of Labonte v. Banque d'Hochelaga was an action to recover the amount of a life insurance policy pledged to the Bank by the plaintiff as collateral security and allowed to lapse by the Bank which had undertaken to pay the premiums.

The plaintiff claimed the face value of the policy $2,000 but the Court awarded only $238—the cash value when the plaintiff ceased to pay the premiums.

The case came before the Quebec Superior Court which maintained the action in part for the following reasons, amongst others: "Considering that the creditor is responsible for the loss or deterioration results from a fault or omission or from a positive fact; that these rules have been applied to the pledging of an insurance policy; that the defendant by paying regularly the insurance premiums due on the said policy up to and including January 1914 has put the plaintiff under the impression that it would continue to pay the premiums at least until the judgment obtained by it against the defendant had been settled; that with the exception of pawnbrokers no creditor can dispose of the thing pledged in default of payment; that no agreement to that effect has been proved; that on the contrary the defendant allowed the plaintiff to pay his debt by means of notes; that the plaintiff appears to have paid the whole of his debt within the term allowed; and that the defendant gave him a receipt in full; that the measure of damages sustained by the plaintiff is the cash value he could have recovered when he ceased to pay the premiums; that the plaintiff appears to have paid thirteen half-yearly premiums; that the cash value of the policy at the end of the seventh year is $238 which represents the amount lost by the defendant; condemns the defendant to pay to the plaintiff the sum of $238 with interest."

## *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended November 24, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Nov. 24 | Nov. 17 | Nov. 10 | Nov. 3 |
|---|---|---|---|---|
| Ontario .... .... .......... | 26 | 24 | 14 | 26 |
| Quebec .... .... ............ | 24 | 44 | 15 | 31 |
| Manitoba .... .... ........ | 6 | 7 | 4 | 9 |
| Alberta .... .... ........ | 4 | 6 | 4 | 3 |
| Saskatchewan .... .. | 5 | 8 | 4 | 2 |

# National Railways May be Self-sustaining

## Sufficient Traffic May Be Developed Through Time, Says Statement by D. B. Hanna in Annual Report—A Survey of the Extent and Financial Results of the System—Importance of Immigration to Districts Served

(Special to The Monetary Times)

Ottawa, Nov. 29.—The annual report of the Department of Railways and Canals contains much information relating to this very important portion of the public service, which, since the Government now owns 22,000 miles of railway, is of more than passing interest. Some of the information contained therein is not new; but this, with the other, well repays repetition.

The total railway mileage owned by the Dominion Government now amounts to 22,645 miles, made up as follows;

Canadian Northern, 9,899; Intercolonial, 1,670; Prince Edward Island, 275; National Transcontinental, 2,006; Hudson's Bay Railway, 214; Eastern Branch Lines, 4,682; Grand Trunk Pacific, 2,756; Grand Trunk Tailway, 5,507; of which latter the Canadian lines comprise 3,611 miles.

On all Government roads, the operating revenue in 1921 was $235,789,013, and the net operating expenses, $247,509,397, leaving a net operating deficit of $16,092,901. The Grand Trunk had a net operating revenue last year of $4,372,517, so that the net operating deficit on all Government roads last year was $11,720,384.

The fixed charges on the Government railways last year were $60,023,498. On the Canadian National they amounted to $40,777,915, of which $21,573,154 was due to the public and $19,204,959 was due to the Government. On the Grand Trunk the total charges were $19,245,583, of which $2,107,420 was due to the Government and $17,138,163 due to others. So the total deficit on the Government roads, including $216,044 on the St. John and Quebec Railway, was $72,662,278.

### Total Investment.

The investment in the Government roads is, at book value, placed at $1,892,577,781, made up as follows; Canadian Northern, $681,822,115; total Canadian Government Railways, including Intercolonial, Transcontinental, Hudson Bay and others is $415,438,153; Grand Trunk Pacific, $256,768,407; Grand Trunk Railway, $512,687,282; Central Vermont, $25,861,823. The funded debt of these is placed at $1,342,582,740.

It is interesting to note that the number of employees on all Government Railways in 1921 was 102,454, or 10,000 less than during the preceding year. As this brings up the wage question, it also throws some light on the difficulties attending the operation of railways during recent years. In 1919 the gross revenue of the Canadian National Railways was $105,000,000, of which the operating labor cost was $78,676,000, making the percentage of operating labor to gross revenue 74.9. In 1920 the gross revenue was $125,641,000, and the operating labor cost $98,767,000, making the percentage of operating labor to gross revenue 78.61. Last year there was an improvement, the gross revenue being $126,691,000. The operating labor cost $82,381,000, and the percentage of operating labor to gross revenue 65.03.

### D. B. Hanna's Statement.

As the report contains also the last annual statement submitted by D. B. Hanna, as president of the Canadian National Railways, it will be interesting to learn what he thinks of the system. He says;

"The system must be regarded as still in its probationary period. The main lines of the Canadian Northern, National Transcontinental and Grand Trunk Pacific were not completed until 1915 and over 35 per cent., of the system's mileage has been taken over for operation since the outbreak of war. Since 1914 there has been practically no immigration and there has been little industrial or other commercial development. Under these circumstances the performance in 1921, when rates were admittedly low, measured from cost of service point of view, and when expenses were exceptionally high, may be regarded as a credimeasured from cost of service. What can he think of them now after two important reductions have been made, This question is the table. The directors knowing the general excellence of the territory served by a large percentage of the company's mileage, and with the knowledge that in many respects the systems lines are in premier position to reach the future traffic resources of the Dominion, are confident that sufficient traffic to maintain the National system can be developed within a reasonable period of normal progress. In the meantime the system has a carrying capacity beyond the present volume of traffic."

It will be noticed that Mr. Hanna thought that during last year, rates were admittedly low more pertinent since railway costs have not declined this year, especially in the matter of wages, to anything like the extent that had been expected.

### Immigration Campaign

Hon. Mr. Stewart's recent statement of policy on immigration shows that the Government intends to conduct a rather vigorous advertising and general publicity campaign for immigrants, and that by these means it will endeavor to let the world know that Canada really wants such people. There is also to be a letting down of the bars, which probably means that all those physically fit and likely to make good, will be allowed to enter. Special attention will also be paid to the bringing in of immigrant children. There is no direct intimation of the placing of the Department of Immigration under a new minister. This presents a political problem, and means an expenditure that might be questioned. No doubt the Department officials feel that they can, under the existing method of organization, impart all the vigor necessary. Departments are not eager to let go duties they have been discharging; they seem to think that this would be to indicate a lack of confidence.

---

## CIRCULATION AGAIN INCREASES

### Six Million Increase During October—Gold Held For Redemption Shows Two Million Increase.

A six million increase in the note circulation of the Dominion Government is shown in the October report, due to the crop movement. October's total is lower by thirteen million from the same month last year, this decline in the circulation is not alarming.

Gold held for redemption of Dominion notes is again up by two million dollars from the previous month, now standing at slightly over ninety-three million. This is an increase of thirteen million over the total of October last year. The ratio of redemption gold to total circulation is slightly lower than for the previous month being down from 38.95 per cent., in September to 38.89 per cent., in October.

The position as at October 31 was as follows:—

| | |
|---|---|
| Provincial | $ 27,710 |
| Fractional | 1,240,539 |
| $1 | 16,876,976 |
| $2 | 12,341,802 |
| $4 | 36,123 |
| $5 | 2,612,640 |
| $50 | 4,650 |
| $500 | 2,992,500 |
| $1,000 | 5,043,000 |
| **Legal Tender for Banks** | |
| $500 | 4,000 |
| $1,000 | 941,000 |
| $5,000 | 131,950,000 |
| $50,000 | 66,200,000 |
| | $240,270,041 |
| Gold held 31st Oct., 1922, by the Minister of Finance | $ 96,614,435 |
| Gold resere to be held on Savings Banks Deposits—<br>10 p.c. on $31,764,139.62 under the Saings Banks Act | $ 3,176,413 |
| Gold held for redemption of Dominion Notes | $ 93,438,021 |
| Dominion Notes outstanding against deposits of approved securities, under Finance Act, 1914. and Chapter 4, Acts 1915 | $109,561,021 |

---

## IMPERIAL BANK ANNUAL MEETING

### Business Situation Shows Little Change During Past Year Says President. Annual Meeting

At the annual meeting of the Imperial Bank on November 22, Peleg Howland, president, stated that while the conditions under which the bank had been working during the past six months had not been easier than those existing during the year previous, the results had not been unsatisfactory. The business situation had not altered materially since the meeting in the spring, though on the whole perhaps there was an improvement.

"Mining, pulp and paper, lumber, salmon canning all have better prospects and are adding largely to our exports," said Mr. Howland. "The harvest has been exceptional, and though the results, owing to the prices and marketing conditions, can not be said to be profitable to the producer, at least in the West, the final returns can not fail to help the country as a whole. Wholesale trade has increased in volume. There is less unemployment and wages are still high. As against all this there is the fact that the activities of the country are not being carried on at a profit, and capital is not being accumulated therefrom; that savings are diminishing; that there is no real reduction in the debt of the Dominion with increases in those of provinces and municipalities; taxes have increased; neither retail trade nor collections are any too good, and there is comparatively little immigration. Altogether we have some distance to go, I fear, before we reach that stretch of level road that leads to general prosperity."

A. E. Phipps, the general manager, said that last April he had predicted that it would be more difficult to maintain earnings, and this bad proved to be the case; the earnings of $638,003.09 were only $5,083.77 in excess of half of the earnings for the previous twelve months. As complete adjustment of the profit and loss account was only made once each year it was not possible to make an exact comparison.

"The deposits not bearing interest at $19,388,397.72 are less by $703,032.28, and the deposits bearing interest, now $71,718,574.18, are $6,622,698.55 less than they were last April," said Mr. Phipps. "The fact that the former are so well maintained is gratifying, indicating as it does that the bank's current business has kept up well, and an analysis of the interest-bearing deposits shows that the drop is due altogether to depletion of balances in Dominion Government and Provincial Government accounts—which may be ascribed to the different time of the year—and that the ordinary deposits in the savings department have not shrunk."

### No Important Buildings

Due to the policy of marking time, no important building operations have been undertaken during the summer, only a few buildings, extensions and alterations of a minor kind, having been prosecuted.

The number of shareholders still continues to increase. At the end of October there were 2,264 as compared with 2,234 six months ago.

The staff number 1,278, of which 292 are ladies.

The old board of directors was re-elected, as follows: Peleg Howland, president; Wm. Hamilton Merritt, M.D. (St. Catharines), vice-president; Sir James Aikins, K.C. (Winnipeg), John Northway, J. F. Michie, Sir James Woods, Frank A .Rolph, R. S. Waldie, George C. Heintzman and J. W. Hobbs.

---

## BRITISH COLUMBIA FINANCES

British Columbia on its return of revenue and expenditure has a surplus of $818,101 for the first six months of the year, according to a statement presented to the legislature by Hon. John Hart, Minister of Finance. The revenue of the province for the last half year was $9,906,952 and the expenditure $9,087,850.

---

## EMPIRE FIRE INSURANCE CO.

The promoters of the above company have decided to apply instead for a charter under the name of the "Federal Fire Insurance Company of Canada." Provincial incorporation in Ontario is sought, and a public hearing was held at the Insurance Superintendent's office on November 28

## RATE REDUCTIONS SHOW EFFECT

### Revenue of Railways in August Decreased, Though Traffic Was Greater Than Last Year

Freight rates on grain and grain products west of Port Arthur and Fort William were reduced July 6th between 20 and 25 per cent. Effective August 1st rates on basic commodities such as forest products, building materials, iron, etc., were reduced about 6 per cent. and all increases on coal granted September 13th, 1920, were removed. The full effect of these reductions was not felt till September and October when the heavy movement of grain and coal began, although the railways show a lower average per ton mile for August, 1922, than for 1921. The reductions in freight rates effective December 1, 1921, would also affect this average.

The railways as a whole showed an increase in revenue freight carried of 1,205,955 ton miles, or .06 per cent., but a decrease in freight revenues of $1,430,475, or 5.6 per cent., with an average freight receipt per ton mile of 1.259 cents as against 1.335 cents in August, 1921. Passenger traffic also increased 7.4 per cent. but passenger revenues fell off $682,694 or 7 per cent., with no general change in passenger rates. The average receipts per passenger per mile was 2.396 cents as against 2.767 cents in August, 1921. Increased number of harvesters, about 5,000 over last year, at cheap rates and long hauls would have some effect on this average, but other factors also affected it. Total revenues declined $2,507,257, or 6.2 per cent., while expenses were reduced $1,628,238, or 4.7 per cent., decreasing the net revenues by $879,017, and increasing the operating ratio from 87.07 per cent. in August, 1921, to 88.54 per cent. Some reductions in rates of pay of maintenance of way employees on July 16th and of shop craft employees August 1st, also some changes in rates of pay of clerks, freight handlers, station employees, etc., were also made in August. The rates on all roads have not been finally settled, so the net effect on the total pay roll cannot be stated. The total pay roll showed an increase of $95,279, or .47 per cent., but this month's pay roll included $54,255 of back pay. There was practically no change in train loading although car loading showed a decrease of 2.8 tons. Average passenger train revenue showed a decrease of 26 cents of 9 per cent. per train mile, although the number of passengers carried increased 5.1 per train mile.

### The National Lines

**Canadian National Railways** showed a considerable increase in passenger miles, viz., 21.0 per cent., although the number of passengers carried increased only 1.4 per cent. and passenger revenues decreased 3.8 per cent. with no general change in rates. There was a considerable increase in the number of harvesters carried at low rates this year, which would have this effect and was undoubtedly the chief cause of this paradox. Freight traffic showed a decrease of 2.4 per cent. and freight revenue a decrease of 10.5 per cent. The effect of the reductions in freight rates December 1st, 1921, July 6 and August 1st, 1922, were being felt, the average freight receipts per ton decreasing from 1,242 cents in August, 1921, to 1.140 cents this year. Light coal movement from both Alberta and the head of the lakes, without doubt, appreciably affected the revenue ton miles, which decreased 2.4 per cent.

Train loading increased 33.7 net tons and with 5.9 per cent. less freight, freight train miles decreased 12.8 per cent. Passenger train miles also showed a decrease of 5.4 per cent. and transportation expenses were reduced $582,140 or 11.8 per cent. Total revenues decreased $805,370, or 7.8 per cent., while operating expenses were practically unchanged from August, 1921, resulting in an increase in the operating deficit of $812,742. The pay roll decreased $68,199 although this year's figures included $54,255 of back pay, which means a reduction of $122,454 in the monthly pay roll with an increase of 1,700 employess.

### Canadian Pacific

**Canadian Pacific Railways** reduced their operating ratio from 82.33 per cent. in August, 1921, and 86.96 per cent. in July, 1922, to 81.96 per cent. Revenues showed a decrease from last year of 7.6 per cent. but this was a result of the reductions in freight and passenger rates, which became effective December 1st, 1921, and July 6th and August 1st. Freight traffic increased 17,357,796 revenue ton miles or 2.3 per cent., and passenger traffic increased 3.4 per cent. They both showed greater increases this year than in 1921 over the July records but were below the records made in August, 1920. Expenses were reduced $1,154,171 or 8 per cent., maintenance of way and structures showing a reduction of $392,515, or 11.2 per cent., and maintenance of equipment a reduction of $617,826, or 17.8 per cent. Transportation expenses were reduced 2.5 per cent. with an increase in total train miles of 5 per cent. Average train loading and average car loading showed decrease of 40 tons and 4.1 tons respectively. The pay roll increased $229,378, or 3 per cent., with an increase of 5.5 per cent. in the number of employees.

**Grand Trunk Railway**—Freight traffic showed an increase of 3.6 per cent. and passenger traffic an increase of 4.8 per cent., but due to reductions in rates, freight revenues increased only $62,722, or 1.2 per cent., passenger revenues decreased $22,089, or 1.3 per cent., and total revenues decreased $112,978 or 1.5 per cent.

Although traffic was heavier, freight and passenger train miles were reduced 3.0 per cent. and 4.5 per cent. respectively and transportation expenses were reduced $185,170, or 6.2 per cent. The average load per car showed a decrease of 1.7 tons, but the average load per train showed an increase of 25.8 net tons. Maintenance of way and structures increased $92,000, maintenance of equipment increased $13,073, but total operating expenses were reduced $3,553 or .06 per cent., giving an operating ratio of 83.04 per cent. as against 81.83 per cent. last year.

## LESS ACTIVITY IN REAL ESTATE

### Loaning Institutions at Vancouver Pursue Cautious Policy—Collections Difficult

(Staff Special)

Vancouver, November 20.—The loaning situation in Vancouver and vicinity is improving, plenty of funds being available, but companies and mortgagees generally are exercising great care in selecting loans. One reason for this is the lowered cost of construction of buildings and its consequent effect on values, and another is the slackening off in the real estate market. The average rate on moderate sized first mortgage loans is eight per cent, but large loans on business property have been placed recently at rates as low as six per cent. In common with other Western Districts it is hoped that the general good crop conditions on the Prairies will result in activity in real estate.

Collections are more difficult than for some years past, due partly to continued business depression, but in connection with farm loans, to the long dry summer, light crops and prevailing low prices. There has been a good deal of residential building during the summer and fall particularly evident in the Shaughnessy Annex, Kerrisdale and Dunbar Heights sections of Point Grey, and small stores and houses in Kitsilano and Hastings Districts of Vancouver. The tendency seems to be to get away from large houses into attractively designed small houses of the bungalow or semi-bungalow type. A tour through districts in which building is going on indicates that quite a few houses erected by speculative builders remain unsold and unoccupied. Rentals, both residential and store are lower and many apartment blocks have several vacant suites. During the winter months these will likely fill up.

## OTTAWA LIFE UNDERWRITERS

At the monthly meeting of the Ottawa branch of the Life Underwriters on November 13, W. May, assistant manager of the Sun Life Assurance Company, Toronto, gave an address on the importance of business insurance. The speaker pointed out that business insurance, either taken out by an individual or a partnership in business, was decidedly advantageous to that business in obviating the possibility of forced sales, or shrinkage or impairment of capital resulting from the death of the insured.

In the absence of the president, the vice-president, Mr. J. A. Desautel, local manager of the Prudential Life Insurance Company, presided.

## APPOINTMENT BEING HELD UP

### Canadian Envoy in Washington Not Yet Named —Probable Changes in Bank Act.

(Special to The Monetary Times)

New York, November 25:—There is a report in circulation in the financial district here that Sir Charles Fitzpatrick will be appointed Canadian Envoy in Washington. The appointment is, however, being held up it is said, pending further negotiations with the home Government tending more clearly to define the status of the new "ambassador."

In discussing with your correspondent possible changes in the Canadian Bank Act, a Canadian banker who has just returned from a visit to Canada, expressed the opinion that the most likely change in the Act, as a result of the revision which will occur in 1923, will be one of taxing circulation. This banker believes that the free circulation privilege of the Canadian banks will, within a year, be a thing of the past.

### Banks Ride Storm

According to information obtained locally, both the Bank of Montreal and the Canadian Bank of Commerce managed to ride the recent financial storm in the city of Mexico without difficulty. Anticipating some such crisis, both banks had for some time back been refusing to accept deposits unless they were offered, with the understanding that withdrawals could be paid either in Mexican gold or New York funds. As during the panic which produced the run on the Mexican banks, Mexican gold was at a premium, while New York funds were at a discount, both the Canadian banks, and all the American banks for that matter, were able to exercise their privilege of making payment in New York funds. This step they took with such effect that they managed to stem the demand for their money on the part of panic stricken depositors effectually.

Canadian bankers look for a return of the discount on the Canadian dollar in the United States early in the coming year. In this they tend to agree with Sir John Aird of the Canadian Bank of Commerce. Like Sir John they feel that the effect of the factors which produced the recent phenomenal strength of the Canadian dollar will become gradually less during the next few weeks and that deprived of this support the exchange market is bound to react.

### U. S. Tariff.

Canadians are deriving considerable amusement from the apparent concern American Woodworking interests are showing in the possible failure of Canada to remove the present Canadian duty on American hardwood. Almost tearfully they are expressing the fear that Canada will force the United States Tariff Commission to act under the "flexible" provisions of the Fordney McCumber Tariff if she lets the Canadian duty on hardwood stand. The United States will be compelled if this duty is allowed to stand to impose at least a similar duty on Canadian woods. Actually of course, the wood working interests of this country are more troubled about the effect of such a turn of events on themselves than they are worrying about the poor Canadian lumbermen. They fear that should the United States through the failure of Canada to act be compelled to impose a duty on Canadian wood, their access to Canada's forests will not be quite as easy as it is today . Canada is therefore being privileged to witness, in effect, an appeal from American wood-working manufacturers to save them from their own politicians. Surely an occasion for amusement.

## CONSERVATION OF BUSINESS

In a discussion of "Conservation of Business" at the American Institute of Actuaries meeting in St. Louis, Nov. 2-3, W. A. P. Wood of the Canada Life said the subject was more of a prevention than a cure of the disease. Conditions in Canada were somewhat different than in the United States. The best plan was to get the repayment of loans. That would help in the conduct of the business. As far as "wishing" is concerned there was little of that done in Canada. Adjustment of commissions is easily done. If changing from larger to smaller policy should be applied to a reduction of the future premiums, payment should not be paid in one sum.

# The Monetary Times

Trade Review and Insurance Chronicle

OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

Address: Corner Church and Court Streets, Toronto, Ontario, Canada.

Telephone: Main 7404. Branch Exchange connecting all departments.

Cable Address: "Montimes, Toronto."

Winnipeg Office: 1206 McArthur Building. Telephone Main 3409. G. W. Goodall, Western Manager.

ANNUAL SUBSCRIPTION RATE, $3.00

Single Copy, 15 cents. Postpaid anywhere.

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

## BANK ACT REVISION

Revision of the Bank Act is due at the next session of parliament and should be proceeded with. In 1911 a precedent was established, when Hon. W. S. Fielding deferred revision for a year due probably to the political situation at the time. By 1912 a new Government had taken office, and Sir Thomas White postponed it another year. The procedure was merely to pass an Act extending the charters of the banks for another year's operations under the old law. There were some grounds for the action taken in both cases.

At present, however, to defer revision would be neither justifiable nor wise. The ten full years which will have elapsed have been eventful ones in our financial history, and though the course of business life is not now much different from what it was in 1913, viewpoints have changed considerably. These new viewpoints must be faced in banking as in other circles, and as there are no exigencies of the moment to divert attention from the issue, the fullest discussion and consideration can be given to it now.

## THE DOUBLE INDEMNITY CLAUSE

Under legislation of the last session of parliament Life Insurance companies may now include the double indemnity feature in their policies, and may also insure against sickness and accident. Several of them have already taken advantage of this power. One company instead of assuming the risk of sickness and accident itself is endeavoring to combine with an Accident Insurance company in the issuing of a policy covering life and sickness and accident. It is probable that a ruling from the Insurance Department will have to be secured. A double indemnity clause in a life insurance policy calls, of course, for an increased premium. The clause provides for double the amount of life insurance if the assured dies through accident. The main advantage from the assured's point of view seems to be that in the case of sudden death by accident there is no time for the arrangement of the policyholders' affairs and consequently there is likely to be greater loss in settling them and greater need for cash assets. The clause also takes the place to some extent of ordinary accident coverage as many will not pay a premium of insurance against ordinary accident only. In a life policy with double indemnity clause they have not only the provision of an ordinary life policy in the event of death but also the provision of an accident policy in the event of fatal accident.

## THE EMPIRE EXHIBITION

The Dominion Government has decided to participate in the British Empire Exhibition to be held shortly at London. The Dominion Mission, under the leadership of Major E. A. Belcher, assistant general manager of the Exhibition, has visited every province. The provincial premiers have expressed themselves as in favor of participating. Resolutions have been passed by many of the leading boards of trade and business organizations in Canadian cities, after hearing the purposes of the Exhibition outlined by Major Belcher. With Messrs. Fielding and Lapointe in London, Premier King has doubtless been able to secure all the additional information he required with regard to the opportunities which the Exhibition will afford to Canada.

Dr. J. H. Grisdale, deputy minister of agriculture has lately returned from a survey of market opportunities for Canadian produce in Great Britain. Among practical recommendations, to secure for Canada the benefits of the removal of the cattle embargo, he advises the appointment of a business man with knowledge of agricultural products to act as Canadian representative in Great Britain. He also urged active Canadian participation in the British Empire Exhibition. The leaders in British commercial enterprise are turning considerable attention towards a policy of promoting trade between the nations under the British flag. Bound by ties of language, kinship, and common ideals and standards of citizenship, it is being better realized that the confidence and goodwill between members of the league of British nations is an excellent basis of credit—and credit is a part of trade. The British Empire Exhibition should be a great constructive medium for mobilizing this real credit, to promote forward movement, to bring demand up to the British Commonwealths capacity to supply.

## CANADIAN COINS

Though an instrument of daily business for almost everyone, our coinage receives very little attention on the part of the public. New issues are accepted with indifference. Here, however, are some comments by the Halifax "Chronicle" on changes now being made:—

"Among the changes that many persons do not like may be mentioned the change in coinage. Experiments, of course, are interesting, but they need not necessarily tend to destroy individuality, that is, national individuality, to make them interesting. Whether it was desirable to change the size of the Canadian five-cent piece and the copper cent or not is a matter that would always call forth a divided opinion, and might not be easy to settle. It is true that small copper coins do not weigh so much nor take up so much room as larger ones, and that may possibly be something in their favor. But the small Canadian copper coin is no longer a distinctively Canadian coin. Except for the stamp and superscription, which must of necessity be different, it is just like the copper cent of the United States. Its individuality has been sacrificed.

"The same thing may be said of the five-cent silver coin. It was neat, light weight, dainty, in fact, a distinctively Canadian coin. The nickel coin now in use has none of these things in its favor, and with the before noted necessary stamp, is a counterpart of the United States nickel. To some, of course, there may be nothing objectionable in this, but again there is a loss of individuality. But whether these particulars are regarded as important or not, the average man will be found agreeing with one point of disapproval. These two new coins are practically the same size, and nothing could be much more annoying than that to a man feeling in his pocket for change, and unable to distinguish, by the sense of touch, between one cent and five cents. There was no such trouble as that with the old coins, and that makes an added argument in favor of the old."

Most of us will agree that the old five cent piece was an attractive and distinctive coin. It was, however, on the small side for convenient handling. The old one cent piece may have been distinctive, but it certainly was too large to be attractive. It was, moreover, very much of a size with the twenty-five cent piece. This confusion has not been overcome by the new issue, but it at least has a neater appearance.

## BANK ADMINISTRATION

Among bankers there is a feeling of dissatisfaction with the outcome of the Merchants Bank case. The fault may not be in the law but in its administration or in the administration of the banks themselves. No law, of course, can altogether prevent failure, mismanagement or fraud, and as Sir Frederick Williams-Taylor pointed out at the annual meeting of the Canadian Bankers' Association, the chief safeguard of banking is the integrity and ability of those who manage the bank. It is felt that having a system of monthly reports as at present, a discrepancy of over $8,000,000 between the books of the bank as reported to the government and the actual assets could not be possible.

There has been some rumor of action being taken by the shareholders against the directors of the Merchants Bank but this is hardly likely in view of the court's decision freeing Sir Montagu Allan and D. C. Macarow.

The outstanding importance of the Merchants Bank case is that it has come at a time when revision of the banking law was in the air and will add weight to the side of those who attack the present law. On the other hand there is little of a constructive character that can be found in it. Numerous weaknesses can be found in the system of State inspection as carried on across the line and state banking itself can scarcely be favored in view of recent developments in other countries.

## HIGH TAXATION

An unusually illuminating statement on the subject of taxation has come from Frank Bailey, vice-president of the Title Guarantee & Trust Company of the United States. He deals with world conditions in this regard, and, incidentally, points to the universal demand for relief from the present onerous taxation which is curbing prosperity in so many countries. After quoting figures relating to the growing expenditures in various countries. Mr. Bailey points to the example of the United States, which is facing a deficit of $650,000,000 in its present budget, but which, instead of reducing expenses, is now groping for more taxes. Taxpayers, he says, are asking there, as everywhere else, is all the money being handled by governments well spent? They want to know where the burden is to end and if a citizen must work for the State entirely, only reserving enough for a living for himself and family. In this connection he points out that "if capital cannot be increased in the hands of the individual, then the advancement of the world is going to be retarded." Mr. Bailey's conclusions are as follows:—

"In any event, it is apparent, even to the unthoughtful, that it is extremely important for the governmental expenditures to stop and stop quickly. This is the cry of the citizens of every land. People, some time or other, will be tired of being sacrificed for votes. It is all right to render unto Caesar the things that are Caesars, but Caesar is now taking more than his right."

In relation to the foregoing a recent campaign speech of Stanley Baldwin, the British Chancellor of the Exchequer, also serves to redouble the attention that at this time is being paid to the problem of taxation. Among the hundred and one causes of our troubles today, he said, heavy taxation stood out. He pointed out that it cripples industry and presses with crushing weight on the poor. It did not matter, he said, whether a poor man was directly taxed much or little; the incidence of taxation was expressed in his wages. Mr. Baldwin emphasized the fact that taxation could only be reduced by lessening expenditures and that was the great task which lay before the Government. It is the task which lies before every government, for it is the outstanding cause of the restlessness that is apparent among those who are, and should be, the backbone of lawful and ordered progress. The people want an end put to experimentation in legislation, with its costly attributes. They want ordinary, common business sense introduced into the duties of administration.

Here in Canada we have the same development. Only a decade ago this country's tax burden was light, but since then the old taxes have been increased and numerous new ones, vexatious as well as expensive, have been introduced. Gradually we are taking on the peculiarities of old as distinct from new countries, with some of the characteristics of those of socialistic tendency.

The name of Sir Montagu Allan appeared on November 13th in the list of passengers due to sail on the 14th, on the Empress of France. His acquittal on the charge of signing a false return of the Merchants Bank was announced on the same day. Evidently Sir Montagu did not have any doubt as to the outcome of the trial.

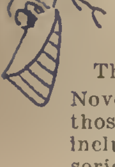
### TAKING STOCK.

"How much liquid assets have you " asked the banker.

The would-be borrower cautiously replied, "About a case and a half."

### NEW SAVINGS BRANCH

On November 28, the Province of Ontario Savings Office opened a downtown branch in Toronto, in the new "Government Savings Building" at the corner of Bay and Adelaide streets. An experienced bank manager is in charge.



### QUEBEC BLUE GOOSE

The Quebec Pond of the Blue Goose met on November 13. Gander G. C. Morris addressed those present on the advisability of the Pond including in its program for the season a series of educational courses. Gander F. E. Dufty also spoke in favor of the subject. On a vote being taken the members present signified their unanimous and hearty accord of Gander Morris's suggestion. A committee was formed to take the matter in hand, consisting of Ganders A. M. Stewart, chairman, Dufty, Beauvais and Cherry.

## *Personal*

T. H. HUNT, K.C., formerly corporation counsel of Winnipeg and now of the firm of Hunt, Auld and Warburton, has been appointed to the board of directors of William Gray & Sons, Co. Ltd. and of William Gray, Sons, Campbell Limited. The head office of these firms is in Chatham, Ont. He has also been appointed a director of the Sawyer Massey company with head offices in Hamilton.

WILFRED B. BEATTIE, a managing director of the firm of Beattie, Child & Co., reinsurance brokers of London, sailed for England on November 18, after a two-months' tour through Canada and the United States. Beattie, Child & Co. are fire reinsurance underwriters and managers in London of the Globe & Rutgers Insurance Company, the Canada National Fire of Winnipeg, the Compagnie Generale de Reassurances of Roubaix and Paris, and the Skandinavian Lloyd of Copenhagen. The firm does not transact marine business, but transacts large treaty and faculative fire reinsurance accounts; also excess loss accident and casualty reinsurance with tariff companies in England and on the European continent.

## *Obituary*

J. M. ANTONIO ROBITAILLE, formerly manager of the branches of the Banque Nationale at Maisonneuve and at Papineauville, died in Montreal on November 20th.

JAS. A. DEVENNY, clerk treasurer of the town of Renfrew for the past ten years, died in Montreal on November 25th.

### THE MERCHANTS' BANK

Montreal Gazette, November 14:—"The judgmen of the Court in the action against Sir Montagu Allan accords with the general expectation. From the day of disclosure of the losses incurred by the Merchants Bank, wide sympathy enlarged and deepened by his frank, manly attitude at the meeting of the shareholders at which the condition of the bank's affairs was revealed. The promptitude and discretion of Sir Montagu were, indeed, instrumental in saving a situation that indiscretion might easily have made serious, and from the beginning it has been felt that wherever censure should fall it was not fairly to be meted to him. Judge Decarie, who heard the case, has honorably acquitted the late President, and has paid tribute not only to Sir Montagu's innocence of culpable negligence, but to the skill and vigilance with which he labored to avert grave consequences to shareholders. The judgment concludes with these words:—

" 'The President cannot be charged with negligence in not doing what was impossible for him to do.

" 'In this occasion the President used the greatest possible diligence with the greatest prudence.

" 'He was facing very heavy responsibilities towards the bank, its directors, shareholders and despositors.

" 'His conduct in these grave days was that of an honest man, of an honourable man. As soon as he could, at great sacrifice to himself, he saved his bank from what he feared to be a great disaster.'

"The last fifteen months must have been months of acute anxiety and distress for Sir Montagu, and there will be general satisfaction that the proceedings taken against him in conformity with the provisions of the Bank Act have terminated in his honorable acquittal."

**Toronto Globe, November 15:—**

"The Montreal Gazette rejoices in what it describes as the honorable acquittal of Sir Montagu Allan. Without commenting on this particular sentence, we are faced with the extraordinary situation that a bank can be wrecked by the grossest mismanagement, to say the least, and nobody is to be blamed. Clearly, if the blame cannot be laid at the doors of any individual, the law must be at fault. Surely banking is not to be regarded as a business in which such collapses as that of the Merchants are to be regarded as ordinary and expected incidents.

"The more reasonable conclusion is that the law is defective, and that the shareholders should be protected by a better system of inspection. Bankers, on the whole, are inclined to resist Government inspection as futile and likely lead to a false sense of security. Then what do they propose as a remedy? The public are not clear as to what should be done. They are dissatisfied and bewildered. They look for light and leading from those bankers and leaders in business, and so far none is forthcoming."

**Montreal Star, November 14:—**

"When the startling news went abroad that the Merchants Bank of Canada had been sold for amalgamating purposes, there was universal regret at the disappearance of an old institution, one well established throughout the Dominion, with active, profitable connections in nearly every country in Canada.

"By those unacquainted with the facts at the time of the disclosure of the sale the inference was drawn that the Bank's capital must have been seriously impaired to justify such a step. When it was discovered that even under a drastic accountancy cutting-down of the surplus, the Bank's capital was intact, unimpaired, and ever and above its capital was a surplus of $1,500,000, there was widespread dismay and well founded indignation at the surrender of the property.

"Under careful direction the shares were well worth 150.

"The recent prosecutions under the Banking Act have not diminished the indignation of the public. In effect Judge Decarie's judgment declares that in a legal sense the erring report was not known to be false," says The Star.

"It was false and known to be false. But, as a result of collusion or otherwise, branch reports concealed facts that were known to directors and ignored by them.

"To have secured a conviction against two of the bank's officers on a question of bookkeeping technicalities would not in any sense have met the situation as it should have been met, squarely and fairly in the interest of the country. If errant directors can rely for protection on the use of filmsy technicalities, there is no security for the shareholders, no ground for trust, and public confidence will be shattered.

"A transaction such as the sacrifice of the Merchants Bank, effected by a small group of its directors, while a majority of them were kept in ignorance of the scheme. bewilders the public, and the spirited condemnation of the transaction throughout the Dominion proves that there is appreciation of the extent of the mischief likely to ensue from such an avoidable calamity.

"The revelation regarding the Thornton Davidson & Company's transaction with the bank proves that there was bad banking and woeful error of judgment in the failure to recognize the fact that the brokerage firm was being bolstered and manipulated by dangerous men using that agency to unload worthless stocks. The Davidson loss and another bad debt were in themselves conclusive proof of the absence of discretion, but these losses, known to some of the directors for months, were no justification for the panic that led to the sacrifice.

"If the three directors instrumental in the surrender had taken half the pains to save the bank that they did to get it off their hands the institution would have been saved.

"If the three manipulating directors had used reasonable arguments with the Finance Minister at the time to help to induce the Government to get the bank through a rough spot instead of pressing him to acquiesce without investigation in a sale he knew nothing about, and if Directors Allan, Ballantyne and Wilson had sought in a courageous way to get from the other banks the support to which they were entitled and which doubtless would have been given, the bank could have been continued as a promising institution.

"It should have been realized by the Government that, as a rebuke—if it was intended as a rebuke—of the conduct of a section of the bank's directors, and as a deterrent to other directors, the recent prosecutions were utterly inadequate and futile. If the object of the trials was to propitiate the victims and to strengthen public confidence, they have failed.

"In the meantime huge expense has been incurred for the extended trials. and the sham claim will be set up that justice has been done to the shareholders and public sentiment. The Merchant's Bank sacrifice will live long in the minds of the people of Canada as a cowardly transaction, and the court procedure as a fiasco, while 20,000 direct sufferers, many of them distressed widows and orphans, are left to mourn without a remedy."

**Bonds to Yield 5.50% to 7.10%**

The former are Government obligations, the latter Corporation securities.

The spread in the interest rate is explained by the difference of security. Nevertheless the Corporation bonds may be conscientiously recommended, when the larger interest yield and the financial position of the companies are considered.

Write for particulars of both bonds.

## Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make, yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

# Investment Opportunities of the Present

By WILLIAM LEWIS EDMONDS.

It may be taken for granted that the funds which on December 1 came into the possession of holders of the 1922 Victory bond who had not accepted conversion proposal of the Gvernment will induce promoters of new oil and mining ventures and dealers in securities of a purely or even gambling description to inaugurate an active campaign having for its purpose the turning of this available cash into their channels.

The aggregate amount paid on December 1 to holders of the 1922 Victory bonds who had not converted to the new issue is estimated at approximately $78,000,000. And while it is generally held "on the street" that a substantial proportion of the unconverted bonds were held by institutions and corporations, who had acquired them for short-term investment, yet it is generally conceded that the amount of cash paid individuals, and therefore available for re-investment, must in the aggregate run into large figures. At any rate sufficiently so to excite the interest of those who have stocks or bonds of a questionable character for sale.

Against a speculative security that has substance and moderate prospect behind it nothing can be said. But it is well that those who are just in receipt of funds from the 1922 Victory--a gilt-edged investment--should bear in mind the fact that if they desire to re-invest in a security that will be an assured source of income purely speculative issues should be taboo, unless, of course, the money at their command is sufficiently large to permit them to "take a chance" without crippling their income.

### Government and Municipal Securities

Naturally, among securities of the gilt-edged class the most outstanding is Dominion Government bonds. This at present is particularly true of the 1934 Victory, which is today selling at a price that assures a yield of close to 5½ per cent. The 1924 Victory, while, at its present figure, providing a higher yield and having the same security behind it as the former, is on the other hand less attractive, because of its short-term maturity, from the investor's point of view. Ranking second only to Federal issues, are provincial government bonds, which can be obtained to yield slightly over 5½ per cent. Then there are government guaranteed bonds. True, there are investors who will not, scarcely under any circumstance, buy bonds of this description. But in the final analysis, having the government guarantee behind them, they are just as safe as direct obligation issues. Having a narrower market, and being in consequence in less demand, they naturally can be obtained at a price that ensures a slightly higher return than direct obligation issues. This applies to both Federal and provincial guaranteed bonds.

Municipal bonds as a rule afford a safe and sound investment. The fact that trustees of estates are permitted by law to invest in his form of security, provided the issue is of a municipality whose financial position is according to specified standard, is proof of this. Unfortunately there are a few municipalities whose financial position has been impaired of late by unwise ventures in electric railways and other forms of public utilities and excessive expenditures in the erection of school buildings. But taking Canadian municipalities as a whole, their financial position is strong. Under advisement of reliable brokers the investor will however experience no difficulty in securing municipal bonds of the safe and sound description that will yield 5½ to 6 per cent., under present market conditions.

### Publi lities.

Public utility i e well worth the in-
vestor's attenti g industrial ventures
of the last d none has made more
substanti those in the public
utility arly those engaged in
th o-electric energy. A
leading American fin-
ties cover the princi-
ed a statement cov-
up comprising fifty
r and light com-
gas companies—
ing with 1921.
gross and net
ring each of
pre-decessor.
with which
new enterprises are being launched, it follows that all public utilities do not yet rank under the investment class. Consequently the investor should make his purchases under the guidance of a reliable broker. Few street railway securities, for example, can be accounted in the sound investment class; due in certain instances to their financial position and in others to irritating legislation or interference by governing bodies with their operation. There are several sound public utility bonds which can be obtained to yield all the way from 5¾ to 6¼ per cent., although in the case of those of the highest grade the greater security afforded means a slightly lower return.

### Industrial Securities.

In the industrial group there are, notwithstanding the period of depression through which they have been passing the last couple of years, a number of attractive investment issues, and particularly those of corporations that have successfully weathered the period of storm and stress, and during a substantial period of time have regularly met dividend and bond payments. Bonds of industrial corporations which are in this fortunate position can be bought at a figure to yield 6 to 6½ per cent. With the general business situation of the country improving as it is, a stronger market for industrial securities may be anticipated in the not distant future.

A security which is not a great deal in evidence on the Canadian market, but one whose soundness is unquestionably good, is the debentures of loan and trust corporations. They may not be as liquid in the ordinary marketable sense as government and municipal bonds, but they are held in such high estimation that the banks readily accept them as security for loans. The yield from this class of investment is 5½ per cent. Then closely akin to it is the guaranteed investment receipts issued by trust corporations. They have a maturity of three to five years and yield at the present time 5¾ per cent., with interest payable half yearly.

### Mortgage Loans.

Mortgages, because of the yield they return and the quality of the security they afford, are naturally attractive to a great many investors. During the last few years, owing to the flood of Victory bonds on the market, this form of investment has been receiving less attention than in pre-war times. The swing, however, has for some months been returning to the normal point and good mortgages are readily obtainable to yield the investor 7 to 7½ per cent. Then there are now available on the Canadian market first mortgage serial bonds, whose security is based on a direct first mortgage and charge on such large city central properties as professional and business office buildings, and give the investor a return of 7 per cent.

Bank stocks are well worthy of consideration by the investor. Although the chartered banks have experienced reduced profits during the recent period of depression, they have suffered less in this particular than any other group—industrial or financial. They have been able to make their customary disbursements to shareholders and strengthen their rest account and maintain a strong position in respect to liquid assets.

While there are gold and silver mines whose stocks afford a sound investment, the number that are purely speculative is legion.

Investors whose income from their ordinary vocation is sufficient for their ordinary requirements may increase their savings by purchasing good discount bonds at, say around 85, and which are payable in par at maturity. On the other hand, it is considered more advantageous for the investor who is either partly or wholly dependent upon interest returns for his necessities to buy 6 or 6½ per cent., long-term bonds at a premium. True, he may today pay 110 and receive but 100 at maturity, but in the meantime he has enjoyed an income from his investment than might otherwise have been the case.

Holders of funds derived from the maturity of the 1922 Victory bond are strongly advised, when re-investing, to make their purchases through reliable brokers and bond dealers. Being experts, they are able to sift the chaff from the wheat, and thus save the investor from purchasing the former when it is the latter he wants. Daily newspaper market reports are all right as a source of news, but it is scarcely wise to take them as guides to safe and sound investments. Neither is it advisable to hold funds in reserve pending the advent of a lower price in a desired security, for not only may his hopes be unrealized, but in the meantime he may miss some good things his broker has offered him. After all, buying a long term bond within a fraction, or even a point, of the bottom of the market is a matter of little moment.

---

## INTEREST OF BONDHOLDERS PROTECTED.

### Dominion Government Disallowed Act of Nova Scotia Legislature Transferring Property

The Dominion Government, by Order-in-Council, recently disallowed an Act of the Nova Scotia Legislature of 1921, regarding certain gypsum properties in that Province.

In 1911 W. Fred Sparrow and Francis McNeil carried on business at Montreal as building contractors. A few months before the firm assigned for the benefit of their creditors, a sum was borrowed from Molsons Bank with which to purchase a gypsum deposit at Island Point, Victoria County, N.S. Francis McNeil went to Cape Breton and paid the purchase price to one McLeod and had the property transferred to Jane McNeil, a sister of Francis.

The curator of the insolvent firm brought action in Nova Scotia to set aside the deed to Jane McNeil. The trial judge decided that the deed was good because apparently Jane McNeil did not know that the money paid was really the firm's money which the judge found to be a fact.

An appeal to the Nova Scotia Supreme Court for the District of Montreal deeded the property to Gordon Fletcher who deeded it to Plaster Quarries Limited, composed of residents of Montreal, which company issued bonds giving a trust deed to Eastern Trust Company. Money subscribed by shareholders and the proceeds of the sale of the bonds, was spent on the property.

### Property Returned

In the spring of 1921 the owners learned through the newspapers that an Act had been passed by the Nova Scotia Legislature, without any notice to those interested vesting the property in Jane McNeil and barring any claim of Plaster Quarries Limited or others unless they commenced an action in the Supreme Court of Nova Scotia within one year. The Act was passed as the result of the activities of D. Stanley McNeil, assisted by the Great War Veterans Association, Stanley McNeil later receiving a deed of the property from his sister.

The passing of the Act was opposed by Honorable Mr. Armstrong, Acting Premier. Premier Murray was absent in the United States.

During the session of 1922 a bill was introduced which if passed would have repealed the Act but it was not passed.

### Bondholders Petition

Plaster Quarries Limited and Eastern Trust Company acting for the bondholders petitioned the Governor-in-Council asking for the disallowance of the Act. Sir Lomer Gouin heard the parties interested at Montreal and at Ottawa, and in addition to to considering the court records made careful inquiry into the merits of the case before recommending disallowance. D. Stanley McNeil appeared on his own behalf while Plaster Quarries Limited was represented by Eugene Lafleur, K.C., and Howard S. Ross, K.C., Eastern Trust Company was represented by Hector McInnes, K.C.

The applicants in their petition claimed that such legislation was a usurpation of the function of the courts and that the question at issue might be decided in favor of the owners by all our courts and yet the legislature might re-enact the Act complained of. Without disallowance there was the danger that investors would in view of what took place not feel very secure even in holding bonds.

---

## BONDS HAVE BEEN CHANGED

Some of the chartered banks have issued circulars to their branches notifying them that attempts are being made to unload the Victory Bonds—the proceeds of western bank robberies and that by means of chemicals registered bonds have been made bearer bonds. The change is cleverly done, and only by holding up the bond to the light can the use of chemicals be detected.

## Advice That Was Good

Several of our customers recently resold Toronto Suburban Railway Debentures to us at 81.

We sold these Toronto Suburban Ry. Debentures to our clients in December, 1921, at a price of 62.25. This shows an advance of 18¾ points, equal to a profit of over $300 on each $1,000 invested, in addition to the interest which the investor received regularly when due.

The above is only one example of several securities which we have recommended during the past few years that have shown similar appreciation in value.

For those who desire to purchase a sound security yielding a high interest return with good possibilities of increasing in value

**We recommend Canadian National Railway 4% Fully Registered Perpetual Debentures**

originally issued by the Canadian Northern Ontario Railway, secured by a First Mortgage on the line from Toronto to Ottawa, now OWNED and OPERATED by the CANADIAN GOVERNMENT.

### HOW ASBESTOS ROYALTY OPERATES

All Arrears Must be Paid Before Operators Benefit From New Rate.

The Order in Council concerning the royalty on asbestos in the Province of Quebec, recently published in the Official Gazette, refers in part to the fact that in view of the depression prevailing in the asbestos industry and the weaker demand for this substance on the part of the manufacturers, it is temporarily expedient to reduce the royalty collected and the order-in-council imposing a royalty of 5 p.c. on the gross value of the asbestos produced and sold at shipping points is repealed and the following clause substituted:

On all asbestos produced by the mines in the Province of Quebec, between the first day of January, 1922, and the first day of January, 1924, a royalty shall be imposed and collected of two and one-half per cent (2½ p.c.) on the gross value of all asbestos produced by the mines and mills of the Province. The Department of Colonization, Mines and Fisheries shall have charge of the collection of this royalty.

### MUCH WHEAT BOUGHT

According to an announcement on November 14, by A. Macheras, Consul-General of Greece, in Montreal purchases by the Greek government of Canadian wheat this year have totalled 32,140,000 bushels, or 80,353 long tons, all of which were shipped through the port of Montreal. Most of the wheat purchased was No. 2 Northern.

# Group Insurance an Example of Humanics

BY RANDOLPH S. MORTLEY

The universal Kinship of humanity is nowhere more strongly realized than in the truly cordial, co-operative relations between employer and employees, brought about and fostered by Group Life Insurance. The most successful salesmen of to-day recognize that this great fact is becoming better understood and appreciated by insurers and their beneficiaries. They realize that the fundamental, most enduring benefits to the employer from Group Insurance are derived only from the absolute assurance he gives his employees that they and their families will be adequately provided for in the event of that most dreaded of contingencies, the death of the family's wage-earner, before he has had opportunity to prepare them against the sad event. Business and other benefits are purely incidental to this one,—summed up in the reputation he establishes of caring for all his employees and their dependents after they can no longer serve him. He must not, however, consider that Group Insurance provides a substitute for adequate wages, sanitary, comfortable working conditions or fairness and justice in his relations toward them. Any concern who does not provide these had better not spend money on Group Insurance, which only works out efficiently where the employer is genuinely interested in the welfare of his men,—anxious to help them in every way he can to carry their burdens, and make their lives brighter for being associated with him.

### Discharges an Obligation.

Employers bear a moral obligation toward those who have long and faithfully labored with them in the upbuilding of their enterprises; and the vast majority who recognize this obligation and interest themselves in the social and moral well-being of their employees and their families, find in group insurance a satisfactory method of discharging it. In rendering this service they naturally realize increased loyalty and efficiency on the part of the employees, making it a profitable business investment which fully justifies the comparatively small cost, usually borne by the employer. This form of insurance, then, protects the lives of the employees and their dependents of any corporation, firm or single employer, and in most cases includes indemnity against death, accident, sickness, or permanent disability. A group policy must include 50 or more persons to be covered; the insurance companies should have seventy-five per cent. of the total staffs, to protect them against the evil of selection, as in writing this specialized form of insurance it is necessary to secure as large a ratio as possible, in order that the law of avenge may take effect.

### How It May Be Used To Mutual Advantage.

Group Insurance may be used as a reward for continued service; starting at a minimum amount of say $500, and increasing it by $100 or $200 a year until $1,000 or more is reached, the longer a worker remains in the same employ, the larger his insurance protection becomes. With proper care this method of making adequate provision for employees' protection has a good effect, and is to be received not as a charity, but as a benefit which properly belongs to the job. It also eliminates the common argument of trades union organizers—it is no longer necessary to join any trade union to secure the benefits of insurance protection.

### Why It Does Not Always Bring Good-Will.

But Group Insurance will not solve all the problems connected with administrating staffs of industrial workers; neither will group insurance alone always produce good-will. To illustrate, let us take a case in point, that of a large well-known manufacturer in Toronto, who for many years had given each member of his staff a "turkey for Christmas, or if not married, then a cash bonus, which amounted to a considerable sum. At a recent Christmas he sought to vary his plan, and without previous consultation, presented every member with a group life insurance policy, paid for one year. He overlooked the fact, however, that the great majority were yet strangers to the responsibilities of house-keeping, and so numerous were the protests and disappointments, that this large employer, finding that he had made a mistake, was compelled to withdraw his well-meant policies and revert to the good, old-fashioned Christmas boxes, in order to maintain "peace on earth, good-will toward men," and women.

These policies, nevertheless, have proven to be powerful factors in counteracting irritation and and the disentegrating influence of strikes and internal disputes, not only in industrial plants, but in large public services and national institutions also. And many striking examples could be cited of the value of group insurance, especially to men who could not pass a medical examination, for any form of insurance, and but for this protection must have died without leaving a dollar in the world to their families. More frequently than otherwise perhaps, it's incomparable benefits are witnessed in the startling, though common, cases of sudden death, but one of the most interesting stories, illustrating that often "truth is stranger than fiction" and how group insurance brings into action the best in human nature, is founded upon a chain of events occurring recently in Toronto:—At the Carls-Rite Hotel one of the employees, an aged Chinaman, Moi Joy, in his 80th year, was in charge of the barber-shop,—where he had been employed for 15 years, ever since he came to Canada,—when the proprietors, Messrs. Wright & Carroll, placed a group insurance policy for $1,000 on each of the lives of all their employees, Moi Joy had travelled extensively and being a great reader and speaking English well, he became a familiar figure to the hotel patrons, especially railway and business men; being well informed on conditions in the Orient, he was occasionally consulted regarding shipments to the Orient. Over a year ago Moi Joy received news of the death of his wife in his native town, near Hong Kong, which was later contradicted. Intimating his desire to visit China, Mr Carroll, his employer, offered him six months' leave of absence with salary, and transportation expenses to go back home. About the 1st February last, Moi Joy sailed from Vancouver for Hong Kong, but died aboard ship two days before it reached that port. Prior to leaving the old man brought his nephew, Moi Joy Jr., from Victoria, B.C., to fill his position at the Carls-Rite until his return, the nephew having been named as his beneficiary in the Insurance Policy. But, when Mr. Carroll tendered him the insurance company's cheque, Moi Joy, Jr. promptly replied: "Give it to his wife (my aunt)—me don't need it; she does." He also offered to pay all expenses of the cheque's transmission to the widow in China. In recognition of the young man's exemplary generosity, Mr. E. M. Carroll at once promoted him to a better position in the hotel. This well-known hotel owner, a very worthy citizen, asks a pertinent question, which life insurance men should be able to answer better than all others: "What percentage, how many of all the employees insured by their employers persist in carrying the needed insurance protection after they leave their employers and go elsewhere, or become self-sustaining?"

### Special Services to Policy Holders.

Some companies render greater service to their policyholders than others, but in proportion to the measure of altruistic spirit with which employer and employees enter into, will the harmonizing and humanizing result of group insurance be realized. In addition to free expert nursing service in cases of illness, and valuable health booklets for instruction and prevention of disease, at least one of the large companies maintains a special service bureau, which concentrates entirely on business and industrial problems confronting it's group policyholders in their respective lines, apart from insurance, to which they are automatically entitled. These welfare services are classified as "humanics." Some of the policyholders are of the opinion that these services should include the doctor in most cases of illness.

All large companies recognize that to succeed, their salesmen must sell group insurance effectively to the workers as well as to their employers. Certificates to meet the individual requirements of the latter, including a "letter to employees" giving full particulars of the policy, are placarded in the establishments alongside of photos of the cheques paid, each month. To meet the needs of all kinds of employees policies are issued for "wholesale insurance," "association insurance" "contract insurance," "pension," etc.

### Its Cost and Payments.

This "yearly renewable term" is said to be the cheapest life insurance in the world. The premiums are usually paid monthly, the cost being estimated at 2 to 3 cents a day per employee, for each $1,000, not exceeding (often less) one per cent. of the pay roll of an average plant. The rate increases yearly of course, but experience teaches that the total cost yearly to the employer does not vary much. The places of older men dropping out are filled by the younger ones, and the average age of a plant does not usually increase so that the expense as a rule does not exceed one per cent of the amount of insurance per year. In cases of total or permanent disability arising before age 60, the prem. payments are usually waived, and unless otherwise provided in the policy, six months later the company commences to pay monthly or annual instalments for each $1,000 to the employee insured.

**Payments:**—As in other forms of insurance payment of claims is made immediately upon receipt of proof of death, to the estates or beneficiaries, in one sum or in six or twelve monthly instalments, as directed by the employer, in the Policy. It is enerally believed to be advisable in most cases to continue the deceased employee's earnings to the bereaved family for a period —say a year—hence arrangements are made for the widow, mother, or sister, to call at the establishment regularly on pay-day to collect the pay envelop as the employee had formerly done.

### Its Origin and 10 Years' Growth

Originating in the United States, having been introduced by a Chicago industrial firm in 1912, Group Life Insurance has since been making steady progress in some other countries as well as in the States, where its growth in public favor has been rapid. In 1920 a few of the larger Canadian companies began to write it, and were sufficiently encouraged that year to assign specially-equipped salesmen to this department. In 1922, however, owing likely to the trade depression their group business fell off remarkably; in 1922 the Sun Life, Canada Life, and Great West, and three large United States companies—Metropolitan, Prudential, and Aetna—report the demand for this business much more active, and business steadily increasing. To quote them,—"group insurance is both growing and sticking." It is now being sold to provincial governments and municipalities in Canada as well as to industrial, and business classes. For the first half of 1922 the U.S. companies showed an increase of $46,000,000 or 112 p.c. over 1921 for group business and it is expected that Canada whose total group business in force on 31st December last was $76,647,919, will show a corresponding increase at the end of this year.

---

## LIFE INSURANCE BENEFICIARY

Because proof of the acceptance as beneficiary of an insurance policy could not be legally made, the Quebec Court of Appeal recently confirmed a judgment of the Superior Court and maintained the widow of Armand St. Aubin in her claim for her husband's insurance, which had been made out in the name of his mother.

St. Aubin took out two policies, aggregating $1,500, in 1914, naming his mother as beneficiary. On October 18, 1918, he was married, and the following day was taken ill with the flu, and three days afterwards he died. On his deathbed he made a will in which he revoked the nomination of his mother as beneficiary, and named his wife in her place.

The boy's father, acting in the name of his wife, contested the payment of the policy to the wife, and the Supreme Court held that, in absence of written proof that the mother had actually accepted the beneficiaryship, which would be required by civil law, the wife was the rightful claimant.

The Court of Appeal, Justice Letourneau handing down judgment, came to the conclusion that, while the mother's acceptance was, in fact, shown to exist, still, in view of the law of proof, there would have to be written evidence of such before it could hold against the husband's revocation of his first intention.

Nov. 26th. Vacant house owned by Henry Taylor, at 86 Blythewood avenue. Loss $4,000.

**Weymouth, N.S.** Nov. 20th. Barn belonging to Reginald Milsom.

## DEFINITION OF "ACTUAL COLLISION"

### Courts Exclude Case Where Automobile Turns Over When Being Driven.

In a recent action (Sowards v. London Guarantee and Accident Co.) upon a policy of insurance against damage to an automoble, the facts were that early in the morning of the 1st May 1921, an automobile belonging to the plaintiff was driven by his son upon a public highway at a rate of about 35 miles per hour. One of the wheels ran into a hole or rut in the road, the driving wheel was wrenched from the driver's hand and the automobile swerved to the right and fell in the ditch on its right side. Still proceeding forward under the force of inertia, a wheel struck a stone, which threw the automobile over on its left side, on which it proceeded a litle farther but finally stopped through friction, with its nose some 5 inches short of a stone heap, near which was a fence. Neither stone heap nor fence had anything to do with the car stopping or with the accident, cause or damage—practically all the damage was caused at once when the car landed on its right side and nothing which took place subsequently was of any consequence.

Damage to the amount of $2,666. was occasioned to the car; and the plaintiff claimed the amount from the defendants. The policy covered "damage to automobile........by being in actual collision........with any other automobile, vehicle, or object . . . . . ."

### Was It "Collision?"

It was argued that the damage was caused by the automobile being in "actual collision with" an "object," i.e. the side of the hole or rut and then the earth on the side of the road.

The plain object of this insurance contract was to provide for damage to the car either itself moving or standing on the surface of the road and running into or being run into by another object of the like nature, moving or standing. It was not intended to provide for defects in the road bed. "Collision" means the clashing together of two objects; but no one would call the running of a car wheel into a hole or a rut a collision of the car. The accident which happened was not insured against.

### Illegal Speed

The defendants also set up the illegal speed at which the car was running.

By sec. 11 (1) of the Motor Vehicles Act it is made unlawful to drive any motor vehicle at a greater speed than 25 miles an hour.

If the policy had expressly provided for insurance when the car was running more than 25 miles an hour it would have been void; nor will an implied contract stand on higher ground. This policy must be read as though it had expressly provided that it was not to apply to accidents at illegal speed.

## CHANGE IN USE OF PROPERTY

### Claim For Fire Insurance Vitiated by Failure to Notify Company.

The Supreme Court of Nova Scotia has recently held that where buildings are insured against fire notice of a change in the uses to which they are put must be given to the insurance company in order to continue its liability.

In the case of Kaurzswki v. Metropolitan Fire Assoc. K. insured his dwelling house and also a stock of groceries in a separate building by separate policies of fire insurance. Without notifying the company he removed the goods to his dwelling and a fire taking place, both the goods and the dwelling were destroyed.

The trial judge gave judgment for K. but the Supreme Court on appeal, said:

"It is clear on the evidence that the occupation of the premises No. 44 Tupper St. as a store constituted a change material to the risk which vitiated the policies on the building under the conditions of the policies unless notice in writing of the change was promptly given to the insurers and no such notice was given.

"So far as the insurance on the stock of groceries is concerned, the policy by its express terms applied only while contained in the two storey frame felt paper roofed building situated and being No. 48 on the south side of Tupper St. The loss occurred after the goods had been removed from No. 48 and while they were in No. 44 and the loss was therefore not covered by the policy."

# *Insurance Licenses and Agency Notes*

The branch of the Great West Life Assurance Company in Edmonton has moved from 306 C. P. R. Block to 906-7 McLeod Bldg.

The St. Paul Fire and Marine Insurance Company has been licensed to transact Explosion insurance in Canada, in addition to the classes for which it is already licensed.

The Royal Insurance Company, Limited, has been granted a license authorizing it to transact in Canada the business of Sprinkler Leakage insurance, in addition to the classes for which it is already licensed.

The Franklin Fire Insurance Company of Philadelphia, Pa., U.S.A., has been granted a license authorizing it to transact in the Province of Manitoba the business of Fire insurance.

The Dominion Gresham Guarantee and Casualty Company of Montreal, Quebec, has been granted a license to transact the business of Fire insurance in the Province of Manitoba in addition to other classes of insurance which it now transacts.

The Dominion Gresham Guarantee and Casualty Company has been licensed to transact in British Columbia the business of Fire insurance.

The Mount Royal Assurance Company has been licensed to transact in British Columbia the business of Plate-Glass insurance.

## GOLD SHIPMENTS

The temporary cessation of gold shipments to Canada, says the New York Times, is immediately traceable to the decline of Montreal exchange below the "gold shipment point," in other words, below the point at which shipment becomes a profitable operation for the banks. They place this as 5-32 of 1 per cent premium. The Canadian exchange premium on Nov. 16, was 3-32, or1/8 below the point where money can be made by the transfer.

Dealers said that one day's interest on balances in New York might easily cause a shift in the premium to the point where gold shipments would again represent a possible source of profit. Canada has thus far taken more than $17,000,000, gold on this movement, which largely explains the week's $6,907,000 decrease in gold holdings reported on Nov. 16, by the Federal Reserve, in the face of substantial gold imports from Europe.

## BIG CLAIM IS REDUCED.

### Insurance of $55,000 Was Carried, But Policy- Holder will Get only $16,651.

Involving a claim for $55,000, one of the biggest fire insurance cases in the history of Saskatchewan was brought to a conclusion on September 25, in the Court of King's Bench in Moose Jaw, when, as a result of the jury's findings, Justice Embury reduced the claim of the plaintiff, M. Loutzenheiser, to $27,769. Under the 60 per cent. clause, Loutzenheiser will only be able to collect $16,651.

The defendants were the Atlas Insurance Company, Nova Scotia Fire Insurance Company, Rochester Underwriters, Glens Falls Fire Insurance Company, British Colonial Fire Insurance Company, Canadian Fire Insurance Company and the London, Liverpool and Globe Fire Insurance Company.

The insurance to the total of $55,000 was placed by the plaintiff on his barn, silo, milk house, fixtures and chattels on the farm in the Moose Jaw district, with several companies. Fire destroyed the premises within a few weeks after the insurance had been placed.

The defence endeavored to set up fraudulent misrepresentation in the proofs of loss and while the jury found misrepresentation with respect to the dimensions and spacing of the buildings, they found there was no intent to defraud.

The insurance was placed with two agencies and while the jury found that the plaintiff failed to disclose to the one agency that he had insured with the other agency, such failure to disclose was not held by the jury to be the result of any fraudulent purpose.

The valuation placed on the property destroyed was as follows: Barn silo and fixtures, $18,924, after deducting depreciation; chattels, $8,845; making a total of $27,769.

### BLUE BIRD ASSIGNS

The Blue Bird Transit Co., Limited, one of the bus services operating on the Toronto & Hamilton highway, has assigned to J. Cowan White, authorized trustee. The meeting of creditors has been fixed for November 23. Although no official figures are available as to the assets and liabilities of the defunct company, it is understood that the former are very small and the latter quite large. The preferred creditors of the company may not realize in full. It is understood that seizure of the busses has been made by those holding liens thereon.

### RECORD OUTPUT

During the month of October, the British Empire Steel Corporation plant at Sydney, N. S., turned out 29,000 tons of steel, said to be the largest ten furnace production in the history of the company, and to break a record of sixteen years standing. The largest previous output was in 1906, when 26,504 tons were produced in a single month. The billet mill also made a new daily record, recently, when 1112 tons of billets were turned out.

### AMERICAN SHOW CARD SYSTEM

The American Show Card System, Ltd., has been formed under an Ontario charter with authorized capital of $1,000,000. J. H. Walker is manager. All capital stock, he states, has been absorbed privately.

### MILLS TO EXPAND

It is reported that Price Brothers Company contemplates the enlargement of its mills at Jonquiere and Kenogami. This was arrived at by the company, it is said, owing to the great development in the harbor of Chicoutimi of late, as all the production of the mills as they exist today, is sold in advance in Canada and the United States.

Many shipments of pulp and paper are made from the port of Chicoutimi to Europe and the Price Company will refuse any offer to augment its production.

### BRITISH COLUMBIA ELECTRIC

The British Columbia Electric Railway Company has contracted to supply the Britannia Mining and Smelting Company with 4,500 horse power and is about to begin the construction of a 30 mile high tension line between Vancouver and Britannia Beach. The Britannia Company's own plant was subject to dry weather spells and the British Columbia Electric company was able to offer low rates which resulted in a contract. The mining company is just completing a new concentrator of larger capacity and is about to extend its workings. The high tension line will cost $150,000 and will be completed by the summer of 1923.

## UPWARD TREND CONTINUES

### Employment Situation During September Shows Fair Improvement.

The employment situation continued to show fair improvement during September, although the curve of employment did not exhibit as decided a rise as in September of last year, according to the Employment Service of Canada. The general expansion since April, however, has been considerably more pronounced than in the summer of 1921 and the index number for the month under review continued to be several points higher than in the corresponding period of last year.

Returns tabulated from 6,250 concerns show that, of the nominal pay-roll of 780,477 persons, 766,635 were actually at work on September 30, as compared with 761,153 at the close of August. The index number, therefore, showed a small increase, rising from 93.7 on the latter date to 94.6 for the period being surveyed. In September of last year it had stood at 90.2. The most pronounced expansion recorded during the month under review ocurred in highway construction and maintenance, logging, in the textile industries, in railway transportation and coal mining. Improvement, moreover, was registered in chocolates, rubber, musical instruments, paper products and printing establishments, as well as in several other branches of the manufacturing division, in building construction, trade and on street railways. On the other hand, employment in sawmills continued to decrease rapidly and the construction and maintenance departments of the railways reported considerable curtailment of operations. In addition, lessened activity was indicated in automobile factories, fish canneries, in shipping and stevedoring and hotels and restaurants.

#### Manufacturing

A rather slight decline in employment was indicated in the manufacturing industries during September, largely on account of seasonal losses in sawmills, supplemented by considerable contractions in automobile concerns and by decreases on a somewhat smaller scale in fish canneries, glass, brick and tile plants, in copper smelters and refineries and in kodak concerns. Improvement, however, was registered in factories producing garments, hosiery and knitted goods, confectionery, biscuits, musical instruments, rubber goods, in printing shops, mineral products and electrical apparatus plants. In some cases, notably in textiles and rubber, the gains indicated recovery from previous losses due to temporary shut downs. Returns were tabulated from 4,094 manufacturers employing 423,104 persons, as compared with 424,466 employees at the close of August. The general tendency in September of last year had been upward, chiefly on account of the re-opening of the railway car shops, which at the close of the preceding month, had experienced one of their frequent shutdowns. Employment for the period under review, however, was in greater volume than in September of last year, the index number standing over 5 points higher.

#### Trade Unions

The trend of employment as reported by 1,477 trade unions having a combined membership of 161,182 persons, continued to be favorable during September, the index number standing at 97.2 as compared with 96.4 at the close of August and with 91.5 in September, 1921.

More employment was reported in all provinces as compared with August and conditions were also more favorable in every district than in September of last year.

---

## INCREASE IN OUTPUT

### Both Pig Iron and Steel Production Shows Substantial Increase

The production of pig iron in Canada during October showed an increase of 11,914 gross tons or 47.7 per cent., over the record tons in the previous month. The increased tonnage was almost wholly basic pig iron manufactured for use by the firms reporting. The production of this grade increased from 16,976 tons in September to 28,922 tons in October or 70.4 per cent.

Although the October production showed an encouraging increase and was the greatest since March of this year, when an output of 41,733 tons was reached, it was still below the monthly average for 1921.

#### Ten Month's Total

During the ten months ending October, the average monthly production of pig iron was 31,287 tons this year as compared with a monthly average of 50,673 tons in the same period last year. The cumulative output was, correspondingly 312,877 tons in the past ten months as against 506,730 tons in the first ten months of 1921.

The number of active furnaces at the end of October was unchanged at four, viz: one at Sault Ste. Marie, one at Hamilton and two at Sydney.

The production of ferro-alloys remained practically the same as in September, at 1,823 tons, comprised wholly of ferro-silicon of 15 to 80 per cent. grades. Of this amount 68.6 per cent was of 15 per cent. ferro-silicon.

#### Steel Output

The output of steel ingots and castings in Canada during October amounted to 52,735 gross tons, an increase of 47.3 per cent. over the September production of 35,787 tons. Basic open hearth ingots produced for further use by the firms reporting amounted to 50,851 tons in October as compared with 33,815 tons in September an increase of 50.4 per cent. The average monthly output of basic open hearth ingots during 1921 was 53,489 tons and for the first ten months of the current year averaged 37,052 tons. The month of October therefore showed a decrease of 4.9 per cent., from the average production for 1921 and an increase of 37.2 per cent., over the average for the first ten months of this year.

Basic open hearth castings made during the month amounted to 974 tons, an increase of 137 tons or 15.2 per cent. over the preceding month, and most of the production was made for sale.

#### Bessemer Declines

The output of bessemer castings declined slightly from 180 tons in September to 125 tons in October, a decrease of 30.6 per cent. Electric castings also fell off 10.6 per cent., the actual production being 831 tons in September and 743 tons in October.

The cumulative production of ingots and castings for the ten months of the current year amounted to 387.570 tons as compared with 549,792 for the same period of last year, a decrease of 29.5 per cent.

### MOVING PLANT

Announcement was made on November 12 that the lithographing firm of Lawson & Jones, Limited, of St. Thomas, is moving its plant from that city to Montreal the change to take effect in about two weeks. The change is made largely from the standpoint of economy, much of the manufactured product of the plant going to Montreal, while a large portion of the raw material also comes from that city. The firm expects to save $30,000 a year on freight charges. A factory building has been secured in the Outremont district of Montreal.

### SALMON CATCH

The salmon catch along the Canadian Pacific Coast to date totals 1,017,696 cases for all districts, according to the Dominion Fisheries Department figures. Sockeyes totalled 283,172 cases; red sprods, 31,665; pinks, 543,882; chums, 82,383, and the balance covered the white spring, blue back, steel head and cohoe packs.

### ENTIRE MATTE OUTPUT SHIPPED

For the first time in four years the entire matte production of the Mond Nickel Company, Sudbury, Ont., is being shipped out. On November 13, a shipment of 138 cars of matte totalling in the neighborhood of 5,600 tons, was sent to the seaboard for export to Wales, this being one car in excess of the October shipment. In September 140 cars were sent out.

Dr. V. C. Corless, manager of the Mond Nicel Company, recently returned from England and reported that conditions in the nickel industry are improving in so far as that country is concerned. An increased demand for the metal is apparent with recent price reductions, and by Dec. 1st the Mond Nickel Company refinery will be operating on the war-time basis.

### EXTEND TRADE WITH WEST INDIES.

At a meeting in the board room of the Canadian Manufacturers' Association on November 7, Montreal manufacturers met and discussed trade possibilities with the West Indies. Last year an extensive tour of the West Indies was made by a party of exporters and the meeting yesterday was a result.

The West Indian and South American field, it was pointed out, was one worth developing. More men should be sent to study possibilities. By doing this, it is thought, that the response of the southern people would be hearty. The position of the Canadian banks in the south, too, is very strong and this was another advantage.

E. C. Austin, Toronto, gave a talk on trade development between Canada, Colombia and Venezuela. These two latter countries, he said, are at the beginning of a period of remarkable expansion. The matter of trade development will be taken up with the Export Club of Canada by the secretary of the Canadian Manufacturers' Association for action.

### BOOST CANADIAN TRADE

The Department of Trade and Commerce has arranged, through Dr. J. W. Ross, its trade commissioner in Shanghai, at present in Canada, that upon his return to his post, arrangements will be made to open an exhibition and salesroom in Shanghai, in the interests of Canadian manufacturers and exporters. It is proposed that the department shall lease adequate accommodation wherein Canadian manufacturers and exporters who so desire may sub-lease space, making their own arrangements for sales representatives, who will at all times have access to the exhibition.

### ELEVATOR TO RE-OPEN

The Davidson and Smith Elevator in Port Arthur, which has been idle since the beginning of the 1922 grain season, will be operated again at once. The control of this house has been taken over by the Inland Sea Grain Company, a new corporation, and it will be operated under the management of C. P. Jones, formerly member of the Dominion Grain Board and now manager of the Consolidated Elevator Company.

### TO VISIT MEXICO

At a meeting of the executive of the Canadian manufacturers' Association at St. Johns, Que., on November 10, it was announced that manufacturers interested in Mexican trade would be given an opportunity of visiting that country as guests of the Mexican government next spring.

### PERMITS FOR WOOD CUTTING

An announcement is made in the Quebec Official Gazette that permits for the cutting of live timber in the Abitibi, Saint Maurice, Lake Saint John, Saguenay and Bonaventure regions and the cutting of burned timber or killed by insects in the townships of Varsan, Malartic and Fiedmont, will be sold by auction at Parliament buildings on December 12 next, commencing at 10 o'clock in the morning. The cutting rights over about 122 square miles of green timber will be sold and 37 miles of burnt timber, the permits being limited to three years.

**Justice to Small Depositors**

THE Province of Ontario Savings Office was organized to do full justice to the small depositor, who cannot afford to take any risks. In the Province of Ontario Savings Office he is guaranteed absolute safety for his accounts by the Government, while his money earns 4% interest compounded half-yearly—a rate higher than he could obtain with equal assurance of safety anywhere else.

And he may withdraw his money in whole or in part at any time. Write for our booklet.

WATERLOO - ONTARIO

COVERAGE ON TERM OR COINSURANCE PLAN

# *Municipal Finance*

**Victoria, B.C.**—Announcement was made on November 8 that total tax collections amounted to $1,300,000, or 81.83 per cent. out of a total levy of $1,588,572. Last year the levy was $1,415,000 and for the same period last year the taxes collected amounted to 76.47 per cent.

**Elmira, Ont.**—Application has been made to the Ontario Railway Board for authority to incorporate the village into a town.

**Hamilton, Ont.**—For the period ending November 14 the city had spent $2,108,318 out of a total appropriation of $2,614,501 for the year.

**Calgary, Alta.**—During the month of October the street railway system reported a surplus of $2,621, which reduces the deficit for the year to $15,772.

**New Toronto, Ont.**—The by-law to be submitted to the electors at the next elections, for a partial exemption of taxes on homes assessed at $4,000 or less, if carried, will mean a 50 per cent. reduction in taxes on 715 of the 723 homes in the town. The exemption is only on taxes for general purposes and does not apply to the school tax. Houses assessed at $2,000 will receive a 50 per cent. reduction, and different percentages of reductions have been arranged for houses assessed between $2,000 and $4,000. The loss in taxes will be made up by the taxes on vacant land.

**Montreal, Que.**—An increase of over $15,000,000 in the realty value of the city of Montreal is shown by figures just compiled at the City Hall. This is due principally to the impetus to building which has been given this year, which makes 1922 the best since before the war. The receipts of the water tax department during the week ended November 11 totalled $109,550. The total of water and business assessments this year is expected to reach $4,000,000.

**Hamilton, Ont.**—Collections of water rates have been decidedly satisfactory to date, according to figures compiled by the tax collector's department. The total to November 14 has reached $401,638, as compared with $364,326 for the same period in 1921. About $176,000 remains to be taken in if the estimates are to be reached.

**Montreal, Que.**—The realty tax of $1.35 per $100 of valuation will not be increased next year it was announced on November 14. The committee consider that, owing to various economies practiced this year and which can be carried in through next, there will be no necessity for an increased assessment rate. However, no reduction was promised.

**Whitemouth R.M., Man.**—In a statement for the first ten months of this year it is shown that cash on hand and in bank on December 31, 1921 was $903. Cash collected since the first of the year totalled $14,772, and notes discounted since December 31, 1921 amounted to $17,000 making a total of $32,676.

Expenditures during the ten months amounted to $32,125 and the amount of cash on hand and in bank on November 1, 1922 was $551. The total of uncollected taxes at the end of the ten months was $62,780. Debentures outstanding on November 1, 1922 totalled $24,683.

**Walkerville, Ont.**—The assessed value of property of separate school supporters is given in the annual financial report of the town as $435,227, on which a rate of 7.91 mills was levied.

The total debenture debt is $123,686. There is owing on notes for which debentures will be issued, school, $99,200; local improvement, $33,600, making a total of $132,800.

Revenue received to date this year totals $10,438. This total revenue is made up as follows: licenses, $1,559; fees and fines, $7,982; miscellaneous, $896.

The Walkerville Housing Commission has paid out the following amounts in connection with the one hundred houses built by the Border Housing Company: for repairs and debentures, $29,626; credit amounts paid to Border Housing Company, $11,453; total expenditure to date, $41,079. Debentures due on the houses in 1922 amounted to $30,145, making a total of $71,224. Payments received to date amount to $20,088, leaving a deficit due on the houses of $51,176 which amount is secured by the real estate value of the properties.

**Wetaskiwin, Alta.**—For the period ending November 14 total tax collections amounted to $83,000, leaving outstanding taxes amounting to approximately $20,000.

**Montreal, Que.**—Practically 25 per cent. of the city's total realty valuation is exempt from taxation, according to a report made by A. Souliere, revenue department of the city treasurer's office, for the year 1922. Of a total valuation of $941,058,154, the exemptons total $230,434,414, leaving an assessable amount of $710,623,690.

Details of the revenue obtained this year are also shown in the statement, which will form the basis of next year's budget. Realty, school, and special taxes netted $16,678,156, of which $9,208,823 was realized from the $1.35 per $100 property tax.

School taxes netted $6,298,153; special taxes, $261,962; snow removal tax, $323,326, and underground vault tax, $28,617.

Water taxes brought $2,334,276, and business taxes, with personal assessments, realized $1,858,855.

**Calgary, Alta.**—According to a statement prepared by Comptroller Wood and presented to Mayor Adams on November 15, the present net debt of the city is 59 per cent. of the borrowing power. The figures show that the assessment for 1922 is $66,231,112, and 20 per cent. of that, or the limit of borrowing, is $13,246,222.

The gross debt is placed at $23,377,828. Deducted from this are the following amounts:

| | |
|---|---|
| Electric light and power ........ | $2,585,495 |
| Street railway ................. | 2,365,174 |
| Paving ....................... | 100,000 |
| Waterworks ................... | 3,466,542 |
| Local improvement property share . | 4,446,365 |

This makes a total of $12,963,578 and leaves the total gross general debt, including the city's share, local improvement, hospitals and market, $10,414,250.

Other figures show that the net general debt, chargeable against borrowing power, is $7,886,614.

**Winnipeg, Man.**—In a statement submitted to the civic finance committee on November 17 it was shown that the city has expended less than half of the estimated year's budget, although uncontrollable items amounting to $3,799,078 are still unpaid. To Oct. 31 $4,288,303 had been expended. The school board's requirements amounting to $2,939,000, the municipal commissioner's levy, police, hospital fees, and fixed charges all remain to be paid, however, leaving a credit balance of $603,955 to take care of the controllable expenditure for the rest of the year.

**Ottawa, Ont.**—The board of control on November 21, after hearing a deputation from the Ottawa Housing Commission, decided that the city should at once pay the $22,000 due the Ontario Housing Commission. The city auditor and city treasurer will be asked to prepare a report as to the best method of further financing the Ottawa commission and the city solicitor will prepare the necessary bylaw for city council.

**Edmonton, Alta.**—City utilities have recorded a profit of $278,520 for the first ten months of this year, compared with $174,742 for the same period of 1921, according to figures given out on November 20 by City Commissioner Yorath. This amount is to be utilized for the relief of taxpayers by being applied on current revenue. The objective for this year is $320.000.

## CITY OF OTTAWA TAXES

Taxation cases by the city of Ottawa against Sir H. Egan, the Hiram Robinson estate, R. L. Blackburn and Russell Blackburn, were heard before the Supreme Court of Canada on November 8. The four cases were argued together and raise the question of the right to tax the several respondents in the assessment for 1921 on a dividend of the Hawkesbury Lumber Company, declared and paid in 1920.

The system of assessment in Ontario, it was stated, is to tax each ratepayer for the current year on the amount of the income of the preceding year. If it is less for the current year, the city refunds the difference.

The respondents claimed that the assessment was on the income for 1921, and an amount received in 1920, which would not accrue, could not be classed an income for 1921. Moreover, that the respondents afterwards returned part of it to the capital stock of the company, and became responsible for money borrowed for working operations.

The Court of Revision held the assessment good. Its decision was reversed by the County Court judge, and restored by the railway and municipal board. The judgment of the latter was in turn reversed by the Appellate Division.

## UNION OF MANITOBA MUNICIPALITIES

### Want Supplementary Revenue Act Repealed and Municipal Land Tax Reduced

The Union of Manitoba Municipalities held its 1922 convention in Winnipeg, November 7-9. Among the subjects discussed was that of income tax, but no resolution was passed. Some of the municipalities adjoining Winnipeg, however, are desirous of having such a tax.

### Resolutions Passed

A resolution calling for the repeal of the Supplementary Revenue Act, which came into effect in 1918 for the purpose of collecting money for war charities, will be presented at the next session of the Manitoba Legislature, following its adoption by the Union. It is a tax of two mills on a dollar on the total equalized assessment of the province, and at the present time the Provincial Government collects yearly more than $1,500,000 under this measure.

Expressing the opinion that the peak had been passed, and with careful and economical handling Manitoba would soon be on the level and starting to climb again, Hon. D. L. McLeod, municipal commissioner, told the delegates the total Manitoba municipal debenture debt is now $52,750,000. This includes $12,750,000 incurred by rural municipalities and villages and about $40,000,000 by cities and towns.

Abolition of the Manitoba Tax Commission was recommended in a resolution adopted at the final session. The resolution stated that the commission had been of "very doubtful, if any, service to the province," and had been maintained at a great cost to the municipalities. Leo. Donley is provincial tax commissioner, and if the Government accedes to the union's request, his department will be abolished.

Regarding the municipal land tax, which is now two per cent., and is collected by the municipalities and paid to the province, the following resolution was passed:—

"Resolved that the Unoccupied Lands' Tax Act be amended so that the rate be one-half of one per cent. and that said tax be henceforth retained by the municipalities that collect it."

### Heavy Debts Incurred

Sir James Aikins, Lieutenant-Governor, addressed the convention. He said:—

"The last decade has been one of personal and public extravagance and excessive expenditures. The luxuries of yesterday indulged in have in the pig-headed thought of many become the necessities of today, things without which they imagine they cannot successfully live. It is surprising how simply and expensively wise people can live if they only try. Many do not want to try and have not the courage to make the adventure or to make it cheerfully, but prefer the whine and grouch, and thus spread dissatisfaction and pessimism. Although my words would indicate a criticism of individuals, I really intend it to apply to public bodies who have control of expenditures.

"But, you may say, we have something to show for our expenditures or for the monies we have borrowed—roads, drainage, power lines, trams, fine school houses, good public buildings, and so on. So you have, but are they paying the interest on the debt or as they depreciate paying off instalments of capital? Are not the people paying too dear for their whistle? Has not the money expended become a debt which the people generally without any evidence of direct benefit grudgingly pay, sometimes with execrations? Are the people as a whole happier on account of that expenditure, or are they groaning under the debt burden?

"The people will stand a certain amount of yoke and burdens of service, but eventually they will rebel against it and demand a change. The people of Canada and indeed most of the nations are demanding a cessation of expenditures resulting in enlarged burdens."

Finances were also touched upon by Hon. W. R. Clubb, Minister of Public Works in the province. Mr. Clubb stated that to Aug. 31 there had been expended in Manitoba by the government and municipalities a total of $9,182,000 on roads of which amount the government contributed $5,128,000. The carrying charges on this amount absorbs the entire revenue from automobile licenses. There are today 305 miles of provincial highways, 250 miles of graded and gravelled roads, 1,760 miles of ordinary market roads and 850 miles of market roads which have been gravelled, making a total of 3,165 miles improved highways.

## MUST PRESERVE FORESTS.

### It Takes Seventy-five Years to Grow a Forest

"Our Government cannot be expected to take the proper steps towards preserving our valuable forests unless each individual in the country assumes his share of the responsibility by bringing his own influence to bear," declared Ellwood Wilson, chief forester of the Laurentide Pulp and Paper Company, at a meeting of the Montreal Rotary Club recently.

"Our natural resources will go only so far as we can enable them to go. It cannot be assumed that the vast timber supply which we praise will last forever for consumption of wood carries on in the lives of us all from the cradle to the grave. No matter how much metal may be used in the manufacture of commercial articles wood will always find it indispensible place in that manufacture and in the article manufactured."

"Many of us," he continued, "have come to the conclusion, unthinkingly, that the vast area over which our home extends is covered by forests from which to draw interminably. What wrong they do themselves and those who believe them. But much of that is swamp and muskeg, much is burned, much is inaccessible by water and untapped by rail."

"Realizing your duty in the preservations of forests you will remember that it depends more and more upon the individual as the supply decreases. It is the aim of forest experts, in the first place to protect and then to find the means of growing again what has been cut for consumption.

### Canada's Forests Rich in Pulp

Mr. Wilson mentioned other countries that had lost all their timber resources through the ruthless cutting of their once valuable and socalled inexhaustible forests. China has been forced to unbelievable measures to supply fuel for the populations of her outlying districts. Spain is denuded of timber and the United States must draw upon the resources of her neighbour.

"Remember that it takes 75 years to grow a forest. Ours are rich in pulp wood. Let us keep them so. They are the richest properties we possess so we must wisely take the interest from these securities and leave the capital to give us interest always."

---

## GOING FULL BLAST

According to J. E. A. Dubuc, general manager of the Saguenay Pulp and Power Co., the Chandler Mill, which the company controls is now running full blast and will remain in this state of operation for the next ten year.

Over 60,000,000 feet of timber will be cut in the Gaspe woods this coming winter. This work will give employment to four or five hundred men during the winter months. The output of the Chandler mill has been sold to English interests on a contract that will continue for ten years.

## MILL CHANGES HANDS

The Trent Valley Woollen Mills at Campbellford, Ont., have sold out to the Barrymore Clothing Company of Toronto. The mill at present employs 300 hands, and it is stated on good authority that the plant will be enlarged and employ 600 hands.

# *Government and Municipal Bonds*

While there has been no pronounced change in the bond market during the past week, there was, nevertheless, a stronger undertone prevalling, and which was reflected to some extent in the course of the Victory loans, which have shown a noticeably upward turn in comparison with the previous week's prices.

This movement in the Victories seems to point to a further strengthening in the entire list and the general opinion among the bond dealers is that with the payment of some eighty million dollars for the outstanding 1922 Victory loan bonds, and various interest payments due on December 1, there will be an active session on the market during the month of December .

The only feature of the sales during the week was the sale of the eight million city of Montreal treasury notes on the New York market. The sale was made for the purpose of refunding the December 1 maturities of the city. The course of action taken by the city is only in accordance with the condition of the bond market at the present time ,and it is generally anticipated that the city will find a better market for its bonds at the expiration of the notes.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Tenders close |
|---|---|---|
| Longueuil, Que. | $100,000 | Dec. 4 |
| Scarborough Twp., Ont. | 80,995 | Dec. 11 |
| Stamford Twp., Ont. | 60,000 | Dec. 4 |
| Rimouski, Que. | 56,000 | Dec. 11 |
| Barton Twp., Ont. | 25,870 | Dec. 4 |
| St. Flore E., Que. | 15,000 | Dec. 4 |
| Dryden, Ont. | 5,000 | Dec. 5 |

**Dryden, Ont.**—Tenders will be received up to 6 p.m. December 5, 1922, for the purchase of $5,000, 6 per cent., 20-annual instalment hospital debentures. J. E. Gibson, town treasurer.

**Rimouski, Que.**—Tenders will be received up to 5 p.m. December 11, 1922, for the purchase of $56,000, 5½ per cent. bonds due serially from 1923 to 1950.

**Ste. Flore East, Que.**—Tenders will be received up to 4 p.m. December 4, 1922 for the purchase of $15,000, 6 per cent., 30-year debentures. Bonds are in denominations of $1,000 each and are dated May 1, 1922, with principal and interest payable at Grand Mere, Montreal or Quebec. Victor Bourassa, secretary-treasurer.

### Coming Issues

**Windsor, Ont.**—At the municipal elections on December 4 the electors will vote on the following by-laws: $22,900 for a hospital site; $765,000 for a water filtration plant to supply the Windsor and Walkerville pumping stations; $509,000, 5½ per cent., 20-annual instalment debentures for the purpose of installing a filtration plant.

**Niagara Falls, Ont.**—On December 2 the ratepayers will vote on the issuing of $32,000, 5½ per cent., 20-instalment debentures for the purchase of a site for a city hall.

**Windsor, Ont.**—The board of park management has asked the city council to submit a bylaw to raise $150,000 to the ratepayers at the municipal elections in December.

**Sherbrooke, Que.**—The Catholic and Protestant school boards have united in a bill now before the Quebec Legislature to provide for power to borrow $300,000 for the Catholic board, and $100,000 for the Protestant board. Interest is not to exceed 6 per cent. and bonds are to be redeemable within a period of forty years, with ample provision for sinking fund. The Catholic commission is moreover authorized to use $50,000 of its loan to redeem one falling due on June 1st, 1923.

**Owen Sound, Ont.**—At a meeting of the council on November 24 they agreed to submit a bylaw to the ratepayers on January 1 to provide for the issuing of debentures to the amount of $10,000, to be used by the Public Utilities Commission in paying for the work they have already done in extending their gas plant and gas mains and to provide for further such expendture contemplated in the near future.

**Burnaby, B.C.**—At the municipal elections in January a by-law for the construction and equipment of a new school at a cost of $80,000 will be submitted to the ratepayers.

**Saskatchewan**—The following is a list of authorizations granted by the Local Government Board from November 4 to 19, 1922:

School Districts: Dysart, $1,800, 8 per cent., 10-years; Regina, $12,000, 6 per cent., 10-years.

Rural Telephones, not exceeding 8 per cent., 15-years annuity: Fern Glen, $575; Big Gully, $4,300; Spruce Home, $4,100; Henrietta, $200; Lashburn, $1,700; Greenwood, $4,600; Kerrobert Eastern, $750; Superb, $3,695.

Village of Mervin, $900, 8 per cent., 10-years. City of Moose Jaw, $7,400, 6 per cent., 10-years.

**Preston, Ont.**—The parks board has requested the council to submit a by-law for $15,000 to the ratepayers at the municipal elections.

**Colborne, Ont.**—H. S. Keyes, clerk-treasurer. informs "The Monetary Times" that all bids for the $40,000, 5½ per cent., 20-annual instalment high school debentures have been rejected. Mr. Keyes states that bids will be asked on a 6 per cent. basis. The following is a list of tenders received:—

| | |
|---|---|
| Canada Bond Corp. | 95.36 |
| Harris, Forbes & Co. | 95.29 |
| R. C. Matthews & Co. | 95.08 |
| Macneill, Graham & Co. | 95.04 |
| Bell, Gouinlock & Co. | 95.03 |
| MacKay & MacKay | 95.00 |
| Gairdner, Clarke & Co. | 94.75 |

# *Bank Branch Notes*

F. C. Ridley has been selected to take charge of the Calgray branch of the Bank of Montreal and Frank Pike will have control of the two Edmonton branches.

The Merchants Bank Building in Prince William Street, St. John, N. B., which was recently taken over by the Bank of Montreal in the amalgamation of the two institutions, has been sold to Dr. W. B. Wallace, K. C.

The Bank of Montreal announce the following changes in their Alberta staff:—E. B. Emeno, who has been manager of the Calgary branch, has been promoted to the position of assistant superintendent for Alberta. H. C. Francis, manager of the Lethbridge branch and N. V. R. Huus, of Winnipeg, have been appointed inspectors attached to the Alberta superintendent's department.

The Dominion Bank is erecting a new brick building at the corner of Eglinton Avenue and Yonge Street, Toronto, to replace its present office.

The Provincial Bank of Canada are erecting new buildings at Windsor, Ford and Walkerville at a cost of $400,000.

## ROYAL BANK APPOINTMENTS

The Royal Bank of Canada announce the following:—M. W. Wilson, superintendent of branches, becomes assistant general manager, with general supervision. S. R. Noble, general inspector in charge of foreign business, becomes assistant general manager, with supervision over foreign business. S. G. Dobson, general inspector in charge of Canadian business, becomes assistant general manager, with supervision over Canadian business. G. W. MacKimmie, general inspector in charge of staff, bank premises, etc., becomes assistant general manager, and will continue supervision over these departments of the bank's business.

## THE BANK AND THE FARMER

### Position of the Latter is Fundamental and Must be Recognized by the Banks.

Professor C. R. Fay of Toronto University addressed the Toronto Bankers' Association on November 8, emphasizing the danger of alienating the sympathy of the farmers and clouding the banker's understanding of the farmer and his problems. Professor Fay pointed out that, as in Great Britain, there was tendency here toward a centralization of the banking system. Here, as there, he said, the past 50 years had brought great mergers. With the resultant setting up of huge organizations, there was a possibility that the local Manager might not have sufficient discretionary power to meet the needs of the local community, particularly the farming community. "We must remember," continued the speaker, "that the farmer occupies a fundamental position. Anything like 'breaking' the farmer, or 'jewing' him, is ridiculous."

### State Banking

The speaker felt that no change in the principles of the present banking system was needed; rather the existing system should adapt itself to developing needs. "State banking never has paid, and I don't believe it ever will. Banking will always remain in private hands," he added.

In substance, Professor Fay's address was a summary of the growth of banking in England, beginning with the early goldsmiths, down through the "City" bankers, the country banks to the joint stock banks of the 19th century.

He detailed the functions of the Bank of England, and then proceeded to a comparison between the British and Canadian methods. He suggested that round-table conferences between representative and specialist British and Canadian bankers would do much to strengthen the ties which bound the various parts of the Empire.

"I am not a supporter of a highly centralized form of Government, nor of hastily adopted tariff relations, but I do think that we have a real opportunity for increasing our relations, our real bonds of Empire, by a much more complete study by us of you, and by you of us."

WE shall be pleased to quote you for the purchase or sale of Government and Municipal Bonds and high grade Corporation Securities.

## MACHINERY BEING INSTALLED

### Paper Making Machines for Fort William and Port Arthur Plants

Paper making machines are now being installed in the plants of the Provincial Paper Mills, Limited at Port Arthur and the Fort William Paper Company. H. S. Taylor, Chief Engineer of the Engineering and Development Company, Dayton, Ohio, was in Port Arthur on November 18 in connection with the taking over of the plants by the respective operators.

The Port Arthur mills are putting in a 40-ton-a-day capacity book print mill,and the Fort William company two newsprint papermaking machines. Mr. Taylor said that the present installation would be followed almost immediately, in his opinion, by further extensions to both plants.

He expressed the opinion that the head of the Lakes was becoming the greatest centre of pulp and paper manufacturing in Canada. Machinery at present being installed is arriving in 65 carloads, 25 for the Port Arthur mill and 40 for the Fort William mill.

## WILL ERECT WIRELESS STATIONS

Application has been made to the Dominion Government by the Marconi Wireless Telegraph Company of Canada, Limited, for a license to erect and operate in the vicinity of Vancouver a continuous wave wireless telephone station costing approximately $2,000,000 and capable of communicating direct with Great Britain, Australia and the Orient, according to announcement made in Vancouver on November 15th.

The Vancouver station is only one of a number to be erected by the Marconi Company in various parts of the Dominion. Others will be situated at Montreal, Toronto and Winnipeg, but the British Columbia plant will be much larger than the others. A total expenditure of $5,000,000 is planned by the company.

## AUTOMOBILE EXPORTS

Canada's exports of automobiles during October were valued at $107,524 for freight vehicles and $2,365,408 for passenger cars, according to a statement issued by the external trade branch of the Dominion Bureau of Statistics. Automobile parts exported during the month were valued at $288,427. Bicycles valued at $185 were exported during the month and bicycle parts to the value of $1,595. Of the freight automobiles exported during the month, 163 machines, valued at $68,998, went to Australia; 15 valued at $5,610, to South Africa, and 72 vehicles at a total valuation of $32,616, to New Zealand. One vehicle, valued at $300, was exported to the United States. Australia was again the principle purchaser of passenger automobiles 1,139, valued at $549,766, being imported to that dominion. To the United Kingdom were exported 926 Canadian automobiles, valued at $935,154. Sweden purchased one car valued at $1,324; Switzerland 10, valued at $6,671 and Turkey, 9, valued at $3,460.

# *Stock Markets*

Although the Canadian security markets displayed considerable reactionary tendencies during the greater part of the past week there was a noticeable strengthening in the undertone in comparison with previous weeks. Trading throughout the entire week was of a restrictive character, being mostly confined to several of the market leaders, although various other securities were also traded in but to a smaller degree.

The latter part of the past week was noticeable for a very slight improvement in the trading, thereby reflecting the better tone that was prevailing on Wall Street. Just whether the market will continue to show an improvement is not definitely known. So far, although, as has been pointed out before, with the large amount of Victory loan money coming due on December 1, and also with other interest payments on the same date, at least part of this large amount will find its way into the stock market, and it is confidently expected that the market will return to its former activity.

While the trading was more or less restrictive several groups were in prominence during the week, including the tractions, with Brazilian taking the lead. Toronto Railway, C.P.R., and Winnipeg Electric were also active, although not on the same scale as Brazilian. The industrial list was moderately firm. Steel of Canada was the leader in this group in the point of activity with several fluctuations during the week, although the stock closed at a slightly higher price than at the first part of the week. The paper group was unusaully quiet during the week with little activity at all from any member of this group. Two of the previous week's leaders, Bell Telephone and Dominion Textile, were not active during the past week, with Dominion Textile losing several points and closing at a lower price than formerly.

### Ogilvy Realty Corp.

A. E. Ames & Co. are offering $800,000, 6½ per cent., 30-year first, closed, mortgage sinking fund bonds of the Ogilvy Realty Corp., Ltd., of Montreal at a price of $100 and accrued interest to yield 6.5 per cent.

The bonds are dated December 1, 1922 and principal and half-yearly interest are payable at the Royal Bank, Montreal or Toronto, or at the agency of the Royal Bank in New York, at the holder's option. Bonds are in denominations of $500 and $1000. Provision has been made for an annual sinking fund, commencing 1923, sufficient to retire the whole issue at maturity. The bonds are callable in whole or in part on any interest date on sixty days prior notice at 105 and accrued interest.

The Ogilvy Realty Corp., own property located at St. Catherine and Mountain Sts., Montreal, on which is built a four-sterey steel and concrete, stone-faced, fire proof departmental store, which was erected in 1911 and has since been occupied by the present tenants, Jas. A. Ogilvy's, Limited. The property has been appraised by the National Trust Company at $1,816,300, of which $740,000 is for land; $870,000 for the building, and $206,300 for the mechanical equipment. The building and equipment are insured against loss by fire for $850,000 in favor of the trustees for the bond holders.

### Great Northern Power Bonds.

Nesbitt, Thomson & Company are offering $850,000, 7 per cent., first mortgage, sinking fund bonds of the Great Northern Power Co., Ltd., at a price of 95 and accrued interest to yield approximately 7.50 per cent. The purchase price includes a bonus of 50 per cent., of common stock, par value $10.

The bonds are dated November 1, 1922, and are due November 1, 1937, with interest payable May 1 and November 1, at the Standard Bank in Montreal and Toronto, or at the holder's option at the Importers and Traders National Bank of New York. The bonds are callable as a whole or in part at 105 and accrued interest on any interest date after November 1, 1927.

The capitalization of the company is $2,000,000 common stock, par value $10, all of which has been issued, and $2,000,000, 7 per cent., first mortgage bonds, of which $850,000 has been issued.

The company was incorporated for the purpose of developing and distributing hydro-electric energy throughout the central mining district of Northern Ontario. The company's two power sites are located on the Montreal river and its field of operations will embrace such mining camps as Porcupine, Kirkland Lake, Matachewan and Shining Tree in the gold area, and Gowganda in the silver area.

## ASSIGNMENT BY COMPANY

### Exercise of Powers Thereafter is Permissible Under Terms of Dominion Bankruptcy Act

A decision of Justice Orde in Bankruptcy with regard to the exercise of corporate powers after an authorized assignment by the company under the Bankruptcy Act has recently been reported and is both interesting and important in view of his opinion as to the powers of the company to act as such although insolvent.

His Lordship says: "The insolvent company had been incorporated and organized to take over the business of an earlier company and, as the result of certain arrangements, bonds and shares of the new company were delivered and issued to the Montreal Trust Company; whose duty it was to distribute them among the holders of the bonds of the old company upon the surrender of such bonds. Before this distribution was completed, the new company made an authorized assignment under the Bankruptcy Act.

"The questions which are now submitted to the Court involve in a broad sense th equestion, whether and to what extent the assignment affects the status and corporate powers of the insolvent company and particularly the powers of the directors and shareholders to meet and to decide by resolution upon certain courses of action on behalf of the company.

"The Bankruptcy Act contains no provisions corresponding to those in the Dominion Winding Up Act which in effect deprive the shareholders and directors of all further power in the administration of the company's affairs. Under a winding up order, the affairs of the company are being wound up, so that unless some action of the court revives the company, it necessarily ceases to exist upon the termination of the winding up proceedings.

### Difference in Two Acts

"But under the Bankruptcy Act except in those cases in which the proceedings are continued under the Winding Up Act by virtue of Bankruptcy Rule 13, a company which makes an authorized assignment is to all intents and purposes in no different position from a natural person. It has parted with all its assets to the trustee, including, by virtue of sec. 36, the right to collect from contributory shareholders. But there is nothing in the Act which destroys its corporate entity or interferes with its power to 'function' as a corporation. It is always possible that a corporation may pay its creditors in full, and it is said that that will probably be the result in this case under careful management. It would doubtless be entitled to a discharge in a proper case, though it is obvious that in the great majority of cases the discharge of a company would be a mere formality.

"Apart from these grounds for believing that an assignment cannot affect the company's status or the powers of the directors and shareholders, there is the fact that under sec. 13 of the Act, the insolvent whether under an assignment or under a receiving order, may always submit to the creditors, through the trustee, a proposal for a composition or for an extension or for a scheme of arrangement. And this right is as clearly open to a corporation as to an individual. If so, how can the company authoritatively decide upon or present such a proposal unless its directors and shareholders can meet for the purposes of deliberation? Limited though the scope of the company's activity must necessarily be because of its inability to carry on its business, yet, within the circumscribed ambit of its curtailed powers it has clearly, in my judgment, still power to continue its corporate existence, and this, not as in a merely dormant or moribund state, but so as to express its corporate decisions for all such purposes as may he expedient or necessary."

His Lordship then deals with specific questions submitted to the court, stating that the company can register and transfer shares in the usual way by the usual form of stock certificate; that meetings of directors and shareholders and passing of bylaws, is still regulated by the charter and bylaws; that the annual returns under sec. 135 of the Ontario Companies Act must be made if the company is to kept alive but that the directors and shareholders and not the trustees are liable for fees under sec. 135.

# *Unlisted Securities*

In their report on the unlisted market, A. J. Pattison Jr. & Co. say that after showing signs of considerable improvement at the end of last week, the market again became dull and lacked public interest. As a rule, quotations changed but fractionally and in most cases were slightly lower. At present levels, offerings of securities cannot be had in any volume, as was demonstrated by Famous Players Preferred, which on an inquiry for about fifty shares rallied 3 points to 58 bid, with no stock offered. Alberta Pacific Grain Preferred lost 2 points to 85-90, without changing hands. The Common eased slightly in sympathy to 100-110. Dominion Iron & Steel 5's were offered down 2 points to 80-83, following the purchase of bonds by the sinking fund. The Oil stocks all closed slightly lower than at the same period last week—Imperial being off a point to 110-113, International off ¾ to 20¾-21¾, and British -American a point to 34½-35½. Small-lot offerings of Canadian Oil Common were made at 54, with the best bid at 48.

Insurance stocks continue to be in demand at slowly increasing figures. Manufacturers Life was asked for in large blocks at 46 with no stock obtainable. Excelsior Life gained a point to 29 bid without changing hands, while National Life, which has been 50 bid for many weeks, has not resulted in bringing any stock into the market. Western Grocers Preferred shows a loss of 2 points to offered at 60, no bid. Sterling Coal Common, under steady inquiry, moved up to 17.50 bid, and was still in demand at this figure at the close. British American Assurance & Western Asurance were both in demand at 6, without resulting in any transactions. Brompton 8's were asked for at 104¼, this a material improvement from the prevailing quotations of the week.

## LIABILITY ON MISDELIVERY OF GOODS

The case of Premier Lumber Co. v. G.T.P. Ry. Co. has recently been decided by the British Columbia Court of Appeal. The action was brought to recover the value of certain goods delivered by the railway company, the carrier, to the wrong person upon arrival at destination.

One of the conditions of the bill of lading was as follows: "Notice of loss, damage or delay must be made in writing to the carrier at the point of delivery or to the carrier at the point of origin within four months after delivery of the goods, or in case of failure to make delivery, then within four months after a reasonable time for delivery has elapsed. Unless notice is so given, the carrier shall not be liable."

The Court held that failure to give notice within the time prescribed disentitled the Lumber company to recover the value of the goods, which on arrival at their destination were delivered to the wrong person.

## TAX ON LIFE INSURANCE AGENTS

A delegation of fifty insurance men waited on the Montreal city council on November 13 and asked that they reconsider the amendment to the city charter proposed recently and sent down to the Legislature for sanction whereby a tax, to reach as high as $100, be imposed on all insurance solicitors.
